Introduction to Fuzzy Logic using MATLAB Jul 23 2020 This book provides a broad-ranging, but detailed overview of the basics of Fuzzy Logic. The fundamentals of Fuzzy Logic are discussed in detail, and illustrated with various solved examples. The book also deals with applications of Fuzzy Logic, to help readers more fully understand the concepts involved. Solutions to the problems are programmed using MATLAB 6.0, with simulated results. The MATLAB Fuzzy Logic toolbox is provided for easy reference.

60 Years of Holden Dec 18 2019 "60 Years of Holden" builds on the success of its predecessors (45 and 50 Years of Holden), bringing together vast amounts of technical information and specifications on the 100 model series that Holden has produced since it began manufacturing. Beginning with Holden's pre-1948 history, this book charts Holden's course in Australia, with

Never Far Away Mar 13 2022 Never Far Away is a short story and a resource for the parent who has a child that doesn't like to separate from them when time for school or work. It has illustrative pictures and content for the parent and child to interact before they go to their day.

On a Global Mission: The Automobiles of General Motors International Volume 1 Aug 06 2021 Volume One traces the history of Opel and Vauxhall separately from inception through to the

and thereafter collectively to 2015. Special attention is devoted to examining innovative engineering features and the role Opel has taken of providing global platforms for GM. Each model is examined individually and supplemented by exhaustive supporting specifications tables. The fascinating history of Saab and Lotus begins with their humble beginnings and examines each model in detail and looks at why these unusual marques came under the GM Banner. Includes a penetrating review of Saab through to its unfortunate demise. Volume Two examines unique models and variations of Chevrolet and Buick manufactured in the Southern Hemisphere and Asia that were never offered in North America. Daewoo, Wuling and Baojun and other Asian brands covered in detail. This volume concludes with recording the remarkable early success of Holden and its continued independence through to today. Volume Three covers the small scale assembly operations around the world and the evolution of GM's export operations. A brief history of Isuzu, Subaru and Suzuki looks at the three minority interests GM held in Asia. The GM North American model specifications are the most comprehensive to be found in a single book. Global and regional sales statistics are included. GM executives and management from around the globe are listed with the roles they held. An index ensures that these volumes serve as the ideal reference source on GM.

Global Business Strategy May 15 2022 This book presents theories and case studies for corporations in developed nations, including Japan, for designing strategies to maximize opportunities and minimize threats in business expansion into developing nations. Case studies featured here focus on Asia, including China and India, and use examples of Japanese manufacturers. Five case studies are provided, including Hitachi Construction Machinery and Shiseido in China and Maruti Suzuki in India. These cases facilitate the reader's

understanding of the business environments in emerging economies. This volume is especially recommended for business people responsible for international business development, particularly in China and India. In addition, the book serves as a useful resource for students in graduate-level courses in international management.

Introduction to Genetic Algorithms Jan 31 2021 This book offers a basic introduction to genetic algorithms. It provides a detailed explanation of genetic algorithm concepts and examines numerous genetic algorithm optimization problems. In addition, the book presents implementation of optimization problems using C and MATLAB 7.0, as well as simulated solutions for genetic algorithm problems. It also includes application case studies on genetic algorithms in emerging fields.

Cars 3: Taken By Storm Feb 18 2020 Read along with Disney! Lightning McQueen is suddenly pushed out of racing by a mysterious rookie who's part of a new generation of high-tech racers. Read along with word-for-word narration as he seeks help from a friend to get back in the game.

Million Cars for Billion People Jan 16 2022 Can one car transform a nation? The Ford Model T did do so a century ago when it replaced the horse, brought about a revolution in agriculture, became a stimulus to urbanization that eventually changed the landscape of America. Though the Maruti 800, the Tata Indica, the Hyundai Santro and the Maruti Alto, became engines of growth for India, these cars neither drove away the cow nor changed the way people travelled. Tata's Nano was expected to change all that and become the ultimate people's car, capturing the imagination of the middle class across nations and cultures. In spite of its petite dimensions,

Nano was meant to stand tall. Yet it did not. What caused it to rise and fall from grace despite being lauded as the 'right product at the right time' and 'the most significant new car since the Ford Model T was introduced 100 years ago'? But is it really all over or is there still hope for India's 'little wonder'? What will the people's cars of tomorrow be like? A Million Cars for a Billion People delves into the questions, concerns and doubts, as well as the many misconceptions and myths, that have gathered momentum over the years about India's automotive history and the industry's mission to create a true 'people's car'. The very first cars that came to India; the early beginnings of the industry; the nascent history of the automobile across nations like Germany, France, US, the UK, Italy, Japan and South Korea, is narrated with authority and charm, from the viewpoint of the quest for the ultimate people's car.

Dark Fiber Jan 19 2020 The Internet is being closed off by businesses and governments intent on creating an environment of dissent. In this text, the author covers concerns and issues of network navigation and usability without losing sight of the agenda of those who control hardware, software, content, design and delivery.

KAOS. Ten Years of Hacking and Media Activism Nov 16 2019
Autistici/Inventati was founded in 2001 with the goal of creating an autonomous server and providing free web services which respect users' privacy and anonymity. Having grown into a distributed network spread over several countries, their projects and services have repeatedly been subjected to legal pressure by governments; however, even while being forcibly seized, shut down and under invasive surveillance operations, they survived. As of today they offer secure and non-commercial tools for free communication.

thousands of users. +KAOS is a cut and paste of interviews, like a documentary film transposed on paper. It describes the peculiar relationship between hacktivism and activism, in Italy and beyond, highlighting the importance of maintaining digital infrastructure. While this may not sound as glamorous as sneaking into a server to leak data, it is a fundamental topic: not even the most emboldened group of hacktivists can operate without the services of radical collectives.

Proceedings of International Conference on Recent Trends in Machine Learning, IoT, Smart Cities and Applications 21 2020

This book gathers selected research papers presented at the International Conference on Recent Trends in Machine Learning, IOT, Smart Cities & Applications (ICMISC 2020), held on 29–30 March 2020 at CMR Institute of Technology, Hyderabad, Telangana, India. Discussing current trends in machine learning, Internet of things, and smart cities applications, with a focus on multi-disciplinary research in the area of artificial intelligence and cyber-physical systems, this book is a valuable resource for scientists, research scholars and PG students wanting to formulate their research ideas and find the future directions in these areas. Further, it serves as a reference work for anyone wishing to understand the latest technologies used by practicing engineers around the globe.

Automotive Systems Dec 30 2020 This book introduces the principles and practices in automotive systems, including modern automotive systems that incorporate the latest trends in the automobile industry. The fifteen chapters present new and innovative methods to manage the complexities of the vehicle of the future. Topics like vehicle classification, structure and layouts, engines, transmissions, brakes, suspension and steering are illustrated with modern concepts, such as battery-electric, hybrid electric and fuel cell vehicles and vehicle maintenance practices. Each chapter is supported with examples, illustrative figures, multiple-choice questions and review questions. Aimed at senior undergraduate and graduate students in automotive/automobile engineering, mechanical engineering, electronics engineering, this book covers the following: Construction and working details of all modern as well as fundamental automotive systems Complexities of operation and assembly of various parts of automotive systems in a simplified manner Handling of automotive systems and integration of various components for smooth functioning of the vehicle Modern topics such as battery-electric, hybrid electric and fuel cell vehicles Illustrative examples, figures, multiple-choice questions and review questions at the end of each chapter

The Savage Detectives Aug 26 2020 With an afterword by Natasha Wimmer. Winner of the Herralde Prize and the Rómulo Gallegos Prize. Natasha Wimmer's translation of The Savage Detectives chosen as one of the ten best books of 2007 by the Washington Post and the New York Times. New Year's Eve 1975, Mexico City. Two hunted men leave town in a hurry, on the desert-bound trail of a vanished poet. Spanning two decades and crossing continents, this is a remarkable quest through a darkening universe – our own. A journey told and shared by a generation of lovers, rebels and readers, whose testimonies are woven together into one of the dazzling Latin American novels of the twentieth century.

On a Global Mission: The Automobiles of General Motors International Volume Dec 22 2022 Volume One traces the history of Opel and Vauxhall separately from inception through to the 1970s and thereafter collectively to 2015. Special attention is devoted to examining innovative engineering features and the role Opel has taken of providing global platforms for GM. Each model is examined individually and supplemented by exhaustive supporting specifications tables. The fascinating history of Saab and Lotus begins with their humble beginnings and examines each model in detail and looks at why these unusual marques came under the GM Banner. Includes a penetrating review of Saab through to its unfortunate demise. Volume Two examines unique models and variations of Chevrolet and Buick manufactured in the Southern Hemisphere and Asia that were never offered in North America. Daewoo, Wuling and Baojun are

other Asian brands covered in detail. This volume concludes with recording the remarkable early success of Holden and its continued independence through to today. Volume Three covers the small assembly operations around the world and the evolution of GM export operations. A brief history of Isuzu, Subaru and Suzuki leads to the three minority interests GM held in Asia. The GM North American model specifications are the most comprehensive to be found in a single book. Global and regional sales statistics are included. GM executives and management from around the globe are listed with the roles they held. An index ensures that these volumes serve as the ideal reference source on GM.

Heat Transfer and Fluid Flow in Microchannels June 04 2021 This first book in a new series in Thermal and Fluid Physics and Engineering, edited by Professor G.F. Hewitt, is of particular importance to the field at the present time. Edited by Professor Celata, the topic of microchannels is finding a very large range of applications, particularly in the context of cooling of electronic equipment. Fluid flow and heat transfer processes at the microscale bring into play many aspects that are not significant at the macroscale. The book fills a void in the existing literature and covers a large body of new knowledge in the thermal-fluid dynamics theory and applications in micro-geometries. The volume also presents a critical assessment of the state-of-the-art in the field. Intended for both academic and industrial audiences.

Monthly Review of the Indian Economy Dec 10 2021

Aesthetics in Marketing Aug 18 2022 A book for Indian designers and brand marketers, *Aesthetics in Marketing* primarily deals with understanding aesthetics beyond its visual association and marketing relevant to product designing strategies. It is the first attempt

kind to understand the influence of aesthetics in the context of very important sectors of the industry—consumer durables and automobile. The book analyses various aesthetic attributes, qualities and elements in a product and deliberates on the importance of these and the kind of balance necessary among them for designing successful products. It stands out on account of the theory, concepts and models discussed, which have a strong foundation in the authors' primary research. Through real-life case studies, interviews, and company and consumer surveys, the authors have brought to the fore the importance of aesthetics in various aspects of marketing, like cultivation of a brand image, and have focused on the role played by demographic variables in influencing product buying decisions. Bringing a whole new meaning to the adage `beauty is in the eye of the beholder`, this book will certainly lead to introspection on the importance of `aesthetics` in the market value of a product.
