Advances in chemistry, biology and genomics coupled with laboratory automation and computational technologies have led to the rapid emergence of the multidisciplinary field of chemical genomics. This edited text, with contributions from experts in the field, discusses the new techniques and applications that help further the study of chemical genomics. The beginning chapters provide an overview of the basic principles of chemical biology and chemical genomics. This is followed by a technical section that describes the sources of small-molecule chemicals; the basics of high-throughput screening technologies; and various bioassays for biochemical-, cellular- and organism-based screens. The final chapters connect the chemical genomics field with personalized medicine and the druggable genome for future discovery of new therapeutics. This book will be valuable to researchers, professionals and graduate

students in many fields, including biology, biomedicine and chemistry. Complete step-by-step repair and maintenance information, 700+ photos, and wiring diagrams all based on a full disassembly and reassembly of the vehicle. libraries; June and December issues include semiannual index Built with twin, underwing engines, tricycle landing gear and shoulder-mounted wings, the Grumman F7F Tigercat was an unusual looking, all-metal fighter. It was also one of the highest-performance piston-engined fighters of all time. Originally designed as a carrier-based aircraft, the F7F failed its initial trials, and ended up flying primarily as a land-based attack aircraft for the Marines. Equipped with radar and a second seat for an operator, the Tigercat also flew as a night-fighter and reconnaissance platform. Although it was introduced in 1944, the Tigercat never saw action in WWII, and had a limited role in Korea. The F7F found a new role in non-military use, flying as a fire-fighting aircraft and camera ship for Hollywood in the 1970s. Originally printed by the U.S. Navy, this F7F Flight Operating Manual taught pilots everything they needed to know before entering the

cockpit. This facsimile has been reformatted. Care has been taken to preserve the integrity of the text. Case studies: California, Kentucky, Massachusetts, Minnesota, Missouri, New Mexico, North Carolina, North Dakota, Ohio, Pennsylvania.
