Wisconsin Uprising Jan 22 2020 In early 2011, the nation was stunned to watch Wisconsin's state capitol in Madison come under sudden and unexpected occupation by union members and their allies. The protests to defend collective bargaining rights were militant and practically unheard of in this era of declining union power. Nearly forty years of neoliberalism and the most severe economic crisis since the Great Depression have battered the labor movement, and workers have been largely complacent in the face of stagnant wages, slashed benefits and services, widening unemployment, and growing inequality. That is, until now. Under pressure from a union-busting governor and his supporters in the legislature, and inspired by the massive uprisings in Tunisia and Egypt, workers in Wisconsin shook the nation with their colossal display of solidarity and outrage. Their struggle is still ongoing, but there are lessons to be learned from the Wisconsin revolt. This timely book brings together some of the best labor journalists and scholars in the United States, many of whom were on the ground at the time, to examine the causes and impact of events, and suggest how the labor movement might proceed in this new era of union militancy.

Empowering Entrepreneurial Communities and Ecosystems May 18 2022 Entrepreneurial Communities and Ecosystems: Case Study Insights aims to provide applied examples that embody the theories, principles, and processes that contribute to empowering everyday entrepreneurial communities and ecosystems. Relying on a diversity of narratives from a wide range of entrepreneurial communities, entrepreneurial ecosystems, and organizations, this book presents a collection of case studies that take the reader inside the minds of leaders who are working to empower entrepreneurs and build entrepreneurial ecosystems and entrepreneurial communities—sometimes from scratch. The book features research and stories from entrepreneurs, development agencies, entrepreneurial support and assistance organizations (i.e. feeders and supports), governments, and involved citizens and local leaders in their quest to make their communities more entrepreneuring. The book presents an analytic frame through which the case studies are cross-analyzed, providing "meta-guidelines" for pursuing a broad range of strategies for supporting local and regional entrepreneurial action. This research volume is equally useful as an undergraduate or graduate text on the sociology of entrepreneurs and entrepreneurship as it is a field guide for ecosystem builders, policy makers, nonprofits, and entrepreneurship and social researchers worldwide.
