NEW YORK TIMES BESTSELLER "A provocative read...There are few tomes that coherently map such broad economic histories as well as Mr. Dalio's. Perhaps more unusually, Mr. Dalio has managed to identify metrics from that history that can be applied to understand today." —Andrew Ross Sorkin, The New York Times From legendary investor Ray Dalio, author of the #1 New York Times bestseller Principles, who has spent half a century studying global economies and markets, Principles for Dealing with the Changing World Order examines history's most turbulent economic and political periods to reveal why the times ahead will likely be radically different from those we've experienced in our lifetimes—and to offer practical advice on how to navigate them well. A few years ago, Ray Dalio noticed a confluence of political and economic conditions he hadn't encountered before. They included huge debts and zero or near-zero interest rates that led to massive printing of money in the world's three major reserve currencies; big political and social conflicts within countries, especially the US, due to the largest wealth, political, and values disparities in more than 100 years; and the rising of a world power (China) to challenge the existing world power (US) and the existing world order. The last time that this confluence occurred was between 1930 and 1945. This realization sent Dalio on a search for the repeating patterns and cause/effect relationships underlying all major changes in wealth and power over the last 500 years. In this remarkable and timely addition to his Principles series, Dalio brings readers along for his study of the major empires—including the Dutch, the British, and the American—putting into perspective the "Big Cycle" that has driven the successes and failures of all the world's major countries throughout history. He reveals the timeless and universal forces behind these shifts and uses them to look into the future, offering practical principles for positioning oneself for what's ahead. If you're thinking about buying this book, it's probably because it feels like something's missing in your career. Guess what? It could be YOU. Whether you're living for the weekends or counting the minutes until 5 pm every day, life is too short to wish it away because you feel stuck in your job. The good news is that you have the power to stop living on autopilot and turn your career around. "Follow your passion," "find your purpose," and "do what you love" have joined the parade of bland directives that aren't doing much to actually help you figure out what you're meant to do with your career. Instead, they only create more confusion. If all we had to do is "follow our bliss" . . . why aren't we blissful yet? The truth is, the best career is not one where you only do what you love, but one where you honor who you are. In You Turn, counterterrorism professional turned career coach Ashley Stahl shares the strategies she's used to help thousands ditch their Monday blues, get clarity on

what work lights them up, and devise an action plan to create a career they love. This book gives readers access to Stahl's coveted 11-step roadmap that has guided thousands of coaching clients in 31 countries to self-discovery and success. Throughout her process, you'll:

- Discover your Core Skillset. Uncover your gifts and talents to create an intentional career path that's fulfilling and aligned with who you are—and what you're good at.
- Understand your "Inner Money Blueprint." Discover the root of your money mindset, and how to break free of financial limitation.
- Clarify your Core Interests. Identify the difference between a passion, gift, and calling so you can get clear on what's meant to be a hobby and what's meant to be a career!
- Become your own coach. Walk away with a unique set of tools for staying true to your best self in times of stress, frustration, or anxiety. Whether you're considering a career pivot, or just curious about what else is possible for you, it's time to make a "you turn"—to get unstuck, discover your true self, and thrive (not just survive) in your career.

southern Africa's wars of national liberation, drawing on extensive oral historical and archival research. Assuming neither the primacy of nationalist loyalties as they exist today nor any single path to liberation, the book unpicks any notion of a straightforward imposition of Cold War ideologies or strategic interests on liberation wars. This approach adds new dimensions to the rich literatures on the Global Cold War and on solidarity movements. The contributors trace the ways that ideas and practices were made, adopted, and circulated through time and space through a focus on African soldiers, politicians and diplomats. The book also asks what motivated the men and women who crossed borders to join liberation movements, how Cold War influences were acted upon, interpreted and used, and why certain moments, venues and relations took on exaggerated importance. The connections among liberation movements, between them and their hosts, and across an extraordinarily diverse set of external actors reveal surprising exchanges and lasting legacies that have too often been obscured by the assertion of monolithic national histories. Tracing an extraordinarily diverse set of interactions and exchanges, *Transnational Histories of Southern Africa's Liberation Movements* will be of great interest to scholars of Southern Africa, Transnational History, the Cold War and African Politics. The chapters were originally published as a special issue of the *Journal of Southern African Studies*. The growth of the Internet has had a profound effect on the way business is carried out, and has provided an unprecedented opportunity for third-party individuals and organisations to attack brands with relative ease. These changes have resulted in the birth of a significant and rapidly-growing new industry: that of online brand protection, consisting of specialist service providers which can be employed by brand owners to monitor and prevent potential attacks on their brand. *Brand Protection in the Online World* explains the full scope of Internet infringement, and associated monitoring and enforcement options that are most relevant to brand owners and managers. Covering crucial topics such as brand abuse, counterfeiting, fraud, digital piracy and more, *Brand Protection in the Online World* provides a clear and in-depth exploration of the importance of, and ideas behind, the brand-protection industry. 175 countries, four billion dollars, one scam: the thrilling rise and fall of the biggest cryptocurrency con in history and the woman behind it all. In 2016, on stage at Wembley Arena in front of thousands of adoring fans, Dr. Ruja Ignatova promised her followers a financial revolution. The future, she said, belonged to cryptocurrencies such as Bitcoin. And the Oxford-educated, self-styled cryptoqueen vowed that she had invented the Bitcoin Killer. OneCoin would not only earn its investors untold fortunes; it would change the world. By March 2017, more than \$4 billion had been invested in OneCoin in countries all around the world. But by October 2017, Ruja Ignatova had disappeared, and it slowly became clear that her revolutionary cryptocurrency was not all it seemed. Fortune was left asking, "Is OneCoin the biggest financial fraud in history?" In *The Missing Cryptoqueen*, acclaimed tech journalist Jamie Bartlett tells the story he began in his smash hit BBC podcast, entering the murky worlds of little-regulated

cryptocurrencies and multilevel marketing schemes. Through a globe-crossing investigation into the criminal underworlds, corrupt governments, and the super-rich, he reveals a very modern tale of intrigue, techno-hype and herd madness that allowed OneCoin to become a million-person pyramid scheme—where, at the top, investors were making millions and, at the bottom, people were putting their livelihoods at risk. It's the inside story of the smartest and biggest scam of the 21st Century—and the genius behind it, who is still on the run. Busy managers and bottom-line entrepreneurs are faced with one of the toughest challenges in all of business: hiring a sales team that can really sell. In *Hire Performance*, authors Dr. David K. Relying on nearly five decades of combined sales and sales-management experience, Barnett and Robinson also help you assess your recruiter skills and deliver research-driven insights on the behaviors to look for in potential sales superstars. Argues that doctors are deliberately misinformed by profit-seeking pharmaceutical companies that casually withhold information about drug efficacy and side effects, explaining the process of pharmaceutical data manipulation and its global consequences. By the best-selling author of *Bad Science*. *WeCulture (HB Version)* by Chris Ciulla How people are motivated has changed. In a world that was driven by individual contribution and climbing the career ladder, today teamwork for organizations to achieve goals has taken center stage. Great organizations are built through the collective efforts of great people. Baby Boomers are retiring at a rate of 10,000 per day, and as they leave, they take their collective knowledge and experience with them. What motivated their generation is very different from the next generation. As Millennials enter the workforce, they will quickly become the majority. While this change takes place, employees continue to evolve bringing new skills, new approaches to processing information, and, most importantly, have different expectations of employers. *WeCulture* is designed to change the way we think about the world of work and focuses on new ways to engage and empower employees to drive results. *WeCulture* is not a collection of leadership ideas. It is a process grounded in why there is a need for new approach; combined with how to execute while keeping the unique identity of your organization. Learning how to attract, retain, motivate, and inspire behavior that reflects common core values. This becomes the basis of a collective effort that inspires teams to reach the next level of success. The goal can be revenue growth, it can be to raise

money to help those in need, it could be a means to drive behavior to restore public trust. Read on and We will include you.

The purpose of this paper is to familiarize researchers with two relatively new and innovative ways to overcome this issue. First, this paper discusses two online instrument delivery services provided by SurveyMonkey and Qualtrics that can be used to distribute experimental materials to geographically distributed participants quickly and inexpensively. Second, it reviews a number of participant recruitment services that behavioral accounting researchers can use to identify and recruit externally valid research participants. Specifically, this paper discusses commercial participant recruitment services provided by SurveyMonkey Audience, Qualtrics, Amazon's Mechanical Turk, and other commercial firms, as well as several non-commercial participant recruitment services associated with industry and professional organizations. Each service is evaluated against three criteria that are important to behavioral accounting researchers: (1) cost, (2) flexibility, and (3) access to populations of interest. relationship between nurses' cross-border movement and efforts to regulate their migration.
