***Water from Stone Dec 30 2020 Award-winning author Jeffrey Greene provides a portrait, by turns lyrical and provocative, of J. David Bamberger's unlikely transformation from first, a vacuum cleaner salesman, then to co-founder and CEO of Church's Fried Chicken, to an internationally recognized conservationist. In fact, Greene tells two integrally related stories: the evolution of one man's business sense, applying profit incentives to land restoration and nature conservancy; and the creation of a Texas Hill Country preserve where he effectively demonstrates his own principles. Growing up in rural Ohio during the Great Depression and World War II, Bamberger learned at an early age to shun waste, grow food productively, and admire the Amish for living in harmony with the land. His mother taught him to love the natural world and gave him a book that would set the course for his life: Pleasant Valley, by Louis Bromfield, a visionary American advocate for land restoration. Inspired by his new role model, Bamberger would say, "If I ever make money, I want to do what Bromfield did." After finding that financial success, Bamberger bought what he describes as "the sorriest piece of land in Blanco***

**County" and entered upon his decades-long effort to restore the ecological balance of 5,500 acres that had been virtually destroyed by more than a century of misuse. Naming his preserve Selah--from the Old Testament term meaning "pause and reflect"--Bamberger dedicates himself and his resources to protecting species and educating school children, conservation groups, government officials, and everyone else who will listen to his central message, delivered with evangelical zeal: We must take care of the earth, and anyone can help. Today, David and his wife, Margaret, have received many awards, and he has been featured in The New Yorker, in Audubon, and on CNN and network news. But until now, no one has fully told the story of how a man with vision transformed a place--and in doing so, transformed himself.**

Directors Richard Linklater and Robert Rodriguez proved that locally made films with regional themes such as Slacker and El Mariachi could capture a national audience. **community with an ongoing commitment to nurture the next generation of independent filmmakers. *Chainsaws, Slackers, and Spy Kids* chronicles the evolution of this struggle by re-creating Austin's colorful movie history. Based on revealing interviews with Richard Linklater, Robert Rodriguez, Mike Judge, Quentin Tarantino, Matthew McConaughey, George Lucas, and more than one hundred other players in the local and national film industries, Alison Macor explores how Austin has become a proving ground for contemporary independent cinema. She begins in the early 1970s with Tobe Hooper's horror classic, *The Texas Chainsaw Massacre*, and follows the development of the Austin film scene through 2001 with the production and release of Rodriguez's \$100-million blockbuster, *Spy Kids*. Each chapter explores the behind-the-scenes story of a specific movie, such as Linklater's *Dazed and Confused* and Judge's *Office Space*, against the backdrop of Austin's ever-expanding film community.**

***Chain Saw Confidential Nov 21 2022 When The Texas***

***Chain Saw Massacre* first hit movie screens in 1974 it was both reviled and championed. To critics, it was either "a degrading, senseless misuse of film and time" or "an intelligent, absorbing and deeply disturbing horror film." However it was an immediate hit with audiences. Banned and celebrated, showcased at the Cannes film festival and included in the New York MoMA's collection, it has now come to be recognized widely as one of the greatest horror movies of all time. A six-foot-four poet fresh out of grad school with limited acting experience, Gunnar Hansen played the masked, chain-saw-wielding Leatherface. His terrifying portrayal and the inventive work of the cast and crew would give the film the authentic power of nightmare, even while the gritty, grueling, and often dangerous independent production would test everyone involved, and lay the foundations for myths surrounding the film that endure even today. Critically-acclaimed author Hansen here tells the real story of the making of the film, its release, and reception, offering unknown behind-the-scenes details, a harrowingly entertaining account of the adventures of low-budget filmmaking, illuminating insights on the film's enduring and influential place in the horror genre and our culture, and a thoughtful meditation on why we love to be scared in the first place.**

***Early Crop-tree Release and Species Cleaning in Young Northern Hardwoods Nov 28 2020 In 1959 a study of crop-tree release and species cleaning was established in a 25-year-old northern hardwood stand growing on an above-average hardwood site that resulted from a silvicultural clearcut in the White Mountains of New Hampshire. Three treatmentslight crop-tree release, heavy release, and species cleaningwere randomly assigned to quarter-acre plots, five plots per treatment, including five untreated plots. The stand was followed for 5 years and based on the results, treatment effects were projected to a stand age of 45 years. These projections were subjected to a financial analysis. The treatment plots were tallied at stand ages 56 (1990) and 69 (2003) years. We summarize the results of the early crop-tree release and species cleaning and provide a long-term financial perspective based on the new tallies. Our goal was to repeat the financial analysis and re-examine the results and conclusions of the original study. We found that the return on investment at***

**stand ages 56 and 69 years was not as good as originally reported. The least expensive treatment, a light crop-tree release, gave the greatest return on investment. An opportunity for a commercial thinning between stand age 45 and 56 was missed and most likely would have improved the financial outcome of the treatments. Approximately 400 crop trees per acre were selected for release in 1959 but 200 crop trees per acre would have been more than sufficient and would have improved the financial outcome of the treatments by lowering initial cost. On a similarly good hardwood site, with an equally well stocked young stand, and good markets for small diameter roundwood, we only can speculate that releasing 200 or preferably fewer dominant or codominant trees per acre at stand age 25 followed by a commercial thinning when feasible after stand age 45 could be a good investment for a landowner.**

***The Ghost in the Image Aug 26 2020 Our century has seen the proliferation of reality shows devoted to ghost hunts, documentaries on hauntings, and horror films presented as found footage. The horror genre is no longer exclusive to fiction and its narratives actively engage us in web forums, experiential viewing, videogames, and creepypasta. These participative modes of relating to the occult, alongside the impulse to seek proof of either its existence or fabrication, have transformed the production and consumption of horror stories. The Ghost in the Image offers a new take on the place that supernatural phenomena occupy in everyday life, arguing that the relationship between the horror genre and reality is more intimate than we like to think. Through a revisionist and transmedial approach to horror this book investigates our expectations about the ability of photography and film to work as evidence. A historical examination of technology's role in at once showing and forging truths invites questions about our investment in its powers. Behind our obsession with documenting everyday life lies the hope that our cameras will reveal something extraordinary. The obsessive search for ghosts in the image, however, shows that the desire to find them is matched by the pleasure of calling a hoax.***

***Henry: Portrait of a Serial Killer Jan 11 2022 Henry: Portrait of a Serial Killer (1986) is precisely that: a cold-eyed character study based on the crimes of Henry Lee Lucas, who was convicted of eleven murders in the 1980s. Director John McNaughton presents an unflinching portrayal of the semi-fictional Henry's crimes. The film proved immensely controversial, notably in the UK, where it confounded the British Board of Film Classification, which went so far as to re-edit a crucial scene, in addition to cutting others. Shaun Kimber's examination of the controversies surrounding Henry considers the history and implications of censors' decisions about the film on both sides of the Atlantic. Taking account of the views of audiences, critics and academics, both at the time the film was released and in the years since, Kimber also looks at the changing political, social and economic contexts within which the film was produced and has subsequently circulated.
