We wish to utilize the opportunity to place on record our special thanks to all team members of Content Development for their efforts to make this wonderful book. Career Point Ltd. This book examines the special nature of English both as a global and a local language, focusing on some of the ongoing changes and on the emerging new structural and discursal characteristics of varieties of English. Although it is widely recognised that processes of language change and contact bear affinities, for example, to processes observable in second-language acquisition and lingua franca use, the research into these fields has so far not been sufficiently brought into contact with each other. The articles in this volume set out to combine all these perspectives in ways that give us a better understanding of the changing nature of English in the modern world. Introducing English for Academic Purposes is an accessible and engaging textbook which presents a wide-ranging introduction to the field, covering the global and institutional position of EAP as well as its manifestations in classrooms and research contexts around the world. Each chapter provides: a critical overview introducing readers to theory- and research-informed perspectives; profiles of practice to guide readers in putting theory to use in real world contexts; tasks, reflection exercises and a glossary to help readers consolidate their understanding; an annotated further reading section with links to

online resources to enable readers to extend their knowledge. Covering both theoretical and practical issues, Introducing English for Academic Purposes is essential reading for students of applied linguistics, and pre-service and in-service teachers of EAP. In this book, John O'Regan examines the role of political economy in the worldwide spread of English and traces the origins and development of the dominance of English to the endless accumulation of capital in a capitalist world-system. O'Regan combines Marxist perspectives of capital accumulation with world-systems analysis, international political economy, and studies of imperialism and empire to present a historical account of the 'free riding' of English upon the global capital networks of the capitalist world-system. Relevant disciplinary perspectives on global English are examined in this light, including superdiversity, translanguaging, translingual practice, trans-spatiality, language commodification, World Englishes and English as a Lingua Franca. Global English and Political Economy presents an original historical and interdisciplinary interpretation of the global ascent of English, while also raising important theoretical and practical questions for perspectives which suggest that the time of the traditional models of English is past. Providing an introduction to key theoretical perspectives in political economy, this book is essential reading for advanced students and researchers in applied linguistics, World Englishes and related fields of study. The book entitled "General English for Students of UMUS Brebes" is designed to facilitate students, to communicate in English according to the context of the language use. For effectiveness and efficiency, class presentation should be geared to this main goal. The class activities should practice and lead four skills of language (listening, speaking, reading and writing) Examines the egalitarian, creative, and inclusive practice of radical democracy in contemporary Venezuela. In a global historical moment of growing mobilizations against inequality, corruption, and exclusion, Only the People Can Save the People illustrates the necessity and challenges of more egalitarian approaches to collective life from one of the most tumultuous and compelling experiments in radical democracy. Donald V. Kingsbury examines twenty-first-century Venezuelan politics from the perspective of constituent power—the egalitarian, creative, and inclusive practice of radical democracy. In the aftermath of neoliberal structural adjustment, Venezuelan politics have been increasingly reconfigured according to principles of autogestión (self-management), social movement autonomy, protagonistic and participatory democracy, and anti-capitalism. However, inherited and intensifying challenges arising from Venezuela's status as a petrostate, the class and racial divisions that define its society, and the difficulties of defining what Hugo Chávez termed "socialism for the twenty-first century" have resulted in a tumultuous process of social change. Informed by ethnography, contemporary and comparative political thought, and global political economy, Only the People Can Save the People demonstrates how constituent power is shaping collective identity, political conflict, and infrastructural space in contemporary Latin America. Donald V. Kingsbury is Lecturer in Political Science and Latin American Studies at the University of Toronto. This work was originally written as a PhD thesis at University of Southampton. It is inspired by The Butterfly Effect Theories to investigate lingua franca phenomena as complex adaptive systems within other complex adaptive systems. It focuses on English as a lingua franca and highlights Arabic as a lingua franca as well. This study's large-scale surveys and interviews are aimed to explore users' (in)tolerance towards misalignment with standard and native language usages and how their positions relate to their reported language practices, beliefs, attitudes, motives, identity management, ideologies, religions, context, and time. As a butterfly fapping its wings may cause a hurricane, this work shows how any small change in any small part, especially in contextual and temporal dimensions, has the power to set off a string of escalating changes in lingua franca and transcultural interactions. Inclusion is a difficult, complex issue for which there are no off-the-shelf answers. To be an effective practitioner it is necessary to identify what makes each situation and circumstance unique and use this knowledge to develop strategies and approaches that are appropriate. This timely new text examines the key perceptions, perspectives and concepts around inclusion in the Early Years. Drawing on real-life experiences of practitioners, it considers the questions practitioners are likely to come

across in their professional lives and how they might genuinely go about meeting the needs of all the children in their care. The book covers all aspects of inclusion including special educational needs, gender and sexuality, multiculturalism, multilingualism, Roma and traveller communities and economic wellbeing. Each chapter features: Case studies to develop reflective thinking Boxed examples to illustrate key points Questions to promote discussion and debate Annotated further reading lists With case studies drawn from current research and thinking points which encourage reflective practice, this book will be essential reading for students on early childhood studies programmes and early years foundation degrees that wish to become reflective and critically aware practitioners. The only endorsed resources for the Cambridge International AS Level English General Paper syllabus (8021). Through exploration of a wide array of topics, from celebrity culture to poetry in the modern world, this book focuses on strengthening communication, evaluation, analysis, application and understanding skills. Helping students improve their written responses, use of English and comprehension, this coursebook looks at discussion points relevant to the globally-minded classroom. With frequent practice questions and sample answers, students have plenty of opportunities to build their confidence answering questions. Answers to coursebook questions are in the teacher's resource. Quotative marking in modern English is a highly dynamic domain which has been undergoing progressive expansion, with newcomer variants, notably quotative be like, entering the scene and restructuring the entire system. Given that this feature is being put forward by the younger generation in native-speaker communities, the crucial question is, How do younger speakers living in different parts of the non-Anglophone world appropriate this feature in their L2 English? This volume tackles this question by exploring the sociolinguistic mechanisms guiding the adoption of the newcomer be like by young adults speaking English as a second and as a foreign language. In so doing, it also explores the role of sociolinguistic salience and language attitudes in the process of adaptation of global linguistic innovations. Responding to the growing need for recruitment and retention of international talent in higher education institutions globally, this volume documents the experiences and contribution of international graduate students, researchers, and faculty. This text foregrounds perspectives around recruitment, transition, integration, professional development, and the retention of scholars originating from, or arriving in, countries including China, Australia, Iraq, Japan, and the US. By investigating the support systems that are in place to assist foreign-born faculty members in institutes of higher education, the text provides important insights for departments and institutions as they look to successfully attract and retain global academic talent. Moreover, the scientific and practical implications of the research presented in the text directly informs institutional policy, working towards more effective, inclusive, and equitable ways to support international faculty. This text will benefit researchers, academics, and educators with an interest in higher education, international and comparative education, and, more specifically, those involved with faculty development programs. The text will also support further discussion and reflection around multicultural education, international teaching and learning, and educational policy more broadly. The Routledge Handbook of English Language and Digital Humanities serves as a reference point for key developments related to the ways in which the digital turn has shaped the study of the English language and of how the resulting methodological approaches have permeated other disciplines. It draws on modern linguistics and discourse analysis for its analytical methods and applies these approaches to the exploration and theorisation of issues within the humanities. Divided into three sections, this handbook covers: sources and corpora; analytical approaches; English language at the interface with other areas of research in the digital humanities. In covering these areas, more traditional approaches and methodologies in the humanities are recast and research challenges are re-framed through the lens of the digital. The essays in this volume highlight the opportunities for new questions to be asked and long-standing questions to be reconsidered when drawing on the digital in humanities research. This is a groundbreaking collection of essays offering incisive and essential reading for anyone with an interest in the English language and digital humanities. This book examines the increasing territorialisation of party competition and the relaxation of unitarian rule through devolution, presenting a long-term analysis of electoral developments in the United Kingdom since the end of the Second World War. Subsequently, the book looks into the undermining of the traditional majoritarian mode of British government as a result. It analyzes the significant role of these long-term

developments and their detrimental effect on the parliament's ability to resolve issues like the Scottish Independence Referendum or the UK's vote to leave the European Union, and it addresses their underlying causes. The author additionally reconnects these electoral developments to the changing nature of devolution and shows how the deepening of devolution accelerates the negative electoral consequences for the British system of government. Finally, the book shows why the British Labour Party is turning more and more into a long-term minority party as a result of these developments. The book is a must-read for scholars, students and policy-makers, interested in a better understanding of comparative politics and devolution in general, as well as in the more specific case of the United Kingdom's electoral system. This book presents the theoretical-historical-comparative political framework needed to fully grasp the truly dynamic nature of 21st century global affairs. The author provides a realistic assessment of the shift from U.S. predominance to a new mix of counterbalancing rival middle-tier and assertive regional powers, while highlighting those geopolitical zones of contention most critical for future international stability. The book will appeal to scholars and policy makers interested in understanding the contours of the emerging world order, and in identifying its principal shapers and leading political actors. A collaborative series with the University of Cambridge Faculty of Education highlighting leading-edge research across Teacher Education, International Education Reform and Language Education. Spotighting the challenges and realities faced by linguistically diverse immigrant and resident students in U.S. secondary schools and in their transitions from high school to community colleges and universities, this book looks at programs, interventions, and other factors that help or hinder them as they make this move. Chapters from teachers and scholars working in a variety of contexts build rich understandings of how high school literacy contexts, policies such as the proposed DREAM Act and the Common Core State Standards, bridge programs like Upward Bound, and curricula redesign in first-year college composition courses designed to recognize increasing linguistic diversity of student populations, affect the success of this growing population of students as they move from high school into higher education. English Medium Instruction in Multilingual and Multicultural Universities analyses the issues related to EMI at both a local and international level and provides a broad perspective on this topic. Drawing on field studies from a Northern European context and based primarily on research carried out at the University of Copenhagen, this book: introduces a topical global issue that is central to the higher education research agenda; identifies the issues and challenges involved in EMI in relation to central linguistic, pedagogical, sociolinguistic and socio-cultural concepts; captures university lecturers' experiences in the midst of curricular change and presents reflections on ways to navigate professionally in English to meet the demands of the multilingual and multicultural classroom. English Medium Instruction in Multilingual and Multicultural Universities is key reading for researchers, pre- and in-service teachers, university management, educational planners, and advanced students with an interest in EMI and the multilingual, multicultural university setting. This book is a powerful narrative of how six women experienced their lives alongside their desire to overcome the challenging and empowering nature of the English language. The volume shares who they are as transnational and mobile women living in the midst of linguistic privilege and marginalization. It is one outcome of a research project and the lived experiences which surround and influence (and were influenced by) it. The author documents how she and her research partners began studying what had drawn them to US TESOL programs, and how English was and is a symbol of power and privilege, a symbol of educational access and a pursuit of equity, yet, at times, is also a symbol of linguistic marginalization. The cost for a college certificate or degree is expensive and takes time. Texas has legislatively selected a single college placement test, which, unless exempted, prospective college students

must take prior to enrollment in freshman-level coursework. This assessment, the Texas Success Initiative Assessment (TSIA), gives students an opportunity to test at a "college ready" level and take courses that count toward certificate or degrees or students fail to achieve "college ready" status and need remediation, which takes additional time and requires more money to complete the remediation before the certificate or degree coursework can begin. College success depends on many things, and completing courses, particularly freshman-level courses, is requisite in that process. For many students, additional time and expenses serve as deterrents to college completion. College ready students should be successful in freshman-level courses. The purpose of this study was to investigate the relationship between Texas Success Initiative Assessment (TSIA) writing scores and demographic variables as predictors of performance in college freshman English composition. Understanding students better is more likely to improve academic outcomes. This study obtained data collected between fall 2014 and fall 2017 for students who took the TSIA writing section and took freshman English between fall 2014 and fall 2017. The study was an ex post facto, quasi-experimental design and used t-tests and forward multiple regression analyses. Results indicated TSIA writing and essay scores along with each demographic variable to be statistically significant predictors of performance, but with low effect size and low variance. First-Time in college (FTIC) students did not perform as well as non-FTIC students. Male students did not perform as well as female students. Low socioeconomic (SES) students did not perform as well as other students. Students who took freshman English online did not perform as well as those who took it face-to-face. While the TSIA writing scores did show a small correlation between TSIA scores and GPA, the results showed demographic variables to be just as statistically significant predictors of performance in freshman English. Based on the findings in this study, The TSIA is not an effective placement test in predicting student success in English composition. Results showed that students success in freshman-level courses depends on more than what is test using the TSIA, and improved advising and first-year support for FTIC students that provide individualized, rather than generalized, assistance is needed to help student success. This edited volume brings together 10 cutting-edge empirical studies on the realities of English language learning, teaching and testing in a wide range of global contexts where English is an additional language. It covers three themes: learners' development of interactional competence, the organization of teaching and testing practices, and sociocultural and ideological forces that may impact classroom interaction. With a decided focus on English-as-a-Foreign-Language contexts, the studies involve varied learner populations, from children to young adults to adults, in different learning environments around the world. The insights gained will be of interest to EFL professionals, as well as teacher trainers, policymakers and researchers. With the exponential growth of English-Medium Instruction (EMI) provision in higher education, which is rapidly outpacing empirical research, this book outlines approaches to EMI in a range of regional contexts to exemplify different interpretations of implementing EMI policy in higher education. The book provides an in-depth understanding of evolving interpretations, challenges and current policies on a global level, through the exploration of case studies from Armenia, Austria, Azerbaijan, Bangladesh, Brazil, China, Colombia, Denmark, Estonia, Ethiopia, Georgia, Hong Kong, Italy, Japan, Kuwait, Mexico, Nepal, the Netherlands, Poland, South Africa, Tunisia, Turkey and Vietnam. The case studies, which outline how EMI policy is implemented, are presented in three sections, at the national, institutional and classroom levels (macro, meso, and micro), using a variety of research tools, including policy analysis, stakeholders' conceptualisations of EMI, observations of EMI in practice and context analysis. This practitioner-based book provides different approaches for reaching an increasing population in today's schools - English language learners (ELLs). The recent development and adoption of the Common Core State Standards for English Language Arts and Literacy in History/Social Studies, Science, and Technical Subjects (CCSS-ELA/Literacy), the Common Core State Standards for Mathematics, the C3 Framework, and the Next Generation Science Standards (NGSS) highlight the role that teachers have in developing discipline-specific competencies. This requires new and innovative approaches for teaching the content areas to all students. The book begins with an introduction that contextualizes the chapters in which the editors highlight transdisciplinary theories and approaches that cut across content areas. In addition, the editors include a table that provides a matrix of how strategies and theories map across the chapters. The four sections of the book represent the following content

areas: English language arts, mathematics, science, and social studies. This book offers practical guidance that is grounded in relevant theory and research and offers teachers suggestions on how to use the approaches described. The chapters in this volume outline and discuss examples of teacher educators in diverse global contexts who have provided successful self-initiated innovations for their teacher learners. The collection suggests that a way forward for second language teacher preparation programs is through 'reflective practice as innovation'. This volume provides an up-to-date and evaluative review of theoretical and empirical stances on emotion and its close interaction with language and cognition in monolingual and bilingual individuals. Importantly, it presents a novel methodological approach that takes into account contextual information and hence goes beyond the reductionist approach to affective language that has dominated contemporary research. Owing to this pragmatic approach, the book presents brand new findings in the field of bilingualism and affect and offers the first neurocognitive interpretation of findings reported in clinical and introspective studies in bilingualism. This not only represents an invaluable contribution to the literature, but may also constitute a breakthrough in the investigation of the worldwide phenomenon of bilingualism. Beginning with a thorough review of the history and current state of affective research and its relation to language, spanning philosophical, psychological, neuroscientific, and linguistic perspectives, the volume then proceeds to explore affect manifestation using neuropragmatic methods in monolingual and bilingual individuals. In doing so, it brings together findings from clinical and introspective studies in bilingualism with cognitive, psychophysiological and neuroimaging paradigms. By combining conceptual understanding and methodological expertise from many disciplines, this volume provides a comprehensive picture of the dynamic interactions between contextual and affective information in the language domain. Thus, *Affect-Language Interactions in Native and Non-Native English Speakers: A Neuropragmatic Perspective* fosters a pragmatic approach to research on affective language processing in monolingual and bilingual population, one that builds bridges across disciplines and sparks important new questions in the cognitive neuroscience of bi- and multilingualism. *Pragmatics Pedagogy in English as an International Language* aims to bring to light L2 pragmatics instruction and assessment in relation to English as an International Language (EIL). The chapters in this book deal with a range of pedagogically related topics, including the historical interface between L2 pragmatics and EIL, reconceptualization of pragmatic competence in EIL, intercultural dimension of pragmatics pedagogy in EIL, teacher pragmatic awareness of instruction in the context of EIL, pragmatics of politeness in EIL, pragmatic teaching materials for EIL pedagogy, teachers' and scholars' perceptions of pragmatics pedagogy in EIL, assessment and assessment criteria in EIL-aware pragmatics, and methods for research into pragmatics in EIL. This book is different from other books about both EIL pedagogy and pragmatics pedagogy. Exploring the interface between different dimensions of pragmatics pedagogy and EIL, it suggests instructional and assessment tasks for EIL-aware pedagogy and directions for research on EIL-based pragmatics pedagogy. *Pragmatics Pedagogy in English as an International Language* will be useful for a range of readers who have an interest in the pragmatics instruction and assessment of EIL as well as those whose main area of specialization is EIL but would like to know how EIL, with its rich conceptual and empirical background, can go beyond linguistic instruction to embrace the instruction of pragmatic competence. this captivating novel about an ambitious young woman who gets trapped in a charismatic con artist's scam. A Most Anticipated Book by Entertainment Weekly, Marie Claire, Parade, New York Post, Shondaland, E!, Fortune, PopSugar, and more! "It's exciting, it's surprising, it's satisfying, it's darkly funny, and it will keep you guessing."—Linda Holmes for Today.com After a rough year at NYU, aspiring writer Lora Ricci is thrilled to land a summer internship at ELLE magazine where she meets Cat Wolff, contributing editor and enigmatic daughter of a clean-energy mogul. Cat takes Lora under her wing, soliciting her help with side projects and encouraging her writing. As a friendship emerges between the two women, Lora opens up to Cat about her financial struggles and lost scholarship. Cat's solution: Drop out of NYU and become her ghostwriter. Lora agrees and, when the internship ends, she moves into Cat's suite at the opulent Plaza Hotel. Writing during the day and accompanying Cat to extravagant parties at night, Lora's life quickly shifts from looming nightmare to dream-come-true. But as Lora is drawn into Cat's glamorous lifestyle, Cat's perfect exterior cracks, exposing an illicit, shady world. A whip-smart and delightfully inventive writer, Susan Rigetti brilliantly pieces together a perceptive, humorous caper full of sharp observations about scam culture. Composed of diary entries, emails, FBI correspondence, and more, Cover Story is a fresh, fun, and wholly original novel that takes readers deep into the codependency and deceit found in a relationship built on power imbalance and lies. "[A] page-turner that's hilarious in its dedication to vamping on viral news stories about real-life strivers and cons from Delvey to Instagram personality Caroline Calloway ... a delicious read."—TIME magazine

Bloomsbury World Englishes offers a comprehensive and rigorous description of the facts, implications and contentious issues regarding the forms and functions of English in the world. International experts cover a diverse range of varieties and topics, offering a more accurate understanding of English across the globe and the various social contexts in which it plays a significant role. With volumes dedicated to research paradigms, language ideologies and pedagogies, the collection pushes the boundaries of the field to go beyond traditional descriptive paradigms and contribute to moving research agendas forward. Volume 3: Pedagogies addresses the teaching of English as a world language. Chapters in this volume consider the teaching and learning of English(es) from a range of perspectives and on the basis of experiences and research from many parts of the world. The Journal of International Students (JIS), an academic, interdisciplinary, and peer-reviewed publication (Print ISSN 2162-3104 & Online ISSN 2166-3750), publishes scholarly peer reviewed articles on international students in tertiary education, secondary education, and other educational settings that make significant contributions to research, policy, and practice in the internationalization of higher education. English for Chef comprises six lessons which start from Cooking Methods, Indonesian Cuisine, Bakery Products, Indonesian Cakes and Desserts. Each lesson introduces 4 language skills: reading skill, writing skill, listening skill and speaking skill. This book is designed to be more practical rather than theoretical. There are several projects to practice speaking skills relating some topics in each lesson. There are also many useful phrases and meaningful words to deepen students' knowledge and their English communication skills in culinary industries. Finally, the author hopes that this book can bring many advantages for lecturers and students especially

Language regulation has often been approached from a top-down policy perspective, whereas this book examines regulatory practices employed by speakers in interaction. With its ethnographically informed focus on language regulation in academic English as a lingua franca (ELF), the book is a timely contribution to debates about what counts as acceptable English in ELF contexts, who can act as language expert, and when regulation is needed. This volume examines how gender shapes the varying and intersecting dynamics of informal/precarious worker struggles in two gender-typed sectors - domestic work and construction. Drawing upon cases across the global North and South, it explores how gender is intertwined into collective organizing efforts, why gender is addressed and to what end. This highly anticipated third edition of the Handbook of Parenting brings together an array of field-leading experts who have worked in different ways toward understanding the many diverse aspects of parenting. Contributors to the Handbook look to the most recent research and thinking to shed light on topics every parent, professional, and policymaker wonders about. Parenting is a perennially "hot" topic. After all, everyone who has ever lived has been parented, and the vast majority of people become parents themselves. No wonder bookstores house shelves of "how-to" parenting books, and magazine racks in pharmacies and airports overflow with periodicals that feature parenting advice. However, almost none of these is evidence-based. The Handbook of Parenting is. Period. Each chapter has been written to be read and absorbed in a single sitting, and includes historical considerations of the topic, a discussion of central issues and theory, a review of classical and modern research, and forecasts of future directions of theory and research. Together, the five volumes in the Handbook cover Children and Parenting, the Biology and Ecology of Parenting, Being and Becoming a Parent, Social Conditions and Applied Parenting, and the Practice of Parenting. Volume 4, Social Conditions and Applied Parenting, describes socially defined groups of parents and social conditions that promote variation in parenting. The chapters in Part I, on Social and Cultural Conditions of Parenting, start with a relational developmental systems perspective on parenting and move to considerations of ethnic and minority parenting among Latino and Latin Americans, African Americans, Asians and Asian Americans, Indigenous parents, and immigrant parents. The section concludes with considerations of disabilities, employment, and poverty on parenting. Parents are ordinarily the most consistent and caring people in children's lives. However, parenting does not always go right or well. Information, education, and support programs can remedy potential ills. The chapters in Part II, on Applied Issues in Parenting, begin with how parenting is measured and follow with examinations of maternal deprivation, attachment, and acceptance/rejection in parenting. Serious challenges to parenting—some common, such as stress and depression, and some less common, such as substance abuse, psychopathology, maltreatment, and incarceration—are addressed as are parenting interventions intended to redress these trials. This edited volume examines how transnational English language assessment practices are envisioned, enacted, and justified by different stakeholders, including students, teachers, and universities in different geographical contexts, and what would be the multi-level consequences of such practices. Bringing together diverse perspectives from across the Global South and Global North, the book argues that the field of English language assessment has always been transnational, despite an absence of a research that explicitly examines English language assessment practices in relation to transnationalism. The contribution of this volume lies in filling in this critical scholarly gap. Through a wide set of epistemological, theoretical, and pedagogical interventions along with methodological orientations and analytical frameworks, the chapter authors question the social, economic, political, linguistic, and pedagogical consequences of transnational English language assessment practices in higher education (HE) settings and contexts. Offering fresh perspectives on English language assessment practices in relation to transnationalism, this book will be of great interest to researchers, academics, and post-graduate students in the fields of applied linguistics, Teaching English to Speakers of Other Languages (TESOL), and language assessment more broadly.
