Doctor Dealer Jan 07 2022 From the # 1 New York Times–bestselling author of *Black Hawk Down: The “shocking” story of the country’s unlikeliest drug kingpin* (The Baltimore Sun). By the early 1980s, Larry Lavin had everything

going for him. He was a bright, charismatic young man who rose from working-class roots to become a dentist with an Ivy League education and a thriving practice, and a beloved father with a well-respected family in one of Philadelphia’s most exclusive suburbs. But behind the façade of his success was a dark secret: Lavin was also the mastermind behind a cocaine empire that spread from Miami to Boston to New Mexico, catering to lawyers, stockbrokers, and other professionals, and generating an annual income of \$60 million for the good doctor. Now, Mark Bowden, a “master of narrative journalism” (The New York Times Book Review) tells the harrowing saga of Lavin’s rise and fall in “a shocking American tragedy . . . [that] shoots straight from the hip” (Pittsburgh Post-Gazette). “An engrossing crime story and a compelling morality tale.” —The Arizona Republic “Has all the elements of a chilling suspense thriller . . . A smoothly crafted, exciting, can’t-put-it-down book.” —The New Voice (Louisville)

Social Assistance in Albania Feb 20 2023

Albania provides a small amount of social assistance to nearly 20% of its population through a system which allows a degree of community discretion in determining distribution. This study investigates the poverty targeting of this program. It indicates that relative to other safety net programs in low income countries, social assistance in Albania is fairly well targeted to the poor.

Traffic Related Air Pollution and Internal Combustion Engines Nov 12 2019

Atmospheric pollution has been a major problem in human technological development and motor vehicles are one of the major sources of particulate matter pollution. This book investigates current models designed to predict air pollutant emissions and fuel consumption for road traffic and presents the outputs of statistical models developed to derive emission factors. Information on the use of Geographic Information Systems and traffic area air pollution monitoring stations is presented in

order to comprehend the variations of traffic-related air pollution. Furthermore, this book reports the pros and cons of hydrogen-fuelled internal combustion engines, a study of the new technology to produce syngas from methane with a compression ignition engine. An overview of the characteristics of the factors influencing the thermal efficiency of spark ignition engines fuelled with hydrogen is given as well.

Mergers and Acquisitions Jun 19 2020 *Mergers and Acquisitions: Text and Cases* provides guiding frameworks and information on Mergers and Acquisitions (M&A), complemented by a set of well-matched cases. The purpose is not to rehash the existing set of M&A books, but to provide real-world examples of situations that allow the reader to utilize the core concepts and processes in M&A. The authors present a process-based framework of M&A, within which the reader is given in-depth information about the steps in doing deals. The reader then has the ability to apply these concepts and frameworks to the full-length cases. The book can be used as a stand-alone text because it provides good coverage of the entire M&A process. In order to more specifically focus on any particular aspect of M&A, the text can easily be supplemented with focused materials.

This collection is a resource for studying the history of the evolving technologies that have contributed to snowmobiles becoming cleaner and quieter machines. Papers address design for a snowmobile using the EPA test procedure and standard for off-road vehicles, along with more stringent U.S. National Park Best Available Technology (BAT) standards that are likened to those of the California Air Resourced Board

(CARB). Innovative technology solutions include:

- Standard application for diesel engine designs
- Applications to address and test both engine and track noise
- Benefits of the Miller cycle and turbocharging

The SAE International Clean Snowmobile Challenge (CSC) program is an engineering design competition. The program provides undergraduate and graduate students the opportunity to enhance their engineering design and project management skills by reengineering a snowmobile to reduce emissions and noise. The competition includes internal combustion engine categories that address both gasoline and diesel, as well as the zero emissions category in which range and draw bar performance are measured. The goal of the competition is designing a cleaner and quieter snowmobile. The competitors' modified snowmobiles are also expected to be cost-effective and comfortable for the operator to drive.

Bion and Primitive Mental States Jul 13 2022 This clinically focused book explores W. R. Bion's thinking on primitive and unrepresented mental states and shows how therapists can work effectively with traumatized patients who are difficult to reach. The author illuminates how trauma survivors suffer from direct access to primal undifferentiated positions of the psyche that lie outside the symbolic order of the mind and are resistant to treatment. This access, unmediated by symbolic representation but represented in the body, disrupts the normal trajectory of development and of relationship. Integrating theory and clinical application, the book addresses processes of symbolization,

somatic receptivity, and the use of countertransference when working therapeutically with undeveloped areas of the mind. It also demonstrates how primitive body relations and object relations include the body of the analyst as part of the analytic frame and are essential in establishing a therapeutic alliance. Illustrated with detailed clinical vignettes, *Bion and Primitive Mental States* is important reading for psychoanalysts, psychologists, social workers, and educators who wish to understand primitive states of mind and body in patients who have previously been considered untreatable.

The Bombardier Story Oct 16 2022

"Bombardier was under attack again. This time, the flack was coming from the president of Berlin-based Adtranz, the rail equipment subsidiary of DaimlerChrysler AG. In 1999, he traveled to Toronto and made a speech in which he warned that Adtranz was coming to challenge Montreal-based Bombardier on its home turf of North America. His motive was retaliation: he did not like Bombardier's invasion of Adtranz's European markets. So he was going to put the upstart from the hinterlands in its place. 'The major player in the United States of the future will be, I believe, Adtranz,' he predicted." "In the spring of 2001, Bombardier acquired Adtranz. The purchase more than doubled annual revenues at Bombardier's rail equipment division and catapulted Bombardier into the number one spot in the railway equipment industry, ahead of the rail divisions of Franco-British conglomerate Alstom and German industrial giant Siemens." "What made Bombardier's progression in rail equipment all the more remarkable is that it occurred while yet another progression was under way at Bombardier's aerospace group. In 1986, the company decided to enter the aerospace sector by acquiring business-jet maker Canadair Ltd. of Montreal. This was followed by acquisitions of several other ailing aerospace companies, including world-renowned Learjet. Turning around these floundering assets, Bombardier came out of nowhere to become, in a little more than a dozen years, the third-largest member of the civil aerospace manufacturing industry. Only US giant Boeing and European colossus, the Airbus consortium, are larger." — from *The*

Circular Economy Jul 21 2020 This book highlights the notion of Circular Economy under the umbrella of Sustainability because of the widespread momentum it is gaining. Today the whole world is certainly in emergent need of an alternative system to traditional economy which is linear, i.e. make, use and dispose to get rid-off the waste and very important to ensure continuous use of resources, which is possible by the advent of circular economy. A circular economy aims to utilize the resources in use for as long as possible, extract the maximum value from them during use, then recover and regenerate products and materials at the end of each service life vis-à-vis traditional linear model. This book discusses circular economy in terms of assessment with various case studies.

Hunters and Bureaucrats Nov 05 2021 This book challenges this conventional wisdom that land claims and co-management -- two of the most visible and celebrated elements of this restructuring the relationship between Aboriginal peoples and the Canadian state -- will help reverse centuries of inequity. Based on

three years of ethnographic research in the Yukon, the author examines the complex relationship between the people of Klane First Nation, the land and animals, and the state. This book moves beyond conventional models of colonialism, in which the state is treated as a monolithic entity, and instead explores how "state power" is reproduced through everyday bureaucratic practices -- including struggles over the production and use of knowledge.

Continental Drift Nov 24 2020 "The most convincing portrait I know of contemporary America . . . a great American novel."— James Atlas, *The Atlantic Monthly* A reissue of Russell Banks' classic novel about love and sex, racism and poverty, and the failures of the American dream, now with P.S. and as a Harper Perennial Modern Classic. Russell Bank's searing tale of uprootedness, migration, and exploitation in contemporary America brings together two of the dominant realms of his fiction—New England and the Caribbean—skillfully braided into one taut narrative. *Continental Drift* is the story of a young blue-collar worker and family man who abandons his broken dreams in New Hampshire and the story of a young Haitian woman who, with her nephew and baby, flees the brutal injustice and poverty of her homeland.
