After all, no-one had ever done it before. It would be one of the longest of all overland journeys - half way round the world, from the English Channel to Singapore. They knew that several expeditions had already tried it. Some had got as far as the deserts

of Persia; a few had even reached the plains of India. But no one had managed to go on from there: over the jungle clad mountains of Assam and across northern Burma to Thailand and Malaya. Over the last 3,000 miles it seemed there were 'just too many rivers and too few roads'. But no-one really knew ... In fact, their problems began much earlier than that. As mere undergraduates, they had no money, no cars, nothing. But with a cool audacity, which was to become characteristic, they set to work - wheedling and cajoling. First, they coaxed the BBC to come up with some film for a possible TV series. They then gently persuaded the manufacturers to lend them two factory-fresh Land Rovers. A publisher was even sweet-talked into giving them an advance on a book. By the time they were ready to go, their sponsors (more than 80 of them) ranged from whiskey distillers to the makers of collapsible buckets. In late 1955, they set off. Seven months and 12,000 miles later, two very weary Land Rovers, escorted by police outriders, rolled into Singapore - to flash bulbs and champagne. Now, fifty years on, their book, 'First Overland', is republished - with a foreword by Sir David Attenborough. After all, it was he who gave them that film. Some of the most popular Land Rover pastimes are detailed here, with explanations of how to take part and what equipment you need. The book covers: the beginnings of Rover and its place in British Leyland; Land Rover's expansion in the 1980s and how it led to the foundation of the Rover Group; Rover under British Aerospace and the sell-off to BMW; Rover's struggle under German management and BMW's disposal of the Group and finally, the aftermath of Rover's collapse - MG Rover, Land Rover and MINI. The provision of support for troops in Iraq and Afghanistan is made more difficult because they operate in remote locations and harsh conditions. Despite the challenging operational environments, the Ministry of Defence (MOD) has successfully delivered around 300,000 personnel and 90,000 tonnes of freight to Iraq and Afghanistan over the last two years. However, it has not consistently met its targets for delivering supplies in a timely fashion. The MOD is taking measures to improve the effectiveness of its supply chain; and the amount of time a unit waits for items to be delivered has reduced by half in Afghanistan and a third in Iraq. 4.2 billion has been approved to upgrade or buy new equipment to meet urgent requirements in the two theatres. The NAO found that the availability of this equipment has generally met or exceeded targets, though there have been spares shortages with some fleets particularly when the vehicle is used for a different purpose than intended. The availability and serviceability of helicopters has

exceeded MOD targets, although prioritisation of spare parts for operations has led to reduced availability in the UK. There are also shortages of equipment for Service personnel in the UK to train with, prior to deployment overseas. Accommodation, medical and welfare services to Service personnel on operations are generally satisfactory although provision at the smaller patrol bases is more basic. The helicopter borne Medical Emergency Response Teams provide quick, life-saving medical support to casualties and evacuate them speedily to hospital. This book will be a completely revised and updated version of the Land Rover 90, 110 and Defender Restoration Manual (H600), containing a great deal of new material, particularly on later Defender models which have become available since the original edition. 'Be vigilant when driving through Africa: camels are careless when crossing the road and women carrying waterpots are little more watchful' warn the authors of this fifth edition of Africa Overland. They also give updated information on each country's political and security situation (Angola, Sierra Leone and Liberia are on the up; since this guide's last edition, security in Western Sudan and Eastern Chad has turned sour); provide an expanded Route Outlines section including information on border crossings; and offer revised recommendations on vehicles including practical coverage on buying a vehicle, maintenance and driving.
