Nowadays, engineering large-scale software systems means dealing with complex systems composed of pervasive software components that move around and adapt to nondeterministic and open environments, like the Internet, in order to achieve systems design goals through the coordination of autonomously distributed services. The agent metaphor, in particular software agents and multi-agent systems (MAS), constitutes a promising approach for covering most of the software development life cycle, from conceptual modeling and requirements specification to architectural definition, design, and implementation. This book presents 17 carefully reviewed papers arranged in order to provide a coherent survey of how to exploit agent properties and MAS issues in today's software systems. The book offers the following topical sections: - software engineering foundations - requirements engineering and software architecture - coordination and mobility - reuse -dependability -empirical studies and applications

This volume extends Michal Kalecki's investment cycle analysis into an integrated dynamic model of how levels of confidence affect investment decisions by entrepreneurs. Confidence is seen as susceptible to a range of factors, which alter over time to create different structures of investment at different periods of economic development.

Using this susceptibility model, the author shows how corporate and governmental strategic planners can better design policies to mitigate the instability of investment patterns. Such policies are seen as capable of diminishing the aggravating effect that investment instability has on business cycles and employment in capitalist economies. This book is a complete reference for all clinicians who are interested in incorporating into their daily practice the techniques available to reduce the duration of orthodontic treatment and to overcome other treatment limitations. It focuses especially on micro-osteoperforations (MOPs) as the most conservative, efficient, and versatile approach to increase the rate of tooth movement. The opening chapters describe the biological principles of current accelerated techniques at the molecular and cellular levels and introduce guidelines on how to select the best acceleration approach based on each patient's needs. Clinicians are then guided step by step through the application of MOPs, case selection, and treatment planning. It is explained how MOPs can be incorporated into daily mechanotherapy for the treatment of different malocclusions and how to take advantage of the catabolic and anabolic effects of the procedure to expand the boundary of orthodontic and orthopaedic corrections. The book is written in a simple and clear language with many illustrations and clinical examples to facilitate understanding of concepts and procedures. In addition, it is a rich source for academicians and researchers interested in a comprehensive and updated review

on theories of tooth movement and accelerated orthodontic techniques. There is one Teacher's Guide which corresponds with each Student Activities Book, and consists of two parts: Answers and Instructional Aids for Teachers, and Answer Sheets. The Answers and Instructional Aids for Teachers provides advice for how to optimize the effectiveness of the activities, as well as brief explanations and comments on each question in the student activities. The Answer Sheets may be duplicated and distributed to students as desired. Use of the Answer Sheets is particularly recommended for activities requiring a lot of graphing or drawing. This book presents a comprehensive, authoritative and independent account of the rules, institutions and procedures governing the international climate change regime. Its detailed yet user-friendly description and analysis covers the UN Framework Convention on Climate Change, the Kyoto Protocol, and all decisions taken by the Conference of the Parties up to 2003, including the landmark Marrakesh Accords. Mitigation commitments, adaptation, the flexibility mechanisms, reporting and review, compliance, education and public awareness, technology transfer, financial assistance and climate research are just some of the areas that are reviewed. The book also explains how the regime works, including a discussion of its political coalitions, institutional structure, negotiation process, administrative base, and linkages with other international regimes. In short, this book is the only current work that covers all areas of the climate change regime in such depth, yet in such a uniquely accessible and objective way. The Macao Master Tax Guide 2015/2016 offers a thorough discussion on Macao taxation law for taxpayers, practitioners and students. The book explores

the main direct taxes (i.e. complementary tax, professional tax and property tax), and indirect taxes in Macao (including tourism tax, stamp duty and excise tax), and topics like tax liability obligations, and other procedural matters are detailed in the process. The Guide fulfils a valuable commercial need in assessing the start-up and ongoing taxation status of these companies, including registration and filing obligations. In addition to the continuation of tax exemptions previously introduced, the Macao SAR Government also brought new temporary exemptions and tax incentives into operation. Like previous editions, these exemptions are accompanied by worked examples to illustrate their operation. Since 2002, as a stimulus to attract more businesses to invest in Macao, the Macao SAR Government announced a series of preferential tax treatments and incentives have been granted and published at the end of each year. The latest preferential tax treatments and incentives granted by the Macao SAR Government have been highlighted. Key Features: In addition to the continuation of tax exemptions previously introduced, the Macao SAR Government also brought new temporary exemptions and tax incentives into operation. Like previous editions, these exemptions are accompanied by worked examples to illustrate their operation. As all tax laws in Macao are stated in Chinese and Portuguese, the Macao Master Tax Guide 2015/2016 is the first comprehensive English version of the taxation landscape in Macao. The Macao Master Tax Guide 2015/16 is updated by Ernst & Young as the Consultant Author. Examines the main types of direct taxes (including complementary tax, professional tax, property tax) and indirect taxes (including stamp duty, tourism tax, excise tax) imposed in

An ALA Notable Children's Book from the award-winning author of *Monster* in which "wit, sensitivity, and insight [are combined] to create this funny, fast-paced story about three orphaned children and the Elks, a Little League baseball team" (Publishers Weekly). T.J., his younger brother, Moondance, and Mop—Miss Olivia Parrish—grew up together in the same orphanage. Now T.J. and Moondance have been adopted, and Mop has to find a family before the orphanage closes and "leftover" kids are sent away. Mop hopes that if she can play catcher for the Elks, the Little League baseball team that her friends have joined, the coach will be so impressed that he and his wife will adopt her. It's going to take a lot of

teamwork for her, T.J, and little Moondance to make their dreams come true! This study examines the carpeting-resilient flooring controversy, an excellent case for classroom use, particularly in courses on business policy and industrial engineering. The PM Teacher's Guides offer invaluable support and guidance to help you gain the maximum benefit from each of the Story Books, Non-fiction Books and Traditional Tales and Plays. Book: Anthology Edition. The 4th edition is a vastly expanded and updated version of Dr. Steve Hodges' groundbreaking guide to resolving enuresis (bedwetting and daytime pee accidents) and encopresis (poop accidents). The book is for parents who are tired of waiting for their child to "outgrow" accidents and who think they have "tried everything." Experts at Mayo Clinic call M.O.P. "incredibly effective." Parents call it "life changing" and

"a life saver." M.O.P. stands for the Modified O'Regan Protocol, named for Sean O'Regan, M.D., a pioneer in bedwetting research. The four-phase regimen, combining enemas and laxatives, has been modified by pediatric urologist Steve Hodges, M.D., of Wake Forest University School of Medicine. Published research shows M.O.P. is the only reliable solution to bedwetting and daytime accidents - far more effective than medication, bedwetting alarms, or Miralax. M.O.P. is based on a simple, proven fact: bedwetting is caused by chronic, severe constipation. Stool piles up in the rectum, pressing against the bladder nerves; only when the rectum is cleared out on a daily basis can it shrink back to size, stop aggravating the bladder, and regain the tone and sensation to full evacuate daily. The 4th edition of the Anthology includes Dr. Hodges' updated guidance on Ex-Lax, oil-retention enemas (the Double M.O.P. regimen), and large-volume enemas (M.O.P.+). The Anthology also includes tracking calendars for parents and children; "The Physician's Guide to M.O.P.," created for parents to hand to their medical professionals; and "Answers to 53 Questions About M.O.P.," a compilation of helpful posts from Dr. Hodges' private Facebook support group for parents. New to the 4th edition: the introduction to "M.O.P. for Teens and Tweens," which offers bedwetting kids ages 10 to 18 encouragement and explanations they can relate to. This guide provides practical guidance for managers of portfolios and those working in portfolio offices as well as those filling portfolio management roles outside a formal PfMO role. It will be applicable across industry sectors. It describes both the Portfolio Definition Cycle (identifying the right, prioritised, portfolio of programmes and projects) and the Portfolio Delivery Cycle (making sure the

portfolio delivers to its strategic objectives). Running Times magazine explores training, from the perspective of top athletes, coaches and scientists; rates and profiles elite runners; and provides stories and commentary reflecting the dedicated runner's worldview.
