Adalaide Morris removes the work of the iconic poet, dramatist, and novelist H.D. from compartments into which it has historically been placed. As she examines the "ongoingness" of H.D.'s writing, Morris makes an eloquent and compelling case for a consideration of poems--all poems--as forms of cultural mediation, instructive historical documents that engage the reader in wide-ranging contemporary debates and use their acoustical richness to generate tangible cultural effects. As she argues in this volume, the writing and, crucially, the reading of poetry is a process in which meaning is produced by the interplay of words on a page and in the ear of the reader. Morris shows H.D. to be a playful linguistic innovator whose writings bear on debates in science, technology, and cinema as well as on poetry. Foremost, however, H.D. was a profound reshapener of the boundaries and possibilities of poetry, a generative form that, as this book shows, can indeed serve the cultural work of survival and resistance against the violence of modern culture. Hermione Gart, a young American newly arrived in Europe, begins to test for the first time the limits of her sexual and artistic identities H. D. and Hellenism: Classic Lines concerns a prominent aspect of the writing of the modern American poet H. D. (Hilda Doolittle): a lifelong engagement with hellenic literature, mythology and art. H. D.'s hellenic intertextuality is examined in the context of classical fictions operative at the turn of the century: the war of words among literary critics establishing a new 'classicism' in reaction to romanticism; the fictions of classical transmission and the problem of women within the classical line; nineteenth-century romantic hellenism, represented in the writing of Walter Pater; and the renewed interest in ancient religion brought about by anthropological studies, represented in the writing of Jane Ellen Harrison. Eileen Gregory explores at length H. D.'s intertextual engagement with specific classical writers: Sappho, Theocritus and the Greek Anthology, Homer and Euripides. The concluding chapter sketches chronologically H. D.'s career-long study and reinvention of Euripidean texts. An appendix catalogues classical subtexts in Collected Poems, 1912-1944, edited by Louis Martz. This edition is the first to offer a detailed account of the theatrical treatment of Troilus and Cressida on the British and North American stages from its first revivals at the beginning of the twentieth century to the present. As social turmoil increased, audiences grew more in tune with the play's cynical undercutting of the Homeric tale of Greeks and Trojans, and less dismissive of Shakespeare's dark comedic treatment of the Medieval tale of Troilus and Cressida. This edition of this problematic and fascinating play traces its theatrical history, drawing upon critical responses, photographic archives, promptbooks, and video tapes of more recent productions to trace changes in production styles and emphases. Stage history is placed against a broader background of social change including shifting attitudes towards war, politics, sexual issues, and the rise of feminism that has increased understanding of Cressida's actions in a wartime man's world. Just as the cultural background of readers shapes how they respond to texts, the context in which writers live shapes what they write. When a context is dominant within a culture, the effects of that context upon an author may be taken for granted and thus overlooked. Race is a powerful factor in shaping literary works. Literature by black writers, for example, often reflects the experiences of African Americans. At the same time, though perhaps less obviously, literature by white writers may similarly reflect the experience of being white. This book argues that H.D., Elizabeth Bishop, and Sylvia Plath wrote from an unproclaimed dominant white perspective that becomes evident in their poetry. Loosely delineated, writing white constitutes writing authored from an acknowledged or unacknowledged white perspective; writing that implies or explicitly delivers the concept of whiteness to a text; writing that remains unconcerned with white racial politics internal and external to the text; and writing that uses the word white to maintain ideological systems of mastery and dichotomy. This book examines numerous poems in terms of whiteness. Each chapter places one poet in the larger context of historical and cultural racial events prevalent during the time of her writing and explores the particular poems created and published during that period. Diana Collecott proposes that Sappho's presence in H. D.'s work is as significant as that of Homer in Pound's and of Dante in Eliot's.
