The chapters present cutting-edge research covering central topics such as the status of semantic components in motion event descriptions and their role in typological variation, the function of linguistic multimodal structures for the codification of motion, the diachronic evolution of motion expressions and its effects on motion typologies, the correspondences between physical and non-physical (fictive, metaphorical) motion, and the impact of contexts and genres on the characterization and interpretation of motion events. These issues are examined from a theoretical and applied linguistic perspective (L1-L2 acquisition, translation/interpreting). The analyses make use of diachronic and synchronic data collected by a range of methods (elicitation, experimentation, and corpus research) in more than fifteen languages. All in all, this book will be of great value to scholars and students interested in the expression of motion and space across languages.

- Tim Ferriss Ten years ago, Lewis spoke only English. But constant travel, along with a buoyant attitude, has unmasked the polyglot within. - National Geographic What if you could skip the years of study and jump right to speaking Mandarin? Sound Crazy? No, it's language hacking. It's about learning what's indispensable, skipping what's not - and using what you've learned to have real conversations in Chinese - from day one! Unlike most traditional language courses that try to teach you the rules of a language, Language Hacking Mandarin shows you how to learn and speak Mandarin Chinese immediately through proven memory techniques, unconventional shortcuts and conversation strategies perfect by one of the world's greatest language learners, Benny Lewis, aka the Irish Polyglot. The Method Language Hacking takes a modern approach to language learning by focusing on the essential conversations that learners need to start speaking from day one. There's no need to study every word and grammar rule before you start using the language. Instead, Language Hacking applies the 80/20 principle to language learning, giving you the most versatile phrases and most effective shortcuts to help you get fluent faster. Through speaking, you get the practice you need to progress and the confidence to use the language. Each of the 10 units culminates with a speaking mission that you can choose to share on the italki#LanguageHacking learner community (www.italki.com/community) where you can submit your missions, give and get feedback and extend your learning beyond the pages of the book. The audio for this course is available for free on library.teachyourself.com or from the Teach Yourself Library app. You don't need to go abroad to learn a language any more.

Kingdom of Characters Aug 15 2022 A New York Times Notable Book of 2022 What does it take to reinvent a language? After a meteoric rise, China today is one of the world's most powerful nations. Just a century ago, it was a crumbling empire with literacy reserved for the elite few, as the world underwent a massive technological transformation that threatened to leave them behind. In Kingdom of Characters, Jing Tsu argues that China's most daunting challenge was a linguistic one: the century-long fight to make the formidable Chinese language accessible to the modern world of global trade and digital technology. Kingdom of Characters follows the bold innovators who reinvented the Chinese language, among them an exiled reformer who risked a death sentence to advocate for Mandarin as a national language, a Chinese-Muslim poet who laid the groundwork for Chairman Mao's phonetic writing system, and a computer engineer who devised input codes for Chinese characters on the lid of a teacup from the floor of a jail cell. Without their advances, China might never have become the dominating force we know today. With larger-than-life characters and an unexpected perspective on the major events of China's tumultuous twentieth century, Tsu reveals how language is both a technology to be perfected and a subtle, yet potent, power to be exercised and expanded.

Challenges Encountered by Chinese ESL Learners Feb 26 2021 This book provides a blended approach in outlining the properties of grammatical knowledge that have been causing difficulty to Chinese speaking learners, including tense and aspect, articles, passives, unaccusatives, plurality and motion verbs. It explains from different linguistics perspectives how these constraints/difficulties might be dealt with. It also offers readers a comprehensive account of these problems, and outlines the possible pedagogical solutions teachers can try in the classroom. These topics are selected because they bring substantial challenges and difficulties to Chinese English as a Second Language (ESL) learners. This book bridges the gap between acquisition theory and language pedagogy research, benefiting not just language learners but language teachers around the world, and all those who would like to witness collaboration between second language acquisition theory and second language teaching practice in general. It initiates future work in which researchers from different fields with diverging theoretical perspectives and methodological approaches will be able to develop studies that are compatible with each other. The Pattern of the Chinese Past May 12 2022 A satisfactory comprehensive history of the social and economic development of pre-modern China, the largest country in the world in terms of population, and with a documentary record covering three millennia, is still far from possible. The present work is only an attempt to disengage the major themes that seem to be of relevance to our understanding of China today. In particular, this volume studies three questions. Why did the Chinese Empire stay together when the Roman Empire, and every other empire of antiquity of the middle ages, ultimately collapsed? What were the causes of the medieval revolution which made the Chinese economy after about 1100 the most advanced in the world? And why did China after about 1350 fail to maintain her earlier pace of technological advance while still, in many respects, advancing economically? The three sections of the book deal with these problems in turn but the division of a subject matter is to some extent only one of convenience. These topics are so interrelated that, in the last analysis, none of them can be considered in isolation from the others.

Early Language Acquisition of Mandarin-Speaking Children Jul 02 2021 Compared with other subdisciplines in Chinese linguistics, children's language acquisition is a significant field with relatively limited achievements. Based on data from a dynamic and developmental corpus, this book is a comprehensive exploration of the early development of Chinese-speaking children's language acquisition. Anchoring the discussions regarding phonetics, semantics and aspects of syntax in a cognitive and functional framework, the author conducts an in-depth analysis of many acquisition characteristics, such as the inevitable and incidental errors of their learning of initials; their ability to obtain the concept of time at a young age and the utilization of Le in the expression of the past tense; their understanding of subjectivity at a young age and the ability to express it; their learning of the degree of modality following the order of from probability to necessity; and children's acquisition of syntactic structures being impacted by genetics and also affected by the steps involved in syntactic processing. Although genetics, cognition and experience all play a role in children's language acquisition, this book focuses on the role of cognitive functions. By successfully explaining the acquisition rules based on some cutting-edge linguistic theories, the book will certainly be beneficial to scholars studying linguistics, psychology, cognitive science and early childhood educators.

Identity Politics and Popular Culture in Taiwan Jan 28 2021 In the past two decades, a uniform representation of cutified femininity prevails in the Taiwanese media, evidenced by the shift of Taiwan's popular cultural taste from a Chinese-centered tradition to a mixed absorption from neighboring cultural capitals in the global market. This book argues that the native term "sajiao" is the key to understand the phenomenon. Originally referring to a set of persuasive tactics through imitating a spoiled child's gestures and ways of speaking to get attention or material goods, sajiao is commonly understood to be women's weapon to manipulate men in the Mandarin-speaking communities. By re-interpreting sajiao as a "feminine" tactic, or the tactic of the weak, the book aims to propose a "feminine framework" in exploring identity

politics in the following three aspects: the rising obsession with the immature female image in Taiwan's popular culture, the adoption of the feminine communication style in native speakers' everyday language and interactions, and the competing discourses between dominant/subordinate, central/peripheral, global/local, and Chinese/Taiwanese in shaping the identity politics in current Taiwanese society. The micro-analysis of everyday language politics leads the reader to examine layers of discourse about gender, identity, and communication, and finally to inquire how to situate or categorize "Taiwan" in area studies. The "feminine framework" is a useful theoretical tool that not only deconstructs everyday communication practice but also provides a bottom-up, alternative angle in analyzing Taiwan's role in political, economic, and cultural flows in East Asia. The massive imports of popular cultural products in the late 80s, mainly from Japan, fermented the kawaii (Japanese cute) type of femininity in regulating everyday communication and the perception of gender roles in Taiwan. The popularity of the baby-like female image is concurrent with the simmering debate on Taiwanese identity. Taiwan offers a unique perspective for observing identity politics because it still holds an undetermined status in the international community. The collective uncertainty about the island's future and the diminishing voice in the international society become the backdrop for the growth of defining, interpreting, and appropriating sajjiao elements in the popular culture. This book offers an in-depth examination of the interplay among local historical contexts, cross-border capitalist exchange, and everyday communication that shapes the dialogism of Taiwanese identity.

The contributors are among some of the most influential pioneers in the field whose entire academic lives have been dedicated to its development. Time Representations in the Perspective of Human Creativity Dec 27 2020 In recent years, the study of the conceptualization of time has seen a considerable growth, providing a basis for exploring the cognitive foundation of metaphor. But if metaphorical representations of time are established in the cognitive system, how are they manipulated when humans are engaged in creative expression? This is the question that the present volume addresses, on the assumption that by interrogating creativity, new insights into our understanding of time may be gained. Our view of creativity, which informs the ten chapters that compose this volume, endorses not only the extraordinary instances found in poetry and the arts (cinema, music, graphic novels, etc.), but also its more 'mundane', everyday manifestations that appear in ordinary language use, political discourse, or TV news. Spanning across modalities (verbal, pictorial, auditory, and gestural), the exemplary expressions herein are intended to reflect the richness and diversity vis-à-vis the creativity of time representations while also pointing to the common underpinnings that motivate and constrain creativity.

Developing, Modelling and Assessing Second Languages Jan 08 2022 This edited volume brings together the work of a number of researchers working in the framework of Processability Theory (PT), a psycholinguistic theory of second language acquisition (SLA) (Pienemann 1998; 2005). The aim of the volume is two-fold: It engages with current issues in both theory development and theory application and focuses on theoretical developments within the framework of PT as well as issues related to second language teaching and assessment. In coordinating approaches to addressing both theoretical and applied aspects of SLA, this volume aims at bridging the gap between theory and practice. It also reflects the richness of debate within the field of PT-based research. The volume is intended for postgraduate students, SLA researchers as well as language teachers. As of January 2019, this e-book is freely available, thanks to the support of libraries working with Knowledge Unlatched.

The Acquisition of the Present Feb 15 2020 This is the first edited volume that tackles the acquisition of the present (tense, aspect, temporality), an under-researched area, particularly compared to the acquisition of past temporality. The first two chapters focus on the L1 acquisition of English from the perspective of the Aspect hypothesis and the Verb-Island hypothesis Wang & Shirai) and the L1 acquisition of French from the perspective of the zero-tense hypothesis (Demirdache &

Lungu). The remaining chapters tackle the L2 acquisition of English (Liszka, Al-Thubaiti, Vraciu), French (Ayoun, Saillard), Spanish (Gabriele et al.), Russian (Martelle) and Japanese (Shirai & Li) by learners of different L1s (French, English, Arabic, Chinese and Korean), testing various semantic and syntactic hypotheses. The last chapter presents a summary of the findings, and offers a few conclusions as well as broad directions for future research.

Space in Languages of China Aug 03 2021 Space has long been a popular topic in linguistic research. Numerous books on the subject have been published over the past decade. However, none of these books were based on linguistic data from Chinese and expressions of space in Chinese have been largely neglected in past research. In this volume, not only Mandarin Chinese (the standard language) is investigated; several other dialects, as well as a minority language of China and Chinese Sign Language are studied. Cross-linguistic, synchronic and diachronic approaches are used to investigate phenomena related to space. The authors of this book present different points of view on the expression of space in language and related theoretical issues. As the contributing scholars argue, Chinese shares many common features with other languages, but also presents some particular properties. Space is a topic that is both classical and modern, of enduring interest. These studies of space give insight into not only general linguistics but also other domains such as anthropology and psychology.

A Systemic Functional Grammar of Chinese Jan 16 2020 This book presents an analysis of Chinese grammar from a systemic functional perspective. Its main focus is the clausal grammar of Chinese, and Dr Li provides a thorough analysis of Chinese clauses according to their constituent parts. However, uniquely, the second half of the book extends this examination into an analysis of Chinese discourse and text analysis. Professor Halliday's foreword praises Eden Li's thorough analysis, and shows its relevance to the field of systemic functional linguistics in general. Systemic Functional Grammar of Chinese provides the reader with a general theoretical framework of grammar and discourse analysis from a systemic functional perspective.
