*Marketing Your Value* Feb 14 2022 “This book is an excellent read for college students, recent graduates and mid-career professionals as they navigate their careers and prepare for the next step towards their professional goals.” Pareena Lawrence, PhD, Provost and Dean of the College, Professor of Economics, Augustana College, Rock Island, Illinois “In the tradition of ‘What Color is Your Parachute’ and ‘What Should I Do With My Life?’, ‘Marketing Your Value: 9 Steps to Navigate Your Career’ is likely to be invaluable to anyone who is entering the job market, considering a change of direction, or advising those who are.” William Pannacker, PhD, Professor of English, Director of the Andrew W. Mellon Foundation Scholars Program in the Arts and Humanities, Faculty Director of the Great Lakes Colleges Association’s Digital Liberal Arts Initiative, Hope College. Navigating the chaos in today’s global marketing place, including global unemployment and underemployment, the digital revolution, and technological advancements, requires a sophisticated strategy that is built upon the paradigm that professional development is directly linked to personal growth. To grow as a professional, therefore, one must increase their self-awareness, build a compelling brand, and then communicate their message in a clear and consistent fashion. This book explains how professionals can market their value to navigate their career and live a life of purpose. Divided into three sections, this publication offers you an opportunity to assess your personal and professional skills, challenges you to create a compelling personal brand, and helps you develop the communication materials necessary to navigate your career.

[Policy Paper about Barriers to Entering the Behavioral Health and Nursing Professions for Individuals with Criminal Convictions](#) Dec 20 2019 For the summer of 2014, I was given the opportunity to intern with the Gamble Institute in Oakland, CA. As an intern at TGI, I worked most of my time developing a policy brief about barriers to entering the behavioral health (Social Work) and nursing professions for individuals with criminal convictions. At TGI, I conducted research, studied previous incarcerated case studies, policy development, and learned about public policy choices

in the US concerning higher education and prison. In the following paper I will provide background information on the Gamble Institute and programs provided to the incarcerated population. The rest of the paper will be focusing on the main thesis of barriers to licensure in professional fields of Social Work and Nursing for the incarcerated population. Key findings and public health competencies that were learned in this internship project are included in this paper. The goal of this project was to create awareness on the barriers that the incarcerated face when applying for licensure. Hopefully once more of the population know about this concerning issue, they will use their awareness to eliminate these barriers for the incarcerated in regards to licensure.

*Design Techniques for Mash Continuous-Time Delta-Sigma Modulators*  
Oct 30 2020 This book describes a circuit architecture for converting real analog signals into a digital format, suitable for digital signal processors. This architecture, referred to as multi-stage noise-shaping (MASH) Continuous-Time Sigma-Delta Modulators (CT-??M), has the potential to provide better digital data quality and achieve better data rate conversion with lower power consumption. The authors not only cover MASH continuous-time sigma delta modulator fundamentals, but also provide a literature review that will allow students, professors, and professionals to catch up on the latest developments in related technology.

**Corrections Today** Nov 30 2020 CORRECTIONS TODAY, 3rd Edition, is a briefer, visual, paperback alternative to hardback Introduction to Corrections texts, ideal for instructors who are looking for course materials that present numerous real-world concepts and applications. It examines the field of corrections through the lens of students who are giving serious thought to a career in the field or are working in corrections while seeking an advanced degree in order to be promoted or switch job paths. CORRECTIONS TODAY, 3rd Edition, offers a practical, engaging, career-focused, and authoritative introduction to corrections. Exploring the US Language Flagship Program Sep 21 2022 A number of reports in the US have highlighted the country's need for improved second language skills for both national security and economic competitiveness. The Language Flagship program, launched in 2002, aims to raise expectations regarding language proficiency levels at the post-secondary

level and to address structural gaps in the curricula of many L2 programs. This federally funded program provides opportunities for US undergraduate students in any specialization to reach a professional level of competence in a targeted second language by graduation. This volume highlights innovative practices that enable students to achieve this goal – even those with no exposure to the second language prior to university. This book explores the rationale and history of the federal program and showcases models and strategies of existing Flagship programs.

Formation and Containment Control for High-order Linear Swarm Systems

Jun 06 2021 This book focuses on analysis and design problems for high-order linear time-invariant (LTI) swarm systems (multi-agent systems) to achieve consensus, formation, containment and formation-containment. As a first step, the concepts of practical consensus and formation-containment are introduced. Unlike previous research, the formation in this book can be time-varying. A general framework for consensus, consensus tracking, formation, containment and state formation-containment is presented for the first time. Sufficient/necessary and sufficient conditions, and approaches to designing the protocols for swarm systems to achieve these control objectives, are respectively proposed. Autonomous time-varying formation experiments using five quadrotor unmanned aerial vehicles (UAVs) are conducted in an outdoor setting to demonstrate the theoretical results.

**Creative Engagements with Ecologies of Place** Apr 04 2021 This book explores an exciting range of creative engagements with ecologies of place, using geopoetics, deep mapping and slow residency to propose broadly based collaborations in a form of ‘disciplinary agnosticism’. Providing a radical alternative to current notions of interdisciplinarity, this book demonstrates the breadth of new creative approaches and attitudes that now challenge assumptions of the solitary genius and a culture of ‘possessive individualism’. Drawing upon a multiplicity of perspectives, the book builds on a variety of differing creative approaches, contrasting ways in which both visual art and the concept of the artist are shifting through engagement with ecologies of place. Through examples of specific established practices in the UK, Australia and the USA, and other emergent practices from across the world, it provides the reader with a rich illustration of the ways in which ensemble creative undertakings are reactivating art’s relationship with place and transforming the role of the artist. This book will be of interest to artists, art educators, environmental activists, cultural

geographers, place-based philosophers and postgraduate students and to all those concerned with the revival of place through creative work in the twenty-first century.

*How Do Law Students Develop Writing Expertise During Summer Internships?* Feb 02 2021 Many law students are required to take first-year writing courses. With the increased emphasis in legal education on practical skills training (Sullivan et al. 2007), legal writing scholars have begun exploring how these writing courses equip students with practical skills (Felsenburg and Graham 2010; Cauthen 2010). However, these scholars have not explored how summer internships serve as opportunities for students to practice the skills they gained in the classroom. Following the lead of writing studies scholars who examine the transition from classroom and workplace writing (Russell and Fisher 2009; Devitt 2004, Wardle 2004; Winsor 1990), this study explores how the genres students learned in legal writing classroom prepared them for internships writing. This study reports results from interviews of eight students who completed 15 internships during the 2014 and 2015 summers. The main findings indicate that students who performed well in the legal writing course eventually served in litigation-based internships. These students perceived a high rate of transfer from classroom to workplace writing. By contrast, students who struggled learning the legal writing classroom genres eventually accepted non-litigation internships where their writing tasks bore a little resemblance to those of the classroom. Tellingly, both groups of students were not trained or mentored on how to write during internships because they were expected to be strong writers already. Therefore, these findings suggest that legal writing scholars need to better prepare students who are not pursuing litigation careers or who accept non-litigation internships. This support is vital because students' future internship and career options were deeply connected to their performance in the legal writing course.

*The Back Door Guide to Short Term Job Adventures* Jul 27 2020 This incredible resource offers thousands of detailed listings for internships, seasonal work, volunteer opportunities, overseas jobs, and other short-term work experiences. Spin Dynamics in Two-Dimensional Quantum Materials Mar 03 2021 This thesis focuses on the exploration of nontrivial spin dynamics in graphene-based devices and topological materials, using realistic theoretical models

and state-of-the-art quantum transport methodologies. The main outcomes of this work are: (i) the analysis of the crossover from diffusive to ballistic spin transport regimes in ultraclean graphene nonlocal devices, and (ii) investigation of spin transport and spin dynamics phenomena (such as the (quantum) spin Hall effect) in novel topological materials, such as monolayer Weyl semimetals  $WTe_2$  and  $MoTe_2$ . Indeed, the ballistic spin transport results are key for further interpretation of ultraclean spintronic devices, and will enable extracting precise values of spin diffusion lengths in diffusive transport and guide experiments in the (quasi)ballistic regime. Furthermore, the thesis provides an in-depth theoretical interpretation of puzzling huge measured efficiencies of the spin Hall effect in  $MoTe_2$ , as well as a prediction of a novel canted quantum spin Hall effect in  $WTe_2$  with spins pointing in the yz plane.

Work Experience, Placements and Internships Nov 23 2022 This book provides students and graduates with a concise guide to work experience, placements and internships. It explores the full range of opportunities in key graduate sectors and offers support for each stage of the journey, from finding appropriate opportunities and applying for posts to developing a strategy and making the most of a placement. This is an indispensable resource for anyone applying for placements, internships and graduate jobs. It will also be a valuable resource for careers advisors and staff on employability, personal development and career planning modules.

**Evolution of a Corporate Idealist** Apr 23 2020 There is an invisible army of people deep inside the world's biggest and best-known companies, pushing for safer and more responsible practices. They are trying to prevent the next Rana Plaza factory collapse, the next Deepwater Horizon explosion, the next Foxconn labor abuses. Obviously, they don't always succeed. Christine Bader is one of those people. She worked for and loved BP and then-CEO John Browne's lofty rhetoric on climate change and human rights--until a string of fatal BP accidents, Browne's abrupt resignation under a cloud of scandal, and the start of Tony Hayward's tenure as chief executive, which would end with the Deepwater Horizon disaster. Bader's story of working deep inside the belly of the beast is unique in its details, but not in its themes: of feeling like an outsider both inside the company (accused of being a closet activist) and out (assumed to be a corporate shill); of getting mixed messages from senior management; of being frustrated with corporate life but committed to pushing for change

from within. *The Evolution of a Corporate Idealist: When Girl Meets Oil* is based on Bader's experience with BP and then with a United Nations effort to prevent and address human rights abuses linked to business. Using her story as its skeleton, Bader weaves in the stories of other "Corporate Idealists" working inside some of the world's biggest and best-known companies.

**Privileged Precarities** Jan 01 2021 Wie gestalten sich die Arbeits- und Lebenswelten von jungen UNO-Beschäftigten in Zeiten des Postfordismus? Ausgehend von der Perspektive junger Beschäftigter an den UNO-Standorten in Genf und Wien befasst sich das Buch mit der zunehmenden Flexibilisierung und Arbeitsplatzunsicherheit. Die Studie legt ein besonderes Augenmerk auf mikrostrukturelle Machtpraktiken und die individuelle Agency. Sie zeigt, wie UNO-Beschäftigte ihre persönlichen Erzählungen mit dem in den vergangenen Jahren und Jahrzehnten kreierte Organisationsbild in Einklang bringen, und in welchem Wechselspiel die prekären Beschäftigungsverhältnisse mit einem moralischen Überlegenheitsgefühl stehen. Dabei wird deutlich, dass diese Entwicklungen keinen Widerspruch darstellen, sondern zwei Seiten derselben Medaille sind. Das Buch zeigt am Beispiel der UNO auf, wie flexible Beschäftigungsverhältnisse in Zeiten des kognitiv- und affektbasierten Kapitalismus auf Biographien wirken.

Gender, Age and Inequality in the Professions Jan 13 2022 The literature on gender and professions shows that professional careers continue to be impacted by gender – albeit with important differences among professions and countries. Much less researched is the issue of the significance of gender and age-cohort or generation to professional work. *Gender, Age and Inequality in the Professions* explores men's and women's experiences of professional work and careers through an intersectional lens by focusing on the intersection of gender and age. The chapters explore different professions – including Medicine, Nursing, Law, Academia, Information Technology and Engineering – in different Western countries, in the present and over time. Through original research, and critical re-analysis of existing research, each of the chapters explores the significance of gender and age-cohort or generation to professional work, with particular attention to professionals just entering professional careers, those building professional

careers, and comparisons of men and women in professions across generational cohorts. The book contributes to literature on inequalities in the professions by demonstrating the ways in which gender and age converge to confer privilege and produce disadvantage, and the ways in which gender inequality is reproduced, and disrupted, through the activities of professionals on the job. The book constitutes a departure point for future research in terms of theoretical perspectives and empirical findings on how gendered and age-related processes are produced and reproduced in particular organisational, professional and socio-cultural contexts. To enhance generational understanding, relationships and collaboration in educational institutions, organisations and professions, the book ends with a section on policy recommendations for educators, professionals, professional organisations as well as policy- and decision-makers. This book will also appeal to students and researchers in the fields of Sociology, Gender Studies, Organisational and Management Studies, Law, Medicine, Engineering and Information Technology as well as related disciplines.

**Technical Communication for Engineers** May 25 2020 Technical Communication for Engineers has been written for undergraduate students of all engineering disciplines. It provides a well-researched content meticulously developed to help them become strategic assets to their organizations and have a successful career. The book covers the entire spectrum of learning required by a technical professional to effectively communicate the technicalities of his subject to other technocrats or to a non-technical person at their proper levels. It is unique inasmuch as it provides some thoughtful pedagogical tools that help the students attain proficiency in all the modes of communication. Key Features • Marginalia, which are spread throughout the book to clarify and highlight the key points.

- Tech Talk passages, which throw light on the latest advancements in communication technology and their innovative use
- Application-based Exercise, which encourages the readers to apply the concepts learnt to real-life situation
- Language-based Exercise (Grammar & Vocabulary) to help readers assess their language competency
- Ethical Dilemma, which poses a complex hypothetical situation of mental conflict on choosing between difficult moral imperatives
- Experiential Learning-based Exercise (Project Work) devised to help learner 'feel' or 'experience' the concepts and theories learnt and thereby gain hands-on experience

**Food and Nutrition Economics** Oct 18 2019 Winner of the 2017 Quality of Communication Award presented by The Agricultural and Applied Economics Association As the importance of food and nutrition becomes more widely recognized by practitioners and researchers in the health sciences, one persisting gap in the knowledge base remains: what are the economic factors that influence our food and our health? Food and Nutrition Economics offers a much-needed resource for non-economists looking to understand the basic economic principles that govern our food and nutritional systems. Comprising both a quick grounding in nutrition with the fundamentals of economics and expert applications to food systems, it is a uniquely accessible and much-needed bridge between previously disparate scholarly and professional fields. This book is intended for upper level undergraduates, graduate students, and health professionals with no background in economics who recognize that economics affects much of their work. Concerned because previous encounters with economics have been hampered by math hurdles? Don't be; this book offers a specialized primer in consumer economics (including behavioral economics of food consumption), producer economics, market-level analysis, cost-effectiveness, and cost-benefit analysis, all in an accessible and conversational manner that requires nothing more than middle-school math acumen. Grounding these lessons in contemporary issues such as soft drink taxes, food prices, convenience, nutrition education programs, and the food environment, Food and Nutrition Economics is an innovative and needed entry in the rapidly expanding universe of food studies, health science, and their related fields.

College-planning expert Sandra L. Berger provides students and parents with advice on using summer opportunities to help gain entrance into selective universities, and guidance on researching, choosing, applying for, and making the most out of summer programs. Students will be able to peruse the updated directory of more than 200 of the best summer opportunities in the areas of academic enrichment; fine arts; internships and paid positions; leadership and service; math, science, computer science, and technology; and study abroad or international travel, to find the program that fits them best.

Agents of Social Change Jan 21 2020 This book goes where no other work has gone. It refuses to conform to the conventional descriptions of the realities of widows in Africa. Thus, rather than approach the issue of widowhood from the vantage point of what society can do for widows, the book considers what widows can do for society. Christian widows in northern Nigeria are defying the restrictions assigned to their widowhood. Remarriage and property inheritance, for instance, are not central to widows' ambitions. Widows believe that they are not passive observers within society, rather, they are agents of social change. Therefore, they are drawing from their faith in religious, social, and economic engagements towards societal transformation. Of the institutions that influence their lives, Christian institutions provide the best guide for the embodied agency of Christian widows in northern Nigeria. The theory of embodiment considers the ways Christian widows emulate the life of Jesus towards remaking society.

*Hybrid Mobile Development with Ionic* Feb 20 2020 Build a complete,

professional-quality, hybrid mobile application with Ionic About This Book Develop high-grade and performance-optimized hybrid applications using the latest version of Ionic Discover the latest and upcoming features of Ionic A practical guide that will help you fully utilize all the features and components of Ionic efficiently Who This Book Is For The target audience for this book is intermediate-level application developers who have some basic knowledge of Ionic. What You Will Learn Use every Ionic component and its customization according to the application along with some important third party components Recently released Lazy Loading and Grid System supporting desktop application with Electron Integration of the various Ionic backend services and features such as Ionic Push, DB, Auth, Deploy in your application Exploration of white-listing, CORS, and various other platform security aspects to secure your application Synchronization of your data with the cloud server and fetching it in real time using Ionic Cloud and Firebase services Integration of the Cordova iBeacon plugin which will fetch contextual data on the basis of location and Websockets for real time communication for IOT based applications Implementation of offline functionality in your PWA application using service-worker, cache storage and indexedDB In Detail Ionic is an open source, front-end framework that allows you to develop hybrid mobile apps without any native-language hassle for each platform. It offers a library of mobile-optimized HTML, CSS, and JS components for building highly interactive mobile apps. This book will help you to develop a complete, professional and quality mobile application with Ionic Framework. You will start the journey by learning to configure, customize, and migrate Ionic 1x to 3x. Then, you will move on to Ionic 3 components and see how you can customize them according to your applications. You will also implement various native plugins and integrate them with Ionic and Ionic Cloud services to use them optimally in your application. By this time, you will be able to create a full-fledged e-commerce application. Next, you will master authorization, authentication, and security techniques in Ionic 3 to ensure that your application and data are secure. Further, you will integrate the backend services such as Firebase and the Cordova iBeacon plugin in your application. Lastly, you will be looking into Progressive Web Applications and its support with Ionic, with a demonstration of an offline-first application. By the end of the book, you will not only have built a professional, hybrid mobile application, but will also have ensured that your app is secure and

performance driven. Style and approach A step-by-step guide (covering all its features and components) to build a complete mobile application using Ionic. Each chapter will cover different features of Ionic.

**Human Resource Development in the Russian Federation Sep 09 2021**  
Unlike Brazil, India, or China, prior to the beginning of market-oriented reforms in early 1990s, Russia maintained a high level of human capital and possessed a highly developed system of vocational education, continuous education, and management development institutions sponsored by the government. However, after the beginning of the market reforms many state-sponsored programs were disbanded and individual enterprises and newly emerging private educational institutions found themselves in a position of having to provide training and professional development services for future and current employees. Both government-level policies in support of HRD and enterprise-level HRD systems have emerged fairly recently in the Russian Federation, and are still in a stage of change and development. This book provides an in-depth analysis of the current state of HRD in the Russian Federation. It covers country-level policies, organizational-level programs and strategies, and individual-level educational and training efforts. While the study is focused on Russia, its conclusions will be of value to scholars, students, and practitioners examining similar issues surrounding the emergence and development of HRD systems in emerging countries. Furthermore, the authors' framework for analyzing HRD on multiple levels and across various parts of the adult and vocational education and development systems offers a unique and important contribution to the theoretical debate on comparative educational systems outside the HRD and HRM communities.

**Rights in Transit Aug 08 2021** Is public transportation a right? Should it be? For those reliant on public transit, the answer is invariably "yes" to both. Indeed, when city officials propose slashing service or raising fares, it is these riders who are often the first to appear at that officials' door demanding their "right" to more service. Rights in Transit starts from the

presumption that such riders are justified. For those who lack other means of mobility, transit is a lifeline. It offers access to many of the entitlements we take as essential: food, employment, and democratic public life itself. While accepting transit as a right, this book also suggests that there remains a desperate need to think critically, both about what is meant by a right and about the types of rights at issue when public transportation is threatened. Drawing on a detailed case study of the various struggles that have come to define public transportation in California's East Bay, *Rights in Transit* offers a direct challenge to contemporary scholarship on transportation equity. Rather than focusing on civil rights alone, *Rights in Transit* argues for engaging the more radical notion of the right to the city.

*Serving Gifted Students in Rural Settings* Aug 28 2020 A cooperative publication of the National Association for Gifted Children and Prufrock Press, *Serving Gifted Students in Rural Settings* provides a framework for educating the gifted in rural settings. The book outlines practical, theoretical, and evidence-supported approaches for understanding, teaching, and leading programs for this unique population. Case study vignettes and practical ideas for administrators and teachers are combined with theoretical applications. The first of three sections in the book outlines the various philosophies and current status of rural education. The second section focuses on practical strategies and evidence-supported approaches for identifying and serving rural gifted students based on their unique geography. Section three highlights support structures that are necessary for leading and supporting gifted education in rural schools. This book helps bridge the gap existing between rural education and accessible, effective gifted education.

**Standards for Internal Control in the Federal Government** Dec 24 2022 Policymakers and program managers are continually seeking ways to improve accountability in achieving an entity's mission. A key factor in improving accountability in achieving an entity's mission is to implement an effective internal control system. An effective internal control system helps an entity adapt to shifting environments, evolving demands, changing risks, and new priorities. As programs change and entities strive to improve operational processes and implement new technology, management continually evaluates its internal control system so that it is effective and updated when necessary. Section 3512 (c) and (d) of Title 31 of the United States Code (commonly known as the Federal Managers' Financial Integrity Act (FMFIA)) requires the Comptroller General to issue standards for internal control in the federal government.

**Ladies of Letterpress** Aug 20 2022 The revival of traditional printing methods has been afoot for the last decade, and the tactile charm of letterpress has ensured that its popularity is on the rise. Ladies of Letterpress is an organization that champions the craft, and in particular seeks to showcase and promote the work of women printers. A gallery of art by its members, the work in Ladies of Letterpress ranges from greetings cards to broadsides and posters, and is offered in a cornucopia of type and illustration styles. What comes through clearly, though, is the quality of the work: every one of these pieces is worthy of display on your wall, and with 80 detachable pages, you can create an instant and beautiful gallery of your own.
