and consumed by hatred for the white man, Tandia seeks refuge in a brothel deep in the veld. There she learns to use her brilliant mind and extraordinary looks as weapons for the battles that lie ahead: she trains as a terrorist. But then Tandia meets a man with a past as strange as her own: Peekay, an Oxford undergraduate who is also the challenger for the world welterweight boxing championship - and a white man. And in a land where mixed relationships are outlawed, their growing love can only have the most explosive consequences.

"The rise and fall of kings and nations!"--Cover. Fueled by media reports of gender bias in the schools, the debate over single sex education has been recently renewed. "Voices of Hope" asks for a reconsideration of the framing of that debate. For whom is single sex education better? For the attainment of which goals? Shmurak follows their development from ninth grade through the first year of college. From King Solomon - "For everything there is a season and a time for very purpose under heaven: a time to be born, and a time to die; a time to break down, and a time to build up, a time to cast away stones and a time to gather stones together; a time to keep silence, and a time to speak." "Even fools are thought wise when they keep silent." In the summer of 1949 fifteen smokejumpers parachuted into a remote Montana canyon called Mann Gulch. It started as a very small fire in rugged country but within two hours after landing, thirteen of these young men were caught in a raging inferno and were killed. They died bravely, together with their friends, and in the service of their country. Everyone was young and attractive, healthy and strong, enthusiastic and in love. They were bursting into the prime of their lives. There were no malcontents here. Everyone did their best but events overtook them. Until now the actual time line has never been connected to the people involved. Fire in Montana connects the lives of young smokejumpers who lived with a joy of life and expectations of shining futures, the forest rangers and volunteers who fought valiantly to rescue them, and their families.

lovers, and friends who were forced to wait and pray, then face the devastating and heart wrenching loss. This book is the first thorough introduction to a comprehensive treatment of the theory and applications of integrodifference equations in spatial ecology. Integrodifference equations are discrete-time continuous-space dynamical systems describing the spatio-temporal dynamics of one or more populations. The book contains step-by-step model construction, explicitly solvable models, abstract theory and numerical recipes for integrodifference equations. The theory in the book is motivated and illustrated by many examples from conservation biology, biological invasions, pattern formation and other areas. In this way, the book conveys the more general message that bringing mathematical approaches and ecological questions together can generate novel insights into applications and fruitful challenges that spur future theoretical developments. The book is suitable for graduate students and experienced researchers in mathematical ecology.
