The field of multilingual testing and assessment has grown rapidly in recent years due to the widespread need to integrate immigrant populations into mainstream education and to provide fair and equitable forms of assessment for all students. However, a continuing emphasis on bilingual students has created a significant gap in testing and assessment research. This book addresses the need for research and guidance on testing multilingual students: at its heart is the difference between designing multilingual tests and testing multilingual individuals. The author introduces an integrated approach to testing and assessment, a flexible approach that combines information about multilingual learners' knowledge, skills and abilities with information about their language background and living environment. The book provides an overview of existing research conducted with multilingual populations; provides guidelines for test-writers, teachers and educators that outline the steps involved in the design, administration, scoring and interpretation of tests for multiple language speakers; and demonstrates how to use the integrated approach to testing and assessment in a multilingual educational context. Over the last forty years, the estimated number of international schools worldwide has increased from fewer than 300 to 6400 in 2012. This explosion is a response to the needs of a world in which borders are being traversed with ever greater ease and children increasingly need to be prepared for the global opportunities that await them. In this book, international school specialists reflect on where the movement has come from, how it stands and where developments are heading, offering insightful observations on these unique institutions. This is a comprehensive resource for students, researchers and professionals with an interest in the future of education in a globalized world.

English for Geographers is a textbook intended to be used not only by students of the university degree of Geography, but also by anybody interested in the field of geography. It is divided into seven different units, each of them dealing with a specific topic (introduction to geography, human geography, environmental geography, tourist geography, Internet for geographers, cartography and climatology). Each of the units offers the learners a variety of activities to improve their skills, mostly reading and writing in English, as well as the capacity to increase their vocabulary related to this field. Following the European philosophy that promotes the use of new technologies throughout the teaching/learning process, students are proposed a series of activities such as an online glossary (which allows students to build up their own classroom dictionary), and a class forum (to exchange their knowledge, opinions, and so on). Eventually, at the end of each unit, learners are asked to fill out a conscious learning grid chart in order to make them aware of their learning process, as encouraged by EHEA (European Higher Education Area). After fulfilling this course, students are expected to reach level B1 according to Common European framework of reference for languages. Endorsed by

The book that inspired the major new motion picture *Mandela: Long Walk to Freedom*. Nelson Mandela is one of the great moral and political leaders of our time: an international hero whose lifelong dedication to the fight against racial oppression in South Africa won him the Nobel Peace Prize and the presidency of his country. Since his triumphant release in 1990 from more than a quarter-century of imprisonment, Mandela has been at the center of the most compelling and inspiring political drama in the world. As president of the African National Congress and head of South Africa's anti-apartheid movement, he was instrumental in moving the nation toward multiracial government and majority rule. He is revered everywhere as a vital force in the fight for human rights and racial equality. *LONG WALK TO FREEDOM* is his moving and exhilarating autobiography, destined to take its place among the finest memoirs of history's greatest figures. Here for the first time, Nelson Rolihlahla Mandela tells the extraordinary story of his life--an epic of struggle, setback, renewed hope, and ultimate triumph. Cambridge IGCSE Geography Revision Guide has been designed specifically to meet the requirements of Cambridge IGCSE Geography syllabus (0460). It has been written to help students prepare for the Cambridge IGCSE Geography examination. In this special edited volume, the editors and invited English Medium Instruction (EMI) researchers, from different parts of the world, outline the latest EMI research methods. Providing academic instruction using English is rapidly spreading in many countries where English is a second or foreign language, and there is a growing interest in researching the effectiveness and effects of EMI across different educational levels. This volume includes chapters on everything from research into classroom interaction to teachers' and students' perceptions and motivations to language challenges and strategies and the pedagogical implications of translanguaging in EMI classrooms. These specific topics were chosen to reflect different approaches to researching EMI. Each chapter focuses on a specific type of research methodology. It begins with an overview of the literature of the topic under discussion. Then an example study is provided to illustrate how this methodology can be used to investigate EMI. Each chapter identifies the process that the EMI researcher used to conduct their research and discusses key dilemmas they faced, focusing particularly on the methodological issues they encountered. By exploring these issues, this volume hopes to inform theory (or the lack thereof) underlying research into the phenomenon of EMI. This volume is indispensable for EMI tutors, curriculum developers, policymakers, and teachers, as well as students at both undergraduate and postgraduate levels. It is particularly valuable for researchers from across the globe working in the fields of applied linguistics, language education, English for Academic Purposes (EAP), English Language Teaching (ELT), and Teaching English to Speakers of Other Languages (TESOL). Debates in Geography Education encourages student and practising teachers to engage with and reflect on key issues, concepts and debates in their specialist subject teaching. It aims to enable geography teachers to reach their own informed judgements and argue their point of view with deeper theoretical knowledge and understanding. Expert editors and contributors provide a balance of experience and perspectives and offer international, historical and policy contexts, evidence informed classroom debates and a glimpse of the subject's expanding horizons. Debates considered include: what constitutes knowledge in geography? constructing the curriculum; how do we link assessment to making progress in

geography? the contribution of fieldwork and outdoor experiences; technology and media; how we use Geographical Information; how geography contributes to ¿global learning¿; sustainable development and geography education. The comprehensive, rigorous coverage of these key issues, together with carefully annotated selected further reading, reflective questions and a range of specific web-based resources, will help support shape your own research and writing. Debates in Geography Education is a source of knowledge, experience and debate that will be essential reading for all students studying at Masters level, practising teachers who want to develop a better understanding of the issues that shape their practice, and Education Studies students considering in-depth subject teaching. Learning to Teach Geography in the Secondary School has become the widely recommended textbook for student and new teachers of geography. It helps you acquire a deeper understanding of the role, purpose and potential of geography within the secondary curriculum, and provides the practical skills needed to design, teach and evaluate stimulating and challenging lessons. It is grounded in the notion of social justice and the idea that all students are entitled to a high quality geography education. The very practical dimension provides you with support structures through which you can begin to develop your own philosophy of teaching, and debate key questions about the nature and purpose of the subject in school. Fully revised and updated in light of extensive changes to the curriculum, as well as to initial teacher education, the new edition considers the current debates around what we mean by geographical knowledge, and what's involved in studying at Masters level. Key chapters explore the fundamentals of teaching and learning geography: Why we teach and what to teach Understanding and planning the curriculum Effective pedagogy Assessment Developing and using resources Fieldwork and outdoor learning Values in school geography Professional development Intended as a core textbook and written with university and school-based initial teacher education in mind, Learning to Teach Geography in the Secondary school is essential reading for all those who aspire to become effective, reflective teachers. Praise for previous editions of Learning to Teach Geography in the Secondary School... 'This is a practical and visionary book, as well as being superbly optimistic. It has as much to offer the experienced teacher as the novice and could be used to reinvigorate geography departments everywhere. Practical activities and ideas are set within a carefully worked out, authoritative, conceptual framework.' - The Times Educational Supplement 'This is a modern, powerful, relevant and comprehensive work...a standard reference for many beginning teachers on geography initial teacher training courses.' - Educational Review Cambridge IGCSE and O Level Geography has been written specifically for Cambridge International syllabuses 0460 and 2217.
