MOTOCOURSE 2020-2021 celebrates its 45th year of publication - and despite the World pandemic throwing the sport into chaos, what a year it was for motorcycle racing! In a thrilling MotoGP season, Marc Marquez and Honda were expected to be the dominant force once more, but an accident in the opening round saw him side-lined for much of the season and left him with but a slim chance of retaining his MotoGP crown. Other riders stepped up in his absence and shared out victories. Ducati's Andrea Dovizioso, and Yamaha's trio of Maverick Vinales, Fabio Quartararo and Franco Morbidelli all took to the top step of the podium. The emergence of KTM as a race winning machine saw both Brad Binder and Miguel Oliveira join the list of first time winners, in a close fought battle for supremacy throughout the whole of the MotoGP field. Once again, Valentino Rossi defied the years to remain at the sharp end of the grid, whilst the Suzuki pair of Alex Rins and Joan Mir both looked equally capable of adding to the list of winners in an enthralling contest for the title. Editor Michael Scott provides a no-holds-barred assessment of all the aspects of a compelling season's action. MOTOCOURSE alone has full coverage of the support classes, Moto2 and Moto3, where Italian riders Luca Marini, Estea Bastinanini, Marco Bezzecchi were contenders to clinch the Moto2 crown, whilst Albert Arenas, Ai Ogura and John McPhee hotly disputed the Moto3 title. In

World Superbikes, Kawasaki's dominance was challenged by Ducati's Scott Redding, with Jonathan Rea looking to retain his championship title for the sixth successive year, ahead of the chasing pack including Alvaro Bautista, Chaz Davies and Yamaha's Michael van der Mark. No book covers the motorcycle racing world in as much detail as MOTOCOURSE, which, in addition to the two major world series covers The World Supersport Championship, The British Superbike Championship and the AMA USA Superbike series. Incredible value for money, with 304 large-format pages, bursting with over 450 stunning colour photographs from the world's finest photographers, MOTOCOURSE covers it all. No wonder MOTOCOURSE is regarded worldwide as 'The Bible of Motorcycle Racing'. Injury. Adrenaline. Addiction. These are the things that fuelled one man's race to international stardom as he pushed boundaries and took life on and off the bike to the limits. Starting out as a talented youth riding the desert tracks of California, his reckless nature and incredible talent earned him a position in the rarefied world of professional motorcycle racing. Despite the success in his professional life, his personal life was crumbling around him - John was battling with depression and temptation, which began to threaten his career, health and marriage, ultimately bringing him to a life of alcoholism, addiction and even smuggling. In his remarkable memoir, one of the world's most renowned riders takes us on a raw and unique journey to the extremes of fast living. John 'Hopper' Hopkins is an icon for motorsport fans worldwide. He won't let anything hold him back. He has broken almost every bone in his body (twice), suffered a bleed on the brain, and had a finger amputated... yet he continued to race. Finally, at the age of 35 - with his latest crash at Brands Hatch in 2017 putting him in rehab for two years - he decided to hang up his helmet. Leathered tells the incredible story of an unparalleled career. From bone-crunching injuries and alcohol-fuelled antics to the breakdown of his marriage, it unveils the true stories behind the lurid headlines. How to Build a Motorcycle leads you through all the key stages - from initially finding

the right project for your skill level, to sourcing a base bike and safely taking on some full-on bike-building tasks. With clear, easy-to-follow instructions, proper advice and specially commissioned step-by-step illustrations throughout it is an ideal aid to getting your hands oily. Written by Gary Inman, the co-founder of independent motorcycle magazine Sideburn, and illustrated by Adi Gilbert who is best known for his bicycle and motorcycle drawings whose clients include Harley-Davidson, Guy Martin, Wired magazine, Sideburn magazine and Nike, this is a must-have for all motorcycle lovers. Read this book, even dip in and out where relevant. If it makes sense, schedule some time, clear your mind, pull on some old clothes, grab your toolbox and get going. The chapters in How to Build a Motorcycle will tell you how to complete a huge variety of tasks that will allow even the greenest of novices to get their hands dirty and start modifying with purpose. If you belong to this camp, start with some of the low-input, high-reward jobs, such as fitting bars, swapping the rear shocks or wiring in a new tail light. Even though these require relatively little work, they'll transform the look of your bike, and completing them will fill you with confidence to undertake the more difficult jobs, such as fitting more modern front forks or even making your own frame. The book comes with a glossy 32-page section on finished bikes and is a reference and the perfect gift for all fans, from those who merely like to tinker, to riders taking on a full build. It is a largely forgotten fact that Britain was the first industrialized country in the world, but Guy Martin - the cult motorcycle racer and mechanic - is about to remind us how the industrial revolution helped make Britain great. Guy shows how the discoveries made in the late 18th-19th centuries are to thank for the ease of our every day lives: in order to cook a bacon and egg sandwich in Industrial-era conditions, Guy has to restore a steam locomotive and railway to have the components delivered to the local shop; he has to bring a saw mill back into working order to be able to make a bicycle; he has to revamp a Victorian fishing trawler so he can cook himself some fish and chips, and when he decides to mow the lawn,

he restores a Victorian botanical garden. After all that, he's in need of a holiday - so he sets to work restoring a Victorian holiday resort. Illustrated throughout with specially commissioned photography as well as historical images, Guy will take us through each project; his passion, enthusiasm and sheer inventiveness bringing a completely new perspective to the Industrial Revolution. He invites us to live it with him, to enjoy the nostalgia, marvel in the mechanics and learn from its legacy.

The Kawasaki Triples Bible covers the entire production of three cylinder two-strokes from 1967 to 1980, featuring a year by year breakdown of bike specs, including the KH250, 350 S2, KH400, H1 500 and H2 750 models. Illustrated with hundreds of archive photographs and period adverts, plus personal memories from some of the racers and tuners who got the best from the fearsome H1 500 and H2 750 machines of the 60s and 70s, this is an invaluable resource for any collector or restorer of these fabulous motorcycles. With information provided by Kawasaki Museum, acknowledged experts such as Rick Brett and Dave Marsden, and lifelong Kawasaki triples owners, it defines the enduring appeal of the models. It also contains excellent tips on spares, tuning, rebuilds etc., and captures the very essence of what made the Kawasaki triples the most rebellious, kick-ass two-strokes of their time. This extensively illustrated all-color book provides a comprehensive reference source for all motorcycle owners and enthusiasts, and is aimed in particular at those who are new or returning to the biking scene. Written by a long-standing motorcycle expert, this book is invaluable to anyone contemplating their first motorcycle, and will improve the reader's overall understanding of their machine without necessarily having to get their hands dirty. The second edition has been revised to bring it fully up to date with current bike technology and model ranges. This is the story of the Japanese motorcycle industry which started from scratch after World War II and grew to make most of the motorcycles in existence today. It is told in a decade-by-decade narrative treatment commencing in the early 1950s and running through to the 1990s. For decades the crown jewels of Japan's

postwar manufacturing industry, motorcycles remain one of Japan's top exports. *Japan's Motorcycle Wars* assesses the historical development and societal impact of the motorcycle industry, from the influence of motor sports on vehicle sales in the early 1900s to the postwar developments that led to the massive wave of motorization sweeping the Asia-Pacific region today. Jeffrey Alexander brings a wealth of information to light, providing English translations of transcripts, industry publications, and company histories that have until now been available only in Japanese. By exploring the industry as a whole, he reveals that Japan's motorcycle industry was characterized not by communitarian success but by misplaced loyalties, technical disasters, and brutal competition. For 100 years, the Isle of Man Tourist Trophy races have been the world's most dangerous organized sporting event. As one of thirty thousand fans who attended the annual spectacle, Mark Gardiner harbored no illusions about his own skill or bravery. He was, however, an avid motorcyclist for whom the race represented a boyhood dream. He went home, quit his job, sold everything he owned, and returned to the Island to race there himself. *Riding Man* is the account of an Everyman, struggling to qualify for -- and survive -- the TT races. If you're a dreamer, the lesson in this book is that the pursuit of any worthwhile goal involves risks, rewards and, almost inevitably some regrets. If you're not a dreamer, the lesson is more important: the deepest regrets are always over risks not taken.

FIELD & STREAM, America's largest outdoor sports magazine, celebrates the outdoor experience with great stories, compelling photography, and sound advice while honoring the traditions hunters and fishermen have passed down for generations. This book chronicles the development and history all five Ducati Corse World Superbike generations together with interviews with the designers, racers and team managers. This unique insight is provided by renown motorcycle racer and journalist Alan Cathcart who has had the opportunity to test ride every one of the race bikes over the last 25 years For the first time the life

of Edward Turner, one of Britain's most talented motorcycle designers, is revealed in full, so this is much more than just another book about Triumph motorcycles. Although seen by many as an irascible man who ran a very tight ship, it is an inescapable fact that that his was a highly profitable company. His hugely successful sales campaign after World War 2 stunned America's own manufacturers and had long lasting repercussions on their own home market. As Bert Hopwood once said to the Author, Turner was an inventive genius who had the flair for pleasing shapes and an uncanny ability to perceive what the buying public would readily accept, to produce it at the right price. No one will deny the impact made at the annual Motor Cycle Show by his aerial Square Four in 1931, his superbly-styled single cylinder Tiger models in 1936, and his revolutionary Speed Twin that dominated the Show in 1937. Even more was to follow with his post-war Thunderbird and Bonneville twins. Derek Minter started his racing career in 1953 on a BSA Gold Star. His early promise as an inexperienced youngster was very quickly fulfilled. After transferring to a couple of Nortons he soon became "King of Brands", succeeding the famous John Surtees. After becoming double British Champion in 1958, two years later he became the first man to lap the Isle of Man TT circuit at over 100mph on a single cylinder bike. During 1962 he not only became triple British Champion, but also won the 250cc TT on a privately entered Honda-beating the might of the Honda works team in the process. Then in 1963 he rode for the Geoff Duke Scuderia Gilera squad and only a crash early in the season prevented him seriously challenging World Champion Mike Hailwood for the 500cc title. By 1965 he held the lap record for virtually every British short circuit. And by the time he retired at the end of 1967 had ridden for many manufactures, including MZ, Moto Morini, Bianchi, REG, EMC, Honda and Norton. Derek Minter: King of Brands is a fitting tribute to one of the world's greatest ever motorcycle racing stars. Singapore's best homegrown car magazine, with an editorial dream team driving it. We fuel the need for speed! A biography of one of Britain's most famous

talented motorcycle designers, this text is also the story of the world famous motorcycles designed by Edward Turner. This book explores the opposed piston (OP) engine, a model of power and simplicity, and provides the first comprehensive description of most opposed piston (OP) engines from 1887 to 2006. Design and performance details of the major types of OP engines in stationary, ground, marine, and aviation applications are explored and their evolution traced. The OP engine has set enviable and leading-edge standards for power/weight refinement, fuel tolerance, fuel efficiency, package space, and manufacturing simplicity. For these reasons, the OP concept still remains of interest for outstanding power and package density, simplicity, and reliability; e.g., aviation and certain military transport requirements. Using material from historic and unpublished internal research reports, the authors present the rationale for OP engines, their diverse architecture, detailed design aspects, performance data, manufacturing details, and leading engineers and applications. Comparisons to four-stroke and competitor engines are made, supporting the case for reconsidering OP engines for certain applications. Topics include: The history of OP engines Aeronautical Automotive Military Marine Unusual OP engines Comparison between 2 and 4 stroke engines The future of OP engines and more THE SUNDAY TIMES NUMBER-ONE BESTSELLER. Michael Dunlop is quite simply the greatest road racer on the planet. Brother of William, also an accomplished rider, son of the late Robert and nephew of the late great Joey Dunlop, Michael can fairly claim that racing is in his blood. Now for the first time he talks in depth about his family story, how he got involved in the family business and how he manages to keep getting back on his bike despite all he knows of the deadly risks he encounters every time he crosses the start line. The death of his uncle during a competition in Estonia in 2000 was followed just eight years later by the death of his father at the North West 200. But despite these tragic losses Michael was undeterred and, two days after his father's death, he returned to the North West, and won. The next year Michael won his first TT, joining both his

father and uncle in the record books. Now with thirteen TT wins to his name Michael is a phenomenal competitor, and in this sensational autobiography he reveals the highs and lows of racing, what it was like growing up part of a motorcycle dynasty and how that made him the incredible racing driver he is today. MV Agusta's classic four-cylinder dominated Grand Prix racing for a decade from 1956. This magnificent engine was always at the heart of the MV Agusta, and it was this engine that created the legend. Few paint a more vivid or varied picture of the joys of riding than this collection of stories from a motorcycling life by Lance Oliver, who has spent more time than most of us thinking about and writing about the art and practicalities of motorcycling.
