This provides an illustration that, in order to create new or modified knowledge practices, strengthen customer relationships and thus positively influence customer satisfaction, organizations must be flexible in configuring (combining) knowledge and knowledge structures in a way that is appropriate for delivering value to the customer. It must simultaneously develop effective strategies for updating the knowledge of its staff members necessary for underpinning the creation and delivery of appropriate knowledge services. Thus, unlearning (forgetting) becomes a critical means for organizational success. The ECKM community of scholars has already initiated dialogue that links its particular strengths to innovation issues. This conference aims to further that dialogue by attracting leading edge work that leverages the ECKM community's in-depth understanding of learning and unlearning to better understand knowledge management. Our aim is to stimulate breakthrough research streams linking learning, unlearning

and knowledge management. How can organizations tailor, use, and extend techniques and tools from knowledge management for improving their business practices and processes? Building upon existing work on knowledge management (KM) and organizational learning, the conference will promote interdisciplinary approaches from computer science and information systems, business, management and organization science as well as cognitive science. Emphasis will be put on systematic learning from experience, KM tools and KM success factors. A special interest belongs to knowledge management initiatives which are lightweight (i.e., do not place considerable additional burden on users and KM experts), allow an incremental adoption (i.e., do not require large up-front investment before any return of investment is at least visible), and are flexible regarding frequent changes in experts and topics. Continuing the success of the ECKM conference series since 2000, the 2015 conference will provide an international communication forum bringing together academia and industry for discussing the progress made and addressing the challenges faced by continuous learning in knowledge-intensive organizations. For more than three decades it has filled a gap in the requirements of students in law or political science taking introductory courses on the legal system and is now in its 7th edition. It deals with every aspect of the law-making process: the preparation of

legislation; its passage through Parliament; statutory interpretation; binding precedent; how precedent works; law reporting; the nature of the judicial role; European Union law; and the process of law reform. It presents a large number of original texts from a variety of sources – cases, official reports, articles, books, speeches and empirical research studies – laced with the author's informed commentary and reflections on the subject. This book is a mine of information dealing with both the broad sweep of the subject and with all its detailed ramifications. "In a crowded market place Zander's latest edition of *The Law-Making Process* stands out like a beacon in the fog. Well chosen extracts from stimulating texts enable the neophyte student of the law making process in England and Wales to grapple with the issues of the hour with a forcefulness and insight we have long come to associate with the author. Highly recommended." Professor Alan Paterson "Law-making is important, fascinating, and fun. This new edition of Michael Zander's stimulating book on law-making brings that out. It takes account of the many developments since the 6th edition in 2004, ranging across the work of the Law Commission, parliamentary scrutiny of Bills, the relationship between our courts and the European Court of Human Rights, the EU, and many other matters. Well chosen extracts and thought-provoking commentary help law and politics students at every level to understand the raw material with which they work, and make more experienced practitioners and academics look afresh at topics we thought we understood. I recommend it highly." Professor David Feldman "As counsel, judge and now cross-bencher in the House of Lords I have been taking part in the law-making process for over fifty years. In explaining to me what I have been up to, Michael Zander both informed and amused. Not only does he deal in detail with every aspect of the law-making process, but he has assembled a rich cornucopia of commentary from a wide variety of sources. He has shown a degree of self-restraint in expressing his own views, though his use of an

adverb made them pleasingly plain when he stated "On 3 October, 2014, the Conservative Party published an 8 page document, brazenly called "Protecting Human Rights in the UK". I commend this book to anyone who wishes to understand the far from simple way that law is made in this country." This timely book provides a comprehensive guide to, and rigorous analysis of, prosecutorial discretion at the International Criminal Court. This is the first ever study that takes the reader through all the key stages of the Prosecutor's decision-making process. Starting from preliminary examinations and the decision to investigate, the book also explores case selection processes, plea agreements, culminating in the question of how to end engagement in specific country situations. The book serves as a guide to the Rome Statute through the lens of the Prosecutor's activities. With its unique combination of legal theory and specific policy analysis, it addresses broader questions that will be relevant to other international and hybrid criminal courts and tribunals. The book will be of interest to students,

practitioners of law, academics, and the wider public concerned with international law, criminal justice and international relations. Capitalism has been an unprecedented engine of wealth creation for many centuries, leading to sustained productivity gains and long-term

growth and lifting an increasing part of humanity out of poverty and subsistence. But its effects, and hence its future, have come increasingly under question: Is capitalism still improving the wealth and well-being for the many? Or, has it become destructive for the economy, where long-term value creation is being sacrificed to the pressures of short-termism; for society, where the gap between rich and poor has increased and opportunities to lift oneself out of poverty have dwindled; and for the natural environment, which seems increasingly under threat with unforeseen consequences for prosperity and global order? This volume reflects both the urgency of the needed action and the opportunity to achieve a wide-ranging agreement and lasting movement towards a more responsible, equitable, and sustainable model of capitalism in order to ensure its very survival. The volume is unique in that it brings together many of the leading proponents for a reformed, re-imagined capitalism from the fields of academia, business, and NGOs. Its contributors have been at the forefront of thought and action in regard to the future of capitalism. Both individually and collectively, they provide powerful suggestions of what such a long-term oriented model of capitalism should look like and how it can be achieved. Drawing on their research and/or professional experience, they write in an accessible way aiming to reach the broad audiences required to turn a re-imagined capitalism into a reality. This product covers the following: • 10 Sample Papers-5 Solved & 5 Self-Assessment Papers strictly designed as per the latest CBSE Sample Paper released on 16th September'2022 • 2023 Board Sample Paper analysis • On-Tips Notes & Revision Notes for Quick Revision • Mind Maps & Mnemonics with 1000+concepts for better learning • 200+MCQs & Objective Type Questions for practice • Chapter-wise and Topic-wise presentation • Latest NEET Question Paper 2022- Fully solved • Chapter-wise & Topic-wise Previous Questions to enable quick revision • Previous Years' (1988-2022) Exam Questions to facilitate

One third of all oil and gas comes from the offshore sector. However, offshore oil and gas installations are generally considered intrinsically vulnerable to deliberate attacks. The changing security landscape and concerns about the threats of terrorism and piracy to offshore oil and gas installations are major issues for energy companies and governments worldwide. But, how common are attacks on offshore oil and gas installations? Who attacks offshore installations? Why are they attacked? How are they attacked? How is their security regulated at the international level? How has the oil industry responded? This timely and first of its kind publication answers these questions and examines the protection and security of offshore oil and gas installations from a global, industry-wide and company-level perspective. Looking at attacks on offshore installations that occurred throughout history of the offshore petroleum industry, it examines the different types of security threats facing offshore installations, the factors that make offshore installations attractive targets, the nature of attacks and the potentially devastating impacts that can result from attacks on these important facilities. It then examines the international legal framework, state practice and international oil and gas industry responses that aim to address this vital problem. Crucially, the book includes a comprehensive dataset of attacks and security incidents involving offshore oil and gas installations entitled the Offshore Installations Attack Dataset (OIAD). This is an indispensable reference work for

oil and gas industry professionals, company security officers, policy makers, maritime lawyers and academics worldwide. Exploring the advantages and disadvantages of codifying contract law, this book considers the question from the perspectives of both civil and common law systems, referring in detail to issues of international and consumer law. With contributions from leading international scholars, the chapters present a range of opinions on the virtues of codification, encouraging further debate on this topic. The book commences with a discussion on the internationalization imperative for codification of contract law. It then turns to regional issues, exploring first codification attempts in the European Union and Japan, and then issues relevant to codification in the common law jurisdictions of Australia, New Zealand and the United States. The collection concludes with two chapters which consider the need to draw upon both private and comparative international law perspectives to inform any codification reforms. This book will be of interest to international and comparative contract law academics, as well as regulators and policy-makers. The aim of this timely work, which appears in the wake of the worst global financial crisis since the late 1920s, is to bring together high quality research-based contributions from leading international scholars involved in constructing a geographical perspective on money. Topics covered include the crisis, the spatial circuits of finance, regulation, mainstream financial markets (banking, equity, etc), through to the various 'alternative' and 'disruptive' forms of money that have arisen in recent years. It will be of interest to geographers, political scientists, sociologists, economists, planners and all those interested in how money shapes and reshapes socio-economic space and conditions local and regional development.
