This book describes and explains the methods by which three related ores and recyclables are made into high purity metals and chemicals, for materials processing. It focuses on present day processes and future developments rather than historical processes. Nickel, cobalt and platinum group metals are key elements for materials processing. They occur together in one book because they (i) map together on the periodic table (ii) occur together in many ores and (iii) are natural partners for further materials processing and materials manufacturing. They all are, for example, important catalysts - with platinum group metals being especially important for reducing car and truck emissions. Stainless steels and CoNiFe airplane engine super alloys are examples of practical usage. The product emphasises a sequential, building-block approach to the subject gained through the author's previous writings (particularly Extractive Metallurgy of Copper in four editions) and extensive experience. Due to the multiple metals involved and because each metal originates in several types of ore - e.g. tropical ores and arctic ores this necessitates a multi-contributor work drawing from multiple networks and both engineering and science. Synthesizes detailed review of the fundamental chemistry and physics of extractive metallurgy with practical lessons from industrial consultancies at the leading international plants Discusses Nickel, Cobalt and Platinum Group Metals for the first time in one book Reviews extraction of multiple metals from the same tropical or arctic ore Industrial, international and multidisciplinary focus on current standards of production supports best practice use of industrial resources Presents thirty-three tips on personal and business success gleaned from the experiences and wisdom of John Patterson, founder of the National Cash Register Company. You only think you want this life . . . Alex Maxwell is planning her wedding to up-and coming music artist Birdie, ghostwriting video vixen Cleopatra Wright's memoir, and she's just been assigned the story of the year by her editor in chief at a major music industry magazine—an article about the glamorous lives of women married to platinum-selling hip-hop artists. Alex has been interviewing celebrities and hangers-on long enough to know all that glitters isn't gold, so she's determined to get the real scoop. Still, it's not going to be easy to get past the wives' gilded cages. . . Beth Saddlebrook, wife of aging rapper Z. They have three beautiful boys and a seemingly endless supply of cash. But Beth spends her days trying to keep Z off drugs and fielding calls from women hollering

she's just a "small-town white bitch" and claiming to be carrying Z's baby. Only one person understands what she's going through. . . Kipenzi Hill, multiplatinum-selling R&B artist and Beth's best friend. Her relationship with rap star and record label president Jake is an open secret in the industry. She knows Jake loves her, but he'd rather break up than publicly acknowledge it. Now she has learned that the newest (and much younger) R&B sensation Bunny has been signed to Jake's label. Josephine Bennett, wife to Jamaican singer and überproducer Ras Bennett. Josephine doesn't just want to spend her husband's money, she wants to contribute. Her fashion company is finally starting to get media attention when her husband admits to something she's suspected all along—he's fallen in love with another woman. Cleopatra Wright, every man's dream girl, a video vixen with a story to tell and scores to settle. Cleo's got that thing no one can put a finger on and no man (or woman) can resist. Some would call her evil or misguided or both, but Cleo always moves with a purpose and she'll stop at nothing to get what she wants. . . Alex realizes she may have more in common with these women than she'd like. What if this is a glimpse of how her life will be if Birdie finally gets signed to a major label? Stuck between her loyalty to this newfound sisterhood and her obligation to write the truth, Alex is forced to rethink everything she knows about work, friendship, and love. This book describes the history of platinum and its associated metals, covering important discoveries and scientific work on the platinum group metals up to the early twentieth century. With twenty-four chapters, 450 pages, over 600 references and 235 illustrations (20 in colour) including 100 portraits, "A History of Platinum and its Allied Metals" by Donald McDonald and Leslie B. Hunt is the definitive description of how science was able to progress by means of the unique properties of these metals. Deliciously handsome lawyer Jake Doyle is set to marry his college sweetheart, heiress and socialite Amanda Climent. Both scions of prominent, old money Los Angeles families, they seem like the perfect couple who have it all, but their happiness is not shared by everyone, and the people closest to them are desperate to tear them apart. When Jake introduces his new girlfriend to his parents, his mother becomes dead set on breaking things up from the start. Turns out she had an affair with Amanda's father years before, a secret known only to the two of them. But there's more that she's been hiding ever since, and to keep a scandal from unfolding she does everything she can to rid her son of Amanda and her family for good. Meanwhile, Jake's longtime bromance with his best friend, Kirby, further complicates things. What began as homoerotic horseplay between high school jocks has evolved into something far more serious and enduring. Although Jake has chosen to marry the girl he loves, he's blindsided when Kirby comes out and professes his love for him. As competing forces collide, untold secrets and lies threaten to derail Jake and Amanda's dream of a future together, and Jake is faced with a decision he never imagined he'd have to make. **This book is intended for mature readers (18+) and contains adult situations, including M/F and M/M sexual intimacy.
