Computer Vision Jul 22 2020 This three volume set, CCIS 771, 772, 773, constitutes the refereed proceedings of the CCF Chinese Conference on Computer Vision, CCCV 2017, held in Tianjin, China, in October 2017. The total of 174 revised full papers presented in three volumes were carefully reviewed and selected from 465 submissions. The papers are organized in the following topical sections: biological vision inspired visual method; biomedical image analysis; computer vision applications; deep neural network; face and posture analysis; image and video retrieval; image color and texture; image composition; image quality assessment and analysis; image restoration; image segmentation and classification; image-based modeling; object detection and classification; object identification; photography and video; robot vision; shape representation and matching; statistical methods and learning; video analysis and event recognition; visual salient detection.

**Mr.Bhaskar's Incredible cycle journey Bokaro-Rameshwaram-Bokaro** Mar 18 2020 The book is about an incredible cycle journey of Dr. Bhaskar Vinayak Parnerkar in the year 1974. The journey on the cycle was done from Bokaro steel city to Rameshwaram and back to Bokaro steel city and covered more than 5000 kms. (During the time when there were no ATMs/Mobiles/GPS). Mr. Parnerkar was of age 34 working as accountant in S.B.Joshi company in Bokaro when he started this incredible cycle journey executed from 14-Jan-1974 to 29-Apr-1974. One of the courageous and extraordinary journey of his life

where he travelled across 9 states (Bihar, U.P., M.P., Maharashtra, Karnataka, Tamilnadu, Kerala, Orissa, Westbengal). This book does not only talk about his travelling but it also dives into the roads he took, the numerous people he met on the way, various experiences he gathered as a part of his traveling, meeting with old friends across cities and many more. This book is also dedicated to all the government officials as well as friends, relatives who helped him throughout this beautiful journey.

**(My Version) Proposed -The Best 17Th Century North Carolina Black Cooks** Sep 16 2022 The Eight Book Series are dedicated to the First Slaves' Thanksgiving and Christmas Dinners Celebrations in the United States who arrived before 1600s. The first Thanksgiving of the Pilgrims has made history since 1621. The first slaves arrived in South Carolina in the 1520s. Even though slavery was very harsh, the slaves were able to create meals from whatever was available. The slaves carved cooking and eating utensils from wood from different varieties of trees. Even though the slaves were treated terribly and prohibited from reading, writing, or going to church, the slaves were able to get patents and serve in the Civil War.

Stability and Failure of High Performance Composite Structures Jun 13 2022 This book is written to introduce the application of high-performance composite materials such as fiber reinforced polymers, functionally graded composites, and sustainable fiber reinforced composites for development of thin-walled plated structures, beams, girders, and deck structures subjected to different kinds of loads. This book also includes test cases and its validation with finite element method using general purpose commercial computer software. Moreover, the book also deals with design methodology of advanced composite materials based on different applications. The comprehensive overview of the state-of-the-art research on the high-performance composite structures dealing with their stability, response, and failure characteristics will be of significant interest to scientists, researchers, students, and engineers working in the thrust area of advanced composite structures. This book is also helpful for Ph.D. candidates for developing their fundamental understanding on high-performance composite structures, and it will also be appropriate for master- and undergraduate-level courses on design of composite structures especially for Civil Engineering Infrastructures.

**Computational Topology for Data Analysis** Aug 23 2020 This book provides a computational and algorithmic foundation for techniques in topological data analysis, with examples and exercises.

Atmospheric Aerosols Nov 18 2022 The book is divided into two sections. The first section presents characterization of atmospheric aerosols and their impact on regional climate from East Asia to the Pacific. Ground-based, air-born, and satellite data were collected and analyzed. Detailed information about measurement techniques and atmospheric conditions were provided as well. In the second section, authors provide detailed information about the organic and inorganic constituents of atmospheric aerosols. They discuss the chemical and physical processes, temporal and spatial distribution, emissions, formation, and transportation of aerosol particles. In addition,

new measurement techniques are introduced. This book hopes to serve as a useful resource to resolve some of the issues associated with the complex nature of the interaction between atmospheric aerosols and climatology.

**Agricultural Co-operation in Its Application to the Industry, the Business, and the Life of the Farmer in the British Empire** Jun 20 2020 Includes a report on the "Conference on Agricultural Co-operation in the British Empire" held at Wembley, July 28-31, 1924.

*Future Landscape of Structural Materials in India* Nov 06 2021 This book provides a perspective on the research, development, and manufacturing aspects of structural materials in India. The contents highlight materials to strengthen technology advancements in sectors like aerospace, defense, automotive, energy, health, and ICT. With the momentum of the 'Make in India' initiative, India has seen an increase in manufacturing of advanced components for these sectors. The vast field of materials covers a whole gamut including structural materials such as metals like steel, aluminum, titanium, polymers, glass, cement and composites; functional materials such photovoltaics, and smart materials are also discussed. This anthology focuses on structural materials and studies, in particular, the Indian landscape of manufacturing capability, R&D capability and status of advanced structural materials compared to the rest of the world. This study highlights the gaps and suggests necessary actions in the national landscape of structural materials, given the pull that will come from the burgeoning advanced components manufacturing over the next 10-15 years. The scope of this study is limited to structural materials covering metals and alloys, structural polymers, cement, glass, composites and high temperature ceramics. The contents of this book will be useful to researchers, industry professionals, and policy makers alike.

**Biotechnology in India I** Apr 30 2021 The biotechnology business in India with an increase from USD 500 million in 1997 and reaching an estimated USD I billion next year health related products accounting for 60%, agro and veterinary products together 15%, and contract R&D, reagents, devices and supplies adding up to the remaining 25% of which the diagnostics share was about 10% of the total surely presented an encouraging picture even five years ago. While volumes have increased, the pattern has not. According to a report, prepared by McKinsey & Co, India's Pharmaceutical industry including domestic and export sales and contract services totals nearly USD 5 billion. Furthermore, the company optimistically projects the growth to a factor of five fold only if both the industry and the government are able to put in place achievable solutions that must take care of the formidable obstacles preventing further growth. If this assessment is correct, then the established transformation made by IT growth should also provide the confidence required by the high expectations for biotechnology which have arisen in the country in recent years. Some contributors to this are overenthusiastic these are bureaucrats, some retired scientists and of course the complacent politicians who have the least knowledge of what the new biotechnology is all about. However, there are clear indications of biotechnology growth demonstrated by a few but rapidly expanding biotech companies such as Biocon Ltd, Shantha Biotech (P) Ltd, Dr.

**Recent Advancements and Research in Biological Sciences** Dec 27 2020 Recent Advancement and Research in Biological Sciences is more inclined towards

interdisciplinary studies. Recent developments in the technologies have led to a better understanding of living systems and this has removed the demarcations between various disciplines of life sciences. A new trend in life science incorporates biological research involving a merger of diverse disciplines such as (Zoology: Entomology & Fisheries, comparative anatomy of vertebrates and toxicology), Botany etc. The book encompasses topics on Biology of stored grains insect-pests and control, Cadmium toxicity in liver and pancreas of albino mice, COVID-19, Phytochemical analysis and antibacterial activity of Hibiscus rosasinensis, Larvicidal fishes and public health, comparative anatomy: Urinogenital system of vertebrates, role of citrus flavonoids in the management of diabetes, environmental diseases with special reference to carcinogenesis and radiation injuries, symptoms and diseases of food fishes, biosphere, protective role of Zingiber officinalis on arsenic induced genotoxicity in albino mice, preventive effect of Curcuma longa against cadmium and different techniques used for chromosomal analysis of spiders, Carica papaya - A Comprehensive Review, Cardiovascular disease comorbidity, Phytase, effect of plant derived extracts on the Oviposition of Aedes aegypti, PHB production by Halophilic Archaea, Pharmacogenomics, Insect - pests Management or Integrated Insect-pests Management, Antimicrobial activity of Marine Red Algae, Protective Effect of Montelukast, Polyherbal formulations for Hepatoprotection, Therapeutical uses of Syzygium cumini distributed throughout Twenty four chapters for the benefits of graduate and postgraduate students as well as young researchers and scientists. In addition, this book provide newer techniques and the use of modern tools in achieving the potential of ecology, toxicology, Entomology, Fisheries, comparative anatomy of vertebrates and COVID-19, this is all used to understand the challenges found in biological sciences.

Measurement, Analysis and Remediation of Environmental Pollutants Jan 28 2021 This book discusses contamination of water, air, and soil media. The book covers health effects of such contamination and discusses remedial measures to improve the situation. Contributions by experts provide a comprehensive discussion on the latest developments in the detection and analysis of contaminants, enabling researchers to understand the evolution of these pollutants in real time and develop more accurate source apportionment of these pollutants. The contents of this book will be of interest to researchers, professionals, and policy makers alike.

The Writerly Life May 12 2022 When R.K. Narayan Passed Away Last Year At The Age Of Ninety-Four, Tributes Poured In From Fans And Admirers, Celebrating The Art Of This Master Storyteller Who Has Often Been Described As India'S Greatest English Language Writer. Narayan Is Better Known For His Novels Set In The Fictional South Indian Town Of Malgudi, But His Essays Are As Delightful And Enchanting As Any Of His Novels. This Collection Begins With The Short Essays Which Narayan Wrote As A Weekly Contribution To The Hindu, The Subjects Of Which Are As Diverse As Umbrellas, Weddings, Monkeys, South Indian Coffee, Films, The Black Market, Old Age, The Caste System, Gardening And Vayudoot. The Later, Longer Essays Dwell On The Cultural Ambiguities That Persist In Our Nation: Narayan S Description Of The Linguistic Confusion Between The North And The South With The Advent Of National Television Is Reminiscent Of The Misunderstood Messages In His

Famous Story 'A Horse And Two Goats'. The Highlight Of This Section Is A Scathingly Funny Essay On The Making Of The Film The Guide, A Project That Distorted Narayan S Narrative Beyond Recognition. In A Separate Section On The World Of The Writer, Narayan Describes The Predicament Of Writing In English In India, An Art Which He Pioneered, And The Pitfalls Of Being Considered For The Nobel Prize In Literature Which He Never Got. This Volume Also Includes The Complete Text Of My Dateless Diary, Narayan S Jottings About His Travels In America When He Was In The Process Of Writing The Guide. As He Journeys Across The Vast Continent On A Diet Of Rice And Yoghurt And Without The Aid Of An Alarm Clock, Narayan Recounts A Myriad Memorable Moments, From His Encounter With The Mysterious Greta Garbo To The Evening Gathering Where He Is Hailed As One Of The Three Greatest Living Authors In The World. Taken Together, These Writings Provide A Fascinating Glimpse Into The Private World Of One Of The Most Gifted Writers Of Our Time, And Reveal The Ways In Which Narayan Was Able To Convert The Small And Ordinary Things Of Everyday Life Into Memorable Literary Anecdotes.

COVID-19 Jan 16 2020 This book highlights the impact of COVID-19 on sustainable waste management and air emission, using various case studies. The year 2020 was a historical year mainly due to the pandemic caused by COVID-19 and it influenced or affected the global economy, business models and the industrial sectors, thus impacting sustainability in various ways. Given that sustainability has many faces and facets, it is worthwhile to deal with the relation (or impact) of COVID-19 on various elements of sustainability. This book presents how COVID-19 has influenced waste management and air quality.

Aerosols Jan 08 2022 Aerosols have a significant impact on technological processes and human activities. In many cases, aerosols are at the core of human health, environmental and technological problems (climate change and air quality). However, aerosols can be successfully used in industry and technology (new materials, fire suppression and fuel delivery). The current scientific status of aerosol modelling and simulation and measurements and some advances in computational techniques, particle measurement technologies and practical applications of aerosols are reviewed and considered in this book. This book also includes a number of case studies focused on analysis of optical thickness and air quality in various regions.

**Air Pollution and Its Complications** Feb 26 2021 This book provides an overview of the fundamental concept of air pollution, emission sources of air pollutants and their transportation. First, the book presents a brief background on air pollution and its emission sources, then it continues with their impact on agriculture, health, and climate change. Furthermore, it covers the basic concepts of air pollution, transportation of air pollutants, global climate change and the use of science in air pollution policy formulation in detail. It also emphasizes the effects of air pollutants in altering the onset pattern of the Indian Summer Monsoon. In addition, it describes the impacts of air pollution on the cryosphere and human health. In this book the editors provide an interdisciplinary unique collection of new studies and findings on the groove of air pollution, to improve the basic understanding of graduate students as well as researchers

in the field of air pollution and its impacts on various aspects of the atmosphere and surroundings. This collection covers the basic concepts of air pollution, transportation of air pollutants, and global climate change and the use of science in air pollution policy formulation.

**Sustainable Fibres for Fashion Industry** Jul 02 2021 This book covers all sustainable fibres applicable in the fashion sector. It addresses the importance of these fibres in the fashion sector with the context of sustainability. This book, the first of its kind, addresses all the minute details pertaining to these fibres and connects these fibres with the world of sustainable fashion. It stresses the importance of having these fibres on board in developing sustainable apparels, as fibres play a major role as the starting point in the life cycle of apparel.

Slum Clearance, Demolitions, Etc. and Firing in Turkman Gate During the Emergency, June 25, 1975-March 21, 1977 Feb 15 2020

**Skill in Mathematics - Algebra for JEE Main and Advanced** Feb 09 2022 1. 'Skill in Mathematics' series is prepared for JEE Main and Advanced papers 2. It is a highly recommended textbook to develop a strong grounding in Algebra 3. The book covers the entire syllabus into 11 chapters 4. Each chapter includes a wide range of questions that are asked in the examinations Good foundational grip is required in the Algebraic Methods, while you are preparing for JEE Mains & Advanced or any other engineering. Bringing up the series "Skills in Mathematics for JEE Main & Advanced for Algebra" that is carefully revised with the sessionwise theory and exercise; to help candidates to learn & tackle the mathematical problems. The book has 11 Chapters covering the whole syllabus for the JEE Mains and Advanced as prescribed. Each chapter is divided into sessions giving complete clarity to concepts. Apart from sessionwise theory, JEE Type examples and Chapter Exercise contain a huge amount of questions that are provided in every chapter under Practice Part. Prepared under great expertise, it is a highly recommended textbook to develop a strong grounding in Algebra to perform best in JEE and various engineering entrances. TOC: Complex Numbers, Theory of Equations, Sequences and Series, Logarithms and Their Properties, Permutations and Combinations, Binomial Theorems, Determinants, Matrices, Probability, Mathematical Inductions, Sets, Relations and Functions.

**The Hindu Kush Himalaya Assessment** Sep 04 2021 This open access volume is the first comprehensive assessment of the Hindu Kush Himalaya (HKH) region. It comprises important scientific research on the social, economic, and environmental pillars of sustainable mountain development and will serve as a basis for evidence-based decision-making to safeguard the environment and advance people's well-being. The compiled content is based on the collective knowledge of over 300 leading researchers, experts and policymakers, brought together by the Hindu Kush Himalayan Monitoring and Assessment Programme (HIMAP) under the coordination of the International Centre for Integrated

Mountain Development (ICIMOD). This assessment was conducted between 2013 and 2017 as the first of a series of monitoring and assessment reports, under the guidance of the HIMAP Steering Committee: Eklabya Sharma (ICIMOD), Atiq Raman (Bangladesh), Yuba Raj Khatiwada (Nepal), Linxiu Zhang (China), Surendra Pratap Singh (India), Tandong Yao (China) and David Molden (ICIMOD and Chair of the HIMAP SC). This First HKH Assessment Report consists of 16 chapters, which comprehensively assess the current state of knowledge of the HKH region, increase the understanding of various drivers of change and their impacts, address critical data gaps and develop a set of evidence-based and actionable policy solutions and recommendations. These are linked to nine mountain priorities for the mountains and people of the HKH consistent with the Sustainable Development Goals. This book is a must-read for policy makers, academics and students interested in this important region and an essentially important resource for contributors to global assessments such as the IPCC reports.

**Poetical Works of Geoffrey Chaucer** Jun 01 2021

A Century, [1876-1976] Oct 25 2020

**Hydrocarbon Pollution and its Effect on the Environment** May 20 2020 This book covers hydrocarbon pollution, measurement techniques for hydrocarbons, risk assessment, and environmental impact. This comprehensive book takes a broad view of the subject and integrates a wide variety of approaches. This book attempts to address the needs of graduate and postgraduate students and other professionals or readers interested in food, soil, water, and air pollution. The aim of this book is to explain and clarify important studies, and compare and develop the new and groundbreaking measurement techniques. Written by leading experts in their respective areas, the book is highly recommended to professionals interested in environmental and human health because it provides specific and comprehensive examples.

**Smart Cities—Opportunities and Challenges** Nov 13 2019 This book comprises select proceedings of the International Conference on Smart Cities: Opportunities and Challenges (ICSC 2019). The book contains chapters based on urban planning and design, policies and financial management, environment, energy, transportation, smart materials, sustainable development, information technologies, data management and urban sociology reflecting the major themes of the conference. The contents focus on current research towards improved governance and efficient management of infrastructure such as water, energy, transportation and housing for sustainable development, economic growth, and improved quality of life, especially for developing nations. This book will be useful for academicians, researchers, and policy makers interested in designing, developing, planning, managing, and maintaining smart cities.

*Aerosol Science* Dec 07 2021 AEROSOL SCIENCE TECHNOLOGY AND APPLICATIONS Aerosols influence many areas of our daily life. They are at the core of environmental problems such as global warming, photochemical smog and poor air quality. They can also have diverse effects on human health, where exposure occurs in both outdoor and indoor environments. However, aerosols can have beneficial effects too; the delivery of drugs to the lungs, the delivery of fuels for combustion and the production of nanomaterials all rely on aerosols. Advances in particle measurement technologies have made it possible to take advantage of rapid changes in both particle size and

concentration. Likewise, aerosols can now be produced in a controlled fashion. Reviewing many technological applications together with the current scientific status of aerosol modelling and measurements, this book includes: Satellite aerosol remote sensing The effects of aerosols on climate change Air pollution and health Pharmaceutical aerosols and pulmonary drug delivery Bioaerosols and hospital infections Particle emissions from vehicles The safety of emerging nanomaterials Radioactive aerosols: tracers of atmospheric processes With the importance of this topic brought to the public's attention after the eruption of the Icelandic volcano Eyjafjallajökull, this book provides a timely, concise and accessible overview of the many facets of aerosol science.

**Cumulated Index Medicus** Feb 21 2023

**Advanced Informatics for Computing Research** Aug 03 2021 This two-volume set (CCIS 955 and CCIS 956) constitutes the refereed proceedings of the Second International Conference on Advanced Informatics for Computing Research, ICAICR 2018, held in Shimla, India, in July 2018. The 122 revised full papers presented were carefully reviewed and selected from 427 submissions. The papers are organized in topical sections on computing methodologies; hardware; information systems; networks; security and privacy; computing methodologies.
