Disaster Mental Health Community Planning Jan 09 2022 Disaster Mental Health Community Planning is a step-by-step guide to developing mental health disaster plans, assisting communities to act on long-term resilience and recovery. As disasters continue to increase in severity and number, with 16% of survivors identified as potential PTSD victims if they don't promptly receive care, this book is a critical read. Chapters outline how to prepare, develop, and implement a trauma-informed collaborative process that prioritizes

lasting emotional wellbeing along with survivors' short-term needs. The manual demonstrates how to form this partnership through effective communication, assess those individuals at greatest risk of distress, and deliver trauma-specific treatment. Readers will appreciate the book's practical, user-friendly approach, including case studies, checklists, and follow-up questions to better define goals. Cutting-edge treatment interventions are included along with basic information on trauma's impact on the brain and the types and effects of human-caused and natural disasters to help readers make sound planning decisions. Accessible to mental-health providers, community leaders, organizations, and individuals alike, *Disaster Mental Health Community Planning is a Road Map* for anyone interested in delivering a trauma-informed mental health supplement to their community's medical disaster preparedness and response plan.

Poultry Meat and Egg Production May 21 2020 *Poultry Meat and Egg Production* has been prepared primarily for use as a text for students taking their first courses in poultry management. The general overall science and production practices currently in use in the industry have been characterized and described so that the student can gain insight into the industry. Reading portions of chapters before the lecture discussions and laboratory sessions will be helpful in giving students an understanding of the material. Also, this gives the instructor an opportunity to emphasize in the lectures areas of current concern in the industry, and to present topics of his or her choice in greater detail. We wish to acknowledge and thank the following scientists who reviewed and critically evaluated the several chapters and made many helpful suggestions: Dr. Bobby Barnett, Clemson

Craft Coffee Nov 14 2019 “Build a better brew by mastering 10 manual methods, from French Press to Chemex, with this comprehensive guide.” —Imbibe Magazine Named a top food & drink book of 2017 by Food Network, Wired, Sprudge, and Booklist This comprehensive but accessible handbook is for the average coffee lover who wants to make better coffee at home. Unlike other coffee books, this one focuses exclusively on coffee—not espresso—and explores multiple pour-over, immersion, and cold-brew techniques on 10 different devices. Thanks to a small but growing number of dedicated farmers, importers, roasters, and baristas, coffee quality is at an all-time high. But for nonprofessionals, achieving café quality at home can seem out of reach. With dozens of equipment options, conflicting information on how to use that equipment, and an industry language that, at times, doesn’t seem made for the rest of us, it can be difficult to know where to begin. *Craft Coffee: A Manual*, written by a coffee enthusiast for coffee enthusiasts, provides all the information readers need to discover what they like in a cup of specialty coffee—and how to replicate the perfect cup day after day. From the science of extraction and brewing techniques to choosing equipment and deciphering coffee bags, *Craft Coffee* focuses on the issues—cost, time, taste, and accessibility—that home coffee

brewers negotiate and shows that no matter where you are in your coffee journey, you can make a great cup at home. “Engaging and fun . . . I really can’t recommend *Craft Coffee: A Manual* enough. If you’re even mildly curious about brewing coffee at home, it’s absolutely worth a read.” —BuzzFeed
