In Jesuit Polymath of Madrid D. Scott Hendrickson offers an account of the life and literary enterprise of Juan Eusebio Nieremberg (1595-1658), who drew from his formation in the Jesuit Order to engage the cultural currents of seventeenth-century Spain. The ideal roadmap for defense lawyers and prosecutors, John M. Castellano has built on the fine works of the original authors of this book, James A. Adams and Daniel D. Blinks who appreciate the succinct analysis necessary to canvass the often tangled landscape of Fourth Amendment law. Their pragmatic approach has created a balanced, sound and comprehensive one-volume survey of arrest, search and seizure issues. The Third edition now features all decisions by the Supreme Court Fourth Amendment cases through June 2015 as well as significant and helpful circuit court decisions on a variety of topics. It includes a number of other new, expanded, or refined sections as well which include application for orders to intercept; bodily intrusions, emergency searches, and workplace searches. The eBook versions of this title feature links to Lexis Advance for further legal research options. The World Commission on Dams (WCD) report (2000) "Dams and Development: A New Framework for Decision-Making" set a landmark in the ongoing controversy over large dams. Now that more than ten years have passed, one has to realize that the WCD norms matter. However, their real chance of becoming implemented relies on whether their core values, strategic priorities and guidelines are accepted by national decision-makers and are translated into official policies and practices. The book's major concern is whether the big hydropower states have improved their standards for environment and resettlement, and whether international standards are applied or exist only on paper. The introductory and synthesis chapters present the methodological approach and discuss the findings. Other chapters analyze changes in dam policies in the big hydropower states Brazil, China, India and Turkey; the role of non-governmental organizations in advocating against the Turkish Ilisu Dam project on the Tigris River; the strategies of International Rivers and World Wildlife Fund for Nature in the global hydropower game; the policies of the German government and its positioning in the dam debate, and the engagement of Chinese actors in building the Bui Dam (Ghana) and the Kamchay Dam (Cambodia). This book addresses the involuntary and arbitrary displacement of individuals resulting from armed conflict and gross human rights violations. It shows that forcible

displacement constitutes a serious violation of international law and of fundamental community interests. *Armed Conflict and Forcible Displacement* provides a critical legal analysis of the contemporary international framework, permeating forcible displacement in these circumstances and explores the rights that individuals possess with specific focus on the right not to be displaced and, where this fails, the right to return home and to receive property restitution. In doing so, this volume marries together different fields of international law and builds on the case studies of Cyprus, Colombia, Cambodia and Syria. While the case studies considered here are far from exhaustive, they are either little explored or present significant challenges due to the magnitude of displacement or contested international jurisprudence. Through this analysis, the volume exposes some of the legal challenges that individuals encounter in being protected from forcible displacement, as well as the legal obstacles that persist in ensuring the return of and the recovery of property by the displaced. It will be of interest to those interested in the fields of international law, human rights law, as well as conflict and war studies.

Animal Cell Technology: from Biopharmaceuticals to Gene Therapy provides a comprehensive insight into biological and engineering concepts related to mammalian and insect cell technology, as well as an overview of the applications of animal cell technology. Part 1 of the book covers the Fundamentals upon which this technology is based and covers the science underpinning the technology. La violencia contra la pareja se ha convertido en un problema social de primera magnitud. La prevalencia e incidencia de este tipo de episodios y la gravedad que adquieren, así como las importantes secuelas que dejan en la víctima y en el resto de la familia, la sitúan entre las principales preocupaciones de los profesionales de la justicia, la psicología, la medicina y la sociología. Para contribuir a su prevención se ha desarrollado el Manual para valorar el riesgo de violencia contra la pareja (SARA), que consiste en un protocolo de predicción del riesgo de violencia específico en conflictos de pareja y que ha demostrado una gran eficacia en Canadá, donde se diseñó inicialmente, y en otros países. La presente edición, traducción al español de la tercera versión de la guía (SARA-v3), ofrece una eficaz herramienta basada en el modelo de juicio profesional estructurado (JPE). En ella se describen los fundamentos empíricos de la metodología y los aspectos técnicos que deben tenerse en cuenta al administrar las indicaciones del manual en contextos profesionales (socio-sanitarios, forenses, jurídicos y correccionales), y también se presentan líneas nuevas de investigación que ayudarán a mejorar la gestión de la violencia contra la pareja.
