[Ralph Waldo Emerson: Essays and Lectures \(LOA #15\)](#) Dec 19 2022 Our most eloquent champion of individualism, Emerson acknowledges at the same time the countervailing pressures of society in American life. Even as he extols what he called "the great and crescive self," he dramatizes and records its vicissitudes. Here are all the indispensable and most renowned works, including "The American Scholar" ("our intellectual Declaration of Independence," as Oliver Wendell Holmes called it), "The Divinity School Address," considered atheistic by many of his listeners, the summons to "Self-Reliance," along with the more embattled realizations of "Circles" and, especially, "Experience." Here, too, are his wide-ranging portraits of Montaigne, Shakespeare, and other "representative men," and his astute observations on the habits, lives, and prospects of the English and American people. This volume includes Emerson's well-known *Nature; Addresses, and Lectures* (1849), his *Essays: First Series* (1841) and *Essays: Second Series* (1844), plus *Representative Men* (1850), *English Traits* (1856), and his later book of essays, *The Conduct of Life* (1860). These are the works that established Emerson's colossal reputation in America and found him admirers abroad as diverse as Carlyle, Nietzsche, and Proust. The reasons for Emerson's influence and durability will be obvious to any reader who follows the exhilarating, exploratory movements of his mind in this uniquely full gathering of his work. Not merely another selection of his essays, this volume includes all his major books in their rich entirety. No

other volume conveys so comprehensively the exhilaration and exploratory energy of perhaps America's greatest writer. LIBRARY OF AMERICA is an independent nonprofit cultural organization founded in 1979 to preserve our nation's literary heritage by publishing, and keeping permanently in print, America's best and most significant writing. **Ralph Waldo Emerson** Nov 18 2022 A new, wide-ranging selection of Ralph Waldo Emerson's most influential writings, this edition captures the essence of American Transcendentalism and illustrates the breadth of one of America's greatest philosophers and poets. The writings featured here show Emerson as a protester against social conformity, a lover of nature, an activist for the rights of women and slaves, and a poet of great sensitivity. As explored in this volume, Emersonian thought is a unique blend of belief in individual freedom and in humility before the power of nature. "I become a transparent eyeball," Emerson wrote in *Nature*, "I am nothing; I see all; the currents of the Universal Being circulate through me; I am part or particle of God." Written over a century ago, this passage is a striking example of the passion and originality of Emerson's ideas, which continue to serve as a spiritual center and an ideological base for modern thought.

*The Collected Works of Ralph Waldo Emerson: Representative men: seven lectures* Apr 18 2020 "With the appearance of the tenth and final volume of *Collected Works*, a project fifty years in the making reaches completion: the publication of critically edited texts of all Emerson's works published in his lifetime and under his supervision."--From the vol. 10 dust-jacket front flap.

*Essays and Lectures* Oct 17 2022 American essayist, philosopher and poet Ralph Waldo Emerson was a leading figure in the 19th century Transcendentalism movement. A champion of individualism and persistent critic of social pressures, Emerson was an influential American figure whose philosophy is embodied in the numerous essays he wrote and lectures he gave. This volume brings together an extensive selection of those essays and lectures. "Essays and Lectures" is a robust representation of Emerson's writings in which you will find the following individual works: "Nature: Addresses and Lectures"; "Essays: First and Second Series"; "Representative Men"; "English Traits"; and "The Conduct of Life."

Natural History of the Intellect Feb 15 2020 At his death in 1882, Emerson left behind a trove of unpublished material extraordinary for its quantity and depth--hundreds upon thousands of pages of journals, letters, notebooks, and lectures that dwarf his nine books in volume and scope but were never seen during his lifetime. His most important manuscripts have gradually filtered through to the public over the course of the last hundred and twenty-five years, save one: the final product of what he himself considered to be the "chief task of his life." Here for the first time in print are the last lectures of Emerson's career, a cycle of seventeen that he delivered at Harvard University in 1871. In his last lectures, Emerson set out to gather and structure the best thoughts of a project that spanned thirty-three years and ran as a constant, though largely hidden, thread throughout his active career. The result is a vibrant fabric of thought, image, and word as startling for the boldness of its pattern as for its immediacy and relevance to the modern reader. The powers of the mind and states of consciousness, the transcendence of physical into spiritual laws, the governing influence of Ideas in the history of humankind, and the ethical duty laid upon those who recognize the Good Cause as their own--all serve as themes and elements of Emerson's portrait of a practical understanding of the -spiritual foundations of human experience and self-development.

The Selected Lectures of Ralph Waldo Emerson Feb 21 2023 This is the first and only comprehensive selection of lectures by Ralph Waldo Emerson, his era's most prominent American man of letters and one of the foremost architects of our intellectual culture. Based on authoritative texts selected and edited by Ronald A. Bosco and Joel Myerson--the most experienced Emerson editors working today--these twenty-five addresses collectively exemplify the lecture style for which Emerson was famed in his day. Best known to his contemporaries as a lecturer, Emerson delivered some 1,500 addresses over the course of his career. Because his most important ideas were worked out in his lectures, they provide the best record we have of his evolving thought--and thus are a key to our understanding of his essays and other printed works. Gathered here are lectures on American culture, literary theory and aesthetics, moral and, as Emerson called it, "intellectual" philosophy, and social and political reform. They are taken from speaking engagements in the United States and the British Isles over the period 1833-1871, during which Emerson often spent four to six months a year on the lecture circuit; lectures from the earliest years of Emerson's career (1833-1842) have been newly edited for this volume. The volume's introduction draws on contemporary accounts to describe Emerson's idiosyncratic but

utterly memorable manner of speaking. A headnote provides context to the composition and delivery of each lecture, and footnotes identify Emerson's allusions to persons, places, occasions, quotations, and books. "By examining his lectures and how they were delivered," say Bosco and Myerson, "we can look into the laboratory of Emerson's intellectual and compositional process and see his published writings gestating."

*The Early Lectures of Ralph Waldo Emerson* Sep 16 2022 The notable link between Ralph Waldo Emerson's journals and his essays is formed by the lectures that reflected his developing views on issues of his time. This second volume of a welcome edition of the early lectures follows the earlier experimental series of lectures and presents the works of Emerson the now professional lecturer who revealed to his audience central ideas and themes which later crystallized into Essays, First Series. "The Philosophy of History," a series of 12 lectures, explores the nature of man in his society, past and present, and singles out the individual as the center of society and history. A second series of 10 lectures on "Human Culture" begins with the duty and the right of the individual to cultivate his powers and proceeds to consider various means by which this cultivation can be accomplished. The occasional "Address on Education," which Emerson delivered between these two series, may be seen as a link between them. Of the twenty-three lectures in this volume, only three have been previously published. The lectures have been reproduced from Emerson's manuscripts, approximating as nearly as possible the original version read by the author to his audience. **Nature, Addresses, and Lectures. by Ralph Waldo Emerson** Oct 13 2019 Ralph Waldo Emerson (May 25, 1803 - April 27, 1882), known professionally as Waldo Emerson, was an American essayist, lecturer, and poet who led the Transcendentalist movement of the mid-19th century. He was seen as a champion of individualism and a prescient critic of the countervailing pressures of society, and he disseminated his thoughts through dozens of published essays and more than 1,500 public lectures across the United States. Emerson gradually moved away from the religious and social beliefs of his contemporaries, formulating and expressing the philosophy of Transcendentalism in his 1836 essay, "Nature." Following this ground-breaking work, he gave a speech entitled "The American Scholar" in 1837, which Oliver Wendell Holmes Sr. considered to be America's "Intellectual Declaration of Independence."
