The only resource dedicated to delivering concise summaries of the most clinically relevant primary care guideline summaries Organized into topics related to disease screening, disease prevention, and disease management, and subdivided into organ systems for quick reference Updated with over 150 new guidelines and nearly 30 new sections on topics including opiate use disorder, transgender health, systemic lupus erythematosus, and rotator cuff injury Strikes the perfect balance between brevity and clinical necessity Includes the most recent research available for each guideline Consolidates information from nationally recognized government agencies, medical and scientific organizations, and expert panels into concise, easy-to-apply guidelines Spans all areas of general medicine and covers primary care topics in both ambulatory and hospital settings Includes website addresses for U.S. government agencies and professional societies In the post genomic era, understanding of the innate immune system is enriched by findings on the specificity of innate immune reactions as well as to novel functions that do not strictly correlate with immunological defense and surveillance, immune modulation or inflammation. This volume covers natural killer cells, mast cells, phagocytes, toll-like receptors, complement, host defense in plants and invertebrates, evasion strategies of microorganisms, pathophysiology, protein structures, design of therapeutics, and experimental approaches. This is a comprehensive differentiated course suitable for students of all abilities. It is written specifically for standard grade, through appropriate for other UK curricula. Chapters begin with looking back exercises for consolidation of the work. The fully differentiated contents have graded exercises. Review sections enable students to develop mathematical competence and confidence. There are photocopiable resources for general and credit students. While on vacation, George and the man with the yellow hat stop to see Mt. Rushmore. There's no time to take a helicopter ride for a close-up view - the hot air balloon races are about to start! Whisked up and away at the races, a surprised George gets a close-up view of the presidents after all. As we approach the 21st century, the Advances in Computers serial remains the oldest continuously published anthology chronicling the evolution of the information technology field. Since 1960, this series has described the ever-changing nature of computing. In this volume, we will emphasize the major themes that have dominated computing in these latter days of the 1990s. Of course we mean the distributed nature of information technology. The growth of networking, the Internet and the World Wide Web have greatly changed the role of the computer, and in turn, our lives as well. Starting as a computer science research topic in 1969, the ARPANET, funded by the U.S. government's Advanced Research Projects Agency (ARPA), tied together university, research, and military computing centers. By the mid-1980s the ARPANET evolved into the Internet under funding by the U.S. National Science Foundation (NSF). The computer experimenter, the so-called "computer geek," discovered the Internet and joined the fun. By the early 1990s, the World Wide Web (WWW) grew as a subnet of the Internet, and email and Web browsing became available to all. Today millions of "computer illiterate" individuals daily use these resources to send mail and search for online information. No longer is the Internet the domain of the serious computer researcher. In this volume we will describe some of the changes the Internet has brought us. A delightful book for preschoolers who are curious about counting! Curious George is a monkey who's learning math—that is, how to count all his favorite things. Not only that, but he's going to do it both forward and backward—from one to ten, and then ten to one! With this colorful book featuring classic illustrations by H.A. Rey, "youngsters count along with '1 curious monkey' as he points out '2 dinosaurs,' '3 tasty donuts' and up to '10 paper boats' before counting down again" (Publishers Weekly). Cupid became a popular figure in the literary and visual culture of post-Reformation England. He served to articulate and debate the new Protestant theory of desire, inspiring a dark version of love tragedy in which Cupid kills. But he was also implicated in other controversies, as the object of idolatrous, Catholic worship and as an adversary to female rule: Elizabeth I's encounters with Cupid were a crucial feature of her image-construction and changed subtly throughout her reign. Covering a wide variety of material such as paintings, emblems and jewellery, but focusing mainly on poetry and drama, including works by Sidney, Shakespeare, Marlowe and Spenser, Kingsley-Smith illuminates the Protestant struggle to categorise and control desire and the ways in which Cupid disrupted this process. An original perspective on early modern desire, the book will appeal to anyone interested in the literature, drama, gender politics and art history of the English Renaissance. One hot summer day, George and the man with the yellow hat go to the beach. What fun George has at the beach! What fun he has feeding the seagulls! It's fun, that is, until they fly away with something valuable and George must find a clever way to save the day. In 1998, Don Nichols returned regularly to Iowa from his life and job in Washington, D.C., to be with his dying father and to oversee his parents' investments. A veteran investor and investment author, Nichols found that managing the portfolio entrusted to him brought a larger understanding of mortality, family, love, work, and the choices he had made as "an agri-kid who took the road out of town and kept going." In this insightful and money-wise book that grew out of that experience, he merges the emotions of a dutiful son with the actions of a knowledgeable investor. Nichols uses money in myriad forms—a grandfather's silver dollar, stocks and bonds, salaries, pallets of coins at the U.S. Mint, on-the-job dealings with coin collectors—as touchstones for reflections on relationships, motives, and a career "like one of those moving walkways in airports." His father's health is measured, tested, and evaluated in part by the health of his finances; at the same time, the turmoil and mystery surrounding both money and relationships are reflected in this memorable story. Wry, unsentimental, and financially savvy, Currency of the Heart is about rediscovering family, managing a portfolio, honoring promises, grieving, and healing; it is about a father and a son who once "fought like medieval villagers in a Thirty Years' War" and the deepening bond between a middle-age son and his aging mother. It is a multilayered story for everyone who will manage, financially and emotionally, a parent's death. Cure Student Underachievement is the culmination of the authors' research, practice, and experience as principals, superintendents, graduate professors, and consultants in efforts to improve school performance and increase student achievement. Searching for the real causes of underperformance, the authors explored problem-solving strategies in several fields. The authors find that clinical practice identifies the root causes rather than the symptoms of problems, focusing valuable time, resource, and energy on prescriptions with greater promise for improved performance health. The concepts of diagnosis, prescription, and prognosis establish a foundation for improved planning and problem solving. This book introduces practicing leaders and leaders-in-training to the protocols of clinical practice by taking the reader through the twelve steps of the clinical cycle with specific strategies and exercises to provide practice in the application, use, and assessment of the model. With the help of the man with the yellow hat, Curious George plants and grows carrots in a

little garden plot of his own. When his carrots are finally ready to be pulled from the ground, George decides that his prize carrot is too perfect to eat. But when George stumbles upon his friend Bill's pet bunnies lost and hungry, he doesn't hesitate to share his carrot to help save the day. George's food-growing adventure has an environmentally friendly theme and includes fun facts about locally grown foods and a delicious recipe for carrot muffins. A beguiling celebration of the extraordinary in ordinary people's lives, this gently moving and beautifully written novel tells the stories of the people of Currawalli Street across the generations. It's a modern classic in the making that will stay with you long after the last page is turned. Riding forward and backward on his bicycle and letting pigs in and out of their pen, George, in his typical inquisitive manner, explores opposites in this simple book. The movie that George and the man with the yellow hat have been waiting to see is now playing! Once inside the darkened theater, George is curious about the light coming from the back of the room. As usual, George's curiosity gets him into trouble but his clever tricks save the day. The adventures of Curious George continue in an all-new series beginning in fall 1998 with eight new stories. Written and illustrated in the style of Margret and H. A. Rey, the books will appear in paperback (8 x 8") and hardcover editions and will feature the art of Vipah Interactive, the animators of HMI's Curious George CD-ROMs. Have you ever wondered where terms like 'end of your tether', 'gets my goat' or 'letting ones hair down' come from? Or why we call some people 'geezers', 'sugar daddies' or 'lounge lizards'? Or where the words 'eavesdropping', 'nickname' and 'D-Day' come from? They are just a few of the many words and phrases that language expert Max Cryer examines in this fact-filled and fun new book. Max explains where these curious expressions come from, what they mean and how they are used. Along the way he tells a host of colourful anecdotes and dispels quite a few myths - Did Churchill originate the phrase 'black dog'? And if 'ivory tower' can be found in the Bible, why has its meaning changed so drastically? Curious English Words and Phrases is a treasure trove for lovers of language. Informative, amusing and value for money, this book is 'the real McCoy'. From 'couch potato' to 'Bob's your uncle', you'll find the explanation here! The adventurous monkey is all alone in the big city! Can he find the man in the yellow hat? When the man with the yellow hat promises to buy George a holiday surprise during their trip to the city, George decides he wants to give his friend a surprise too. But it isn't long before the little monkey's curiosity gets him into trouble and he gets separated from his friend. Though he has fun seeing the tourist sites and all the sparkling decorations, what he really wants most is to find his best friend again—and enjoy the city together . . . Includes new bonus activities! Current Issues in School Leadership examines controversies about, and affecting, school practices. Focusing on two essential questions--what is important to today's school leaders? and what is interfering with schooling processes?--it includes chapters by a broad range of authors, with expertise on their specific topic. The text is organized in three sections: *Social and Political Issues; *Curriculum and Learning Issues; and *Organization and Management Issues. The goal of this text--designed for school leadership, educational administration, and foundations of education courses--is to challenge readers to think carefully and critically about each of the issues presented, leading to positive action and leadership. Meet small town librarian Kathleen Paulson and her fantastical felines, Hercules and Owen, in the first novel in the New York Times bestselling Magical Cats Mystery series. When librarian Kathleen Paulson moved to Mayville Heights, Minnesota, she had no idea that two strays would nuzzle their way into her life. Owen is a tabby with a catnip addiction and Hercules is a stocky tuxedo cat who shares Kathleen's fondness for Barry Manilow. But beyond all the fur and purrs, there's something more to these kitties. When murder interrupts Mayville's Wild Rose Summer Music Festival, Kathleen finds herself the prime suspect. More stunning is her realization that Owen and Hercules are truly special—perhaps even magical. Now, with a little legwork from her four-legged friends, Kathleen may be able to solve this purr-fect murder... The best libraries in Victorian Britain kept this tome under lock and key, permitting access only to doctors and professors. Scotland Yard had a copy in their reference library, and even Sherlock Holmes may have had recourse to a copy in certain investigations. In private collections across the English speaking world, it was kept on top shelves, or safely stowed in locked cabinets, beyond the reach of minors, domestics and spouses. Any woman who gazed upon its pages was said to have fainted away. The church campaigned to have it banned and the German translation was burned at Nuremberg. Many antiquarian book sellers believe the book to have been a myth, others claimed it changed hands at enormous cost, and some are certain all original copies are now lost. But Curious Pleasures does exist and is back in print - nearly a century since it's last apocryphal edition. This encyclopaedic treasure of adult pleasures, dysfunctions and unacceptable female behaviour has been fully restored with the original illustrations intact. In modern hands, this forbidden work of scholarly madness will prove hilarious. Guidelines for more than sixty common outpatient conditions - drawn from the most authoritative sources For more than 70 years, professors, students, and clinicians have trusted LANGE for high-quality, current, concise medical information in a convenient, affordable, portable format. Strategic corporate finance? This sounds like a paradox at first. After all, corporate finance means responding to the financial markets. Strategy, on the other hand, aims to change and shape the environment in the long term. Lately, though, more and more managers and investors appear to be breaking the laws of the capital market. At the same time, corporations are discovering new ways to not just react to the capital markets, but to actively shape them. The authors show that these violations are not isolated occurrences, but part of a paradigm shift. If companies want to stay successful in changing markets, they have to take a strategic approach to corporate finance. The authors use practical examples to demonstrate how this can be achieved. This book is intended not only for corporate finance experts, but also for students interested in the latest developments on the financial markets. In Volume 2 of Current Thinking and Research in Brief Therapy the author's consideration of Ericksonian-influenced brief therapy continues. Presently, there is a concern among those in the psychotherapy profession who worry that this area of science will become heartless. Others are equally concerned that their hearts not become science-less in the future. In this volume, the authors respect both viewpoints and attempt to weave these notions together. Throughout this book, different types of emotions in psychotherapy unfold. For instance, Harry Aponte presents a thoughtful piece on the issue of client-therapy intimacy, while Doug Flemons and Shelley Green, a married couple, share a humorous yet sensitive article on sexual concerns in couples, and finally, Daniel Handel provides a powerful story of the use of hypnosis with a dying adolescent. In addition to the emotional side of psychotherapy, the authors include the scientific aspects of psychotherapy. A discussion about various models of brief therapy is given, emphasizing that the therapeutic effects of the treatment models are attributable to "the non-treatment specifics" of the therapeutic interaction. A review of empirical data on the key elements of Ericksonian hypnosis and the social-psychological aspect of Ericksonian hypnosis are discussed as well. Finally, an important, and perhaps controversial, essay on ethics in the general non-therapeutic use of hypnosis by lawyers and its use in recovering memories is presented. In The Wild Irish Girl, the powerful Irish heroine's marriage to a heroic Englishman symbolizes the Anglo-Irish novelist Lady Morgan's re-imagining of the relationship between Ireland and Britain and between men and women. Using this most influential of pro-union novels as his point of departure, Thomas J. Tracy argues that nineteenth-century debates over what constitutes British national identity often revolved around representations of Irishness, especially Irish womanhood. He maps out the genealogy of this

development, from Edgeworth's *Castle Rackrent* through Trollope's Irish novels, focusing on the pivotal period from 1806 through the 1870s. Tracy's model enables him to elaborate the ways in which gender ideals are specifically contested in fiction, the discourses of political debate and social reform, and the popular press, for the purpose of defining not only the place of the Irish in the union with Great Britain, but the nature of Britishness itself. The book is a very up-to-date collection of articles in theoretical computer science, written by leading authorities in the field. The topics range from algorithms and complexity to algebraic specifications, and from formal languages and language-theoretic modeling to computational geometry. The material is based on columns and articles that have appeared in the *EATCS Bulletin* during the past two to three years. Although very recent research is discussed, the largely informal style of writing makes the book accessible to readers with little or no previous knowledge of the topics. Contents: Computational Geometry (H Edelsbrunner et al.) Global warming?"... We've probably all heard these words over and over again, from media reporters, from elected officials, and even from friends and co-workers. Scientists argue about what they mean for our future. What is the truth? How can we decipher exactly what really are the effects of environmental damage? Where can we go to get dependable, clearly-written information so we can join in the conversation and take the right action? *THE CURIOSITY GUIDE TO GLOBAL WARMING* fills that need, with a scientifically accurate introduction to perhaps the most important issue of our time. It unravels the mysteries of nature and settles any issue of "reasonable doubt" about the reality of global climate change. Dr. Ernest Zebrowski, a prominent scientist and educator, examines everything from melting glaciers and disappearing snow covers to increased levels of carbon dioxide in our atmosphere; patterns of climate change through the centuries, and the potentially disastrous effects (including rising seas, more violent storms, and alterations in agricultural productivity) of environmental damage. If you need to understand what's in the news, in print and on line about this subject, this is the one book to read. From the Hardcover edition. Dive into the powerful world of business analytics and take the journey from insight to getting your Aha moments of business clarity where you see exciting new possibilities that lead to improved business productivity. The journey starts with developing your analytical thinking and learning how to use analytic tools and techniques that are especially useful with business data. The journey continues by combining the reader's own deep situational knowledge and experience with their new analytical viewpoint—this creates opportunities for insight and Aha! moments. Dixie Hemingway was a County deputy when a tragic accident happened and now she is a pet-sitter. But when she finds a man drowned in a cat's water bowl, she is drawn into a tangled web of danger and secrets. Interested in learning more about the religious rites, beliefs and practices of different cultures around the world? Check out W. H. Davenport Adams' *Curiosities of Superstition*. This important early work of comparative religious study highlights similarities and differences of sacred practices throughout history and around the globe. Written by over 60 scientists and clinicians from the United States, mainland China, Germany, Australia, Japan, Sweden, Portugal and Hong Kong, *Current Research in Acupuncture* discusses recent advances in acupuncture research in a modern scientific language. The first 5 chapters investigate the basic mechanisms of acupuncture. Later chapters explore topics including acupuncture treatment and potential mechanisms for epilepsy, Parkinson's diseases, neurodegenerative disorders such as Alzheimer's disease, vascular cognitive impairment, aging, anxiety, polycystic ovary syndrome, pain, nerve root cervical spondylosis, stroke, inflammation, myocardial ischemia and other cardiovascular diseases. Following the translational and clinical discussions, 4 chapters present new prospects for acupuncture theories and applications. The final chapter comments on the pitfalls and problems of the previous studies and suggests direction for future research towards in-depth understanding of acupuncture, along with better application of acupuncture in modern medicine. Each chapter is written by one or more experts in the field. This unique book provides a broad perspective on the principles of acupuncture for acupuncture researchers and neuroscientists. The laboratory and clinical investigations of various acupoints and optimal conditions provide unique clues to acupuncturists for improved clinical efficacy. For a medical student, this book is a modern course in ancient Traditional Chinese Medicine, especially acupuncture. Ying Xia, the chief editor, is Professor and Vice-Chairman of the Department of Neurosurgery at The University of Texas Medical School in Houston, Texas, USA. Guanghong Ding is Professor in the Department of Mechanics and Engineering Science at Fudan University and Director of Shanghai Research Center for Acupuncture and Meridians, Shanghai, China. Gen-Cheng Wu is Professor of Neurobiology; Chairman, Department of Integrative Medicine and Neurobiology; Director, Institute of Acupuncture Research; and Director, WHO Collaborating Center for Traditional Medicine, at Shanghai Medical College of Fudan University, Shanghai, China. Brisbane lawyer Clare Mitchell has a structured, orderly life. That is, until she finds herself the unlikely guardian of a small, troubled boy. In desperation, Clare takes Jack to stay at Currawong Creek, her grandfather's horse stud in the foothills of the beautiful Bunya Mountains. Here life moves at a different pace, and for Clare it feels like coming home. Her grandad adores having them there. Jack loves the animals. And Clare finds herself falling hard for the handsome local vet. But trouble is coming. The Pyramid Mining Company threatens to destroy the land Clare loves – and with it, her newfound happiness. 'An excellent read.' *Newcastle Herald* 'Delightful, thoughtful and heartwarming.' *Book'd Out* 'Ms Scoullar's love of the land truly shines through ... Told with warmth and humour, this is a story about family, the risks and rewards of selfless devotion and the powerful bonds we form with animals and the land.' *Book Muster Down Under* Praise for Jennifer Scoullar's *Brumby's Run*: 'A lovely story of family and self-discovery, of love of the land and the wildlife that live on it.' 1 Girl . . . 2 Many Books 'Celebrates the country and, more importantly, the bush as a life-changing environment...A heart-thumping romance.' *The Weekly Times* Explore the increased need for marketing within the political arena *Current Issues in Political Marketing* presents up-to-date theory and research findings from academics working in political science, advertising, and management, and guidance from successful practitioners who know what it takes to make a nonprofit organization stand out i George is taking pictures of wild animals and their tracks for his photo collection. While looking for the fawn his friend Bill spotted, he finds an unusual set of tracks. George thinks he has discovered dinosaur footprints—which would make the perfect addition to his collection! In hopes of getting a photo, he attempts to lure the dinosaur with food, but quickly remembers that some dinosaurs are not friendly. Eventually George discovers the real culprit behind the tracks and it's not what he expects! Almost four decades of innovative and intensive research on Alzheimer's disease (AD) have brought major advances in our understanding of its pathogenesis, improved tools for diagnosis, and strategies for its treatment. This research has helped build a solid foundation of knowledge in the neurosciences and biological basis of AD and AD-related neurological disorders. Scientific background and insightful hypotheses are of major relevance in order to approach to an effective therapy for this devastating disease. *Current Hypotheses and Research Milestones in Alzheimer's Disease* contains 20 seminal chapters by authors with varying views on the neuroanatomical, neuropathological, neuropsychological, neurological, and molecular aspects of AD. These chapters grew out of "Current Hypothesis on Alzheimer's Disease", held in Viña del Mar, Chile, in November of 2007. Participants included the world's leading Alzheimer's researchers, whose work has illuminated AD investigations during the past few decades. Students, academics and medical professionals will find this text an invaluable addition to the study of this important subject. George is excited about his new rug, but happiness gives way to dread when he accidentally spills grape juice on it. George tries everything he can think of to clean the stain, with hilarious results! Curious George knows that getting sick is no fun—but learning facts about fighting off bad germs is! In this exciting *Curious George* series all about discovery, George comes down with a cold and can't wait to feel better. In the meantime, it's straight to bed for this monkey. But when George drifts to sleep, his dreams take him on a wild ride inside the body to learn all about germs, how they affect us, and how to avoid and get rid of them. Based on the Emmy-winning PBS show, this story is filled to the brim with additional facts, real photos, experiments, activities, and more. Learning about science has never been so much fun!
