[Joy Road](#) Sep 15 2022 *Joy Road* is the story of four remarkable black women from Woodmere, Georgia (referred to as Bottoms by the locals) and their struggle to survive, to love their men and, to raise their children. As the Great Depression puts forty percent of the country out of work, people sell apples on the streets and comfortable living quarters are traded in for Hoovervilles. Life in the colored section of Woodmere, Georgia reaches rock bottom. RayMyra and Elaine Elliott are sisters. The differences between them is as stark as their skin color. RayMyra, described as Alight bright, almost white, @ leaves their home town for New York City. Passing for white, she marries a South African diamond mine owner, and straddles two worlds, but finds it difficult being a part-time Negro. Elaine, a Ahigh-yella gal @runs away from a love triangle and heads for the stages of Hollywood. Along the way to fame and fortune, she encounters the low-lives of the road, losing everything she owns, and making her home in a corrugated Kellogg Corn Flakes box. Called Aunt Ella by everyone, the sixty-two year old matriarch has withstood the loss of her children to war, accident, and lynching. Having a life long prejudiced against whites, she takes it upon her shoulders to leave a mark on the world. May Lee, a high school friend of RaeMyra and Elaine with six children and no husband, remains in Bottoms, Georgia, a district south of Atlanta. Making figurines that are not much more than broken glass and glue, and never believing life would give her anything except more children, she and Aunt Ella rebuild both the town and faith in their fellow man. RaeMyra, Elaine, Aunt Ella and May Lee have nothing in common and everything in common. They share friendship, bloodlines and the staunch determination to survive whatever life throws at them. With nowhere to go but up, they reach inside themselves and find the strength to survive just one more day. *Joy Road* is as thought provoking as the four women who bring it to life. Intensely emotional, Shirley Hailstock=s novel explores the depths of family love, showing that time, distance, and life=s decisions don=t break the bonds of kinship. Prepare to laugh and cry through the pages of *Joy Road* as this rising star of fiction proves she has a firm place as a new talent in literature.

**Integrative Framing Analysis** Jan 07 2022 Much of framing scholarship focuses either exclusively on the analysis of words or of visuals. This book aims to address this gap by proposing a six-step approach to the analysis of verbal frames, visual frames and the interplay between them—an integrative framing analysis. This approach is then demonstrated through a study investigating the way words and visuals are used to frame people living with HIV/AIDS in various communication contexts: the news, public service announcements and special interest publications. This application of integrative framing analysis reveals differences between verbal frames and visual frames in the same messages, underscoring the importance of looking at these frames together.

**Computer Theology** May 11 2022 Computers are complex tools of the human species. To make them work well for us, we have to specify their actions in very great detail. When properly instructed, networks of computers take on the trappings of human social orders derived from the physiological characteristics and capabilities of our species. To create a social order, we engage in grouping mechanisms through which the actions of the individuals within the group are influenced. From a technical perspective, such grouping mechanisms form the trust environments within which we can effect policy. Historically, the most comprehensive such environments have been formed by religions. Within a specific religion, the policy framework is established by a statement of theology. So, if we connect all the dots, when we want to tell our computers how to act in a manner paralleling human social orders, we must define for them a theology. So goes the rationale explored in great detail by the authors of Computer Theology. Based on their combined tenure of almost a century working in the realms of computer systems and their ubiquitous networks, du Castel and Jurgensen have expressed both social and computer systems through the same concepts. The result offers a unique perspective on the interconnection between people and machines that we have come to understand as the World Wide Web.

**Is Racism an Environmental Threat?** Jan 15 2020 The ecological crisis is the most overwhelming to have ever faced humanity and its consequences permeate every domain of life. This trenchant book examines its relation to Islamophobia as the dominant form of racism today, showing how both share roots in domination, colonialism, and the logics of capitalism. Ghassan Hage proposes that both racism and humanity's destructive relationship with the environment emanate from the same mode of inhabiting the world: an occupying force imposes its own interest as law, subordinating others for the extraction of value, eradicating or exterminating what gets in the way. In connecting these two issues, Hage gives voice to the claim taking shape in many activist spaces that anti-racist and ecological struggles are intrinsically related. In both, the aim is to move beyond what makes us see otherness, whether human or nonhuman, as something that exists solely to be managed.

**Saudi Arabia and Ethiopia** Feb 14 2020 What is the significance of Islam's growing strength in Ethiopia? And what is the impetus for the Saudi financing of hundreds of new mosques and schools in the country, the establishment of welfare organizations, and the spread of the Arabic language? Haggai Erlich explores the interplay of religion and international politics as it has shaped the development of modern Ethiopia and Saudi Arabia. Tracing Saudi-Ethiopian relations from the 1930s to the present, Erlich highlights the nexus of concrete politics and the conceptual messages of religion. His fresh approach encompasses discussions of the options and dilemmas facing Ethiopians, both Christians and Muslims, across multiple decades; the Saudis' nuanced conceptualization of their Islamic 'self' in contrast to Christian and Islamic 'others'; and the present confrontation between Ethiopia's apolitical Islam and Wahhabi fundamentalism. It also provides new perspectives on both the current dilemmas of the Wahhabi kingdom and the global implications of the evolving Saudi-Ethiopian relationship.

Transforming Water Management in South Africa Aug 02 2021 One of the early set of reforms that South Africa embarked on after emerging from apartheid was in the water sector, following a remarkable, consultative process. The policy and legal reforms were comprehensive and covered almost all aspects of water management including revolutionary changes in defining and allocating rights to water, radical reforms in water management and supply institutions, the introduction of the protection of environmental flows, and major shifts in charging for water use and in the provision of free basic water. Over ten years of implementation of these policy and legislative changes mean that valuable lessons have already been learned and useful experiences gained in the challenge of effective water resources management and water services provision in a middle income country.

**Fairwood** Dec 18 2022 "This is crime-noir so dark that you won't see the twists that lurk in the shadows" –Keith Moray, author of Inspector Torquil McKinnon Series Dexter and Pandora are stuck in the middle of nowhere, desperate to escape the clutches of the law. The conversations don't seem real, their smiles never seem to waver, and Dexter and Pandora can't escape the feeling they are being watched. The fugitives were sure that they had found a safe haven, but they begin to suspect that the perfect country town they escaped to may be worse than the life of crime they left behind.

Adaptogens in Medical Herbalism Jul 13 2022 A scientifically based herbal and nutritional program to master stress, improve energy, prevent degenerative disease, and age gracefully • Explains how adaptogenic herbs work at the cellular level to enhance energy production and subdue the pro-inflammatory state behind degenerative disease • Explores the author's custom adaptogenic blends for the immune system, cardiovascular health, thyroid function, brain health, and cancer treatment support • Provides more than 60 monographs on herbs and nutritional compounds based on more than 25 years of clinical practice with thousands of patients Weaving together the ancient wisdom of herbalism and the most up-to-date scientific research on cancer, aging, and nutrition, renowned medical herbalist and clinical nutritionist Donald Yancey reveals how to master stress, improve energy levels, prevent degenerative disease, and age gracefully with the elite herbs known as adaptogens. Yancey's holistic approach, called the Eclectic Triphasic Medical System (ETMS), is based on extensive scientific research, more than 25 years of clinical practice, and excellent results with thousands of patients. It centers on four interconnected groups of health tools: botanical formulations, nutritional supplements, diet, and lifestyle. Defining three categories for adaptogenic herbs, he explains how formulations should combine herbs from each category to create a synergistic effect. He provides more than 60 monographs on herbs and nutritional compounds as well as custom combinations to revitalize the immune system, build cardiovascular health, protect brain function, manage weight, and support cancer treatment. He explains the interplay of endocrine health, the hypothalamic-pituitary-adrenal (HPA) axis, thyroid function, and stress in the aging process and reveals how adaptogenic treatment begins at the cellular level with the mitochondria--the microscopic energy producers present in every living cell. Emphasizing spirituality, exercise, and diet in addition to herbal treatments and nutritional supplements, Yancey's complete lifestyle program explores how to enhance energy production in the body and subdue the proinflammatory state that lays the groundwork for nearly every degenerative disease, taking you from merely surviving to thriving.

Who's Swearing Now? May 31 2021 Who's Swearing Now? represents an investigation of how people actually swear, illustrated by a collection of over 500 spontaneous swearing utterances along with their social and linguistic contexts. The book features a focus on the use of eight swear words: ass, bitch, cunt, damn, dick, fuck, hell, shit and their possible inflections or derivations, e.g., asshole or motherfucker, offering a solution to the controversial issue of defining swear words and swearing by limiting the investigation to the core set of words most common to previous swearing studies. The specific focus results in accurate depictions of contextualized swearing utterances. Precise frequency counts are thus enabled which, along with offensiveness ratings of contextualized and non-contextualized swearing, enable a clarification of The Swearing Paradox, referring to the phenomenon of frequently used swear words also being those which traditionally are judged to be the most offensive. The book revisits the relationship between gender and swear word usage, but considers the distribution based on the core subset of swear words, revealing similarities where others have claimed differences. Significantly, Who's Swearing Now? considers the aspect of race with regards to swear word usage, and reveals behavioral differences between, for example, White and African American males and females with regards to word preferences as well as social impetuses for and effects of swearing. Questionnaire and interview data supplement the swearing utterances, revealing participants' individual credos about their own use or non-use of swear words and, interestingly, about others' allowed or ideally prohibited use of swear words. These sets of data present thought-provoking and often entertaining statements regarding the unwritten set of rules governing swearing behavior. Who's Swearing Now? concludes with close analyses of four recent and highly publicized incidences of public swear word usage, considered in light of the spontaneous swearing utterances, speaker and addressee variables such as gender, race and age, and perceptions of offensiveness and propriety.

Other People's Anthropologies Dec 26 2020 Anthropological practice has been dominated by the so-called "great" traditions (Anglo-American, French, and German). However, processes of decolonization, along with critical interrogation of these dominant narratives, have led to greater visibility of what used to be seen as peripheral scholarship. With contributions from leading anthropologists and social scientists from different countries and anthropological traditions, this volume gives voice to scholars outside these "great" traditions. It shows the immense variety of methodologies, training, and approaches that scholars from these regions bring to anthropology and the social sciences in general, thus enriching the disciplines in important ways at an age marked by multiculturalism, globalization, and transnationalism.
