In global consumer culture, brands structure an economy of symbolic exchange that gives value to the meanings consumers attach to the brand name, logo, and product category. Brand meaning is not just a value added to the financial value of goods, but has material impact on financial markets themselves. Strong brands leverage consumer investments in the cultural myths, social networks, and ineffable experiences they associate with marketing signs and rituals. Creating Value: The Theory and Practice of Marketing Semiotic Research is a guide to managing these investments by managing the cultural codes that define value in a market or consumer segment. The book extends the discussion beyond the basics of semiotics to post-structural debates related to ethnographic performance, multicultural consumer identity, the digitalized consumer, and heterotopic experiences of consumer space. The book invites readers to challenge the current thinking on topics ranging from cultural branding and brand rhetoric to digital media management and service site design. It also emphasizes the role of product category codes and cultural trends in the production of perceived value. Creating Value explains theory in language that is accessible to academics and students, as well as research practitioners and marketers. By applying semiotics to the everyday world of the marketplace, the book makes sense of the semiotics discipline, which is often mystified by technical jargon and hair-splitting debate in the academic literature. The book also provides practitioners and professors with a practical guide to the methods used in semiotic research across the marketing mix. This is a story of summer 1940, of a little known territorial battalion and an almost forgotten British military disaster. In April 1940 the Princess Louise's Kensington Regiment left England to join the British Expeditionary Force in France. It was attached to the 51st (Highland) Division which was moving to the Saar region to defend the Maginot Line. From May until mid-June the Kensingtons were in continuous action, first on the Saar, then on the Somme, and finally in a fighting withdrawal along the channel coast in an attempt to reach Le Havre. Outnumbered four to one the division was cornered at the little seaside town of St Valery en Caux and forced to surrender on 13 June. Three companies of the Kensingtons launched a daring escape through Le Havre to return to England and take part in the invasion defences on the Kent coast. This book chronicles the divergent growth trends in car production in Belgium and Spain. It delves into how European integration, high wages, and the demise of GM and Ford led to plant closings in Belgium. Next, it investigates how lower wages and the expansion strategies of Western European automakers stimulated expansion in the Spanish auto industry. Finally, it offers three alternate scenarios regarding how further EU expansion and Brexit may potentially reshape the geographic footprint of European car production over the next ten years. In sum, this book utilizes history to help expand the knowledge of scholars and policymakers regarding how European integration and Brexit may impact future auto industry investment for all EU nations. "Phantoms is gruesome and unrelenting...It's well realized, intelligent, and humane."—Stephen King They found the town silent, apparently abandoned. Then they found the first body, strangely swollen and still warm. One hundred fifty were dead, 350 missing. But the terror had only begun in the tiny mountain town of Snowfield, California. At first they thought it was the work of a maniac. Or terrorists. Or toxic contamination. Or a bizarre new disease. But then they found the truth. And they saw it in the flesh. And it was worse than anything any of them had ever imagined...
