Diversity and the College Experience "Casing Organizational Communication demonstrates communication theory through real-world examples. Every case in this volume requires the reader to come to some kind of decision. Every case follows a similar pattern and opens with the introduction of the main character of the case. Second, you will be introduced to other individuals involved in the case. Third, you will see the fundamental communication problem(s) that either the main character or the organization faces. Finally, you will be left with a character who is not sure in which direction they should proceed. You, the reader, will need to make the decision as to what action should be taken. The decision-making process is guided by a five-step process: 1. Understand the problem 2. Select criteria 3. Identifying solutions 4. Reviewing decision alternative 5. Selecting the best decision alternative. As with any new skill, learning how to evaluate and discuss cases takes time and effort, but it is well worth it as you will see how important a formalized decision-making process is for the business world and in your life." -- Back cover
