The Social City Feb 01 2021 In the post-war period, Berlin and Naples experienced a phase of profound changes, essentially influenced by external factors: the less rigid urban structure which had been ruined by World War II, resulting in severe changes in the social and economic structure, an uncritical reception and implementation of largely theoretical models of functionalism in urban planning, and in the design of the new public building interventions. On the one hand, between the 1940s and the 1980s, Berlin experienced a considerable loss in population, a political isolation and an urban splitting, as the urban planning institutions, deeply influenced by relevant politics, slowly and thoroughly changed the cityscape. On the other hand, Naples suffered from a new phase of immigration as well as from the parallel densification of the old suburbs and the physical expansion of the city limits without consistent and socially appropriate urban planning measures. This phase of change, so full of contrasts, coincided with the establishment of new democratic systems in the Federal Republic of Germany and Italy, and with the fundamental goal of socially adequate housing in both the West and the East. The research involved a series of historical analyses of the relationship between urban development and social housing for critical reflection and to allow an informed evaluation of the contemporary condition. In particular, it investigated housing settlements realised in Berlin and Naples in the first four decades of the post-war period, which corresponds to the period in which public housing was central in both political and urban planning terms. The book focuses on places of living, the city and the house. Consequently, it investigates the scale of the project and that of the intervention, the relationship between innovation and the cultural reception of urban phenomena and, again, between the stage of the project and the realisation and upkeep of the interventions, between democratic expectations and the adequacy of the administration system. These steps have a direct effect on the social identity that inspires, structures and transforms the planned and then built city, that continuous dialogue between form and content (the past) that occurs, in general, through progressive and mutual adaptations. In the selection of the case studies, we have favoured interventions on the

“periphery,” which are those in which theoretical and aesthetic trends have best manifested themselves and in which planning and design cultures could develop most widely. However, the periphery does not necessarily coincide with the geographical edges of the cities: both in Berlin and in Naples, historical events, or the particular topography have naturally shifted the “peripheral” location along a radius that only ideally starts from the city centre and often extends to its inner fringes. Rather, from a sociological point of view, the same interventions generally generate the peripheral condition, that is, marginalisation or social division. This, as we shall see, can be traced both on the large scale of the city and inside the neighbourhood. The materials are arranged in the following way: the text is introduced by a graphic and synthetic presentation of the historical context in Berlin and Naples and the documentation of the twelve case studies. In the second chapter, Comparison, which was mostly developed as the first by the young scholars involved in the project, three theoretical issues highlighted during the seminars are better presented: The ability of the project to involve the social level; the experimentalism of the interventions, in particular in construction technology, social approach and democratic participation; the relationship between public and private in the phases of implementation and the upkeep of the programmes. The third chapter, In-Depth Analysis, includes the contributions of the scientists involved to give a better articulated historical and critical analysis of many of selected case studies and of the wider urban and social context. The closing editorial paper offers a brief overview focusing on a selection of the theoretical nodes that emerged from the comparison of the materials from a contemporary perspective. The publication is the outcome of the homonymous research programme fully funded by DAAD German Academic Exchange Service and runned in 2019 in cooperation between the Technische Universität of Berlin, Department of Architecture (Habitat Unit) with the Università della Campania "Luigi Vanvitelli," Dipartimento di Architettura e Disegno Industriale in Aversa (Italy). In der Nachkriegszeit erlebten Berlin und Neapel eine Phase tiefgehender Veränderungen, die im Wesentlichen von externen Faktoren beeinflusst

wurde: der aufgelockerten, infolge des Zweiten Weltkriegs ruinierten Stadtform, der starken Veränderung der sozialen und wirtschaftlichen Struktur, der unkritischen Rezeption und Implementierung von stark theoretisch geprägten Modellen des Funktionalismus in der Stadtplanung sowie in der Gestaltung der neuen öffentlichen Bauinterventionen. Auf der einen Seite erlebt Berlin zwischen den 40er und den 80er Jahren einen starken Bevölkerungsverlust, eine politische Isolierung und eine urbane Aufspaltung, indem eine stark politisch beeinflusste Stadtplanung das Stadtbild tief verändert. Auf der anderen Seite leidet Neapel unter einer neuen Einwanderungsphase sowie der parallelen Verdichtung der alten Vorstädte und der physischen Erweiterung der Stadtgrenze, ohne dass konsequente und sozial gemäße stadtplanerische Maßnahmen vorgenommen wurden. Diese kontrastreiche Umbruchsphase stimmt überein mit der Etablierung der neuen demokratischen Regierungssysteme in der Bundesrepublik Deutschland wie auch in Italien und damit mit dem für beide - und im Westen wie im Osten - grundlegenden Ziel des sozial gerechten Wohnens. Das Forschungsvorhaben beinhaltete eine Reihe von historischen Analysen der Beziehung zwischen Stadtentwicklung und sozialem Wohnungsbau zum Zweck der kritischen Reflexion und um eine fundierte Bewertung der jeweiligen zeitgenössischen Bedingungen zu ermöglichen. Insbesondere wurden Wohnsiedlungen untersucht, die in Berlin wie in Neapel in den ersten vier Jahrzehnten nach dem Zweiten Weltkrieg errichtet wurden, d.h. in eben dem Zeitraum, in dem öffentlicher Wohnungsbau sowohl unter politischen wie auch unter stadtplanerischen Aspekten zentral war. Das Buch konzentriert sich auf Lebensräume, die Stadt und das Haus. Folglich untersucht es das Ausmaß des Projekts wie das der Intervention, die Beziehung zwischen Innovation und kultureller Rezeption städtischer Phänomene wie auch zwischen dem jeweiligen Stadium des Projekts und der Umsetzung und Aufrechterhaltung der Interventionen und schließlich zwischen den demokratischen Erwartungen und der Leistungsfähigkeit des Verwaltungssystems. Diese Schritte haben direkte Auswirkungen auf die soziale Identität, welche die zunächst geplante und dann gebaute Stadt

inspiriert, strukturiert und transformiert, d.h. diesen ständigen Dialog zwischen Form und Inhalt (die Vergangenheit), der im Allgemeinen durch fortschreitende und gegenseitige Anpassungen abläuft. Bei der Auswahl der Fallstudien haben wir Interventionen in der "Peripherie" bevorzugt, da sie es sind, in denen sich theoretische und ästhetische Trends am deutlichsten abzeichnen und in denen sich Kulturen der Planung und des Designs am weitesten entwickeln könnten. Die Peripherie fällt jedoch nicht unbedingt zusammen mit den geografischen Rändern der Städte: sowohl in Berlin wie in Neapel haben historische Ereignisse oder auch die jeweilige Topografie naturgemäß die "periphere" Lage entlang einem Radius verschoben, der nur im Idealfall vom Stadtzentrum ausgeht und sich oft bis an seine Ränder erstreckt. Von einer soziologischen Perspektive aus ist es eher so, dass im Allgemeinen die gleichen Interventionen zu einer peripheren Situation führen. d.h. zu Marginalisierung oder sozialer Aufspaltung. Wie wir sehen werden, gilt dies sowohl im größeren Rahmen für die Stadt wie auch innerhalb eines Stadtviertels. Die Materialien sind folgendermaßen angeordnet: Der Text wird eingeführt durch eine grafische und zusammenfassende Präsentation der historischen Zusammenhänge in Berlin und Neapel und eine Dokumentation zu den zwölf Fallstudien. Im zweiten Kapitel - "Vergleich/Comparison" - , das ursprünglich als erstes Kapitel von den jüngeren Forschern, die am Projekt teilnahmen, entwickelt wurde, werden drei Fragen, die während der Seminare im Mittelpunkt standen, genauer vorgestellt: die Eignung des Projekts dafür, die soziale Ebene mit einzubeziehen; der experimentelle Charakter der Interventionen, insbesondere in der Bautechnologie, im sozialen Ansatz und in der demokratischen Teilhabe; die Beziehung zwischen öffentlichem und privatem Engagement in der Phase der Umsetzung wie der Aufrechterhaltung der Programme. Das dritte Kapitel - "Eingehende Analyse/In-Depth-Analyses" - besteht aus den Beiträgen der beteiligten Wissenschaftler, um so eine klarere historische und kritische Analyse von etlichen der ausgewählten Fallstudien und der weiterreichenden städtischen und sozialen Zusammenhänge zu gewährleisten. Der abschließende Kommentarteil bietet einen kurzen

Überblick, der den Schwerpunkt auf eine Auswahl von theoretischen Verknüpfungen legt, die sich aus dem Vergleich der Materialien aus zeitgenössischen Perspektive ergeben. Die Veröffentlichung ist das Ergebnis des gleichnamigen Forschungsprogramms, das vollständig vom DAAD (Deutscher Akademischer Austauschdienst) finanziert wurde und 2019 in einer Zusammenarbeit der Architektur-Fakultät (Habitat Unit) der Technischen Universität Berlin mit dem Dipartimento di Architettura e Disegno Industriale der Università della Campania "Luigi Vanvitelli" in Aversa (Italien) durchgeführt wurde. Nel secondo dopoguerra Berlino e Napoli vivono una fase di profondo cambiamento che è condizionato in maniera preponderante da fattori esterni: la parziale disgregazione della forma urbana causata dai bombardamenti bellici, il cambiamento della struttura socio-economica, il recepimento delle teorie funzionaliste nella pianificazione urbana e nella progettazione dei nuovi interventi di edilizia residenziale pubblica. Per un verso, tra gli anni quaranta e gli anni ottanta, Berlino rileva una pesante contrazione demografica, l'isolamento politico, la separazione interna del Muro, gli effetti di una pianificazione urbana fortemente influenzata dal sdoppiato piano politico che deriva dalla fondazione nel 1949 dei due stati tedeschi, la GDR e la DDR. Per altro verso, Napoli osserva una nuova fase di immigrazione che si aggiunge alla naturale crescita demografica del primo dopoguerra, lo sviluppo urbano dei sobborghi e dei principali centri dell'entroterra costiero, l'espansione fisica ma non amministrativa dei confini della città, l'inadeguatezza ed il costante ritardo del piano amministrativo-urbanistico nella gestione dei fenomeni sociali ed urbani. Si tratta in pratica di una fase carica di contrasti che coincide con l'instaurazione delle nuove repubbliche liberali in Germania ed Italia, e con la definitiva affermazione della questione abitativa e della residenza popolare che assurge, in ambito socialista, al rango di elemento funzionale alla stessa costruzione statale. Lo studio indaga la relazione tra sviluppo urbano ed edilizia residenziale pubblica e si propone come strumento per la riflessione critica e per la valutazione informata della condizione contemporanea. Le indagini e le valutazioni storiche che esso raccoglie si concentrano sugli interventi realizzati a Berlino e a Napoli nei primi

quarant'anni del dopoguerra, ovvero nel periodo in cui la questione abitativa diviene urgente e centrale per vari ordini di motivi sia in termini politici che urbanistici. Lo sguardo si concentra sui luoghi dell'abitare, la città e la casa; indaga e confronta la scala teorica e quella reale, il rapporto tra innovazione e recezione culturale; confronta i piani del progetto, della costruzione e della successiva manutenzione degli interventi residenziali, tra le aspettative democratiche e l'adeguatezza del sistema amministrativo nel gestirli. Si tratta di passaggi che hanno un effetto diretto sull'identità sociale che, di risposta, ispira e struttura la nuova città attraverso un dialogo tra forma e contenuto (il passato) che procede per progressivi e reciproci adattamenti. Nella selezione dei casi studio sono stati privilegiati interventi di "periferia", ovvero quelli in cui le culture della pianificazione e del progetto, e le tendenze teoriche ed estetiche si sono potute manifestare nella maniera più completa. Come si vedrà, tuttavia, la periferia non coincide necessariamente con i margini geografici delle città: sia a Berlino che a Napoli gli eventi storici o la particolare topografia hanno dislocato la condizione "periferica" lungo un raggio che solo idealmente conduce dal centro della città. Da un punto di vista sociologico, e per la coincidenza di diversi fattori, inoltre, gli stessi interventi residenziali generano al loro interno la condizione periferica che si manifesta generalmente in degrado degli spazi comuni, mancanza di prossimità, emarginazione sociale. I materiali del testo sono organizzati in tre parti: nel primo capitolo Documentation si introduce al contesto storico, amministrativo ed urbanistico e si presentano schematicamente e secondo un criterio uniforme i dodici casi studio selezionati; nel secondo capitolo Comparison, che, come il primo, è stato redatto dai giovani ricercatori coinvolti nel progetto di ricerca, vengono meglio presentate tre questioni teoriche emerse nel corso dei laboratori: la capacità del progetto di coinvolgere il piano sociale; lo sperimentalismo degli interventi, in particolare per tecnologia costruttiva, approccio sociale e partecipazione democratica; il rapporto tra il piano amministrativo-pubblico ed il piano civico-privato nelle fasi di realizzazione e mantenimento dei programmi residenziali. Il terzo capitolo, In-Depth-Analysis, raccoglie i contributi degli studiosi coinvolti

per fornire un'analisi storica e critica articolata dei casi di studio selezionati e del più ampio contesto urbano e sociale. Infine, le conclusioni raccolgono e presentano i principali nodi teorici emersi nel corso della ricerca in una prospettiva aperta alla condizione contemporanea. La pubblicazione restituisce e meglio sviluppa sul piano documentale e critico i materiali raccolti nel corso dei due laboratori tenuti nel 2019 presso la Technische Universität di Berlino, Dipartimento di Urbanistica e Sviluppo urbano sostenibile "Habitat Unit," e l'Università della Campania "Luigi Vanvitelli," Dipartimento di Architettura e Disegno Industriale di Aversa, nell'ambito dell'omonimo progetto di ricerca finanziato dal DAAD (Servizio Tedesco per lo Scambio Accademico).

The Art of Singing on Stage and in the Studio May 24 2020 (Book).

To be a great singer, talent and technique are obviously important, as are having excellent songs and being able to move an audience. But there's more to it than that, including two critical skills that are rarely, if ever, addressed in vocal training: managing the technology on stage and in the studio, and interacting with the people who run it. No matter how fantastic your voice is or how much money is behind you, if you don't know how to work with performing and recording technology, you're in for a tough ride. Countless phenomenal singers stagnate professionally and even leave the business because they can't figure out how to deliver when using studio headphones and stage monitors, or how to communicate their needs to producers and engineers. And many less-capable singers get ahead because they can. The Art of Singing on Stage and in the Studio is the only book that comprehensively addresses these critical issues in an easy-to-read, accessible style. Starting with a discussion of the evolution of technology and the voice in our culture, it also explores the root causes of anxiety-related performance issues and, more importantly, how to overcome them. Singers, performers, producers, and engineers will all come away from this book more knowledgeable about the origins of their fields, empowered in the tools of their trade, and clearer on how to best communicate with one another.

Sustainable Development and Higher Education Institutions Dec 31 2020 Higher education institutions (HEIs) have a unique role and responsibility for the future and for driving the development of a

sustainable society. HEIs are charged with the task of fostering sustainability in the leaders of tomorrow, developing solutions and methods for addressing a sustainable future and ensuring that knowledge is contributed to society. HEIs must also ensure that their everyday operations and practices are consistent with a sustainable future, and that they work toward holistically integrating sustainability into both the mission of a university and its daily tasks. This Special Issue builds on papers presented during the 2018 International Sustainable Campus Network Conference and also includes other contributions. The articles reflect the many aspects of sustainability in higher education institutions and illustrate innovation in approach, outcomes, and impact. The papers cover a range of perspectives on sustainability both on and around campuses. These include organization and management issues, networking and city partnership themes, and metrics and indicators related to sustainable development goals. The Special Issue also includes papers on education, student involvement, and gender issues. Select articles include results from surveys and desktop research; others depict approaches on experimentation, living labs, and action research.

I Dreamed I Was a Very Clean Tramp Aug 07 2021 The sharp, lyrical, and no-holds-barred autobiography of the iconoclastic writer and musician Richard Hell, charting the childhood, coming of age, and misadventures of an artist in an indelible era of rock and roll... From an early age, Richard Hell dreamed of running away. His father died when he was seven, and at seventeen he left his mother and sister behind and headed for New York City, place of limitless possibilities. He arrived penniless with the idea of becoming a poet; ten years later he was a pivotal voice of the age of punk, starting such seminal bands as Television, the Heartbreakers, and Richard Hell and the Voidoids—whose song "Blank Generation" remains the defining anthem of the era. Hell was significantly responsible for creating CBGB as punk ground zero; his Voidoids toured notoriously with the Clash, and Malcolm McLaren would credit Hell as inspiration for the Sex Pistols. There were kinetic nights in New York's club demi-monde, descent into drug addiction, and an ever-present yearning for redemption through poetry, music, and art. "We lived in the suburbs in America in the fifties," Hell writes. "My roots are shallow. I'm a little jealous of people with strong ethnic and cultural roots. Lucky Martin Scorsese or Art Spiegelman or Dave Chappelle. I came from Hopalong Cassidy and Bugs Bunny and first grade at ordinary Maxwell Elementary." How this legendary downtown artist went from a prosaic childhood in the idyllic Kentucky foothills to igniting a movement that would take over New York's and London's restless youth cultures—and spawn the careers of not only Hell himself, but a cohort of

friends such as Tom Verlaine, Patti Smith, the Ramones, and Debbie Harry—is just part of the fascinating story Hell tells. With stunning powers of observation, he delves into the details of both the world that shaped him and the world he shaped. An acutely rendered, unforgettable coming-of-age story, *I Dreamed I Was a Very Clean Tramp* evokes with feeling, clarity, and piercing intelligence that classic journey: the life of one who comes from the hinterlands into the city in search of art and passion.

C++ code needn't be difficult. The C++ Core Guidelines can help every C++ developer design and write C++ programs that are exceptionally reliable, efficient, and well-performing. But the Guidelines are so jam-packed with excellent advice that it's hard to know where to start. Start here, with *Beautiful C++*. Expert C++ programmers Guy Davidson and Kate Gregory identify 30 Core Guidelines you'll find especially valuable and offer detailed practical knowledge for improving your C++ style. For easy reference, this book is structured to align closely with the official C++ Core Guidelines website. The Studio SOS Book Sep 27 2020 Professional studio design is a specialized science, with more than a touch of "black magic" thrown in. Over the past few years, Sound on Sound magazine has made one trip each month to a reader's studio. These visits have demonstrated that it is fairly simple to make a huge improvement to an untreated project-studio room, without spending a fortune. However, they've also proven that beginners' attempts at DIY acoustic treatments often cause more problems than they solve. Utilizing knowledge from dozens of visits to readers' home and project studios, the SOS team imparts easy-to-understand, organized troubleshooting advice. Learn how to rid yourself of monitoring problems and get an accurate monitoring system, how to enhance the sound of your recording space, and how to perfect your instrumental and vocal recordings. Decrease the time you spend re-recording and mixing, simply by improving your room with advice from the guys who have seen it all when it comes to make-do small studios.

Contains: A structured look at the problems that most often plague small studios, with individual studio case studies addressing each issue Real solutions that you can both afford and implement; no thousand-dollar investments or idealized studio designs that don't work with your space! Case studies that look at small studios' specific problems, with additional break-outs tips that address quick fixes to common problems

Urban China Feb 19 2020 In the last 30 years, China's record economic growth lifted half a billion people out of poverty, with rapid urbanization providing abundant labor, cheap land, and good infrastructure. While China has avoided some of the common ills of urbanization, strains are showing as inefficient land development leads to urban sprawl and ghost towns, pollution threatens people's health, and farmland and water resources are becoming scarce. With China's urban population projected to rise to about one billion - or close to 70 percent of the country's population - by 2030, China's leaders are seeking a more coordinated urbanization process. Urban China is a joint research report by a team from the World Bank and the Development Research Center of China's State Council which was established to address the challenges and opportunities of urbanization in China and to help China forge a new model of urbanization. The report takes as its point of departure the conviction that China's urbanization can become more efficient, inclusive, and sustainable. However, it stresses that achieving this vision will require strong support from both government and the markets for policy reforms in a number of areas. The report proposes six main areas for reform: first, amending land management institutions to foster more efficient land use, denser cities, modernized agriculture, and more equitable wealth distribution; second, adjusting the hukou household registration system to increase labor mobility and provide urban migrant workers equal access to a common standard of public services; third, placing urban finances on a more sustainable footing while fostering financial discipline among local governments; fourth, improving urban planning to enhance connectivity and encourage scale and agglomeration economies; fifth, reducing environmental pressures through more efficient resource management; and sixth, improving governance at the local level.

Doing Ethnography in the Wake of the Displacement of

Transnational Sex Workers in Yokohama Aug 27 2020 Doing Ethnography in the Wake of the Displacement of Transnational Sex Workers in Yokohama reflects on the politics, poetics, and ethics of remembering the lives of transnational migrant sex workers in postcolonial Japan. Drawing on ethnographic fieldwork in the port city of Yokohama, the book focuses on the “water trade” in the Koganecho neighbourhood where exploitative and stigmatised labour took place, involving sexual services performed by migrant women. In recent years the city has sought to rebrand Koganecho, evicting transnational migrant sex workers who had been integral to postindustrial development and erasing their past presence. The author explores Yokohama’s memoryscapes in the aftermath of displacement through embodied knowledge, engaging her senses and ethics as a colonizer-researcher as she navigates the elusive past through traces that remain in the present. She examines the city’s built environment, official historical narratives, films, and photographic works. With few brothels and workers remaining, Yoshimizu fills the gap with her own interactions, encounters, and imaginings. Yoshimizu also writes through the imagery of water in ways that are informed by the local usage and imaginations—the ocean, flowing rivers, swamps, humidity, alcohol, the fluidity of relationships, and transient lives. The water also offers a way to sense the “ghost”, or the displaced lives and the effects of displacement, that, like humid air, stick to those who occupy or inhabit the site of displacement today. This interdisciplinary work makes a valuable contribution to sensory studies, memory studies, migration studies, and Asian studies.
