*Wicked Intelligence* Dec 20 2019 In late seventeenth-century London, the most provocative images were produced not by artists, but by scientists. Magnified fly-eyes drawn with the aid of microscopes, apparitions cast on laboratory walls by projection machines, cut-paper figures revealing the "exact proportions" of sea monsters—all were created by members of the Royal Society of London, the leading institutional platform of the early Scientific Revolution. *Wicked Intelligence* reveals that these natural philosophers shaped Restoration London's emergent artistic cultures by forging collaborations with court painters, penning art theory, and designing triumphs of baroque architecture such as St Paul's Cathedral. Matthew C. Hunter brings to life this archive of experimental-philosophical visualization and the deft cunning that was required to manage such difficult research. Offering an innovative approach to the scientific image-making of the time, he demonstrates how the Restoration project of synthesizing experimental images into scientific knowledge, as practiced by Royal Society leaders Robert Hooke and Christopher Wren, might be called "wicked intelligence." Hunter uses episodes involving specific visual practices—for instance, concocting a lethal amalgam of wax, steel, and sulfuric acid to produce an active model of a comet—to explore how Hooke, Wren, and their colleagues devised representational modes that aided their experiments. Ultimately, Hunter argues, the craft and craftiness of experimental visual practice both promoted and menaced the artistic traditions on which they drew, turning the Royal Society projects into objects of suspicion in Enlightenment England. The first book to use the physical evidence of Royal Society experiments to produce forensic evaluations of how scientific knowledge was generated, *Wicked Intelligence* rethinks the parameters of visual art, experimental philosophy, and architecture at the cusp of Britain's imperial power and artistic efflorescence.

*Mediaeval Manichaean Book Art* Jan 01 2021 *Mediaeval Manichaean Book Art* focuses on a corpus of 89 fragments of exquisitely illuminated manuscripts that were produced under the patronage of the Turkic-speaking Uygurs in the Turfan region of East Central Asia between the 8th and 11th centuries C.E., and used in service of the local Manichaean church. By applying a codicological approach to the analysis of these sources, this study casts light onto a lost episode of Central Asian art history and religious book culture. *Mediaeval Manichaean Book Art* represents a pioneer study in its subject, research methodology, and illustrations. It extracts codicological and art historical data from torn remains of lavishly decorated Middle-Persian, Sogdian, and Uygur language manuscripts in codex, scroll, and 'palm-leaf' formats. Through detailed analyses and carefully argued interpretations aided by precise computer drawings, the author introduces an important group of primary sources for future comparative research in Central Asian art, mediaeval book illumination, and Manichaean studies.

**Janson's History of Art: The ancient world** Dec 12 2021 For courses in the History of Art. Rewritten and reorganized, this new edition weaves together the most recent scholarship, the most current thinking in art history, and the most innovative online supplements, including MyArtsLab and the Prentice Hall Digital Art Library. Experience the new Janson and re-experience the history of art. The Portable Edition of Janson's History of Art, Eighth Edition features four lightweight, paperback books packaged together along with optional access to a powerful student website, [www.myartslab.com](http://www.myartslab.com), making the text more student friendly than ever. Janson's History of Art is still available in the original hardcover edition and in Volume I and Volume II splits. The Portable Edition is comprised of four books, each representing a major period of art history. Long established as the classic and seminal introduction to art of the Western world, the Eighth Edition of Janson's History of Art is groundbreaking. When Harry Abrams first published the History of Art in 1962, John F. Kennedy occupied the White House, and Andy Warhol was an emerging artist. Janson offered his readers a strong focus on Western art, an important consideration of technique and style, and a clear point of view. The History of Art, said Janson, was not just a stringing together of historically significant objects, but the writing of a story about their interconnections, a history of styles and of stylistic change. Janson's text focused on the visual and technical characteristics of the objects he discussed, often in extraordinarily eloquent language. Janson's History of Art helped to establish the canon of art history for many generations of scholars. The new Eighth Edition, although revised to remain current with new discoveries and scholarship, continues to follow Janson's lead in important ways: It is limited to the Western tradition, with a chapter on Islamic art and its relationship to Western art. It keeps the focus of the discussion on the object, its manufacture, and its visual character. It considers the contribution of the artist as an important part of the analysis. This edition maintains an organization along the lines established by Janson, with separate chapters on the Northern European Renaissance, the Italian Renaissance, the High Renaissance, and Baroque art, with stylistic divisions for key periods of the modern era. Also embedded in this edition is the narrative of how art has changed over time in the cultures that Europe has claimed as its patrimony.

**Reality Through the Arts** Jan 25 2023 This introductory exploration of basic artistic concepts and terms applies them to a skeletal multi-disciplinary and multi-cultural history of artistic styles. It treats all the arts—painting, printmaking, photography, sculpture, music, theatre, dance, film, architecture, literature—uniformly, and uses a common outline to reinforce the relationship of terms and concepts to the perceptual process. The book also ties both artistic media and history to the theme of art as a reflection of human reality. This examination focuses on the media of the arts, pictures, sculpture, music, theatre, cinema, dance, architecture, literature, the styles of the arts, ancient approaches, artistic reflections in the pre-modern world, as well as artistic styles in the emerging modern world and, the beginnings of modernism, pluralism in a post-modern age. For art enthusiasts and others interested exploring how artists express themselves.

**Ornament and Order** Feb 20 2020 Over the last forty years, graffiti and street-art have become a global phenomenon within the visual arts. Whilst they have increasingly been taken seriously by the art establishment (or perhaps the art market), their academic and popular examination still remains within old debates which argue over whether these acts are vandalism or art, and which examine the role of graffiti in gang culture and in terms of visual pollution. Based on an in-depth ethnographic study working with some of the world's most influential Independent Public Artists, this book takes a completely new approach. Placing these illicit aesthetic practices within a broader historical, political, and aesthetic context, it argues that they are in fact both intrinsically ornamental (working within a classic architectonic framework), as well as innately ordered (within a highly ritualized, performative structure). Rather than disharmonic, destructive forms, rather than ones solely working within the dynamics of the market, these insurgent images are seen to reface rather than deface the city, operating within a modality of contemporary civic ritual. The book is divided into two main sections, Ornament and Order. Ornament focuses upon the physical artifacts themselves, the various meanings these public artists ascribe to their images as well as the tensions and communicative schemata emerging out of their material form. Using two very different understandings of political action, it places these illicit icons within the wider theoretical debate over the public sphere that they materially re-present. Order is focused more closely on the ephemeral trace of these spatial acts, the explicitly performative, practice-based elements of their aesthetic production. Exploring thematics such as carnival and play, risk and creativity, it tracks how the very residue of this cultural production structures and shapes the socio-ethico guidelines of these artists' lifeworlds.

**Beyond Representation** Oct 10 2021 Beyond Representation surveys Chinese painting and calligraphy from the eighth to the fourteenth century, a period during which Chinese society and artistic expression underwent profound changes. A fourteenth-century Yuan dynasty (1279 - 1368) literati landscape painting presents a world that is totally different from that portrayed in the monumental landscape images of the early Sung dynasty (960 - 1279). To chronicle and explain the evolution from formal representation to self-expression is the purpose of this book. Wen C. Fong, one of the world's most eminent scholars of Chinese art, takes the reader through this evolution, drawing on the outstanding collection of Chinese painting and calligraphy in The Metropolitan Museum of Art, New York. Focusing on 118 works, each illustrated in full color, the book significantly augments the standard canon of images used to describe the period, enhancing our sense of the richness and complexity of artistic expression during this six-hundred-year era.
