This volume includes the papers presented at the 20th International Conference on Advances in Mobile Computing & Multimedia Intelligence (MoMM2022), organized in conjunction with 24th International Conference on Information Integration and Web Intelligence. The dominant research focus of submitted papers was artificial intelligence and machine learning. The accepted papers presented advances and innovations in an array of areas such as online teaching, activity and movement detection, greenhouse gas emission, smart irrigation, network security, and video delivery. MoMM2022 attracted 34 papers, from which the Program Committee selected 8 regular papers and 8 short papers. Due to safety concerns as well as other restrictions preventing travel and gatherings, it was decided to organize MoMM2022 as a virtual conference. Ratline is the documented history about the mechanisms by which thousands of other Nazi war criminals fled to the remotest parts of the globe—including quite possibly Adolf Hitler. It is a story involving Soviet spies, Nazi priests, and a network of Catholic monasteries and safe houses known as the ratline. The name of one priest in particular, Monsignor Draganovic, was discovered by the author in a diary found in Indonesia. Why would this name turn up in a document written in a spidery German hand in a remote island in Indonesia? As famed author Peter Levenda began his research, more information came to light: In December of 2009, it was revealed that the skull the Russians claimed was Hitler's—salvaged from the bunker in 1945—was not that of Hitler! In 2010, files from the Office of Special Investigations of the Justice Department were declassified, revealing a history of American intelligence providing cover for Nazi war criminals. The mystery deepened, and the author returned to his own roots hunting Nazis in North America, South America and Europe. He revisited old contacts, made some new ones, and gradually the explosive story was revealed: there is no forensic evidence to prove that Adolf Hitler died in the bunker in April 1945! Miniaturization and the availability of special components make many things possible, especially in commercial vehicle modelling. A few years ago, one was happy if a model drove at all, but today there is hardly any original function that cannot be reproduced in the model. One model builder who does this with enthusiasm is Jürgen Ritter. Whether with his road trucks or his much acclaimed agricultural machinery models, his models are always filled with special functions and special ideas. In this book, he shows his unusual construction methods, exciting ideas for special functions and how these can be realized - often with simple means. So spice up your model with the help of this richly illustrated reference book! From the content • Basics of the used Machines with small tips • Electronic components used • Information and scale • Electromechanical solutions • Movements by wire rope • Electrical solutions • Motor limit switches • Vehicle lighting • Sound modules • Details and stickers The 8-volume set, comprising the LNCS books 13801 until 13809, constitutes the refereed proceedings of 38 out of the 60 workshops held at the 17th European Conference on Computer Vision, ECCV 2022.
