**Life in and Against the Odds** Apr 21 2020 Somehow people continue to imagine a world of justice against the odds of a deck that has been stacked against them. In her urgent and perceptive book, *Life in and against the Odds*, Hoechst focuses on the particular circumstances and conditions of different phases of speculative expansion in the United States. She traces the roots of the nation-state to nineteenth-century land markets and slave exchanges. Hoechst also chronicles how these racial foundations extend through corporate capitalism from the 1920s and '30s to the present era of financialized capitalism and the recent housing bubble. *Life in and against the Odds* identifies where and how speculative nationalism creates roadblocks to freedom. Hoechst retells the history of the United States with a perspective on how human lives are made, destroyed, reconfigured, and claimed under the systemic violence of a nation that is rooted in the racializing futurity of speculative capitalism.

**Against the Odds** Jun 16 2022 The common thread among the 18 stories in *Against the Odds* is the way people can resourcefully overcome obstacles to realize their ambitions and dreams. The “odds” are varied in these skillfully written tales. An obstacle to one’s success or happiness may lie in one’s own character or the prejudice of someone else. A potential employer may cast a suspicious eye on an individual’s background. A guardian seems reluctant to sponsor any further education for his charge. Other characters here are looking as much for increased self-respect as financial reward or better training. Set in locales as varied as Ontario, Saskatchewan, and Prince Edward Island, the stories of *Against the Odds* are peopled with orphans, teachers, actors, struggling single-parent families, intransigent relatives. It’s a world, though distant from our own, where Montgomery’s characters have problems similar to ours, and their methods of solving them are not very different from what we would try.

**Against the Odds** Jul 17 2022 "Against the Odds is the most important book yet written about the quest for a cure and treatments for AIDS. Authors Arno and Feiden cut through the complex issues to tell the tragic, inspiring story behind the scenes of the AIDS crisis - how a diverse group of extraordinary people banded together to fight bureaucracy and greed to save lives. AIDS has been called the greatest public health menace of our time, and yet political and bottom-line agendas, couples with fear, racism, and homophobia, have made the battle against it a painful uphill struggle. *Against the Odds* is the tale of government officials, agencies, and pharmaceutical companies that have delayed the development of life-saving and life-prolonging drugs, and of others who have bent and changed the rules. Most of all, it is the story of the activist and patient communities that have now altered the course of government policy toward AIDS and other diseases with their creative, and often heroic, tactics"--Unedited summary from book.

Flying Against the Odds Jan 31 2021 "It takes a different kind of thinking to solve

a problem than the kind of thinking that produced the problem." -Albert Einstein JJ HAD A DEVASTATING PROBLEM. At age fifty-one, he was diagnosed with stage four cancer and given three years to live. Rather than accept that outcome, JJ did what he always does: he set out to find a solution. Desiring to look beyond traditional treatments and their often harmful side effects, he put his unconventionally wired mind to work. JJ was relentless as he investigated alternative therapies and pursued global trailblazers in cancer research. Moving from the role of patient to patient-researcher, he became a trailblazer in his own right, being sought after for his latest findings. Ultimately, JJ brought together the most innovative international minds at the Rethinking Cancer 2017 conference in Paris. Together, they found common ground, and they continue to create integrative, synergistic approaches to treatment. Today, almost a decade after his diagnosis, JJ has defied the odds and is cancer-free. Recently retired from his career as a commercial airline captain on the Airbus A380, he now devotes himself to sharing his ongoing research with scientists and patients. JJ's story illustrates how looking at things differently often enables us to see them in a whole new light. "Captain Trochon is a true warrior, willing to fight like no other to win his battle against cancer." -Prof. Valter Longo, Director of USC Longevity Institute, Los Angeles

**Success Against The Odds** Apr 02 2021 *Success Against the Odds* is an exciting book about effective schools in disadvantaged areas, written for a wide audience. The findings will be invaluable to headteachers, teachers, governors in all schools, and will also be of great interest to parents and indeed all those who are concerned

about the future of our schools and our children. The best-selling report of the National Commission on Education, *Learning to Succeed*, published in 1993, achieved widespread attention, acclaim and influence. *Success Against the Odds* will do the same. This powerful new book picks up one of the key themes of its predecessor, namely how schools in disadvantaged areas can not only be particularly effective but can continue to improve. A dozen teams have undertaken to investigate a school which can be described as 'succeeding against the odds'. Each team includes: \* a leading educationalist, providing knowledge about effective teaching and learning and expertise in school improvement; \* someone from the business world, offering a fresh insight into the successful management of the school as an organisation, and its interaction with the world of work; \* someone working in the regeneration of deprived areas, providing a perspective that places education not in isolation, but as an interdependent part of the life of a local community. The teams have visited a range of successful schools in disadvantaged areas to identify and analyse the key features of their effectiveness, or of their improvement. The schools between them cover a broad spectrum: primary, secondary and special; inner city, town and rural; local education authority maintained, voluntary and grant-maintained. What all the schools have in common is proven experience of overcoming difficult circumstances. In the case of each school, in-depth investigations of the life and work of the school have taken place, and the teams have attempted to explain the success of these schools. Some are detailed accounts of the life and work of the school, drawing on the views of pupils, parents and teachers to show what lies behind the consistent effectiveness of the school. Others are stories of schools that were 'turned round' from being failing schools to being schools on a long-term improvement path. In the concluding chapter, the National Commission on Education show that all schools have lessons to learn from these schools.

Michael Daly was a West Point dropout who risked his neck over and over to keep his men alive. Keith Ware would one day become the first and only draftee in history to attain the rank of general before serving in Vietnam. In WWII, Ware owed his life to the finest soldier he ever commanded, a baby-faced Texan named Audie Murphy. In the campaign to liberate Europe, each

would gain the ultimate accolade, the Congressional Medal of Honor. Tapping into personal interviews and a wealth of primary source material, Alex Kershaw has delivered his most gripping account yet of American courage, spanning more than six hundred days of increasingly merciless combat, from the deserts of North Africa to the dark heart of Nazi Germany. Once the guns fell silent, these four exceptional warriors would discover just how heavy the Medal of Honor could be—and how great the expectations associated with it. Having survived against all odds, who among them would finally find peace?

When I left the children's home, I promised myself that I would have nothing to do with them, I was sure that my only chance of living a good life would be to put the past behind me, even though that meant saying goodbye to some of the people I loved the most - as well as the ones I hated...it turned out that six of us had died, several by slow suicide in the form of heroin abuse, and at least two by faster means. When two police officers arrived out of the blue at Paul Connolly's door, he learned the shocking news that, out of the eight children with whom he shared a dormitory in care, only two were still alive. Fighting the Odds Feb 24 2023 I'd prepared myself for a life without love. Lost my parents and anyone else I got close to. Nothing good ever stays for long. I'm a statistic after all. Former foster kid. Former drug addict, alcoholic. Always thought I was destined to be alone. Always felt like I wasn't worth a damn. Then Carla Evans walked into my life. One look at her in that uptight, buttoned-up outfit and I knew I had to have her. For a night, I'd indulge myself in the fantasy of a girl like her actually wanting a guy like me. Then she moved here with no job and that ridiculous bucket list. I knew she needed my help. I just didn't expect to need hers. I spent a long time letting myself believe I didn't deserve happiness. It took me a while (and a whole lot of therapy) to realize I'd had it all wrong. Now I know. And now I have to tell her. \*Fighting the Odds deals with sensitive topics like drug addiction, death, foster care, homelessness, and miscarriage. But it is also an inspirational story of love, friendship, hope, and finding your inner warrior.

**Against All Odds** Aug 26 2020 This book presents an overview of the ways in which women have been able to conduct mathematical research since the 18th century, despite their general exclusion from the sciences. Grouped into four thematic sections, the authors concentrate on well-known figures like Sophie Germain and Grace Chisholm Young, as well as those who have remained unnoticed by historians so far. Among them are Stanisława Nidodym, the first female students at the universities in Prague at the turn of the 20th century, and the first female professors of mathematics in Denmark. Highlighting individual biographies, couples in science, the situation at specific European universities, and sociological factors influencing specific careers from the 18th century to the present, the authors trace female mathematicians' status as it evolved from singular and anomalous to virtually commonplace. The book also offers insights into the various obstacles women faced when trying to enter perhaps the "most male" discipline of all, and how some of them continue to shape young girls' self-perceptions and career choices today. Thus, it will benefit scholars and students in STEM disciplines, gender studies and the history of science; women in science, mathematics and at institutions, and those working in mathematics education.
