[Math Phonics - Fractions \(eBook\)](#) Jan 22 2020 In just minutes a day, students can master math facts with this specially designed program. Using rules, patterns and memory tools similar to those used in language arts, Math Phonics (tm) is great for introducing concepts or providing alternative techniques.

[Technical Mathematics](#) Apr 24 2020 This textbook has been in constant use since 1980, and this edition represents the first major revision of this text since the second edition. It was time to select, make hard choices of material, polish, refine, and fill in where needed. Much has been rewritten to be even cleaner and clearer, new features have been introduced, and some peripheral topics have been removed. The authors continue to provide real-world, technical applications that promote intuitive reader learning. Numerous fully worked examples and boxed and numbered formulas give students the essential practice they need to learn mathematics. Computer projects are given when appropriate, including BASIC, spreadsheets, computer algebra systems, and computer-assisted drafting. The graphing calculator has been fully integrated and calculator screens are given to introduce computations. Everything the technical student may need is included, with the emphasis always on clarity and practical applications.

Word Problems Using Fractions Feb 03 2021 Not everyone loves word problems or fractions, but everyone loves food! Every sample problem relates to kids' favorite snacks. Even better, each problem is broken down into four easy-to-follow steps, with tips and pointers on how to successfully solve the problem and apply the same strategies to other problems. Design elements aid in understanding the math concepts, and lively, color photographs pull the reader in.

[Multiplying Fractions](#) Jan 14 2022 Grade Level: 3-6 CCSS Level: 4-6 Making fractions make sense! This 23-lesson learning unit is packed with hundreds of sequential fraction activities featuring both computation and word problems. As the third book in a series – following Adding Fractions and Subtracting Fractions – these exercises are designed to build upon what students have already learned. From “writing reciprocals of fractions, whole numbers, and mixed numbers,” to “multiplying a proper fraction by a proper fraction,” and on to “using a banana bread recipe to multiply fractions,” the activities in this book progress from learning basic concepts to mastering an understanding of how to multiply fractions. A Post Test and Answer Key are included.

The Amazing 8-Day, Super-Simple, Scripted Guide to Teaching or Learning Fractions Nov 19 2019 Welcome to The Amazing 8-Day, Super-Simple, Scripted Guide to Teaching or Learning Fractions. I have attempted to do just what the title says: make learning fractions super simple. I have also attempted to make it fun and even ear-catching. The reason for this is not that I am a frustrated stand-up comic, but because in my fourteen years of teaching the subject, I have come to realize that my jokes, even the bad ones, have a crazy way of sticking in my students' heads. And should I use a joke (even a bad one) repetitively, the associations become embedded in their brains, many times to their chagrin! What is so different about this book? First of all, it is scripted, so that tutors, parents and teachers alike can deliver the lessons easily and without frustration. Secondly, the scripts and lessons have been carefully crafted to be ageless -- that is, to apply to any learner, based on age or level of mathematical mastery. Finally, the lessons have been carefully culled and edited over a decade in order to include the most necessary information in a finite and reasonable timetable, something (in this educator's opinion) other books seem to lack.

Milliken's Complete Book of Math Reproducibles - Grade 6 Aug 09 2021 This activity book of over 110 ready-to-use, reproducible pencil-to-paper worksheets are ideal for enrichment or for use as reinforcement. [10 Minutes a Day](#) Oct 31 2020 Reinforce learning fractions at home with 10 Minutes a Day: Fractions, a workbook that supports school curriculum and classroom teaching on fractions by adding quick but valuable practice time for adding, subtracting, multiplying, and dividing fractions. 10 Minutes a Day: Fractions utilizes a proven learning strategy for learning fractions. Encourage your child's learning with the effective "little and often" learning strategy outlined in our 10 Minutes a Day workbooks. Proven effective, this leveled, curriculum-supporting method is great for children who resist long periods of study, or for children who need focused attention in fractions. 10 Minutes a Day: Fractions is different than other study books because it includes an embedded LCD timer that encourages children to beat the clock, adding an extra element of challenge to focused study time. The 10 Minutes a Day: Fractions workbook is broken into study challenges and exercises designed to take up to 10 minutes to complete. Children work through a series of quick-answer questions, then move onto extension activities and timed exercises if they have time left after the first round of study questions. The timer acts as a stopwatch for skills challenges, and many kids are surprised to find that beating the timer can actually be fun. 10 Minutes a Day: Fractions helps children learn by supplementing school curriculum and strengthening the important skills set of learning fractions. Parents will love that 10 Minutes a Day: Fractions helps them fit short bursts of study into already busy days, and that 10 Minutes a Day: Fractions includes an answer key for parents, as well as notes on common pitfalls and how to teach children to overcome them.

[Master Basic Fraction Skills Workbook](#) Mar 16 2022 This math workbook from the Dr. Pi Squared Math Workbooks focuses on basic fraction skills. The first two chapters introduce the concept of representing a fraction with pie slices. The remaining ten chapters offer practice converting between mixed numbers and improper fractions, reducing fractions and mixed numbers, finding the lowest common denominator, comparing fractions and mixed numbers, finding reciprocals of fractions and mixed numbers, and adding, subtracting, multiplying, and dividing fractions and mixed numbers. Each section begins with a description of how to perform the mathematical procedure, including fully-solved examples to illustrate the technique and to serve as a useful guide. Answers are nicely organized by page number in the back of the book to allow students, parents, or teachers to quickly check the answers. There is ample workspace for students to write large answers and still fit their solutions comfortably into the space provided. High-quality, durable, bright paper is used (instead of standard workbook paper, which often tears easily and appears dull in color). CONTENTS: (1) Determining Fractions Visually, (2) Representing Fractions Visually (students color the pie slices), (3) Converting Mixed Numbers into Improper Fractions, (4) Converting Improper Fractions into Mixed Numbers, (5) Reducing Fractions and Mixed Numbers, (6) Finding Lowest Common Denominators, (7) Comparing Fractions (includes fractions vs. fractions, integers vs. fractions, and mixed numbers vs. fractions), (8) Adding Fractions (includes fractions plus fractions, fractions plus integers, and mixed numbers plus mixed numbers), (9) Subtracting Fractions (includes fractions minus fractions, subtracting fractions with integers, and mixed number minus mixed numbers), (10) Multiplying Fractions (includes fractions times fractions, fractions times integers, and mixed numbers times mixed numbers), (11) Reciprocating Fractions, Integers, and Mixed Numbers, (12) Dividing Fractions, Answers (includes fractions divided by fractions, dividing fractions with integers, and mixed numbers divided by mixed numbers).

100 Days of Money, Fractions, & Telling the Time Jul 20 2022 100 days of practice counting money, learning fractions, and telling the time. Three core areas of maths that students often need additional help to master. Start by counting groups of coins that have a value of a pound or less. Slowly learn to count greater amounts of money that include small and large notes too. Add and subtract values, and even learn to make change. Learn fractions one step at a time. Start with simple fractions and eventually learn to add and subtract mixed numbers. Telling the time is one of the more difficult concepts for children to learn. Gradually progress from learning to tell hours, to quarter hours.

Eventually tell time in five minute and minute increments. This is a great workbook to start out with. Most students will grasp the concepts within each of the three sections. If a student still needs more practice, Humble Math has workbooks that provide additional practice for these concepts too.
