Excerpt from The Manual of Colours and Dye Wares: Their Properties, Applications, Valuation, Impurities and Sophistications; For the Use of Dyers, Printers, Drysalterns, Brokers, Etc The object of this Manual is to furnish, in brief space, an account of the chemical products and natural wares used in dyeing, printing, and the accessory arts - their properties, their applications, the means of ascertaining their respective values, and of detecting the impurities which may be present. My experience has convinced me that information of this kind is needed, both by makers, dealers, and consumers, and I am not aware of any work which exactly meets the demand. The last seven or eight years have been very fruitful in novelties, and have witnessed such an enlargement of the resources of tinctorial art as to render older authorities defective, and in some measure obsolete. It will be perceived that in the valuation of dye wares, I differ from certain authorities in relying more upon strictly chemical methods as distinguished from rule-of-thumb procedures. Without presuming to impugn the observations of others, I must say that having had prolonged opportunities of comparing the indications afforded by chemical tests with the valuations of experienced brokers and consumers, and again with the results obtained in actual use, I have found the first more reliable than the second. I believe that there are means of forging those outward features of colour, touch, taste, etc., upon

which so many rely. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. This data is provided as an additional tool in helping to ensure edition identification: ++++ A Manual Of Dyeing And Dyeing Receipts, Comprising A System Of Elementary Chemistry, As Applied To Dyeing: With Receipts For The General Reader For Dyeing Any Colour On Cotton, Silk, And Wool, With Coloured Pattern Of Cloth Of Each Fabric 3 James Napier Charles Griffin, 1875 Crafts & Hobbies; Dye; Crafts & Hobbies / Dye; Dyes and dyeing This manual is the result of many years research and practical investigation of commercial dyeing of the 18th century and earlier. It is based largely on the work of William Partridge, a master dyer in New York in 1800. The original recipes are given together with modern instructions for use by todays dyeing enthusiasts. In 1823 Partridge wrote that he would like to have published an illustrated version of his treatise on dying (sic). The cost then would have been prohibitive. Today we can fulfil Partridge's dream, at least in part, with the

aid of modern photography. This manual includes approximately 160 recipes, many of which are illustrated, together with photographs of surviving 18th century dye swatches. John Edmonds has supplied replicas of historic dyeing for scientific analysis in studies of archaeological artifacts. He was awarded the 2003 Open Prize for the Presentation of Heritage research by the British Association for the Advancement of Science. 30 step-by-step tie-dye projects with full color photos perfect for crafting fun at home!
