General Science I Course Description This is the suggested course sequence that allows two core areas of science to be studied per semester. You can change the sequence of the semesters per the needs or interests of your student; materials within each semester are independent of one another to allow flexibility.

Quarter 1: Ocean The oceans may well be Earth's final frontier. These dark and sometimes mysterious waters cover 71 percent of the surface area of the globe and have yet to be fully explored. Under the waves, a watery world of frail splendor, foreboding creatures, vast mountains, and sights beyond imagination awaits. Now this powerful resource has been developed for three educational levels! Learning about the oceans and their hidden worlds can be exciting and rewarding — the abundance and diversity of

life, the wealth of resources, the latest discoveries, and the simple mysteries that have intrigued explorers and scientists for centuries. A better understanding of our oceans ensures careful stewardship of their grandeur and beauty for future generations, and leads to a deeper respect for the delicate balance of life on that God created on planet Earth.

Quarter 2: Astronomy The universe is an amazing declaration of the glory and power of God! Beautiful and breathtaking in its scale, the vast expanse of the universe is one that we struggle to study, understand, or even comprehend in terms of its purpose and size. Now take an incredible look at the mysteries and marvels of space in *The New Astronomy Book*! If you watch the stars at night, you will see how they change. This speaks to the enormity and intricacy of design in the universe. While the stars appear timeless, they instead reflect an all-powerful Creator who speaks of them in the Bible. Many ancient pagan cultures taught that the changing stars caused the seasons to change, but unlike these pagan teachings, the Book of Job gives credit to God for both changing stars and seasons (Job 38:31-33). When Job looked at Orion, he saw about what we see today, even though he may have lived as much as 4,000 years ago.

Quarter 3: Weather From the practical to the pretty amazing, this book gives essential details into understanding what weather is, how it works, and how other forces that impact on it. Learn why storm chasers and hurricane hunters do what they do and how they are

helping to solve storm connected mysteries. Discover what makes winter storms both beautiful and deadly, as well as what is behind weather phenomena like St. Elmo's Fire. Find important information on climate history and answers to the modern questions of supposed climate change. Get safety tips for preventing dangerous weather related injuries like those from lightning strikes, uncover why thunderstorms form, as well as what we know about the mechanics of a tornado and other extreme weather examples like flash floods, hurricanes and more. A fresh and compelling look at wild and awesome examples of weather in this revised and updated book in the Wonders of Creation series! Quarter 4: Mineral Minerals are a gift of God's grace. Every day we touch them, seeing the diamond in an engagement ring or a copper chain with a cross on it. Minerals are touched on in video games like Minecraft® and Mineral Valley™, making them more a part of our daily experience. Salt, one vital mineral, helps maintain the fluid in our blood cells and is used to transmit information in our nerves and muscles. Also, Jesus told his followers that we are the salt of the earth (Matthew 5:13), something thus needed for health and flavor. Here is a God-honoring book that reveals the first mention of minerals in the Bible, symbolic usages, their current values in culture and society, and their mention in heaven. most of your American adventure with *The Rough Guide to the USA*. Now available in ePub format. Tourists started visiting the American West in sizable numbers after the Union Pacific and Central Pacific Railroads were completed in 1869. Contemporary travel brochures and guidebooks of the 1870s sold tourists on the spectacular scenery of the West, and depicted its cities as extensions of the natural landscape—as well as places where efficient business operations and architectural grandeur prevailed—all now easily accessible thanks to the relative comfort of transcontinental rail travel. Yet as people flocked to western cities, it was the everyday life that captured their interest—the new technologies, incessant clatter, and all the upheaval of modern metropolises. In *Manifest Destinations*, J. Philip Gruen examines the ways in which tourists experienced Chicago, Denver, Salt Lake City, and San Francisco between 1869 and 1893, a period of rapid urbanization and accelerated modernity. Gruen pays particular attention to the contrast between the way these cities were promoted and the way visitors actually experienced them. Guidebooks made Chicago, Denver, Salt Lake City, and San Francisco seem like picturesque environments sprinkled with civilized buildings and refined people. But Gruen’s research in diaries, letters, and traveler narratives shows that tourists were interested—as tourists usually are—in the unexpected encounters that characterize city life. Visitors relished the cities’ unfamiliar storefronts and advertising, public

transit systems, ethnic diversity, and multiple dwellings in all their urban messiness. They thrust themselves into the noise, danger, and cacophony. Western cities did not always live up to the marketing strategies of guidebooks, but the western cities' fast pace and many novelties held extraordinary appeal to visitors from the East Coast and abroad. In recounting lively anecdotes, and by focusing on tourist perceptions of everyday life in western cities, Gruen shows how these cities developed the economy of tourism to eventually encompass both the urban and the natural West. Venture across every inch of this prosperous and stable central European country, from the cosmopolitan capital of Vienna--packed with cultural offerings and late-night musikcafes--to the awesome Alpine backwaters of the Tyrol or winemaking villages. Learn how to stretch your budget in what can be an expensive country to visit. 40 maps. color photos.
