Pulled between the disparate spheres of homelife with his minister father and the world of sex, drugs, and violence of his closest friends, author Stephen Haven relates his journey of self-discovery in this poignant memoir. After a fourteen-year absence from his home in Amsterdam, New York, Haven returns to the streets that molded his character. Through memories of his adolescence, Haven relives his youth in this economically deprived community and explores the values of friendship, loyalty, and privilege. A true bildungsroman, The River Lock traces the forging of Haven's identity from the clash of the two worlds of his youth-home and street. His return to his childhood past allows Haven to understand and describe how his growing understanding of art, culture, spirituality, and class melded to create a man able to live fully in two distinct worlds, the foundation of the man he is today. When Patrina Palinski is an infant, a strange fire rips through her tiny home, miraculously leaving her untouched physically but orphaned. Rescued by a nearby neighbor, Patrina is safe until Uncle Vlad, one of the most powerful men in Poland, shows up to claim her and take her back to his estate, where he locks her in a tower with only a nanny to teach her about life and her heritage. As Patrina nears her twelfth birthday, her simple life begins to change, and she soon finds that neither she nor those around her are who they seem. With the help of her nanny, Miriam, and the Guide, a voice that only she can hear, Patrina discovers new and secret abilities at every turn. What's more, she comes to understand her uncles true intentions. Will she be locked away forever, doing her uncles bidding, or get away and possibly cause a catastrophe like her ancestors? In this fantasy novel, an orphaned girl who has been locked away from the world learns about her secret heritage and special abilities and must work to escape her power-hungry uncle. Backpacker brings the outdoors straight to the reader's doorstep, inspiring and enabling them to go more places and enjoy nature more often. The authority on active adventure, Backpacker is the world's first GPS-enabled magazine, and the only magazine whose editors personally test the hiking trails, camping gear, and survival tips they publish. Backpacker's Editors' Choice Awards, an industry honor recognizing design, feature and product innovation, has become the gold standard against which all other outdoor-industry awards are measured. Can you smuggle some thirty-five million dollars worth of gold openly and so audaciously that no one can catch you when you carry it from Houston to Cochin on the high seas using a sailboat? Dr. Mohan Reddy, an American metallurgist, does it, and he does it successfully. The gold bars were accidentally found by him in a jungle in Texas. The original thief of the gold comes to know about his loss and keeps an eagle's eye on Mohan all the time. What about Mohan's own challenges? The movement of gold bars within the US is the first one. The next one is converting the shape of gold amenable for transportation, a metallurgical nightmare. What about the treacherous Atlantic Ocean? What about the pirates of the Arabian Sea? What about the moles placed by the original thief of the gold on his sailboat? What about converting the gold into legal money? Most importantly, how would he handle the whole perilous caper all alone and without any latitude for error or failure? Venera Fanning was last seen falling into nothingness at the end of Sun of Suns. Now, in Queen of Candescence, Venera finds herself plunging through the air among the artificial worlds of Virga, far from home and her husband, who may or may not be alive. Landing in the ancient nation of Spyre, Venera encounters new enemies and new friends (or at least convenient allies). She must quickly learn who she can trust, and who she can manipulate in order to survive. Survival isn't her only goal; with the powerful Key of Candescence in her hands, she can control the fate of the entire world of Virga, yet something even more pressing is driving her--the all consuming need for revenge. Trish accidentally time travels to Lieutenant-Colonel Custer's army camp during its final preparations for the 1873 Yellowstone Expedition. Luckily for her, she has her old-style flip cell phone with her, along with a ballpoint pen and plastic reading glasses. Even luckier, she is befriended by the regiment's surgeon, who is officially in charge of her. He soon believes her story that she is from the future, and quickly realizes he can profitably take advantage of her knowledge of modern medicine – and future inventions, from automobiles to X-rays. But his female assistant is not as enamored with Trish as he is, finding her to be a real pain to deal with. Trish's 21st century idioms and crudely blunt language make her a misfit in the crowd of 19th century Army officers and young soldiers— although they certainly enjoy being around her! Trish also discovers how time machines work. Within a comparative, theoretical and global network, this volume focuses on the impact of information technologies on the prospects for democratic development. It deals with the hopes as well as the fears for democracy and development that have emerged out of the current technological revolution in information and communication. The volume argues that information technologies have historically played a dual and paradoxical role in political formations. Generally, the Big Media (the national press, broadcasting and mainframe computers) have served the centralizing forces, while the Small Media (the alternative press, small scale audio-video production and transmission facilities and increasingly personal computing networking) have provided the channel for community resistance and mobilization. The volume argues that the new information technologies, like the old, should be viewed neither as technologies of freedom nor of tyranny but primarily as technologies of power that lock into existing or emerging techno-structures of power. Lists the MSRP and dealer invoice prices including the costs of standard vs. optional equipment, provides detailed specifications and reviews, offers advice for both buying and leasing, and explains how to save time and money when purchasing a truck, van, or sport utility vehicle. Original. weapon. NAZI MADNESS AND TERRORIST EVIL COMBINE In modern-day Pakistan, the elite terrorist known as the Asp survives a U.S. drone strike, then undertakes a solo mission to penetrate America's heartland to wreak destruction. Dr John West, Cambridge don and private investigator, was present at the trial of an odd duck, R. A. Adcock, who was being most uncooperative in answering questions about a bank robbery. At length, Adcock had made a dash for it from the courtroom - through a glass window, and what should have been a three storey drop to the street. But suddenly, Adcock wasn't there, and at once a swarm of bees came into the courtroom. Thus begins The Molecule Men, which takes many fascinating and terrifying turns to its chilling conclusion. In the second story, the Monster of Loch Ness, Tom Cochrane, an independent scientist, determines to find out why the waters of Loch Ness are inexplicably warming up. What was it that caused the waters of the loch to pour up into the air like the worst rainstorm any of the observers had ever seen? What was at the bottom of the loch? These two short novels by a celebrated father and son team will hold the interest of the science fiction fan from page one on. The devil in my nightmares is the man of my dreams. ABSOLUTE POWER For the past three years, I've been running from a man I've never met. A man who carries a grudge. A man who specializes in revenge. I thought I had it all—a career and a new home in a sleepy small town. My world comes crashing down when a sexy gang member from the city arrives at my job, wrapped in tattoos and sinful smiles. Beneath his flirtatious facade beats the heart of an angry man. I've committed the one sin he can never forgive. I stole from him, and he won't be satisfied until he's repaid with the money or my life. They say there are two kinds of power: power derived from fear and power obtained by acts of love. Cash Delacorte holds them both over my head. He's everything I never wanted: dark, deceptive, and dedicated to a life of crime. He's determined to pull me into the darkness with him, and the thing is—I want to go. Every kiss, every lie, every punishment propels me into a future I never dreamed possible. ABSOLUTE TRUST I'm just a simple girl from a poor background, who loves with all her heart and has the best of intentions. Falling in love with Cash Delacorte was never a life goal. The former gang leader turned ruthless billionaire holds all of my power. He owns me—body, soul, and bank account. The problem? I like it. I crave his touch in the dark of night. I long to hear his whispered dirty words in my ear when we make love. Most of all, I trust him to do what's right for me. Because that's what we do when we're in love, right? We trust the wrong people. We make bad decisions. And we sacrifice our souls to make them happy. Now, with the FBI breathing down our necks and a million dollars in stolen jewels on the line, the power rests in my hands. One word from me can bring Cash's empire crashing down around him. Does he trust me enough to save us both or will his need for power ruin the only love I've ever known? The Absolute Power Duet Box Set contains the complete duet from USA Today bestselling author Jeana E. Mann, including Absolute Power and Absolute Trust.
