Promoting democracy has long been a priority of Western foreign policy. In practice, however, international attempts to expand representative forms of government have been inconsistent and are often perceived in the West to have been failures. The states of Central Asia, in particular, seem to be "democracy resistant," and their governments have continued to support various forms of authoritarianism in the decades following the Soviet Union's collapse. In *Democracy in Central Asia*, Mariya Omelicheva examines the beliefs and values underlying foreign policies of the major global powers—the United States, the European Union, Russia, and China—in order to understand their efforts to influence political change in Kazakhstan,

Kyrgyzstan, and Uzbekistan. Omelicheva has traveled extensively in the region, collecting data from focus groups and public opinion surveys. She draws on the results of her fieldwork as well as on official documents and statements of democracy-promoting nations in order to present a provocative new analysis. Her study reveals that the governments and citizens of Central Asia have developed their own views on democracy supported by the Russian and Chinese models rather than by Western examples. The vast majority of previous scholarly work on this subject has focused on the strategies of democratization pursued by one agent such as the United States or the European Union. Omelicheva shifts the focus from democracy promoters' methods to their message and expands the scope of existing analysis to include multiple sources of influence. Her fresh approach illuminates the full complexity of both global and regional notions of good governance and confirms the importance of social-psychological and language-based perspectives in understanding the obstacles to expanding egalitarianism.

The examining team reviewed P5 Practice & Revision Kit provides invaluable guidance on how to approach the exam and contains past ACCA exam questions for you to try. The questions in the Practice & Revision Kit reflect the scenario-based questions you will find on the exam. Using the little-known equation $E=hf$ as the foundation for a compelling new vision, *The Burning Answer* reveals the importance of embracing solar energy as the only solution to the global energy crisis. Our society faces a choice. We could be enjoying a sustainable lifestyle but we have chosen not to. In three generations we have consumed half the oil produced by photosynthesis over eight million generations. In two generations we have used half our uranium resources. With threats from global warming, oil depletion and nuclear disaster, we are running out of options. Solar power, as Keith Barnham explains, is our necessary solution. In *The Burning Answer* he uncovers the connections between physics and politics that have resulted in our dependence on a high-carbon lifestyle, which only a solar revolution can now overcome. Einstein's famous equation $E=mc^2$ led to the atomic bomb and the widespread use of nuclear energy; it has delayed a solar revolution in many countries. In a fascinating tour of recent scientific history, Keith Barnham reveals Einstein's other, less famous equation, the equation the world could have relied on. Barnham explains that the roots of solar energy lie in a little known equation $E=hf$, an equation which was coincidentally celebrated (and explained to the world) by Einstein in the same year he discovered $E=mc^2$. He alleges that the former equation has been overlooked in favor of the latter, much to our detriment, and Barnham is here to offer us a solution: We can still turn things around and solar energy is the key. While everyone is aware of solar energy, people are still not paying enough attention, and so as well as explaining the science behind it, Barnham takes his subject forward to advise on what we should be doing

to utilize this amazing energy source. In this provocative, inspiring, passionately argued book, Keith Barnham outlines actions that any one and all of us can take to make an impact now and on future generations. The Burning Answer is a solar manifesto for the new climate-aware generation and a must-read for climate-change skeptics. A concise introduction to one of today's fastest-growing, most exciting fields, Comics Studies: A Guidebook outlines core research questions and introduces comics' history, form, genres, audiences, and industries. Authored by a diverse roster of leading scholars, this Guidebook offers a perfect entryway to the world of comics scholarship. Surveillance in Europe is an accessible, definitive and comprehensive overview of the rapidly growing multi-disciplinary field of surveillance studies in Europe. Written by experts in the field, including leading scholars, the Companion's clear and up to date style will appeal to a wide range of scholars and students in the social sciences, arts and humanities. This book makes the case for greater resilience in European society in the face of the growing pervasiveness of surveillance. It examines surveillance in Europe from several different perspectives, including: the co-evolution of surveillance technologies and practices the surveillance industry in Europe the instrumentality of surveillance for preventing and detecting crime and terrorism social and economic costs impacts of surveillance on civil liberties resilience in Europe's surveillance society. the consequences and impacts for Europe of the Snowden revelations findings and recommendations regarding surveillance in Europe Surveillance in Europe's interdisciplinary approach and accessible content makes it an ideal companion to academics, policy-makers and civil society organisations alike, as well as appealing to top level undergraduates and postgraduates. Corporate Governance and the Nuclear Industry explores the UK nuclear Legacy - governance issues associated with the decommissioning of a range of early-generation civil nuclear facilities. This book traces how we got here and the risks that have been taken, whilst presenting new research and thinking that is required to manage our nuclear Legacy. The book addresses a new analytical approach using notions of governance to review key historic events. This approach analyses these events using concepts of stakeholder control, accountability and regulation. Using these concepts and undertaking a more detailed analysis of the Legacy's current governance arrangements; the conventional public sector-based solutions that attempt to harness private sector expertise, this book will contrast these with government responses to determine the degree of control over the Legacy and any possible control issues. Corporate Governance and the Nuclear Industry concludes that we need to recognise the legacy's problems as exceptional rather than prosaic, and suggests that this requires exceptional governance solutions rather than the current form that is

clearly failing. As the Egyptian revolution unfolded throughout 2011 and the ensuing years, no one was better positioned to comment on it—and try to push it in productive directions—than best-selling novelist and political commentator Alaa Al-Aswany. For years a leading critic of the Mubarak regime, Al-Aswany used his weekly newspaper column for Al-Masry Al-Youm to propound the revolution's ideals and to confront the increasingly troubled politics of its aftermath. This book presents, for the first time in English, all of Al-Aswany's columns from the period, a comprehensive account of the turmoil of the post-revolutionary years, and a portrait of a country and a people in flux. Each column is presented along with a context-setting introduction, as well as notes and a glossary, all designed to give non-Egyptian readers the background they need to understand the events and figures that Al-Aswany chronicles. The result is a definitive portrait of Egypt today—how it got here, and where it might be headed.

The Dispute Settlement Reports are the WTO authorized and paginated reports in English. They are an essential addition to the library of all practicing and academic trade lawyers and needed by students worldwide taking courses in international economic or trade law. DSR 2018: Volume 7 reports on European Communities and Certain Member States - Measures Affecting Trade in Large Civil Aircraft - Recourse to Article 21.5 of the DSU by the United States (WT/DS316) and Indonesia - Safeguard on Certain Iron or Steel Products (WT/DS490, WT/DS496). This book investigates the emergence of an EU strategic intelligence community as a complex multi-dimensional networked construction. It examines the constitution, structure and performance of EU intelligence arrangements as part of security policies of the European Union. Intelligence security has become a remarkable feature of the European integration processes. This study assess the ability of EU Member States, as well as relevant institutions and agencies, to develop effective, legitimate and accountable institutions and mechanisms for collection, transmission, processing and exchange of intelligence. In this regard, synergy is a key indicator that validates the ability to create the European strategic intelligence community in the EU's legal and institutional framework. This groundbreaking project constructs a comprehensive model of the intelligence community as a distorted epistemic community tailored to singularities of EU security policies and systemic arrangements provided by EU institutions and agencies. Between 1922 and 1996, over 10,000 girls and women were imprisoned in Magdalene Laundries, including those considered 'promiscuous', a burden to their families or the state, those who had been sexually abused or raised in the care of the Church and State, and unmarried mothers. These girls and women were subjected to forced labour as well as psychological and physical maltreatment. Using the Irish State's own report into the Magdalene institutions, as well as testimonies from survivors and independent witnesses, this book gives a detailed account of life behind the high walls of Ireland's Magdalene institutions. The book offers an overview of the social, cultural and political contexts of institutional survivor activism, the Irish State's response culminating in the McAleese Report, and the formation of the Justice for Magdalenes campaign, a volunteer-run survivor advocacy group. Ireland and the Magdalene Laundries documents the ongoing work carried out by the Justice for Magdalenes group in advancing public knowledge and research into Magdalene Laundries, and how the Irish State continues to evade its responsibilities not just to survivors of the Magdalenes but also in providing a truthful account of what happened. Drawing from a variety of primary sources, this book reveals the fundamental flaws in the state's investigation and how the treatment of the burials, exhumation and cremation of former Magdalene women remains a deeply troubling issue today, emblematic of the system of torture and studious official neglect in which the Magdalene women lived their lives. The Authors are donating all royalties in the name of the women

Paper Knowledge is a remarkable book about the mundane: the library card, the promissory note, the movie ticket, the PDF (Portable Document Format). It is a media history of the document. Drawing examples from the 1870s, the 1930s, the 1960s, and today, Lisa Gitelman thinks across the media that the document form has come to inhabit over the last 150 years, including letterpress printing, typing and carbon paper, mimeograph, microfilm, offset printing, photocopying, and scanning. Whether examining late nineteenth century commercial, or "job" printing, or the Xerox machine and the role of reproduction in our understanding of the document, Gitelman reveals a keen eye for vernacular uses of technology. She tells nuanced, anecdote-filled stories of the waning of old technologies and the emergence of new. Along the way, she discusses documentary matters such as the relation between twentieth-century technological innovation and the management of paper, and the interdependence of computer programming and documentation. Paper Knowledge is destined to set a new agenda for media studies. Issues in Financial Accounting addresses the controversial issues in financial accounting that have been debated by the preparers, users, auditors and regulators of financial statements. Henderson provides the best balance of technical and theoretical coverage in any Financial Accounting text on the market today, with its presentation of real-world examples, current debates and the underlying rationale for the accounting concepts demonstrated. Throughout the text, academic studies and professional accounting

research are referenced to also provide a critical understanding of historical debates in financial accounting. The new 15th edition covers significant recent developments to the accounting standards in Australia and is based on the AASB standards and interpretations that have been issued up to the end of 2012. This includes the Australian Accounting Standard Board's (AASB) program of changes to make accounting standards equivalent to International Financial Reporting Standards. The renowned Internet commentator and author of *How to Fix the Future* "expos[es] the greed, egotism and narcissism that fuels the tech world" (Chicago Tribune). The digital revolution has contributed to the world in many positive ways, but we are less aware of the Internet's deeply negative effects. *The Internet Is Not the Answer*, by longtime Internet skeptic Andrew Keen, offers a comprehensive look at what the Internet is doing to our lives. The book traces the technological and economic history of the Internet, from its founding in the 1960s through the rise of big data companies to the increasing attempts to monetize almost every human activity. In this sharp, witty narrative, informed by the work of other writers, reporters, and academics, as well as his own research and interviews, Keen shows us the tech world, warts and all. Startling and important, *The Internet Is Not the Answer* is a big-picture look at what the Internet is doing to our society and an investigation of what we can do to try to make sure the decisions we are making about the reconfiguring of our world do not lead to unpleasant, unforeseen aftershocks. "Andrew Keen has written a very powerful and daring manifesto questioning whether the Internet lives up to its own espoused values. He is not an opponent of Internet culture, he is its conscience, and must be heard." —Po Bronson, #1 New York Times bestselling author

Consumers are not usually incorporated into the sociological concept of 'division of labour', but using the case of household recycling, this book shows why this foundational concept needs to be revised.

FUEL ADDITIVES Explore a complete and insightful review of fuel additives In Fuel Additives: Chemistry and Technology, petroleum industry chemist R. D. Tack delivers a comprehensive and practical exploration of various types of fuel additives, the problems they're meant to address, what they do, their chemistries and preparations, and a discussion of how they work. The book introduces and summarizes refinery operations to an extent that discussions of fuels in the following chapters become easier to understand. Then follow detailed descriptions of problems that occur for reasons of the ways in which liquid petroleum fuels are transported, stored, and used. In these discussions, their applications to jet fuel, heating oils, gasoline, diesel fuels, and

bunker fuels are covered. Fuel Additives: Chemistry and Technology also includes: A thorough overview of fuels, including discussions of refinery operations and processes and the application of fuel additives Aids to the transportation and storage of liquid petroleum fuels: practical discussions of stabilizers against oxidative degradation, drag reducers, static dissipators, anti-foamants, demulsifiers, de-icers, and biocides Comprehensive explorations of fuel detergents, including their chemistries and proposals to their mechanisms of action In-depth examinations of cold flow improvers, with detailed descriptions of the waxing problems that they solve Combustion improvers that improve the efficiencies of fuel combustion in engines, burners, and particulate filters—while also reducing emissions Additives that protect metal surfaces against wear, by providing lubricity, and corrosion Perfect for chemists working in the petroleum industry, Fuel Additives: Chemistry and Technology will also earn a place in the libraries of professionals working in related areas and seeking a quick understanding of topics such as oxidative stability, corrosion, or wax crystallization since 1974. This title examines an important historic event--the school shooting at Sandy Hook Elementary School in Newtown, Connecticut. Easy-to-read, compelling text explores the man behind the shooting, Adam Lanza, the tragic events of December 14, 2012, the shooting's aftermath and the community's response, and the victims' families advocacy work in subsequent months. Also discussed are gun laws in the United States, new legislation introduced in Congress regarding gun control, and mental health policy and law. Features include a table of contents, glossary, selected bibliography, Web sites, source notes, and an index, plus a timeline and essential facts. Aligned to Common Core Standards and correlated to state standards. Essential Library is an imprint of Abdo Publishing, a division of ABDON. The examining team reviewed P3 Practice & Revision Kit provides invaluable guidance on how to approach the exam and contains past ACCA exam questions for you to try. It focuses on teaching you what to look for in questions and how to determine what the requirements are asking you to do. It contains many past exam questions and additional questions prepared by BPP Learning Media which reflect the scenarios and technical questions you will find in the exam. This is the second edition of the book. The book has been written especially for UGC NET Exam, which is conducted twice a year i.e. in June & December. Not a single book is available on Women's Studies especially for UGC NET Exam. It is my endeavour to fill this gap. The first section of this book deals with important facts related to the subject. It contains all the information in tabular form for quick revision. Thereafter, 31 Sets of Question Papers (Paper II & Paper III) asked in previous UGC NET Exam from 2004 to 2015 has been solved with detailed explanations. If any NET aspirant studies these Question-Answers carefully then I am sure that

success is not far for such aspirants, as often many questions from previous year exam are repeated or asked in a modified form each year. Those students who are appearing in State Level Eligibility Test or Ph. D Entrance Exam may also find this book equally useful for them.
