This workbook is designed to help you prepare a request for accommodation from your employer under the Americans with Disabilities Act (ADA). Using the legal concepts and definitions from Title I of the ADA, the workbook exercises take you step by step through the nuts and bolts of an accommodation request. By filling out the worksheets and exercises here, you will begin to understand the concepts involved and explore how they apply to your situation. When you have worked through each section, you will be able to describe the health condition or physical or mental limitations you are experiencing, analyze your job duties and how your health condition is impacting you at work, research accommodations that will help you be able to work, and make a request for accommodation from your employer. This workbook is tied closely to the book *Making It Work: Managing Your Health Condition Through ADA Workplace Accommodations*. The book *Making It Work* provides information on Title I of the ADA, an employer's obligations under the ADA, and the employment accommodation process. It contains detailed explanations, definitions, and many diverse examples of employee situations, and it provides a big-picture view of how ADA definitions, processes, and requirements fit together. Because of the detailed information available there, I will periodically refer you back to specific chapters and appendices of the book *Making It Work*, which you can reference for examples, explanation, and discussion of the questions being asked in the workbook exercises.

Annotation Olson (history, U. of Maryland) argues that, until the eve of the revolution, the British crown could rule its American colonies peacefully with so few administrators because an extensive network of voluntary interest groups, tying the colonies and London, allowed colonists a measure of influence over the central government.

Annotation c. by Book News, Inc., Portland, Or. The work-family conflict that mothers experience today is a national crisis. Women struggle to balance breadwinning with the bulk of parenting, and social policies aren't helping. Of all Western industrialized countries, the United States ranks dead last for supportive work-family policies. Can American women look to Europe for solutions? *Making Motherhood Work* draws on interviews that Caitlyn Collins conducted over five years with 135 middle-class working mothers in Sweden, Germany, Italy, and the United States. She explores how women navigate work and family given the different policy supports available in each country. Taking readers into women's homes, neighborhoods, and workplaces, Collins shows that mothers' expectations depend on context and that policies alone cannot solve women's struggles. With women held to unrealistic standards, the best solutions demand that we redefine motherhood, work, and family. First Published in 1997. Routledge is an imprint of Taylor & Francis, an informal company. *Making Work and Family Work* investigates the difficult choices that contemporary employees must face when juggling work and family with a view to identifying the smart choices that all parties involved—society, employers, employees and families—should make to promote greater work-life balance. Leading scholars Jeffrey Greenhaus and Gary Powell begin by identifying the factors that work against an employee's ability to be effective and satisfied in their work and family roles. From there, they examine a variety of factors that impact the decision-making process that employees and their families can use to enhance employees' feelings of work-family balance and families' well-being. Covering a comprehensive set of topics and perspectives, this fascinating book will appeal to upper-level students of human resource management, organizational behavior, industrial/organizational psychology, sociology, and economics, as well as to thoughtful and engaged professionals.

The creative collaborations of engineers, artists, scientists, and curators over the past fifty years. Artwork as opposed to experiment? Engineer versus artist? We often see two different cultural realms separated by impervious walls. But some fifty years ago, the borders between technology and art began to be breached. In this book, W. Patrick McCray shows how in this era, artists eagerly collaborated with engineers and scientists to explore new technologies and create visually and sonically compelling multimedia works. This art emerged from corporate laboratories, artists' studios, publishing houses, art galleries, and university campuses. Many of the biggest stars of the art world—Robert Rauschenberg, Yvonne Rainer, Andy Warhol, Carolee Schneemann, and John Cage—participated, but the technologists who contributed essential expertise and aesthetic input often went unrecognized. This book is an invaluable desk reference for facilitators, leaders, coaches and anyone who wants to engage in more effective learning and decision-making conversations. It offers over 1700 rich questions that you can borrow or adapt to improve your inquiry skills, and provides clear frameworks that point to when, where, and why particular questions are most useful.

Practical solutions for improving higher education opportunities for disadvantaged students Too many disadvantaged college students in America do not complete their coursework or receive any college credential, while others earn degrees or certificates with little labor market value. Large numbers of these students also struggle to pay for college, and some incur debts that they have difficulty repaying. The authors provide a new review of the causes of these problems and offer promising policy solutions. The circumstances affecting disadvantaged students stem both from issues on the individual side, such as weak academic preparation and financial pressures, and from institutional failures. Low-income students disproportionately attend schools that are underfunded and have weak performance incentives, contributing to unsatisfactory outcomes for many students. Some solutions, including better financial aid or academic supports, target individual students. Other solutions, such as stronger linkages between coursework and the labor market and more structured paths through the curriculum, are aimed at institutional reforms. All students, and particularly those from disadvantaged backgrounds, also need better and varied pathways both to college and directly to the job market, beginning in high school. We can improve college outcomes, but must also acknowledge that we must make hard choices and face difficult tradeoffs in the process. While no single policy is guaranteed to greatly improve college and career outcomes, implementing a number of evidence-based policies and programs together has the potential to improve these outcomes substantially.

By the end of World War I, the skyrocketing divorce rate in the United States had generated a deep-seated anxiety about marriage. This fear drove middle-class couples to seek advice, both professional and popular, in order to strengthen their relationships. In *Making Marriage Work*, historian Kristin Celello offers an insightful and wide-ranging account of marriage and divorce in America in the twentieth century, focusing on the development of the idea of marriage as "work." Throughout, Celello illuminates the interaction of marriage and divorce over the century and reveals how the idea that marriage requires work became part of Americans' collective consciousness. "This book gives highly sensitive persons (HSPs) strategies to build confidence, combat stress, and find work that is emotionally, financially, and creatively rewarding. Based on cutting-edge medical and scientific research, this fresh perspective on how readers can secure satisfying careers." -- WEBSITE. Many tools are on offer to politicians and other policy-makers when they seek to change policy outcomes. Often they choose to concentrate on one set of tools, but fail to see the costs as well as the benefits - and may not consider the available evidence regarding their effectiveness. This innovative new textbook clearly sets out the main tools of government, and provides an analysis of their efficacy when applied to public problems. Each chapter examines the relative benefits and costs of using a key tool that is available to improve policy outcomes, drawing on a diverse literature, a large number of empirical studies and a range of contexts. Areas covered include: governments and policy outcomes law and regulation public spending and taxation bureaucracy and public management institutions information, persuasion and deliberation networks and governance. Offering a clear and comprehensive evaluation, and highlighting the set of powerful tools commonly available, this text encourages students to consider the most effective

combination in order to manage key issues successfully. Including a useful glossary of key terms, this book will be of great interest to all students of public policy, administration and management. Rationale and step-by-step instructions for creating classroom assessments that accurately measure what students know and are able to do. "An excellent workbook-like guide" to the nuts and bolts of professional conflict and the strategies you need to make conflict work for you (Booklist, starred review). Every workplace is a minefield of conflict, and all office tension is shaped by power. Making Conflict Work teaches you to identify the nature of a conflict, determine your power position relative to anyone opposing you, and use the best strategy for achieving your goals. These strategies are equally effective for executives, managers and their direct reports, consultants, and attorneys—anyone who has ever had a disagreement with someone in their organization. Packed with helpful self-assessment exercises and action plans, this book gives you the tools you need to achieve greater satisfaction and success. "A genuine winner." —Robert B. Cialdini, author of Influence "This book is a necessity . . . Read it." —Leymah Gbowee, 2011 Nobel Peace Prize laureate and Liberian peace activist "Innovative and practical." —Lawrence Susskind, Program on Negotiation cofounder "Navigating conflict effectively is an essential component of leadership. Making Conflict Work illustrates when to compromise and when to continue driving forward." —Hon. David N. Dinkins, 106th mayor of the City of New York "An excellent workbook-like guide." —Booklist, starred review

Experience is making a comeback. Learn how to repurpose your wisdom. At age 52, after selling the company he founded and ran as CEO for 24 years, rebel boutique hotelier Chip Conley was looking at an open horizon in midlife. Then he received a call from the young founders of Airbnb, asking him to help grow their disruptive start-up into a global hospitality giant. He had the industry experience, but Conley was lacking in the digital fluency of his 20-something colleagues. He didn't write code, or have an Uber or Lyft app on his phone, was twice the age of the average Airbnb employee, and would be reporting to a CEO young enough to be his son. Conley quickly discovered that while he'd been hired as a teacher and mentor, he was also in many ways a student and intern. What emerged is the secret to thriving as a mid-life worker: learning to marry wisdom and experience with curiosity, a beginner's mind, and a willingness to evolve, all hallmarks of the "Modern Elder." In a world that venerates the new, bright, and shiny, many of us are left feeling invisible, undervalued, and threatened by the "digital natives" nipping at our heels. But Conley argues that experience is on the brink of a comeback. Because at a time when power is shifting younger, companies are finally waking up to the value of the humility, emotional intelligence, and wisdom that come with age. And while digital skills might have only the shelf life of the latest fad or gadget, the human skills that mid-career workers possess—like good judgment, specialized knowledge, and the ability to collaborate and coach - never expire. Part manifesto and part playbook, *Wisdom@Work* ignites an urgent conversation about ageism in the workplace, calling on us to treat age as we would other type of diversity. In the process, Conley liberates the term "elder" from the stigma of "elderly," and inspires us to embrace wisdom as a path to growing whole, not old. Whether you've been forced to make a mid-career change, are choosing to work past retirement age, or are struggling to keep up with the millennials rising up the ranks, *Wisdom@Work* will help you write your next chapter. Chapter 16: Proactive Behavior Training: Theory, Design, and Future Directions -- The Sequence of Actions -- Personal Initiative -- Developing the Training Content Along the Facet Model -- Making the Training Work: From Action Principles to Personal Initiative -- Personal Initiative Trainings in Different Contexts of Work -- Evaluation of Personal Initiative Training -- Limitations of Personal Initiative Training -- Recommendations for Research and Practice -- References -- Chapter 17: Voice Framing and Sensemaking: A Construal-Level Perspective on Proactive Voice Effectiveness -- Defining Proactive Voice -- Construal-Level Theory and Voice Effectiveness -- Discussion -- Conclusion -- References -- Chapter 18: The Dark Side of Proactive Behavior: When Being Proactive May Hurt Oneself, Others, or the Organization -- The Dark Side of Proactive Work Behaviors -- The Dark Side of Proactive PE-Fit Behaviors -- The Dark Side of Proactive Strategic Behaviors -- Discussion -- References -- Chapter 19: Teams and Proactivity -- Defining Team Proactivity -- Distinguishing Individual and Team Proactivity -- The Origins of Team Proactivity -- Toward a Model of Team Proactivity: An IMOI Framework -- Implications and Future Research -- Conclusion -- Note -- References -- Chapter 20: New Perspectives and Directions for Understanding Proactivity in Organizations -- Core Themes and Idiosyncracies in Proactivity Research -- Practical Implications of Proactivity Research -- The Future of Proactivity Research -- Concluding Remarks on the Future of Proactivity -- References -- Index.

Master the delicate art of working from home with this comprehensive resource. *Working from Home: Making the New Normal Work for You* provides readers with a detailed strategy on how to turn working from home into a powerful career choice. Author and Salesforce executive Karen Mangia teaches readers how to: Build the future of work in any kind of space: ideas for your home office that fit anywhere Create personalized time management routines designed specifically for remote productivity, impact, and balance—even while wearing your sweatpants Deal with Zoom fatigue, burnout, and isolation, via untapped new strategies for connection and team-building, even when the team is remote Discover how to deliver powerful virtual presentations and build career impact online, with expert communication strategies designed for an online world *Working from Home* explains in detail how to turn even the smallest of living spaces into the ideal remote work environment. It comprehensively explores how you can make yourself vital to any organization without ever setting foot in an office building. Because success isn't a location: you can move your career forward from anywhere, if you know how to do it. This book will show you how to embrace the new normal and make sure your career doesn't miss a beat. Full of concrete strategies and practical advice, *Working from Home* is a must-read for anyone who wants to know how to find that elusive work/life balance when working remote. With guidance on how to create a work-from-home culture designed for success, it's a perfect choice for early-in-career professionals, sales leaders, team managers, and business executives looking for fresh ideas on the future of work. An encouraging account of the potential of foreign aid to reduce poverty and a challenge to all aid organizations to think harder about how they spend their money. With more than a billion people now living on less than a dollar a day, and with eight million dying each year because they are simply too poor to live, most would agree that the problem of global poverty is our greatest moral challenge. The large and pressing practical question is how best to address that challenge. Although millions of dollars flow to poor countries, the results are often disappointing. In *Making Aid Work*, Abhijit Banerjee—an "aid optimist"—argues that aid has much to contribute, but the lack of analysis about which programs really work causes considerable waste and inefficiency, which in turn fuels unwarranted pessimism about the role of aid in fostering economic development. Banerjee challenges aid donors to do better. Building on the model used to evaluate new drugs before they come on the market, he argues that donors should assess programs with field experiments using randomized trials. In fact, he writes, given the number of such experiments already undertaken, current levels of development assistance could focus entirely on programs with proven records of success in experimental conditions. Responding to his challenge, leaders in the field—including Nicholas Stern, Raymond Offenheiser, Alice Amsden, Ruth Levine, Angus Deaton, and others—question whether randomized trials are the most appropriate way to evaluate success for all programs. They raise broader questions as well, about the importance of aid for economic development and about the kinds of interventions (micro or macro, political or economic) that will lead to real improvements in the lives of poor people around the world. With one in every six people now living in extreme poverty, getting it right is crucial. During the westward expansion of America, white middle-class ideals of home and domestic work were used to measure differences between white and Native American women. Yet the vision of America as "home" was more than a metaphor for women's stake in the process of conquest—it took deliberate work to create and uphold. Treating white and indigenous women's struggles as part of the same history, Jane E. Simonsen argues that as both cultural workers and domestic laborers insisted upon the value of their work to "civilization," they exposed the inequalities integral to both the nation and the household. Simonsen illuminates discussions about the value of women's work through analysis of texts and images created by writers, women's rights activists, reformers, anthropologists, photographers, field matrons, and Native American women. She argues that women such as Caroline Soule, Alice Fletcher, E. Jane Gay, Anna Dawson Wilde, and Angel DeCora called upon the rhetoric of sentimental domesticity, ethnographic science, public display, and indigenous knowledge as they sought to make the gendered and racial order of the nation visible through homes and the work performed in them. Focusing on the range of materials through which domesticity was produced in the West, Simonsen integrates new voices into the study of domesticity's imperial manifestations. Workplace conflict is inevitable. When it happens, how can you get back on track? Like all relationships, the ones we have at work are subject to stresses—maybe even fractures that can really take a toll on the workplace. Productivity is lost. Time is wasted. Tension mounts. Cooperation is reduced. And the workplace becomes toxic. What's the solution? In *Making Things Right at Work*, Dr. Gary Chapman, #1 New York Times bestselling author of *The 5 Love Languages®*, is joined by business consultants Dr. Jennifer Thomas and Dr. Paul

White to offer the strategies you need to restore harmony at work. You'll learn: How to discern the causes of workplace conflict How to avoid unnecessary disputes How to repair relationships when you've messed up How to let go of past hurts and rebuild trust Don't let broken relationships taint your work environment. Take the needed steps to make things right . . . not tomorrow, but today. The success of your career depends on it! Drawing from research and 25 years of experience in the field, diversity expert Dr. Sondra Thiederman dissects the problems surrounding diversity in the workplace and offers specific, straightforward strategies focused on creating individual change. Using real-life examples, practical tips, and exercises, she guides readers on a journey of self-discovery, intellectual awareness, and healing. In this fully updated and revised edition, learn to: Function more effectively and feel more comfortable in a diverse workplace. Identify and defeat biased attitudes. Confront and minimize the fears that underlie biases. Overcome diversity-related conflict. Women or men, black or white, gay or straight, immigrant or native-born--everyone has prejudices. Making Diversity Work shifts the dialogue from blame to emphasis on the responsibility everyone shares to rid the workplace of bias. Dr. Thiederman delivers the prescription to defeat bias in the workplace in this definitive book for executives, managers, human resources professionals, and diversity practitioners. "A damning denunciation of things as they are, and a platform for how we can do better."—Andrew Leonard, Salon Building on the international bestseller *Globalization and Its Discontents*, Joseph E. Stiglitz offers here an agenda of inventive solutions to our most pressing economic, social, and environmental challenges, with each proposal guided by the fundamental insight that economic globalization continues to outpace both the political structures and the moral sensitivity required to ensure a just and sustainable world. As economic interdependence continues to gather the peoples of the world into a single community, it brings with it the need to think and act globally. This trenchant, intellectually powerful, and inspiring book is an invaluable step in that process. For decades, the world's governments have struggled to move from talk to action on climate. Many now hope that growing public concern will lead to greater policy ambition, but the most widely promoted strategy to address the climate crisis - the use of market-based programs - hasn't been working and isn't ready to scale. Danny Cullenward and David Victor show how the politics of creating and maintaining market-based policies render them ineffective nearly everywhere they have been applied. Reforms can help around the margins, but markets' problems are structural and won't disappear with increasing demand for climate solutions. Facing that reality requires relying more heavily on smart regulation and industrial policy - government-led strategies - to catalyze the transformation that markets promise, but rarely deliver. *A Simple Mindset Tweak Will Change Your Life*. After a fifteen-year nightmare operating a stagnant service business, Sam Carpenter developed a down-to-earth methodology that knocked his routine eighty-hour workweek down to a single hour—while multiplying his bottom-line income more than twenty-fold. In *Work the System*, Carpenter reveals a profound insight and the exact uncomplicated, mechanical steps he took to turn his business and life around without turning it upside down. Once you “get” this new vision, success and serenity will come quickly. You will learn to: • Make a simple perception adjustment that will change your life forever. • See your world as a logical collection of linear systems that you can control. • Manage the systems that produce results in your business and your life. • Stop fire-killing. Become a fire-control specialist! • Maximize profit, create client loyalty, and develop enthusiastic employees who respect you. • Identify insidious “errors of omission.” • Maximize your biological and mechanical “prime time” so that you are working at optimum efficiency. • Design the life you want—and then, in the real world, quickly create it! You can keep doing what you have always done, and continue getting mediocre, unsatisfactory results. Or you can find the peace and freedom you've always wanted by transforming your business or corporate department into a finely tuned machine that runs on autopilot! For the last 2 decades, the field of social studies education has seen an increase in research on the use of discussions as an essential instructional technique. This book examines the importance of using quality dialogue as a tool to help students understand complex issues in social studies classrooms. The author provides a collection of well-known, evidence-based discussion techniques as well as classroom examples showing the methods in use. While the benefits of using discussion as an instructional method is widely considered a best practice of civic learning, actual high-quality discussions are rare and notoriously difficult to facilitate. *Making Classroom Discussions Work* is designed to guide teacher educators and classroom teachers in facilitating equitable and productive discussions that will boost learning and democratic engagement. **Book Features:** Emphasizes the rationale for using discussion in social studies teaching. Collects strategies that have been proposed in disparate journal articles and books in one convenient volume. Presents research-based challenges and supports for conducting and assessing discussions in the social studies. Includes methods and tips to help teachers make discussions more equitable in their classrooms. **Contributors:** Terence Beck, Jacob S. Bennett, Bryant O. Best, Mary Ellen Daneels, Antero Garcia, Noorya Hayat, Carlos P. Hipolito-Delgado, Erica Hodgkin, Amanda Jennings, Jeff Kabat, Kei Kawashima-Ginsberg, Jada Kohlmeier, Bruce E. Larson, Arine Lowery, Paula McAvoy, Elizabeth Milligan Cordova, H. Richard Milner IV, Nicole Mirra, Chauncey Monte-Sano; Walter Parker, Maria del Mar Estrada Rebull, Abby Reisman, Dan Stickney **Why do some democratic governments succeed and others fail?** In a book that has received attention from policymakers and civic activists in America and around the world, Robert Putnam and his collaborators offer empirical evidence for the importance of "civic community" in developing successful institutions. Their focus is on a unique experiment begun in 1970 when Italy created new governments for each of its regions. After spending two decades analyzing the efficacy of these governments in such fields as agriculture, housing, and health services, they reveal patterns of associationism, trust, and cooperation that facilitate good governance and economic prosperity. **Group homes** emerged in the United States in the 1970s as a solution to the failure of the large institutions that, for more than a century, segregated and abused people with intellectual and developmental disabilities. Yet community services have not, for the most part, delivered on the promises of rights, self-determination, and integration made more than thirty years ago, and critics predominantly portray group homes simply as settings of social control. *Making Life Work* is a clear-eyed ethnography of a New York City group home based on more than a year of field research. Jack Levinson shows how the group home needs the knowledgeable and voluntary participation of residents and counselors alike. The group home is an actual workplace for counselors, but for residents group home work involves working on themselves to become more autonomous. Levinson reveals that rather than being seen as the antithesis of freedom, the group home must be understood as representing the fundamental dilemmas between authority and the individual in contemporary liberal societies. No longer inmates but citizens, these people who are presumed—rightly or wrongly—to lack the capacity for freedom actually govern themselves. Levinson, a former group home counselor, demonstrates that the group home depends on the very capacities for independence and individuality it cultivates in the residents. At the same time, he addresses the complex relationship between services and social control in the history of intellectual and developmental disabilities, interrogating broader social service policies and the role of clinical practice in the community. **How do you keep your employees engaged, creative, innovative, and productive?** *Simple: Work human!* From the pioneers of the management strategy that's transforming businesses worldwide, *Making Work Human* shows how to implement a culture of performance and gratitude in the workplace—and seize a competitive edge, increase profitability, and drive business momentum. Leaders of Workhuman, the world's fastest-growing social recognition and continuous performance management platform, Eric Mosley and Derek Irvine use game-changing data analytics to prove that when a workplace becomes more “human”—when it's fueled by a culture of gratitude—measurable business results follow. In *Making Work Human*, they show you how to: Apply analytics and artificial intelligence in ways that make work more human, not less Expand equity, diversity, and inclusion initiatives and strategies to include a wider range of backgrounds, life experiences, and capabilities Use recognition as an actionable strategy to create a truly inclusive, connected culture “The qualities that make us most human—connection, community, positivity, belonging, and a sense of meaning—have become the corporate fuel for getting things done—for innovating, for thriving in the global marketplace, and for outperforming the competition,” the authors write. By building a sense of belonging, purpose, meaning, happiness, and energy in every employee, you'll create a profound connection between your organization and its goals. And *Making Work Human* provides everything you need to get there. This book uses original data from China's National People's Congress to challenge conceptions of representation, authoritarianism, and the political system. **NEW YORK TIMES BESTSELLER • Over a million copies sold!** “An eminently practical guide to an emotionally intelligent—and long-lasting—marriage.”—Daniel Goleman, author of *Emotional Intelligence* *The Seven Principles for Making Marriage Work* has revolutionized the way we understand, repair, and strengthen marriages. John Gottman's unprecedented study of couples over a period of years has allowed him to observe the habits that can make—and break—a marriage. Here is the culmination of that work: the seven principles that guide couples on a path toward a harmonious and long-

lasting relationship. Straightforward yet profound, these principles teach partners new approaches for resolving conflicts, creating new common ground, and achieving greater levels of intimacy. Gottman offers strategies and resources to help couples collaborate more effectively to resolve any problem, whether dealing with issues related to sex, money, religion, work, family, or anything else. Packed with new exercises and the latest research out of the esteemed Gottman Institute, this revised edition of *The Seven Principles for Making Marriage Work* is the definitive guide for anyone who wants their relationship to attain its highest potential. When Shola Richards's soul-sucking job left him feeling numb and suicidal, he switched focus and devoted himself to transforming the workplace into a space of relentless respect, courtesy, and endless energy. Meant to motivate current and future leaders, *Making Work Work* aims to start a movement that will banish on-the-job bullying, put meaning back into work, and enhance coworkers' happiness and engagement. "This book is about the threats to education quality in the developing world that cannot be explained by lack of resources. It reviews the observed phenomenon of service delivery failures in public education: cases where programs and policies increase the inputs to education but do not produce effective services where it counts - in schools and classrooms. It documents what we know about the extent and costs of such failures across low and middle-income countries. And it further develops the conceptual model posited in the World Development Report 2004: that a root cause of low-quality and inequitable public services - not only in education - is the weak accountability of providers to both their supervisors and clients. The central focus of the book, however, is a new story. It is that developing countries are increasingly adopting innovative strategies to attack these problems. Drawing on new evidence from 22 rigorous impact evaluations across 11 developing countries, this book examines how three key strategies to strengthen accountability relationships in developing country school systems have affected school enrollment, completion and student learning. The book reviews the motivation and global context for education reforms aimed at strengthening provider accountability. It provides the rationally and synthesizes the evidence on the impacts of three key lines of reform: (1) policies that use the power of information to strengthen the ability of clients of education services (students and their parents) to hold providers accountable for results; (2) policies that promote school-based management?that is increase schools? autonomy to make key decisions and control resources, often empowering parents to play a larger role; (3) teacher incentives reforms that specifically aim at making teachers more accountable for results, either by making contract tenure dependent on performance, or offering performance-linked pay. The book summarizes the lessons learned, draws cautious conclusions about possible complementarities across different types of accountability-focused reforms if they are implemented in tandem, considers issues related to scaling up reform efforts and the political economy of reform, and suggests directions for future work." Information Technology time management expert Dominica DeGrandis, the reveals the real crime of the century--time theft, one of the most costly factors impacting enterprises in their day-to-day operations. The solution to preventing these value stream delays? Make the work visible. In this timely book (title not final), solutions and preventative measures are illustrated and methodologies outlined for immediate application into daily work. The family business becomes much more complex as it goes from the founder to next generations. As more family members work together several challenges become apparent and can threaten the business if not addressed. This book shows the family members how to confront the problems and how to create solutions. This book celebrates Michael Stonebraker's accomplishments that led to his 2014 ACM A.M. Turing Award "for fundamental contributions to the concepts and practices underlying modern database systems." The book describes, for the broad computing community, the unique nature, significance, and impact of Mike's achievements in advancing modern database systems over more than forty years. Today, data is considered the world's most valuable resource, whether it is in the tens of millions of databases used to manage the world's businesses and governments, in the billions of databases in our smartphones and watches, or residing elsewhere, as yet unmanaged, awaiting the elusive next generation of database systems. Every one of the millions or billions of databases includes features that are celebrated by the 2014 Turing Award and are described in this book. Why should I care about databases? What is a database? What is data management? What is a database management system (DBMS)? These are just some of the questions that this book answers, in describing the development of data management through the achievements of Mike Stonebraker and his over 200 collaborators. In reading the stories in this book, you will discover core data management concepts that were developed over the two greatest eras (so far) of data management technology. The book is a collection of 36 stories written by Mike and 38 of his collaborators: 23 world-leading database researchers, 11 world-class systems engineers, and 4 business partners. If you are an aspiring researcher, engineer, or entrepreneur you might read these stories to find these turning points as practice to tilt at your own computer-science windmills, to spur yourself to your next step of innovation and achievement. The author of *Getting Things Done* makes recommendations for altering one's perspectives in order to see life as a game that can be won, offering suggestions for handling information overload, achieving focus, and trusting oneself while making decisions. 125,000 first printing. *Making Mentoring Work* is a practical guide for school leaders interested in beginning or enhancing their mentoring programs for new teachers. Readers can use the mentoring program rubric to pre-assess their program and then choose the chapters that correspond to areas of growth. The authors explain the need for collaboration in the management of natural resources and cite successful partnerships doing so, including government agencies, community groups, businesses and individuals across the USA. "Solid advice for newlyweds, golden anniversary celebrants and everybody in-between" from the *Marriage Boot Camp* and former *Divorce Court* star (The *Augusta Chronicle*). As the judge starring on two hit television shows, Lynn Toler has witnessed, en masse, the thematic mistakes made in American marriages. She herself has also been wed for more than 30 years and has seen both the highs and lows of matrimony in her own marriage as well as the marriages of those close to her. Drawing from both her professional career and personal life, Toler sees that the biggest impediment to marriage these days is that couples decide to take the plunge based almost entirely on the most irrational criteria: falling in love. *Making Marriage Work* doesn't suggest that love has nothing to do with marriage at all; rather, Toler says that love by itself is simply not enough to make marriages survive. Marriage, Toler says, is a job, and it needs to be treated like one. This updated manual suggests specific procedures that should be put in place to bridge the gap between head over heels and happily ever after. It explains how to phrase things in order to span the great hormonal divide men and women often fall into when trying to talk to one another. It also discusses the very new and real challenges to marriage created in a culture often overwhelmed by the emphasis on (and ability to attain) instant gratification. Replete with simple, no-nonsense rules, *Divorce Court* anecdotes, and stories about Judge Toler's own union, *Making Marriage Work* contains invaluable information couples can use today to secure their marital tomorrow. Managing a health condition or disability that affects your performance at work can be challenging and even frightening. This book can help you be successful at work while maintaining your health condition. *Making It Work* is an easy-to-understand guide to workplace accommodations under the Americans with Disabilities Act. It will help you: Understand how the ADA applies to you and your job Research, prepare, request, and negotiate a reasonable accommodation with your employer Learn about special cases in which the ADA applies: Service or emotional support animal Temporary workforce Veterans Addiction and recovery Mature workforce (workers over 55) Understand how to use leave and other benefits Find your path to working and living well with a health condition and much more *Making It Work* includes a FREE downloadable *Employee Workbook* (available April 30th, 2020) to help employees research, prepare, and request their specific workplace accommodation needs. A print copy of the *Making It Work Employee Workbook* is available through Amazon. It is employer-friendly, and the author encourages both parties to use the book and workbook during the accommodation process. Author Sheryl Ellis offers guidance from her own experience as a certified human resource professional and ADA Coordinator. Sheryl is uniquely qualified as an HR professional and an employee with a health condition.
