Instead of prescribing perfection, she understands our individual differences require individual strategies—and that it doesn't always need to be rational."—Cait Flanders, bestselling author of The Year of Less Utilizing innovative ethnographic research, Swept Up Lives? challenges conventional accounts of urban homelessness to trace the complex and varied attempts to care for homeless people Presents innovative ethnographic research which suggests an important shift in perspective in the analysis and understanding of urban homelessness Emphasizes the ethical and emotional geographies of care embodied and performed within homeless services spaces Suggests that different homelessness 'scenes' develop in different places due to varied historical, political, and cultural responses to the problems faced "The eighty-three documents presented here, varied in length and character, are not all concerned with Suffolk, but they are all connected with the eventful lives of Sir Thomas (later Viscount) Savage and his wife Elizabeth Savage (later Countess Rivers), who married in 1602 and whose homes included Melford Hall." "Thomas and Elizabeth both inherited considerable estates in Suffolk, Essex and Cheshire. Within a tight circle of aristocratic Catholics, they became prominent servants of the royal family during the reigns of James I and Charles I. After Thomas's death in 1635, Elizabeth remained an intimate of the queen, but her two houses of St. Osyth's and Melford Hall were sacked in 1642, and she remained chronically short of money up to her death in 1651." "The central document is a remarkable inventory of 1635-6, taken after Thomas died, listing the contents of Melford Hall in Suffolk, Rocksavage in Cheshire and a town house on Tower Hill in London."--BOOK JACKET. Interlacing in his work practical, literary, and philosophical approaches to landscape architecture, Evelyn created the first large-scale encyclopedic work on the science and art of gardening."--BOOK JACKET. This extraordinarily beautiful book gathers together and examines for the first time a delightful collection of English gardens rendered by artists from 1540 to the early nineteenth century, many of which are unknown. Sir Roy Strong, widely recognised for his expertise in both art history and garden history, surveys garden pictures ranging from Elizabethan miniatures to eighteenth-century al fresco conversation pieces, from suites of paintings of a single garden to amateur watercolours. He inquires into the origin of the English garden picture genre, its development prior to the invention of photography, its greatest exponents, its reliability as historical evidence of actual gardens, and its place within the larger European tradition of picturing the garden. A member of the world renowned Program on Negotiation at Harvard Law School introduces the powerful next-generation approach to negotiation. A member of the world-renowned Program on Negotiation at Harvard Law School introduces the powerful next-generation approach to negotiation. For many years, two approaches to negotiation have prevailed: the "win-win" method exemplified in Getting to Yes by Roger Fisher, William Ury, and Bruce Patton; and the hard-bargaining style of Herb Cohen's You Can Negotiate Anything. Now award-winning Harvard Business School professor Michael Wheeler provides a dynamic alternative to one-size-fits-all strategies that don't match real world realities. The Art of Negotiation shows how master negotiators thrive in the face of chaos and uncertainty. They don't trap themselves with rigid plans. Instead they understand negotiation as a process of exploration that demands ongoing learning, adapting, and influencing. Their agility enables them to reach agreement when others would be stalemated. Michael Wheeler illuminates the improvisational nature of negotiation, drawing on his own research and his work with Program on Negotiation colleagues. He explains how the best practices of diplomats such as George J. Mitchell, dealmaker Bruce Wasserstein, and Hollywood producer Jerry Weintraub apply to everyday transactions like selling a house, buying a car, or landing a new contract. Wheeler also draws lessons on agility and creativity from fields like jazz, sports, theater, and even military science. We're happy to make these classics available again for future generations to enjoy! A brutal murder, a nefarious plot, a coded letter. After five hundred years, the most notorious mystery of the Renaissance is finally solved. The Italian Renaissance is remembered as much for intrigue as it is for art, with papal politics and infighting among Italy's many city-states providing the grist for Machiavelli's classic work on take-no-prisoners politics, The Prince. The attempted assassination of the Medici brothers in the Duomo in Florence in 1478 is one of the best-known examples of the machinations endemic to the age. While the assailants were the Medici's rivals, the Pazzi family, questions have always lingered about who really orchestrated the attack, which has come to be known as the Pazzi Conspiracy. More than five hundred years later, Marcello Simonetta, working in a private archive in Italy, stumbled upon a coded letter written by Federico da Montefeltro, the Duke of Urbino, to Pope Sixtus IV. Using a codebook written by his own ancestor to crack its secrets, Simonetta unearthed proof of an all-out power grab by the Pope for control of Florence. Montefeltro, long believed to be a close friend of Lorenzo de Medici, was in fact conspiring with the Pope to unseat the Medici and put the more malleable Pazzi in their place. In The Montefeltro Conspiracy, Simonetta unravels this plot, showing not only how the plot came together but how its failure (only one of the Medici brothers, Giuliano, was killed; Lorenzo survived) changed the course of Italian and papal history for generations. In the course of his gripping narrative, we encounter the period's most colorful characters, relive its tumultuous politics, and discover that two famous paintings, including one in the Sistine Chapel, contain the Medici's astounding revenge. This book presents a new and controversial theory about dialect contact and the formation of new colonial dialects. It examines the genesis of Latin American Spanish, Canadian French and North American English, but concentrates on Australian and South African English, with a particular emphasis on the development of the newest major variety of the language, New Zealand English. Peter Trudgill argues that the linguistic growth of these new varieties of English was essentially deterministic, in the sense that their phonologies are the predictable outcome of the mixture of dialects taken from the British Isles to the Southern Hemisphere in the 19th century. These varieties are similar to one another, not because of historical connections between them, but because they were formed out of similar mixtures according to the same principles. A key argument is that social factors such as social status, prestige and stigma played no role in the early years of colonial dialect development, and that the 'work' of colonial new-dialect formation was carried out by children over a period of two generations. The book also uses insights derived from the study of early forms of these colonial dialects to shed light back on the nature of 19th-century English in the British Isles. A significant ideological transition has taken place in the discipline of architecture in the last few years. Originating in a displeasure with the 'starchitecture' system and the focus on aesthetic innovation, a growing number of architects, emboldened by the 2007-8 economic crisis, have staged a rebellion against the dominant mode of architectural production. Against a 'disinterested' position emulating high art, they have advocated political engagement, citizen participation and the right to the city. Against the fascination with the rarefied architectural object, they have promoted an interest in everyday life, play, self-build and personalization. At the centre of this rebellion is the call for architecture to (re-)assume its social and political role in society. The Efficacy of Architecture supports the return of architecture to politics by interrogating theories, practices and instances that claim or evidence architectural agency. It studies the political theories animating the architects, revisits the emergence of reformist architecture in the late nineteenth century, and brings to the fore the relation of spatial organization to social forms. In the process, a clearer picture emerges of the agency of architecture, of the threats to as well as potentials for meaningful societal transformation through architectural design. What does "missional" mean for small Christian communities in a deeply secular society? Leading missiologist Stefan Paas asks what missional spirituality could possibly mean for today's local church. This fully revised new international edition will make this an important introduction to contemporary thinking on mission and the church.
