There is nothing quite like a hot, crackling fire on a cold, snowy night. Use this new book as a reference guide to create your dream fireplace, be it contemporary or a more conservative, classic design. Step-by-step instructions will walk you through the process from start to finish, from choosing the best location and installing the fireplace and venting to finishing your home's new centerpiece. Construction techniques are demonstrated in more than 290 color photos and 20 detailed diagrams. Log Home Design is the preferred, trusted partner with readers in simplifying the process of becoming a log home owner. With its exclusive focus on planning and design, the magazine's friendly tone, practical content and targeted advertising provide the essential tools consumers need – from the crucial preliminary stages through the finishing touches of their dream log home. FIELD & STREAM, America's largest outdoor sports magazine, celebrates the outdoor experience with great stories, compelling photography, and sound advice while honoring the traditions hunters and fishermen have passed down for generations. At Last! A Beginner's Guide to Newborn Baby Technology You've programmed your DVR, you've installed a wireless Internet connection, you can even check Facebook on your cell phone. But none of this experience will prepare you for

the world's biggest technological marvel: a newborn baby. Through step-by-step instructions and helpful schematic diagrams, *The Baby Owner's Manual* explores hundreds of frequently asked questions: What's the best way to swaddle a baby? How can I make my newborn sleep through the night? When should I bring the baby to a doctor for servicing? Whatever your concerns, you'll find the answers here—courtesy of celebrated pediatrician Dr. Louis Borgenicht and his son, Joe Borgenicht. Together, they provide plenty of useful advice for anyone who wants to learn the basics of childcare.

Moving can be a highly emotional time filled with excitement—and with panic. From selecting a real estate agent and finding a new home to transferring medical records and registering your vehicle, there are hundreds of steps involved in making a successful move. Fortunately, you don't have to go it alone! *The Moving Survival Guide* will help you make informed decisions and keep your family organized and motivated before, during, and after your move. Part how-to book, part workbook, this friendly guide leads you through the daunting tasks of selling, packing, and relocating your household. Within these pages author Martha Poage—who has successfully moved her family nine times in eleven years—offers practical advice and tried-and-true tips, including:

- Extensive planning calendars
- Detailed to-do lists
- Helpful worksheets
- Easy recordkeeping guidelines that will be invaluable at tax time
- Ideas to involve the whole family
- Proven advice to keep you focused, informed, and energized for your move

*The Moving Survival Guide* will ensure you don't forget a single important task during this busy and exciting time.

We are in a power crunch and you need help. It is not going to go away. Fuel costs, population increases, or the need to reduce air pollution will all keep us in a power hungry situation. Either we cannot afford it, can no longer breathe it, or there will not be enough. The purpose of this book is to ease the problem. Better start learning now. Experience is the best teacher, but you need help before you can acquire experience on your own. Next best is to benefit from another's experience. This book collects the relevant material from most of the authors' over 50 books. They were written for people who want to help themselves. Does that include you? This book contains over 50 years of ways we have used to conserve energy. We started early: The message of energy shortages to come wasn't widely publicized, although it's coming was announced and published in the 1950's. We hope that rolling blackouts are the most with which we will have to cope. In today's culture, even that is a minor disaster. Electricity is the hinge upon which our lives swing. Most of us can't even tell time without electricity, or when it comes back on, how do we reset the clocks? In fact, every floating automatic device in the house will need resetting. We depend upon electricity for all the niceties of living. What about the necessities? Food Preservation and Spoilage Heat Light- both to see and for security Water-. No hot water without electricity. City and Rural water is supplied by electric pumps. Enjoy air conditioning? A hot tub, Hot water? These are things we can live without if we must, although there are energy efficient ways to have these things. Otherwise, either the cost of having them or the need to use a minimum of electricity may make them unavailable. Solar Energy will heat your home and provide hot water. It will even heat a hot tub. We use what is in this book ALL the time. While Aristotle acknowledges the connection between rhetoric, biology, and cognitive abilities, scholarship continues to struggle to integrate the fields of rhetoric and neurobiology. Drawing on recent work in neurorhetoric, this book offers a model that integrates multimodal rhetorical theory and multisensory neural processing theory pertaining to cognition and learning. Using existing theories from multimodal rhetoric and specific findings from neurobiological studies, the author develops a model that integrates concepts from both fields, bridging, if not uniting, them. He also discusses possible applications of the new model, with specific case studies related to training and instruction. These applications include various media used in instructional and training contexts, such as print, slide shows, videos, simulations, and hands-on training. The book thus introduces concepts of cognitive neuroscience to multimodal rhetorical theory and facilitates theorization combining multimodal rhetoric and multisensory cognition, and serves as a vehicle by which readers can better understand the links between multimodal rhetoric and cognitive neuroscience associated with technical communication.

Integrating case studies from industry and practice, the text makes explicit connections between academic scholarship and workplace preparation. It also describes how interdisciplinary research can contribute to pharmaceutical research, as well as the development of productive instructional materials. Rhetoric is affected by how the brain of any member of a given audience can process information. This book can promote further research-qualitative and quantitative-to develop a better understanding of the relationship between multimodal messages and how the brain processes such information. As we approach a great turning point in history when technology is poised to redefine what it means to be human, *The Fourth Age* offers fascinating insight into AI, robotics, and their extraordinary implications for our species. “If you only read just one book about the AI revolution, make it this one” (John Mackey, cofounder and CEO, Whole Foods Market). In *The Fourth Age*, Byron Reese makes the case that technology has reshaped humanity just three times in history: 100,000 years ago, we harnessed fire, which led to language; 10,000 years ago, we developed agriculture, which led to cities and warfare; 5,000 years ago, we invented the wheel and writing, which lead to the nation state. We are now on the doorstep of a fourth change brought about by two technologies: AI and robotics. “Timely, highly informative, and certainly optimistic” (Booklist), *The Fourth Age* provides an essential background on how we got to this point, and how—rather than what—we should think about the topics we’ll soon all be facing: machine consciousness, automation, changes in employment, creative computers, radical life extension, artificial life, AI ethics, the future of warfare, superintelligence, and the implications of extreme prosperity. By asking questions like “Are you a machine?” and “Could a computer feel anything?”, Reese leads you through a discussion along the cutting edge in robotics and AI, and provides a framework by which we can all understand, discuss, and act on the issues of the Fourth Age and how they’ll transform humanity. **THE MONEY PIT®**, hosted by Tom Kraeutler and Leslie Segrete, is a syndicated home improvement call-in radio program that airs every weekend all over North America on more than 200 stations, as well as on XM Satellite Radio. Tom and Leslie give homeowners like you real information on how to get things done the right way by alerting you to what you need to know before you start a project. Room by room, Tom and Leslie share their extensive experience in home improvement, decorating, and remodeling in kitchens, bathrooms, bedrooms, family spaces, basements, and laundry rooms. They tell you secrets about lowering your energy bills. They've got great ideas about curb appeal and making exterior maintenance easier. And they give the best counsel anywhere on home safety and security, insurance, and preparing your home for sale. Before you start your next project, get advice from Tom and Leslie.
