**Boxer Rebellion** Feb 13 2020 Chinese peasants chafed against the foreign technologies and ideas that the imperialists introduced. Then a new movement—mystical, materialistic, and virulently anti-Christian—began to spread among them like wildfire. The foreigners laughed at the peasants' martial-arts routines and nicknamed them "the Boxers"—never imagining that the group, with the backing of China's empress dowager, would soon terrorize the world... This acclaimed account of the Boxer Rebellion, by an Oxford-trained historian, is an important new addition to every shelf of high-quality, highly accessible history.

**The World in a Box** Dec 17 2022 This is a book about a box that contained the world. The box was the Picture Academy for the Young, a popular encyclopedia in pictures invented by preacher-turned-publisher Johann Siegmund Stoy in eighteenth-century Germany. Children were expected to cut out the pictures from the Academy, glue them onto cards, and arrange those cards in ordered compartments—the whole world filed in a box of images. As Anke te Heesen demonstrates, Stoy and his world in a box epitomized the Enlightenment concern with the creation and maintenance of an appropriate moral, intellectual, and social order. The box, and its images from nature, myth, and biblical history, were intended to teach children how to collect, store, and order knowledge. te Heesen compares the Academy with other aspects of Enlightenment material culture, such as commercial warehouses and natural history cabinets, to show how the kinds of collecting and ordering practices taught by the Academy shaped both the developing middle class in Germany and Enlightenment thought. The World in a Box, illustrated with a multitude of images of and from Stoy's Academy, offers a glimpse into a time when it was believed that knowledge could be contained and controlled.

**The World We Need** Jan 14 2020 The "inspiring people and grassroots" organizations that are on the front lines of the battle to save the planet As the world's scientists have come together and declared a "climate emergency," the fight to protect our planet's ecological resources and the people that depend on them is more urgent than ever. But the real battles for our future are taking place far from the headlines and international conferences, in mostly forgotten American communities where the brutal realities of industrial pollution and environmental degradation have long been playing out. The World We Need provides a vivid introduction to America's largely unsung grassroots environmental groups—often led by activists of color and the poor—valiantly fighting back in America's so-called sacrifice zones against industries poisoning our skies and waterways and heating our planet. Through original reporting, profiles, artwork, and interviews, we learn how these activist groups, almost always working on shoestring budgets, are devising creative new tactics; building sustainable projects to transform local economies; and organizing people long overlooked by the environmental movement—changing its face along the way. Capturing the riveting stories and hard-won strategies from a broad cross section of pivotal environmental actions—from Standing Rock to Puerto Rico—The World We Need offers a powerful new model for the larger environmental movement, and inspiration for concerned citizens everywhere.

**The World in the Evening** Oct 11 2019 A deeply introspective book about war, religion, and sexuality Against the backdrop of World War II, The World in the Evening charts the emotional development of Stephen Monk, an aimless Englishman living in California. After his second marriage suddenly ends, Stephen finds himself living with a relative in a small Pennsylvania Quaker town, haunted by memories of his prewar affair with a younger man during a visit to the Canary Islands. The world traveler comes to a gradual understanding of himself and of his newly adopted homeland. When first published in 1953, The World in the Evening was notable for its clear-eyed depiction of European and American mores, sexuality, and religion. Today, readers herald Christopher Isherwood's frank portrayal of bisexuality and his early appreciation of low and high camp.

Newsday • Library Journal • Publishers Weekly In a profound work that pivots from the biggest questions about American history and ideals to the most intimate concerns of a father for his son, Ta-Nehisi Coates offers a powerful new framework for understanding our nation's history and current crisis. Americans have built an empire on the idea of "race," a falsehood that damages us all but falls most heavily on the bodies of black women and men—bodies exploited through slavery and segregation, and, today, threatened, locked up, and murdered out of all proportion. What is it like to inhabit a black body and find a way to live within it? And how can we all honestly reckon with this fraught history and free ourselves from its burden? *Between the World and Me* is Ta-Nehisi Coates's attempt to answer these questions in a letter to his adolescent son. Coates shares with his son—and readers—the story of his awakening to the truth about his place in the world through a series of revelatory experiences, from Howard University to Civil War battlefields, from the South Side of Chicago to Paris, from his childhood home to the living rooms of mothers whose children's lives were taken as American plunder. Beautifully woven from personal narrative, reimagined history, and fresh, emotionally charged reportage, *Between the World and Me* clearly illuminates the past, bravely confronts our present, and offers a transcendent vision for a way forward.

*A Book that Shook the World* Aug 13 2022 This collection features five essays from noted theologians, philosophers, geneticists, and biologists who discuss the sweeping impact of Charles Darwin's *On the Origin of Species* on their respective fields. This volume, edited by Ralph Buchsbaum, professor of biology at the University of Pittsburgh, was published to celebrate the centenary of Darwin's announcement in 1858, along with Alfred Russel Wallace, of their independent discovery of the process of natural selection. Darwin's book was published one year later.

**Around the World in 50 Years** Feb 07 2022 This is the inspiring story of an ordinary guy who achieved two great goals that others had told him were impossible. First, he set a record for the longest automobile journey ever made around the world, during the course of which he blasted his way out of minefields, survived a breakdown atop the Peak of Death, came within seconds of being lynched in Pakistan, and lost three of the five men who started with him, two to disease, one to the Vietcong. After that—although it took him forty-seven more years—Albert Podell set another record by going to every country on Earth. He achieved this by surviving riots, revolutions, civil wars, trigger-happy child soldiers, voodoo priests, robbers, pickpockets, corrupt cops, and Cape buffalo. He went around, under, or through every kind of earthquake, cyclone, tsunami, volcanic eruption, snowstorm, and sandstorm that nature threw at him. He ate everything from old camel meat and rats to dung beetles and the brain of a live monkey. And he overcame attacks by crocodiles, hippos, anacondas, giant leeches, flying crabs—and several beautiful girlfriends who insisted that he stop this nonsense and marry them. Albert Podell's *Around the World in 50 Years* is a remarkable and meaningful tale of quiet courage, dogged persistence, undying determination, and an uncanny ability to extricate himself from one perilous situation after another—and return with some of the most memorable, frightening, and hilarious adventure stories you have ever read.

*All the Time in the World* Dec 25 2020 Entertaining, unexpected, and full of charm, the follow-up to Jessica Kerwin Jenkins's *Encyclopedia of the Exquisite* presents a miscellany of engaging stories, detailing the intriguing customs, traditions, and guilty pleasures pursued throughout the ages. *All the Time in the World* takes its cue from an iconic component of medieval life, the book of hours, which prescribed certain readings and contemplations for certain parts of the day throughout the year. Divided into more than seventy-five entries, *All the Time in the World* is brimming with witty bons mots, interesting etymologies, and arresting anecdotes encompassing an array of cultures and eras. Subjects covered include the daylong ceremony of laying a royal Elizabethan tablecloth; the radicalization of sartorial chic in 1890s Paris; Nostradamus's belief in the aphrodisiac power of jam; the sensuous practice of sniffing incense in fifteenth-century Japan; the American fascination with flaming desserts; the short-lived artistic discipline of "lunia," or visual music; the evolution of coffee from a religious ritual to a forbidden delight in the Middle East; Henriette d'Angeville's fearless and wine-fueled ascent of Mont Blanc; the elaborate treasure hunts concocted by London's Bright Young Things; and the musical revolution known as bebop. An antidote to the contemporary cult of "getting things done," *All the Time in the World* revives forgotten treasures of the past while inspiring a passion for good living in the present.

*Tomorrow, the World* Aug 21 2020 A new history explains how and why, as it prepared to enter World War II, the United States decided to lead the postwar world. For most of its history, the United States avoided making political and military commitments that would entangle it in European-style power politics. Then, suddenly, it conceived a new role for itself as the world's armed superpower—and never looked back. In *Tomorrow, the World*, Stephen Wertheim traces America's transformation to the crucible of World War II, especially in the months prior to the attack on Pearl Harbor. As the Nazis conquered France, the architects of the nation's new foreign policy came to believe that the United States ought to achieve primacy in international affairs forevermore. Scholars have struggled to explain the decision to pursue global supremacy. Some deny that American elites made a willing choice, casting the United States as a reluctant power that sloughed off "isolationism" only after all potential competitors lay in ruins. Others contend that the United States had always coveted global dominance and realized its ambition at the first opportunity. Both views are wrong. As late as 1940, the small coterie of officials and experts who composed the U.S. foreign policy class either wanted British preeminence in global affairs to continue or hoped that no power would dominate. The war, however, swept away their assumptions, leading them to conclude that the United States should extend its form of law and order across the globe and back it at gunpoint. Wertheim argues that no one favored "isolationism"—a term introduced by advocates of armed supremacy in order to turn their own cause into the definition of a new "internationalism." We now live, Wertheim warns, in the world that these men created. A sophisticated and impassioned narrative that questions the wisdom of U.S. supremacy, *Tomorrow, the World* reveals the intellectual path that brought us to today's global entanglements and endless wars.

*A History of the World in Seven Cheap Things* Jul 20 2020 Nature, money, work, care, food, energy, and lives: these are the seven things that have made our world and will shape its future. In making these things cheap, modern commerce has transformed, governed, and devastated Earth. In *A History of the World in Seven Cheap Things*, Raj Patel and Jason W. Moore present a new approach to analyzing today's planetary emergencies. Bringing the latest ecological research together with histories of colonialism, indigenous struggles, slave revolts, and other rebellions and uprisings, Patel and Moore demonstrate that throughout history, crises have always prompted fresh strategies to make the world cheap and safe for capitalism. At a time of crisis in all seven cheap things, innovative and systemic thinking is urgently required. This book proposes a radical new way of understanding—and reclaiming—the planet in the turbulent twenty-first century.

**Mapping the World** May 30 2021 "There are many ways to tell a story. Textbooks offer narratives, crafted by an historian or a team of historians. Collections of primary sources present a mosaic of stories, often interspersed with pictures of artwork and other physical objects drawn from the past. *Mapping the World* takes advantage of the strength of maps to tell a different sort of story. The maps are divided into two groups: a) Reference maps that provide a brief outline of key events and developments in global history; b) blank outline maps and accompanying exercises that offer opportunities to explore the past in a hands-on fashion."--Provided by publisher.

*The World* Apr 09 2022 The New York Times bestseller "A clear and concise account of the history, diplomacy, economics, and societal forces that have molded the modern global system." —Foreign Affairs An invaluable primer from Richard Haass, president of the Council on Foreign Relations, that will help anyone, expert and non-expert alike, navigate a time in which many of our biggest challenges come from the world beyond our borders. Like it or not, we live in a global era, in which what happens thousands of miles away has the ability to affect our

lives. This time, it is a Coronavirus known as Covid-19, which originated in a Chinese city many had never heard of but has spread to the corners of the earth. Next time it could well be another infectious disease from somewhere else. Twenty years ago it was a group of terrorists trained in Afghanistan and armed with box-cutters who commandeered four airplanes and flew them into buildings (and in one case a field) and claimed nearly three thousand lives. Next time it could be terrorists who use a truck bomb or gain access to a weapon of mass destruction. In 2016 hackers in a nondescript office building in Russia traveled virtually in cyberspace to manipulate America's elections. Now they have burrowed into our political life. In recent years, severe hurricanes and large fires linked to climate change have ravaged parts of the earth; in the future we can anticipate even more serious natural disasters. In 2008, it was a global financial crisis caused by mortgage-backed securities in America, but one day it could well be a financial contagion originating in Europe, Asia, or Africa. This is the new normal of the 21st century. The World is designed to provide readers of any age and experience with the essential background and building blocks they need to make sense of this complicated and interconnected world. It will empower them to manage the flood of daily news. Readers will become more informed, discerning citizens, better able to arrive at sound, independent judgments. While it is impossible to predict what the next crisis will be or where it will originate, those who read The World will have what they need to understand its basics and the principal choices for how to respond. In short, this book will make readers more globally literate and put them in a position to make sense of this era. Global literacy-- knowing how the world works—is a must, as what goes on outside a country matters enormously to what happens inside. Although the United States is bordered by two oceans, those oceans are not moats. And the so-called Vegas rule—what happens there stays there—does not apply in today's world to anyone anywhere. U.S. foreign policy is uniquely American, but the world Americans seek to shape is not. Globalization can be both good and bad, but it is not something that individuals or countries can opt out of. Even if we want to ignore the world, it will not ignore us. The choice we face is how to respond. We are connected to this world in all sorts of ways. We need to better understand it, both its promise and its threats, in order to make informed choices, be it as students, citizens, voters, parents, employees, or investors. To help readers do just that, The World focuses on essential history, what makes each region of the world tick, the many challenges globalization presents, and the most influential countries, events, and ideas. Explaining complex ideas with wisdom and clarity, Richard Haass's The World is an evergreen book that will remain relevant and useful as history continues to unfold.

**The Book that Made Your World** Jul 12 2022 Understand where we came from. Whether you're an avid student of the Bible or a skeptic of its relevance, The Book That Made Your World will transform your perception of its influence on virtually every facet of Western civilization. Indian philosopher Vishal Mangalwadi reveals the personal motivation that fueled his own study of the Bible and systematically illustrates how its precepts became the framework for societal structure throughout the last millennium. From politics and science, to academia and technology, the Bible's sacred copy became the key that unlocked the Western mind. Through Mangalwadi's wide-ranging and fascinating investigation, you'll discover: What triggered the West's passion for scientific, medical, and technological advancement How the biblical notion of human dignity informs the West's social structure and how it intersects with other worldviews How the Bible created a fertile ground for women to find social and economic empowerment How the Bible has uniquely equipped the West to cultivate compassion, human rights, prosperity, and strong families The role of the Bible in the transformation of education How the modern literary notion of a hero has been shaped by the Bible's archetypal protagonist Journey with Mangalwadi as he examines the origins of a civilization's greatness and the misguided beliefs that threaten to unravel its progress. Learn how the Bible transformed the social, political, and religious institutions that have sustained Western culture for the past millennium, and discover how secular corruption endangers the stability and longevity of Western civilization. Endorsements: "This is an extremely significant piece of work with huge global implications. Vishal brings a timely message." (Ravi Zacharias, author, Walking from East to West and Beyond Opinion) "In polite society, the mere mention of the Bible often introduces a certain measure of anxiety. A serious discussion on the Bible can bring outright contempt. Therefore, it is most refreshing to encounter this engaging and informed assessment of the Bible's profound impact on the modern world. Where Bloom laments the closing of the American mind, Mangalwadi brings a refreshing optimism." (Stanley Mattson, founder and president, C. S. Lewis Foundation) "Vishal Mangalwadi recounts history in very broad strokes, always using his cross-cultural perspectives for highlighting the many benefits of biblical principles in shaping civilization." (George Marsden, professor, University of Notre Dame; author, Fundamentalism and American Culture)

**Superpower** Apr 16 2020 Bestselling author and strategist Ian Bremmer argues that Washington's directionless foreign policy has become expensive and dangerous. Since the end of the Cold War, the U.S. has stumbled from crisis to crisis in Afghanistan, Iraq, Iran, Libya, Syria, and Ukraine with no clear strategy. Bremmer urges us to think more deeply about what sort of role America should play and how it should use its superpower status. He explores three competing options: • Independent America: America should no longer take responsibility for solving other people's problems, and instead should lead by example. • Moneyball America: Washington can't meet every international challenge, but we can and should focus on opportunities and defend U.S. interests where they're threatened. • Indispensable America: Only America can defend the values on which global stability increasingly depends. We will never live in a stable world while others are denied their most basic freedoms. There are sound arguments for and against each of these choices, but we must choose. Washington can no longer improvise a foreign policy without a lasting commitment to a coherent strategy.

**To Know the World** Oct 23 2020 Why environmental learning is crucial for understanding the connected challenges of climate justice, tribalism, inequity, democracy, and human flourishing. How can we respond to the current planetary ecological emergency? In To Know the World, Mitchell Thomashow proposes that we revitalize, revisit, and reinvigorate how we think about our residency on Earth. First, we must understand that the major challenges of our time—migration, race, inequity, climate justice, and democracy—connect to the biosphere. Traditional environmental education has accomplished much, but it has not been able to stem the inexorable decline of global ecosystems. Thomashow, the former president of a college dedicated to sustainability, describes instead environmental learning, a term signifying that our relationship to the biosphere must be front and center in all aspects of our daily lives. In this illuminating book, he provides rationales, narratives, and approaches for doing just that. Mixing memoir, theory, mindfulness, pedagogy, and compelling storytelling, Thomashow discusses how to navigate the Anthropocene's rapid pace of change without further separating psyche from biosphere; why we should understand migration both ecologically and culturally; how to achieve constructive connectivity in both social and ecological networks; and why we should take a cosmopolitan bioregionalism perspective that unites local and global. Throughout, Thomashow invites readers to participate as educational explorers, encouraging them to better understand how and why environmental learning is crucial to human flourishing.

**A World in Disarray** Jun 11 2022 "A valuable primer on foreign policy: a primer that concerned citizens of all political persuasions—not to mention the president and his advisers—could benefit from reading." —The New York Times An examination of a world increasingly defined by disorder and a United States unable to shape the world in its image, from the president of the Council on Foreign Relations Things fall apart; the center cannot hold. The rules, policies, and institutions that have guided the world since World War II have largely run their course. Respect for sovereignty alone cannot uphold order in an age defined by global challenges from terrorism and the spread of nuclear weapons to climate change and cyberspace. Meanwhile, great power rivalry is returning. Weak states pose problems just as confounding as strong ones.

The United States remains the world's strongest country, but American foreign policy has at times made matters worse, both by what the U.S. has done and by what it has failed to do. The Middle East is in chaos, Asia is threatened by China's rise and a reckless North Korea, and Europe, for decades the world's most stable region, is now anything but. As Richard Haass explains, the election of Donald Trump and the unexpected vote for "Brexit" signals that many in modern democracies reject important aspects of globalization, including borders open to trade and immigrants. In *A World in Disarray*, Haass argues for an updated global operating system—call it world order 2.0—that reflects the reality that power is widely distributed and that borders count for less. One critical element of this adjustment will be adopting a new approach to sovereignty, one that embraces its obligations and responsibilities as well as its rights and protections. Haass also details how the U.S. should act towards China and Russia, as well as in Asia, Europe, and the Middle East. He suggests, too, what the country should do to address its dysfunctional politics, mounting debt, and the lack of agreement on the nature of its relationship with the world. *A World in Disarray* is a wise examination, one rich in history, of the current world, along with how we got here and what needs doing. Haass shows that the world cannot have stability or prosperity without the United States, but that the United States cannot be a force for global stability and prosperity without its politicians and citizens reaching a new understanding.

**The World Book Encyclopedia** Sep 02 2021 An encyclopedia designed especially to meet the needs of elementary, junior high, and senior high school students.

**When China Rules the World** May 18 2020 Greatly revised and expanded, with a new afterword, this update to Martin Jacques's global bestseller is an essential guide to understanding a world increasingly shaped by Chinese power. Soon, China will rule the world. But in doing so, it will not become more Western. Since the first publication of *When China Rules the World*, the landscape of world power has shifted dramatically. In the three years since the first edition was published, *When China Rules the World* has proved to be a remarkably prescient book, transforming the nature of the debate on China. Now, in this greatly expanded and fully updated edition, boasting nearly 300 pages of new material, and backed up by the latest statistical data, Martin Jacques renews his assault on conventional thinking about China's ascendancy, showing how its impact will be as much political and cultural as economic, changing the world as we know it. First published in 2009 to widespread critical acclaim - and controversy - *When China Rules the World: The End of the Western World and the Birth of a New Global Order* has sold a quarter of a million copies, been translated into eleven languages, nominated for two major literary awards, and is the subject of an immensely popular TED talk.

**The World in a Grain** Jun 30 2021 A finalist for the PEN/E. O. Wilson Literary Science Writing Award The gripping story of the most important overlooked commodity in the world--sand--and the crucial role it plays in our lives. After water and air, sand is the natural resource that we consume more than any other--even more than oil. Every concrete building and paved road on Earth, every computer screen and silicon chip, is made from sand. From Egypt's pyramids to the Hubble telescope, from the world's tallest skyscraper to the sidewalk below it, from Chartres' stained-glass windows to your iPhone, sand shelters us, empowers us, engages us, and inspires us. It's the ingredient that makes possible our cities, our science, our lives--and our future. And, incredibly, we're running out of it. *The World in a Grain* is the compelling true story of the hugely important and diminishing natural resource that grows more essential every day, and of the people who mine it, sell it, build with it--and sometimes, even kill for it. It's also a provocative examination of the serious human and environmental costs incurred by our dependence on sand, which has received little public attention. Not all sand is created equal: Some of the easiest sand to get to is the least useful. Award-winning journalist Vince Beiser delves deep into this world, taking readers on a journey across the globe, from the United States to remote corners of India, China, and Dubai to explain why sand is so crucial to modern life. Along the way, readers encounter world-changing innovators, island-building entrepreneurs, desert fighters, and murderous sand pirates. The result is an entertaining and eye-opening work, one that is both unexpected and involving, rippling with fascinating detail and filled with surprising characters.

**The World Without Us** Nov 11 2019 A study of what would happen to Earth if the human presence was removed examines our legacy for the planet, from the objects that would vanish without human intervention to those that would become long-lasting remnants of humankind.

**All the World** Apr 28 2021 This simple, profound, Caldecott Honor story is now available as a Classic Board Book. All the world is here. It is there. It is everywhere. All the world is right where you are. Now. Following a circle of family and friends through the course of a day from morning until night, this book affirms the importance of all things great and small in our world, from the tiniest shell on the beach, to the warmth of family connections, to the widest sunset sky. Now available as a Classic Board Book, this Caldecott Honor picture book written by Liz Garton Scanlon and illustrated by Marla Frazee is perfect for the youngest of readers.

**All the Time in the World** Dec 13 2019 From a master of modern American letters comes an enthralling collection of brilliant short fiction about people who, as E. L. Doctorow notes in his Preface, are somehow "distinct from their surroundings—people in some sort of contest with the prevailing world." Containing six unforgettable stories that have never appeared in book form, and a selection of previous classics, *All the Time in the World* is resonant with the mystery, tension, and moral investigation that distinguish the fiction of E. L. Doctorow.

**The World in a Book** Feb 19 2023 Based on the author's dissertation (doctoral)-- Harvard University, 2012.

**The World in the Model** Nov 04 2021 During the last two centuries, the way economic science is done has changed radically: it has become a social science based on mathematical models in place of words. This book describes and analyses that change - both historically and philosophically - using a series of case studies to illuminate the nature and the implications of these changes. It is not a technical book; it is written for the intelligent person who wants to understand how economics works from the inside out. This book will be of interest to economists and science studies scholars (historians, sociologists and philosophers of science). But it also aims at a wider readership in the public intellectual sphere, building on the current interest in all things economic and on the recent failure of the so-called economic model, which has shaped our beliefs and the world we live in.

**A Map of the World** Sep 14 2022 Pen/Hemingway Award-winning novelist Jane Hamilton follows up her first success, *The Book Of Ruth*, with this spectacularly haunting drama about a rural American family and a disastrous event that forever changes their lives. *The Goodwins*,

Howard, Alice, and their little girls, Emma and Claire, live on a dairy farm in Wisconsin. Although suspiciously regarded by their neighbors as "that hippie couple" because of their well-educated, urban background, Howard and Alice believe they have found a source of emotional strength in the farm, he tending the barn while Alice works as a nurse in the local elementary school. But their peaceful life is shattered one day when a neighbor's two-year-old daughter drowns in the Goodwins' pond while under Alice's care. Tormented by the accident, Alice descends even further into darkness when she is accused of sexually abusing a student at the elementary school. Soon, Alice is arrested, incarcerated, and as good as convicted in the eyes of a suspicious community. As a child, Alice designed her own map of the world to find her bearings. Now, as an adult, she must find her way again, through a maze of lies, doubt and ill will. A vivid human drama of guilt and betrayal, *A Map of the World* chronicles the intricate geographies of the human heart and all its mysterious, uncharted terrain. The result is a piercing drama about family bonds and a disappearing rural American life.

**What Is Intelligence?** Jan 06 2022 The 'Flynn effect' refers to the massive increase in IQ test scores over the course of the twentieth century. Does it mean that each generation is more intelligent than the last? Does it suggest how each of us can enhance our own intelligence? Professor Flynn is finally ready to give his own views. He asks what intelligence really is and gives a surprising and illuminating answer. This expanded paperback edition includes three important new essays. The first contrasts the art of writing cognitive history with the science of measuring intelligence and reports data. The second outlines how we might get a complete theory of intelligence, and the third details Flynn's reservations about Gardner's theory of multiple intelligences. A fascinating book that bridges the gulf separating our minds from those of our ancestors a century ago, and makes an important contribution to our understanding of human intelligence.

*The World in 2050* Nov 16 2022 A vivid forecast of our planet in the year 2050 by a rising star in geoscience, distilling cutting-edge research into four global forces: demographic trends, natural resource demand, climate change, and globalization. The world's population is exploding, wild species are vanishing, our environment is degrading, and the costs of resources from oil to water are going nowhere but up. So what kind of world are we leaving for our children and grandchildren? Geoscientist and Guggenheim fellow Laurence Smith draws on the latest global modeling research to construct a sweeping thought experiment on what our world will be like in 2050. The result is both good news and bad: Eight nations of the Arctic Rim (including the United States) will become increasingly prosperous, powerful, and politically stable, while those closer to the equator will face water shortages, aging populations, and crowded megacities sapped by the rising costs of energy and coastal flooding. *The World in 2050* combines the lessons of geography and history with state-of-the-art model projections and analytical data—everything from climate dynamics and resource stocks to age distributions and economic growth projections. But Smith offers more than a compendium of statistics and studies— he spent fifteen months traveling the Arctic Rim, collecting stories and insights that resonate throughout the book. It is an approach much like Jared Diamond took in *Guns, Germs, and Steel* and *Collapse*, a work of geoscientific investigation rich in the appreciation of human diversity. Packed with stunning photographs, original maps, and informative tables, this is the most authoritative, balanced, and compelling account available of the world of challenges and opportunities that we will leave for our children.

**A History of the World (in Dingbats)** Oct 15 2022 The phenomenally creative musician and filmmaker David Byrne presents new artwork that explores daily life in surprising ways, with unique reflections on shared human experiences - a book for our time from a highly influential artist Through striking and humorous figurative drawings, the iconic artist and musician David Byrne depicts daily life in intriguing ways. His illustrations, created while under quarantine, expand on the dingbat, a typographic ornament used to illuminate or break up blocks of text, to explore the nuances of life under lockdown and evoke the complex, global systems the pandemic cast in bright light. Edited and designed by Alex Kalman in close collaboration with Byrne, this unique book reflects on shared experiences and presents history as a story that is continually undergoing revision.

*Writing the Book of the World* Feb 24 2021 Theodore Sider presents a broad new vision of metaphysics centred on the idea of structure. To describe the world well we must use concepts that 'carve at the joints', so that conceptual structure matches reality's structure. This approach illuminates a wide range of topics, such as time, modality, ontology, and the status of metaphysics itself.

*The Way of the World* Mar 16 2020 From Pulitzer Prize-winning journalist and bestselling author Ron Suskind comes a startling look at how America and the West lost their way, and at the struggles of their respective governments to reclaim the moral authority on which their survival depends. From the White House to Downing Street, and from the fault-line countries of South Asia to the sands of Guantanamo, Suskind offers an astonishing story that connects world leaders to the forces waging today's shadow wars and to the next generation of global citizens. Tracking down truth and hope, Suskind delivers historic disclosures with this emotionally stirring and strikingly original portrait of the post 9-11 world.

*World in Crisis* Jun 18 2020 Most mainstream economists view capitalism's periodic breakdowns are nothing more than temporary aberrations from another wise unbroken path toward prosperity. For Marxists, this fundamental flaw has long been acknowledged as a central feature of the free market system. This groundbreaking volume brings together Marxist scholars from around the world to offer an empirically grounded defense of Marx's law of profitability and its central role in explaining these capitalist crises. Guglielmo Carchedi has worked at the United Nations in New York and has taught at the University of Amsterdam. Michael Roberts has worked as an economist for over thirty years in the city of London financial center.

**The Ultimate Ambition in the Arts of Erudition** Mar 08 2022 For the first time in English, a catalog of the world through fourteenth-century Arab eyes—a kind of Schott's Miscellany for the Islamic Golden Age An astonishing record of the knowledge of a civilization, *The Ultimate Ambition in the Arts of Erudition* catalogs everything known to exist from the perspective of a fourteenth-century Egyptian scholar and litterateur. More than 9,000 pages and thirty volumes—here abridged to one volume, and translated into English for the first time—it contains entries on everything from medieval moon-worshipping cults, sexual aphrodisiacs, and the substance of clouds, to how to get the smell of alcohol off one's breath, the deliciousness of cheese made from buffalo milk, and the nesting habits of flamingos. Similar works by Western authors, including Pliny's *Natural History* and Diderot's *Encyclopédie*, have been available in English for centuries. This groundbreaking translation of a remarkable Arabic text—expertly abridged and annotated—offers a look at the world through the highly literary and impressively knowledgeable societies of the classical Islamic world. Meticulously arranged and delightfully eclectic, it is a compendium to be treasured—a true monument of erudition. For more than seventy years, Penguin has been the leading publisher of classic literature in the English-speaking world. With more than 1,700 titles, Penguin Classics represents a global bookshelf of the best works throughout history and across genres and disciplines. Readers trust the series to provide authoritative texts enhanced by introductions and notes by distinguished scholars and contemporary authors, as well as up-to-date translations by award-winning translators.

**A Short History of the World** Nov 23 2020 Chronologically discusses the events of history beginning with the evolution of man and ending with the restructuring of Western Europe in 1993.

**A History of the World in 100 Objects** Jan 26 2021 This book takes a dramatically original approach to the history of humanity, using objects which previous civilisations have left behind them, often accidentally, as prisms through which we can explore past worlds and the

lives of the men and women who lived in them. The book's range is enormous. It begins with one of the earliest surviving objects made by human hands, a chopping tool from the Olduvai gorge in Africa, and ends with an object from the 21st century which represents the world we live in today. Neil MacGregor's aim is not simply to describe these remarkable things, but to show us their significance - how a stone pillar tells us about a great Indian emperor preaching tolerance to his people, how Spanish pieces of eight tell us about the beginning of a global currency or how an early Victorian tea-set tells us about the impact of empire. Each chapter immerses the reader in a past civilisation accompanied by an exceptionally well-informed guide. Seen through this lens, history is a kaleidoscope - shifting, interconnected, constantly surprising, and shaping our world today in ways that most of us have never imagined. An intellectual and visual feast, it is one of the most engrossing and unusual history books published in years.
