Secondary Education in Modern India (1800 - 2022) is a rare treatise of educational research, based on authentic primary data collected directly from archives. It spans two centuries and two decades of development of Secondary Education in India – from its faint faltering beginnings to the nationwide obsession with it today. It covers the gradual evolution of secondary education in India, presenting in detail the changing policies and programs, reports of different National Education Commissions, and the structural changes over a vast time frame. It is an invaluable reference book for students of education and those engaged in researching the development of education in India. This book has been considered by academicians and scholars of great significance and value to literature. This forms a part of the knowledge base for future generations. So that the book is never forgotten we have represented this book in a print format as the same form as it was originally first published. Hence any marks or annotations seen are left intentionally to preserve its true nature. The Seamanship Primer is a complete study and revision guide, based on the international Standards of Training, Certification and Watch Keeping, for cadet and serving crew in the merchant marine sector. It is the ideal study package for anyone preparing for the oral assessment taken by every marine professional to acquire a Deck Certificate of Competency at various levels of seniority up through Master. With hundreds of tutorial questions and answers, plus interactive multiple choice examinations, the Primer is a trusted study aid for all international STCW Deck Officer candidates including Officer of the Watch, Chief Mate and Master positions, plus those working coastal and inland waters in the fishing industry such as Deck Officers. In 1996, Dr. Nancy Olivieri identified an unexpected risk associated with a drug she was testing to treat a rare blood disorder. When she moved to inform patients of this risk as required by medical ethics, the drug manufacturer, Apotex, terminated the research trial and threatened to take legal action. This was the opening salvo in a long contest involving Olivieri, Apotex, Toronto's Hospital for Sick Children, and the University of Toronto. Olivieri expected to receive support on the ethical issue from the hospital and the university, but neither institution provided effective support against ongoing legal harassment by Apotex. Intense media coverage followed the case from beginning to end. The Olivieri Report is the report of an independent inquiry--commissioned by the Canadian Association of University Teachers--into the case, conducted by three widely respected Canadian academics. H.S.C. SAMPLE PAPERS (Maharashtra Board) for 2022 Exam (Science Stream) - Handbook of 8 Subjects, Activity Sheet & Question Papers on New Pattern The challenge of widening access and participation in higher education in a manner that ensures students are successful in their studies is a major issue globally and a significant research-focus within higher education studies and higher education policy. Similarly, the challenge of under-preparedness of students entering higher education has become increasingly pertinent as universities in both developed and developing countries struggle to improve their throughput rates in a context in which schooling no longer seems to provide sufficient preparation for entering university. In this book Merridy Wilson-Strydom applies the capabilities approach to better understand university access and participation and draws on a rich case study from South Africa to critically and innovatively explore the complex and contradictory terrain of access with success. The book integrates quantitative and qualitative research with theory and practical application to provide a new framework for considering and improving the transition from school to university. University Access and Success will appeal to academics and researchers in the field of higher education internationally. The book also contributes to the growing body of international and comparative scholarship on the capabilities approach in higher education and will therefore be of value to higher education practitioners, such as those working in the promotion of teaching and learning, higher education quality assurance, institutional research and student affairs.
