Officially called the Fighting Falcon by the USAF (a name loathed by pilots and ground crews), the F-16 is popularly referred to as the "Viper". First

introduced into service with the USAF in 1978, the F-16 is a successful all-weather multi-role jet fighter of which more than 4,500 have been built and exported to 25 countries worldwide. It remains in service more than 30 years later. The Viper incorporates a number of innovative design features that include a frameless bubble canopy for better visibility, pilot's side-mounted control stick for ease of control when manoeuvring, a seat reclined 30 degrees to reduce the effect of g-forces on the pilot, and the first use of a relaxed static stability/fly-by-wire flight control system that makes the Viper a highly agile aircraft. At the 'business end' the F-16 has an internal M61 Vulcan cannon and eleven weapon-mounting stations.

The US-designed and built McDonnell Douglas F/A-18 Hornet is one of the most important Fourth Generation fighters in the world. Its twin-engine, twin-tails (canted outwards), and leading edge root extensions make it one of the most recognizable fighters in operation. The latest version is the enlarged Super Hornet. It was controversial in being chosen

as the replacement for the much loved F-14 Tomcat, but the truth is that it is a potent and fearsome fighter that boasts one of the most capable radars in service and a weapons loadout that takes full advantage of it. The Super Hornet currently performs the bulk of the Western world's airstrikes on the nefarious terrorist group 'ISIS' in Iraq and Syria. Developed initially by Northrop as the P-530 Cobra in response to the US Air Force's Light Weight Fighter competition (winner: the General Dynamics F-16), the Hornet had a troubled start in life. Designated the YF-17 for the LWF fly-off in 1974, it failed to impress the Air Force. However, contractor McDonnell Douglas stepped in confident that it could be improved sufficiently to make it a contender for the US Navy's new fighter competition. McAir, as was often the case, were right. Re-designed and re-designated the F/A-18 (fighter/attack), it won the competition and entered service with the US Navy as a carrier-borne, multi-role fighter, marking the beginning of the Hornet's journey from Air Force 'reject' to 'king' of the US Navy's Fleet Defenders With the help of the Clymer Snowmobile Service Manual 11th Edition in your toolbox, you will be able to maintain, service and repair your snowmobile to extend its life for years to come.
