Written by a senior examiner, Ray Powell, this AQA A2 Economics Student Unit Guide is the essential study companion for Unit 4: The National and International Economy. This full-colour book includes all you need to know to prepare for your unit exam: clear guidance on the content of the unit, with topic summaries, knowledge check questions and a quick-reference index examiner's advice throughout, so you will know what to expect in the exam and will be able to demonstrate the skills required exam-style questions, with graded student responses, so you can see clearly what is required to get a better grade This book lays down a marker as to the state of economists' understanding of the National Football League (NFL) by assembling sophisticated, critical surveys of by leading sports economists on major topics associated with the league. The book is divided into four parts. The first three chapters in Part I provide an overview of the business of the NFL from an economist's perspective. Part II is a collection of surveys of the economics of the NFL's most important revenue streams, including media, attendance, and merchandising. The NFL's labor economics is the focus of Part III, with chapters on player and coach labor markets, the draft, and contract structure. Part IV includes essays on competitive balance, gambling, economic impacts of the Super Bowl, behavioral economic issues associated with the league, and antitrust issues. This book will appeal to sports economists, sports management professionals, and policy-makers, and would be useful as a supplementary text for sports economics and management courses as well as a reference text. This is a book of 20 photocopiable full specimen exam-style questions and answers for paper 2 (Data Response) IB Economics. Higher and Standard Level. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version. Written by a senior examiner, Ray Powell, this AQA A2 Economics Student Unit Guide is the essential study companion for Unit 3: Business Economics and the Distribution of Income This full-colour book includes all you need to know to prepare for your unit exam: clear guidance on the content of the unit, with topic summaries, knowledge check questions and a quick-reference index examiner's advice throughout, so you will know what to expect in the exam and will be able to demonstrate the skills required exam-style questions, with graded student responses, so you can see clearly what is required to get a better grade V.1 Capital theory and investment behavior -- V.2 Tax policy and the cost of capital. A leading economist trains a lens on his own discipline to uncover when it fails and when it works. This book looks at a number of topics in economic education, presenting multiple perspectives from those in the field to anyone interested in teaching economics. Using anecdotes, classroom experiments and surveys, the contributing authors show that, with some different or new techniques, teaching economics can be more engaging for students and help them better retain what they learned. Chapters cover a wide range of approaches to teaching economics, from interactive approaches such as utilizing video games and Econ Beats, to more rigorous examinations of government policies, market outcomes and exploring case studies from specific courses. Many of the chapters incorporate game theory and provide worked out examples of games designed to help students with intuitive retention of the material, and these games can be replicated in any economics classroom. While the exercises are geared towards college-level economics students, instructors can draw inspiration for course lectures from the

various approaches taken here and utilize them at any level of teaching. This book will be very useful to instructors in economics interested in bringing innovative teaching methods into the classroom. This book presents essential insights on environmental policy derived from behavioral economics. The authors demonstrate the potential of behavioral economics to drive environmental protection and to generate concrete proposals for the efficient design of policy instruments. Moreover, detailed recommendations on how to use “nudges” and related instruments to move industry and society toward a sustainable course are presented. This book addresses the needs of environmental economists, behavioral economists and environmental policymakers, as well as all readers interested in the intersection between behavioral economics and environmental policy.

Understanding the way economists see the world is a necessary step on the way to good economics writing. This book guides students through the means and methods of economics writing, by taking a step by step approach investigating: the keys needed to succeed as a writer of economics and an overview of the writing process from beginning to end the basic methods economists use to analyze data and communicate their ideas suggestions for finding and focusing one's topic, including standard economic sources and techniques for doing economic research how to write paper ways of citing sources and creating a bibliography. It also contains useful appendices, which provide details of statistical sources and relevant electronic indices. Used as a standard guide for economics students at Harvard University, this book is of immense practical use to economics students the world over. 4LTR Press solutions give students the option to choose the format that best suits their learning preferences. This paper reviews the long-term growth performance of the major industrial countries and discusses some of the many factors that have been identified as possible sources of the marked slowdown in growth since the early 1970s. According to the view of different demographic developments across countries, it is useful to break the growth of output down into changes in labor input and changes in labor productivity in order to obtain a basis for cross-country comparisons. Wage behavior in the face of energy price shocks appears to have differed considerably among the major industrial countries. Increased uncertainty, reflecting, in particular, changes in the international economic environment and the stop-go financial policies of several of the major countries during the 1970s, and is frequently cited as a possible reason for the slowdown in growth, mainly through its impact on private investment. Views on the contribution of slower net capital accumulation to the deceleration in growth depend upon assessments of whether the efficiency of investment declined significantly after 1973 and on assumptions made about technological change and the embodiment of technical progress.
