Object Oriented Programming Through Java Dec 14 2019 Covering both the fundamentals and applications, Object Oriented Programming through Java provides a thorough introduction to this popular programming paradigm. It includes coverage of essential topics such as classes, objects, packages, interfaces, multithreading, AWT, Applets, and Swings. The book also includes a detailed overview of various practical applications, including JDBC, Networking classes, and servlets. It contains exercises at the end of every chapter, and sample illustrative programs are used throughout the book. It is a text for courses on object oriented Java programming and a reference for professionals.

Nurse Notebook Feb 08 2022 The book has 120 white pages with dot matrix that will help you while writing and sketching but at the same time gives you enough freedom for notes and other ideas. It comes in handy format 6x9 inches (equivalent to DIN A5). The Nurse Notebook is for those who have a Fable for Medicine or Cure. The Nurse Notebook is versatile, notepad inserts, personal achievements, birthday appointments, your thoughts or other notes of your choice. Use it on holiday as a holiday diary or as a gratitude diary. No matter if motivation, tokens, appointments or notes with this space-saving notebook no wish remains open. For leisure, hobbies or work, this small but fine notebook is always and everywhere suitable for things, ideas or thoughts that want to be noted, e.g. as a thought support or for organizing tasks. Whether for yourself or as a gift for men and women, partners, friends, mums and dads or work colleagues. Especially suitable for birthdays, for Christmas or just as a nice attention for your loved one.

Immunogenomics and Human Disease Dec 26 2020 This book provides an overview of key conceptual and molecular technologies being deployed in immunogenomics, followed by detailed evaluations of the impact of genomics and systems biology on important areas such as cancer immunology, autoimmunity, allergy and the response to infection.

UX Design for Mobile May 11 2022 Get proficient in building beautiful and appealing mobile interfaces (UI) with this complete mobile user experience (UX) design guide. About This Book Quickly explore innovative design solutions based on the real needs of your users. Create low and high fidelity prototypes using some of the best tools. Master a pragmatic design process to create successful products. Plan an app design from scratch to final test, with real users. Who This Book Is For This book is for designers, developers and product managers interested in creating successful apps. Readers will be provided with a process to produce, test and improve designs based on best practices. What You Will Learn Plan an app design from scratch to final test, with real users. Learn from leading companies and find working patterns. Apply best UX design practices to your design process. Create low and high fidelity prototypes using some of the best tools. Follow a step by step examples for Tumult Hype and Framer Studio. Test your designs with real users, early in the process. Integrate the UX Designer profile into a working team. In Detail User experience (UX) design provides techniques to analyze the real needs of your users and respond to them with products that are delightful to use. This requires you to think differently compared to traditional development processes, but also to act differently. In this book, you will be introduced to a pragmatic approach to exploring and creating mobile app solutions, reducing risks and saving time during their construction. This book will show you a working process to quickly iterate product ideas with low and high fidelity prototypes, based on professional tools from different software brands. You will be able to quickly test your ideas early in the process with the most adequate prototyping approach. You will understand the pros and cons of each approach, when you should use each of them, and what you can learn in each step of the testing process. You will also explore basic testing approaches and some more advanced techniques to connect and learn from your users. Each chapter will focus on one of the general steps needed to design a successful product according to the organization goals and the user needs. To achieve this, the book will provide detailed hands-on pragmatic techniques to design innovative and easy to use products. You will learn how to test your ideas in the early steps of the design process, picking up the best ideas that truly work with your users, rethinking those that need further refinement, and discarding those that don't work properly in tests made with real users. By the end of the book, you will learn how to start exploring and testing your design ideas, regardless the size of the design budget. Style and approach A quick and simple guide to design and test a mobile application from the UX design point of view

Accounting Theory Jan 07 2022

Green Land, Brown Land, Black Land Feb 25 2021 James C. McCann provides a synthesis of evidence and a narrative of Africa's environmental history over the past two centuries. In a book readily accessible to undergraduates and nonspecialists, Professor McCann argues that far from being pristine and primordial spaces, Africa's landscapes were created by human activity. This argument contrasts strongly with the idealized notions of an African Eden commonly held in the West and in Africa itself. It also confronts more recent alarm about degradation of Africa's natural and human resources by examining the historical evidence of environmental change. Key topics within the book are the effects of population growth, disease, agricultural change, the state of natural resources, and the changing role of the state in how Africans have managed and changed their own landscapes.

Volunteer Is a Work of Heart Mar 29 2021 Looking for a great gift to show your appreciation and support for a friend? Need a new journal in your life? This unique funny notebook / journal is the perfect way to express your love and gratitude to your friends and family! Filled with 50+ double sided sheets (110 writing pages!) of lined paper, this inspirational notebook with motivational quote makes a memorable useful present for anybody. Give your friend an inspiring gift they'll remember! With a beautiful matte, full-color paperback cover, this cute lined notebook can be used as a diary to record all your creative stories. High quality ruled journal of ideal size suitable for kids, women or men to write. Best cool small gift under \$10! Desired Awesome Journals are perfect for: Birthday Christmas Gifts New Job Gift Colleague/ Co-

worker/ Boss Gifts Journals & Planners Doodle Diaries Homeschool Planners for Kids Creative Writing Notebooks Gifts for Mom Dad, Grandma Grandpa, Cousins, Brother Sister Retirement Gifts School Notebooks Student Graduation Gifts Teacher Thank You Gifts Mom Daughter Journal Journaling For Kids Book Lover Souvenir Novelty Blank Scrapbook Monthly Project Tracker Practical Plan Checklist And much more..... Place your order today!

Quick Quilts to Make in a Weekend Sep 22 2020 All 26 designs for throws, cot quilts and bed quilts can be made quickly using a rotary cutter and a sewing machine. Expert advice guarantees speedy results.

Market Segmentation Jan 19 2023 Modern marketing techniques in industrialized countries cannot be implemented without segmentation of the potential market. Goods are no longer produced and sold without a significant consideration of customer needs combined with a recognition that these needs are heterogeneous. Since first emerging in the late 1950s, the concept of segmentation has been one of the most researched topics in the marketing literature. Segmentation has become a central topic to both the theory and practice of marketing, particularly in the recent development of finite mixture models to better identify market segments. This second edition of Market Segmentation updates and extends the integrated examination of segmentation theory and methodology begun in the first edition. A chapter on mixture model analysis of paired comparison data has been added, together with a new chapter on the pros and cons of the mixture model. The book starts with a framework for considering the various bases and methods available for conducting segmentation studies. The second section contains a more detailed discussion of the methodology for market segmentation, from traditional clustering algorithms to more recent developments in finite mixtures and latent class models. Three types of finite mixture models are discussed in this second section: simple mixtures, mixtures of regressions and mixtures of unfolding models. The third main section is devoted to special topics in market segmentation such as joint segmentation, segmentation using tailored interviewing and segmentation with structural equation models. The fourth part covers four major approaches to applied market segmentation: geo-demographic, lifestyle, response-based, and conjoint analysis. The final concluding section discusses directions for further research.

Standing Room Only Oct 04 2021 Argues that organizations in the performing arts must market themselves to survive, including defining their mission, thinking strategically, and applying basic marketing concepts like product and pricing

The Almost Queen Jan 27 2021 The Witch Needs Her Freedom. Ellara Wist, one of the many witches that fought on the losing side of the war, has no intentions of returning to Outerland when it is finished and she has no intention of letting her fellow witches suffer either. So, during her sentencing for war crimes against the kingdom of Aulen, she boldly offers their new king a proposal: she'll join the king's court as his own personal sorceress in exchange for the lives and freedom of those trapped in Outerland. The King Needs a Wife. Terran didn't want to be king. But after years of war and the loss of almost his entire family, he will not put the crown aside. But when a witch from his past offers herself as a sacrifice, he sees her as an equal. So, he instead counters her offer with one of his own: Don't be my sorceress. Be my Queen. ?And the deal they strike will change their world forever. Desperate, Ellara agrees, swearing to herself that she could never love him. But as time reveals the man she's married not as the monster everyone thought he was and danger draws them closer together, she finds her vow almost impossible to keep.

Network Management and Control Dec 06 2021 Three speakers at the Second Workshop on Network Management and Control nostalgically remembered the INTEROP Conference at which SNMP was able to interface even to CD players and toasters. We agreed this was indeed a major step forward in standards, but wondered if anyone noticed whether the toast was burned, let alone, would want to eat it. The assurance of the correct operation of practical systems under difficult environments emerged as the dominant theme of the workshop with growth, interoperability, performance, and scalability as the primary sub-themes. Perhaps this thrust is un surprising, since about half the 100 or so attendees were from industry, with a strong contingency of users. Indeed the technical program co-chairs, Shivendra Panwar of Polytechnic and Walter Johnston of NYNEX, took as their assignment the coverage of real problems and opportunities in industry. Nevertheless we take it as a real indication of progress in the field that the community is beginning to take for granted the availability of standards and even the ability to detect physical, link, and network-level faults and is now expecting diagnostics at higher levels as well as system-wide solutions.

Learning iPhone Programming Aug 22 2020 Get the hands-on experience you need to program for the iPhone and iPod Touch. With this easy-to-follow guide, you'll build several sample applications by learning how to use Xcode tools, the Objective-C programming language, and the core frameworks. Before you know it, you'll not only have the skills to develop your own apps, you'll know how to sail through the process of submitting apps to the iTunes App Store. Whether you're a developer new to Mac programming or an experienced Mac developer ready to tackle the iPhone and iPod Touch, Learning iPhone Programming will give you a head start on building market-ready iPhone apps. Start using Xcode right away, and learn how to work with Interface Builder Take advantage of model-view-controller (MVC) architecture with Objective-C Build a data-entry interface, and learn how to parse and store the data you receive Solve typical problems while building a variety of challenging sample apps Understand the demands and details of App Store and ad hoc distribution Use iPhone's accelerometer, proximity sensor, GPS, digital compass, and camera Integrate your app with iPhone's preference pane, media playback, and more

Desserts LaBelle Jul 21 2020 Superstar singer, bestselling cookbook author, and cooking show host Patti LaBelle shares her favorite dessert recipes and kitchen memories. Her New York Times bestseller LaBelle Cuisine: Recipes to Sing About, which sold more than 300,000 copies, established her as a cooking star. Today, Patti's baking skills have the country buzzing. In Fall 2015, a fan's YouTube review of her sweet potato pie became a viral sensation, with over 20 million views. In just one weekend, her pies were completely sold out at Wal-Mart stores across the country. Now, for the first time, fans of Patti's pie can make their own, as well as other amazing sweets! Filled with her favorite recipes for pies, cakes, cookies, and puddings, as well as a chapter on diabetic-friendly recipes, moving personal stories from her career and life, this is the most personal cookbook LaBelle has written. Every fan of soul and sweets will want to own it.

Modern Microbial Genetics Jun 19 2020 In accordance with its predecessor, the completely revised and expanded Second Edition of Modern Microbial Genetics focuses on how bacteria and bacteriophage arrange and rearrange their genetic material through mutation, evolution, and genetic exchange to take optimal advantage of their environment. The text is divided into three sections: DNA Metabolism, Genetic Response, and Genetic Exchange. The first addresses how DNA replicates, repairs itself, and recombines, as well as how it may be manipulated. The second section is devoted to how microorganisms interact with their environment, including chapters on sporulation and stress shock, and the final section contains the latest information on classic exchange mechanisms such as transformation and conjugation. Chapters include: * Gene Expression and Its Regulation * Single-Stranded DNA Phages * Genetic Tools for Dissecting Motility and Development of Myxococcus xanthus * Molecular Mechanism of Quorum Sensing * Transduction in Gram-Negative Bacteria * Genetic Approaches in Bacteria with No Natural Genetic Systems The editors also cultivate an attention to global regulatory systems throughout the book, elucidating how certain genes and operons in bacteria, defined as regulons, network and cooperate to suit the needs of the bacterial cell. With clear appreciation for the impact of molecular genomics, this completely revised and updated edition proves that Modern Microbial Genetics remains the benchmark text in its field.

Invisible Sep 15 2022 You could say that my railroad, the Madham Line, is almost the most important thing in my life. Next to Andy Morrow, my best friend. Lots of people think Doug Hanson is a freak -- he gets beat up after school, and the girl of his dreams calls him a worm. Doug's only refuge is creating an elaborate bridge for the model railroad in his basement and hanging out with his best friend, Andy Morrow, a popular football star who could date any girl in school. Doug and Andy talk about everything -- except what happened at the Tuttle place a few years back. It does not matter to Andy that we live in completely different realities. I'm Andy's best friend. It does not matter to Andy that we hardly ever actually do anything together. As Doug retreats deeper and deeper into his own reality, long-buried secrets threaten to destroy both Doug and Andy -- and everything else in Doug's fragile world.

Laser-Driven Particle Acceleration Towards Radiobiology and Medicine May 19 2020 This book deals with the new method of laser-driven acceleration for application to radiation biophysics and medicine. It provides multidisciplinary contributions from world leading scientist in order to assess the state of the art of innovative tools for radiation biology research and medical applications of ionizing radiation. The book contains insightful contributions on highly topical aspects of spatio-temporal radiation biophysics, evolving over several orders of magnitude, typically from femtosecond and sub-micrometer scales. Particular attention is devoted to the emerging technology of laser-driven particle accelerators and their application to spatio-temporal radiation biology and medical physics, customization of non-conventional and selective radiotherapy and optimized radioprotection protocols.

Mechatronics: Ideas for Industrial Applications Feb 20 2023 This book presents recent advances and developments in control, automation, robotics, and measuring techniques. It presents contributions of top experts in the fields, focused on both theory and industrial practice. The particular chapters present a deep analysis of a specific technical problem which is in general followed by a numerical analysis and simulation, and results of an implementation for the solution of a real world problem. The presented theoretical results, practical solutions and guidelines will be useful for both researchers working in the area of engineering sciences and for practitioners solving industrial problems.

Beginning Pixlr Editor Aug 02 2021 Learn digital image editing without the expense of using subscription-based editors. This book will pave the way for you to leverage Pixlr Editor, a free, web-based image editing solution that works on virtually any computer platform. You'll learn image editing first hand by using the practice images with the corresponding tutorials—everything from creating simple graphics to enhancing and retouching photos. Explore all of the features you'd expect in a high end photo editing application; layers, history (multiple undos), and an array of powerful tools for handling almost any editing task. Powerful image editing used to require purchasing and installing expensive, complicated image editing software on your computer. Beginning Pixlr Editor takes an easy-to-access and convenient look at the alternative from the Pixlr family of tools and utilities and offers you advanced editing techniques so you can enhance, retouch, and edit your digital images like a pro. What You'll Learn: Easily access Pixlr Editor from any computer with a high speed Internet connection Create a new image, or open an image from your computer, a URL, or the Pixlr library Save your images on to your computer or the Pixlr library Navigate the the Pixlr interface Use the Tools, Layers, image Adjustments, History, and much more Who This Book Is For: Beginner and those with some image editing experience (anyone accustomed to Adobe Photoshop will instantly feel at home with Pixlr Editor).

Cell Reprogramming Oct 12 2019 This volume provides an understanding of the factors involved in nuclear reprogramming, which is essential for the success of reprogramming. The book is aimed at reprogramming differentiated cells and germ line transmission of pluripotent stem cells and features chapters that deal with reprogramming-related issues such as analysis of mitochondrial DNA in reprogrammed cells and the isolation of reprogramming intermediates; alternative methods for nuclear transfer; the production of germ-line chimeras from embryonic stem cells and induced pluripotent stem cells; and neonatal care and management of somatic cell nuclear transfer derived offspring. Written in the highly successful Methods in Molecular Biology series format, chapters include introductions to their respective topics, lists of the necessary materials and reagents, step-by-step, readily reproducible laboratory protocols and tips on troubleshooting and avoiding known pitfalls.

Authoritative and cutting-edge, Cell Reprogramming: Methods and Protocols

Consumer Behaviour Jun 12 2022 Electronic Inspection Copy available for instructors here Why do you choose the things you buy – such as this textbook, a smartphone or an item of clothing? How often, where, and instead of what? What do you consider a boring necessity or a fun luxury? What do you do with products once you've purchased them? When do you decide to chuck them and why? As a consumer you make conscious and unconscious decisions, nonstop, every day of your life. This is Consumer Behaviour! This friendly, lively full colour text will support you through your course and help you to get the best possible grade for future employment. It even has How to Impress Your Examiner boxes in each chapter. There are lots of case studies along the way from global brands such as Facebook, Apple and Amazon Kindle, and Consumer Behaviour in Action boxes in every chapter to show you how it works in the real world. If you want to be top of the class you can push yourself that little bit further by reading the Challenging the Status Quo asides which will help your critical thinking and problem solving skills. These are key skills that employers look for in graduates, so practicing now will help set you apart from the pack and boost your employability. You could also dip into the Further Reading resources to help you with essays and exam revision – using these is a sure route to better grades. Visit the companion website www.sagepub.co.uk/blythe for extra materials including multiple choice questions to test yourself and Jim's pick of Youtube videos that make the examples in each chapter come alive!

The Ecuador Reader Oct 24 2020 Encompassing Amazonian rainforests, Andean peaks, coastal lowlands, and the Galápagos Islands, Ecuador's geography is notably diverse. So too are its history, culture, and politics, all of which are examined from many perspectives in The Ecuador Reader. Spanning the years before the arrival of the Spanish in the early 1500s to the present, this rich anthology addresses colonialism, independence, the nation's integration into the world economy, and its tumultuous twentieth century. Interspersed among forty-eight written selections are more than three dozen images. The voices and creations of Ecuadorian politicians, writers, artists, scholars, activists, and journalists fill the Reader, from José María Velasco Ibarra, the nation's ultimate populist and five-time president, to Pancho Jaime, a political satirist; from Julio Jaramillo, a popular twentieth-century singer, to anonymous indigenous women artists who produced ceramics in the 1500s; and from the poems of Afro-Ecuadorians, to the fiction of the vanguardist Pablo Palacio, to a recipe for traditional Quiteño-style shrimp. The Reader includes an interview with Nina Pacari, the first indigenous woman elected to Ecuador's national assembly, and a reflection on how to balance tourism with the protection of the Galápagos Islands' magnificent ecosystem. Complementing selections by Ecuadorians, many never published in English, are samples of some of the best writing on Ecuador by outsiders, including an account of how an indigenous group with non-Inca origins came to see themselves as definitively Incan, an exploration of the fascination with the Andes from the 1700s to the present, chronicles of the less-than-exemplary behavior of U.S. corporations in Ecuador, an examination of Ecuadorians' overseas migration, and a look at the controversy surrounding the selection of the first black Miss Ecuador.

UNIX and Shell Programming Nov 12 2019 Designed as one of the first true textbooks on how to use the UNIX operating system and suitable for a wide variety of UNIX-based courses, UNIX and Shell Programming goes beyond providing a reference of commands to offer a

guide to basic commands and shell programming. Forouzan/Gilberg begin by introducing students to basic commands and tools of the powerful UNIX operating system. The authors then present simple scriptwriting concepts, and cover all material required for understanding shells (e.g., Regular Expressions, grep, sed, and awk) before introducing material on the Korn, C, and Bourne shells. Throughout, in-text learning aids encourage active learning and rich visuals support concept presentation. For example, sessions use color so students can easily distinguish user input from computer output. In addition, illustrative figures help student visualize what the command is doing. Each chapter concludes with problems, including lab sessions where students work on the computer and complete sessions step-by-step. This approach has proven to be successful when teaching this material in the classroom.

DNA Methylation Protocols Nov 24 2020 DNA Methylation Protocols offer a set of readily reproducible protocols of the analysis of DNA methylation and methylases. These powerful methods provide the tools necessary for studying methylation at both the global level and the level of sequence, and include many techniques for identifying genes that might be aberrantly methylated in cancer and aging. Additional methods cover genome-wide analysis of abnormal DNA methylation and the isolation and measurement of demethylases and related proteins.

Just a Hint - Clint Feb 14 2020 Clint Evans rescues heiress Julie Rose from her kidnappers, but while trying to solve the mystery of her kidnapping he is tempted to break his own rule of never getting involved with a client.

Relationships May 31 2021 Offering insights into the issues that threaten relationships and practical tools to strengthen and make them work, this book reveals secrets on how to move past the limitations of traditional roles—woman, man, mommy, daddy, and others—into practical ways to give and receive more loving, sharing, happiness, and fulfillment.

GPS Made Easy Mar 17 2020 -- Clear language and illustrations demystify GPS-- Completely revised edition includes extensive new material on using GPS with maps and in rough terrain-- GPS systems have seen exponential growth recently and the first edition has sold more than 33,000 copies

Divine Stories Nov 05 2021 Divine Stories is the inaugural volume in a landmark translation series devoted to making the wealth of classical Indian Buddhism accessible to modern readers. The stories here, among the first texts to be inscribed by Buddhists, highlight the moral economy of karma, illustrating how gestures of faith, especially offerings, can bring the reward of future happiness and ultimate liberation. Originally contained in the Divyavadana, an enormous compendium of Sanskrit Buddhist narratives from the early Common Era, the stories in this collection express the moral and ethical impulses of Indian Buddhist thought and are a testament to the historical and social power of narrative. Long believed by followers to be the actual words of the Buddha himself, these divine stories are without a doubt some of the most influential stories in the history of Buddhism.

Growing Up Cajun Apr 10 2022 Explore the Cajun traditions of the Walker family, creators of the Slap Ya Mama Cajun Seasoning company. Through family stories, Cajun lore, and some of the most prized recipes in Louisiana, this collection is sure to leave you feeling a little Cajun yourself.

The Hardmen: Legends and Lessons from the Cycling Gods Apr 29 2021 Embrace and revel in the stories of the toughest cyclists of all time, told by The Velominati, originators of The Rules. Read and get ready to ride . . . In cycling, suffering brings glory: a rider's value can be judged by their results, but also by their panache and heroism. Prepared to be awed and inspired by Chris Froome riding on at the Tour de France with a broken wrist or Geraint Thomas finishing it with a broken pelvis. In The Hardmen the writers behind cycling superblog Velominati.com and The Rules will tell the stories and illuminate the myths of not just the greatest cyclists ever, but the toughest. From Eddy Merckx to Beryl Burton, and from Marianne Vos to Edwig Van Hooydonk, the book will lay bare the secrets of their extraordinary and inspirational endurance in the face of pain, danger and disaster. After all, suffering is one of the joys of being a cyclist. Embrace climbs, relish the descents, and get ready to harden up. . .

Poster Girl Jul 01 2021 Beccy Cole's inspirational memoir from the heart of Australian country music. Beccy Cole has country music in her blood. Daughter of a country music star, Carole Sturtzel, she is one of the most popular country singer-songwriters in Australia today. This is the story of her life - in her own words. At fourteen, Beccy was performing in her mother's group, Wild Oats. By her late teens, Beccy had teamed up with the Dead Ringer Band - Kasey Chambers' family band - and had attracted the attention of the country music world by winning the Star Maker quest: the same award that started the careers of Keith Urban, Lee Kernaghan, James Blundell and Gina Jeffreys. It was just the first of many awards and accolades for this multitalented woman with a big heart. With refreshing candour, Beccy shares her story: leaving everything she knew to pursue her dream, making a name for herself with her own band; her marriage and motherhood; her subsequent divorce, becoming a single mother and maintaining the nurturing love of family. Performing for the Australian troops in Afghanistan. Coming out, and what it has meant for her and her fans. Taking control of her own life - and finding love. Heartfelt and honest, Poster Girl is the inspirational memoir of a strong woman who epitomises the authentic spirit of country music, and of Australia.

Nana Sep 03 2021 Anxious to get into a Tokyo groove, both women are on the prowl for a funky and cheap place to live. But inexpensive apartments in Japan's capital city are hard to find. Thank goodness each Nana has a clique of cool friends willing to help out. Too bad these friends are a little wiggy! -- VIZ Media

RSPB Gardening for Wildlife Apr 17 2020 There is something uplifting about having butterflies in your flowerbeds, frogs in your water feature and birds in your bushes, and knowing they're there because of you. Rich in detail and accessible in style, Gardening for Wildlife is the crucial companion to novices and expert gardeners alike. Adrian Thomas dispels myths and offers new insights and ideas, helping everyone understand what to do so gardens, large or small, can become ideal homes for wildlife. Building on the success of the award-winning first edition, this expanded and updated edition reflects the latest research and developments in nature-friendly gardening. The book serves as an expert guide to the practical aspects of this rewarding pastime and educates readers about the ecological principles involved, while exploding commonly held misconceptions that often deter people from pursuing a kinder approach to gardening. Adrian Thomas provides a detailed guide to the many and varied species that can contribute to a natural and healthy garden. Practical sections help you create entire habitats, such as woodland and meadow gardens, in your garden. And the massively expanded catalogue of the top 500 best garden flowers, shrubs and trees for wildlife, now includes colour photos of every species. If you love wildlife and want to encourage more to visit your garden, this inspirational book will help you sow the seeds and reap the rewards.

Feminist Surveillance Studies Aug 14 2022 Questions of gender, race, class, and sexuality have largely been left unexamined in surveillance studies. The contributors to this field-defining collection take up these questions, and in so doing provide new directions for analyzing surveillance. They use feminist theory to expose the ways in which surveillance practices and technologies are tied to systemic forms of discrimination that serve to normalize whiteness, able-bodiedness, capitalism, and heterosexuality. The essays discuss the implications of, among others, patriarchal surveillance in colonial North America, surveillance aimed at curbing the trafficking of women and sex work, women presented as having agency in the creation of the images that display their bodies via social media, full-body airport scanners, and mainstream news media discussion of honor killings in Canada and the concomitant surveillance of Muslim bodies. Rather than rehashing

arguments as to whether or not surveillance keeps the state safe, the contributors investigate what constitutes surveillance, who is scrutinized, why, and at what cost. The work fills a gap in feminist scholarship and shows that gender, race, class, and sexuality should be central to any study of surveillance. Contributors. Seantel Anaïs, Mark Andrejevic, Paisley Currah, Sayantani DasGupta, Shamita Das Dasgupta, Rachel E. Dubrofsky, Rachel Hall, Lisa Jean Moore, Yasmin Jiwani, Ummni Khan, Shoshana Amielle Magnet, Kelli Moore, Lisa Nakamura, Dorothy Roberts, Andrea Smith, Kevin Walby, Megan M. Wood, Laura Hyun Yi Kang
