Perhaps you have recently found Christ as your Savior and Lord and want to be able to convey your experience to your community or friends. The Operation of Faith will guide you through the necessities and show you how the Lord enables you to effectively bring the gospel to the ones He has designated for your presentation. Brother Jim's forty years of street and vocational evangelism experience will help you see how the Lord prepares you for the fruitful presentation of the gospel. Chapters that you will find helpful in initiating your personal outreach include: What Purpose Faith Three-Part Nature of Man The Function of the Written Word The Utterance of God The Training of the Senses Walking by Faith The Operation of Faith in the Vocations Brokenness and the Release of the Spirit The death penalty in classical Judaism has been a highly politicized subject in modern scholarship. Enlightenment attacks on the Talmud's legitimacy led scholars to use the Talmud's criminal law as evidence for its elevated morals. But even more pressing was the need to prove Jews' innocence of the charge of killing Christ. The reconstruction of a just Jewish death penalty was a defense against the accusation that a corrupt Jewish court was responsible for the death of Christ. In Execution and Invention, Beth A. Berkowitz tells the story of modern scholarship on the ancient rabbinic death penalty and offers a fresh perspective using the approaches of ritual studies, cultural criticism, and talmudic source criticism. Against the scholarly consensus, Berkowitz argues that the early Rabbis used the rabbinic laws of the death penalty to establish their power in the wake of the destruction of the Temple. Following recent currents in historiography, Berkowitz sees the Rabbis as an embattled, almost invisible sect within second-century Judaism. The function of their death penalty laws, Berkowitz contends, was to create a complex ritual of execution under rabbinic control, thus bolstering rabbinic claims to authority in the context of Roman political and cultural domination. Understanding rabbinic literature to be in dialogue with the Bible, with the variety of ancient Jews, and with Roman imperialism, Berkowitz shows how the Rabbis tried to create an appealing alternative to the Roman, paganized culture of Palestine's Jews. In their death penalty, the Rabbis substituted Rome's power with their own. Early Christians, on the other hand, used death penalty discourse to critique judicial power. But Berkowitz argues that the Christian critique of execution produced new claims to authority as much as the rabbinic embrace. By comparing rabbinic conversations about the death penalty with Christian ones, Berkowitz reveals death penalty discourse as a significant means of creating authority in second-century western religious cultures. Advancing the death penalty discourse as a discourse of power, Berkowitz sheds light on the central relationship between religious and political authority and the severest form of punishment. Come take a stroll down the memory lane of medical history. Reflections on Pediatric Medicine from 1943 to 2010 recounts the struggles of a dedicated pediatrician as he attempts to strike a balance between a normal family life and the demands of the rapidly evolving world of modern medicine. Through vividly drawn stories compiled from a career that spans more than half a century, author Byron Oberst takes readers on an amazing journey from the early years of medicine, when there were few specific therapies with which to treat patients, to the wonders

of today. From the eradication of the scourge of polio to the miracle of antibiotics to the era of organ transplantation and body imaging, Oberst offers a rare chance to experience medical progress and discovery as it happens. Written in eight parts, each spanning a unique decade, Reflections on Pediatric Medicine from 1943 to 2010 is an unforgettable trip down memory lane with many interesting side excursions. A 2012 New York Times Notable Book A 2013 Los Angeles Times Book Award Winner in the Science & Technology category An engaging narrative about an incredible, life-giving organ and its imperiled modern fate. Did you know that breast milk contains substances similar to cannabis? Or that it's sold on the Internet for 262 times the price of oil? Feted and fetishized, the breast is an evolutionary masterpiece. But in the modern world, the breast is changing. Breasts are getting bigger, arriving earlier, and attracting newfangled chemicals. Increasingly, the odds are stacked against us in the struggle with breast cancer, even among men. What makes breasts so mercurial—and so vulnerable? In this informative and highly entertaining account, intrepid science reporter Florence Williams sets out to uncover the latest scientific findings from the fields of anthropology, biology, and medicine. Her investigation follows the life cycle of the breast from puberty to pregnancy to menopause, taking her from a plastic surgeon's office where she learns about the importance of cup size in Texas to the laboratory where she discovers the presence of environmental toxins in her own breast milk. The result is a fascinating exploration of where breasts came from, where they have ended up, and what we can do to save them. Process industries have a particularly urgent need for collaborative equipment management systems, but until now have lacked for programs directed toward their specific needs. TPM in Process Industries brings together top consultants from the Japan Institute of Plant Maintenance to modify the original TPM Development Program. In this volume, they demonstrate how to analyze process environments and equipment issues including process loss structure and calculation, autonomous maintenance, equipment and process improvement, and quality maintenance. For all organizations managing large equipment, facing low operator/machine ratios, or implementing extensive improvement, this text is an invaluable resource. White Cargo is the forgotten story of the thousands of Britons who lived and died in bondage in Britain's American colonies. In the seventeenth and eighteenth centuries, more than 300,000 white people were shipped to America as slaves. Urchins were swept up from London's streets to labor in the tobacco fields, where life expectancy was no more than two years. Brothels were raided to provide "breeders" for Virginia. Hopeful migrants were duped into signing as indentured servants, unaware they would become personal property who could be bought, sold, and even gambled away. Transported convicts were paraded for sale like livestock. Drawing on letters crying for help, diaries, and court and government archives, Don Jordan and Michael Walsh demonstrate that the brutalities usually associated with black slavery alone were perpetrated on whites throughout British rule. The trade ended with American independence, but the British still tried to sell convicts in their former colonies, which prompted one of the most audacious plots in Anglo-American history. This is a saga of exploration and cruelty spanning 170 years that has been submerged under the overwhelming memory of black slavery. White Cargo brings the brutal, uncomfortable story to the surface.
