With a writing style alive with the rhythms and riffs of jazz, Jeffries deftly examines the quest of identity, race and family in a provocative, moving and often hilarious memoir. Too light to be black, too dark to be white, finding a place in race-conscious American society as the son of a black father and Jewish mother was a challenging journey for the author. Following a different path to his more wayward siblings, he discovers conflicts within himself that have as much to do with Kafka as with Ellison. The truth he learns - you must create yourself. "The greed, excess and decadence of the long 1980s has been famously chronicled, critiqued, and satirized in epochal works like *White Noise* by Don DeLillo, *American Psycho* by Bret Easton Ellis, and Tom Wolfe's *The Bonfire of the Vanities*. Leigh Claire La Berge offers an in-depth study of these fictions alongside the key moments of financial history that inform them, contending that throughout the 1980s, novelists, journalists, and filmmakers began to reimagine the capitalist economy as one that was newly personal, masculine, and anxiety producing. The study's first half links the linguistic and the technological by exploring the arrival of ATMs and their ubiquity in postmodern American literature. In transformative readings of novels such as *White Noise* and *American Psycho*, La Berge traces how the ATM serves as a symbol of anxious isolation and the erosion of interpersonal communication. A subsequent chapter on Ellis' novel and Jane Smiley's *Good Faith* explores how male protagonists in each develop unique associations between money and masculinity. The second half of the monograph features chapters that attend to works-most notably Oliver Stone's *Wall Street* and Wolfe's *The Bonfire of the Vanities*-that capture aspects of the arrogance and recklessness that led to the savings-and-loan crisis and the 1987 stock market crash. Concluding with a coda on the recent Occupy Wall Street Movement and four short stories written in its wake, *Scandals and Abstraction* demonstrates how economic forces continue to remain a powerful presence in today's fiction"-- *Fictions Inc.* explores how depictions of the corporation in American literature, film, and popular culture have changed over time. Beginning with perhaps the most famous depiction of a corporation—Frank Norris's *The Octopus*—Ralph Clare traces this figure as it shifts from monster to man, from force to "individual," and from American industry to multinational "Other." Clare examines a variety of texts that span the second half of the twentieth century.

century and beyond, including novels by Thomas Pynchon, William Gaddis, Don DeLillo, Richard Powers, and Joshua Ferris; films such as *Network*, *Ghostbusters*, *Gung Ho*, *Office Space*, and *Michael Clayton*; and assorted artifacts of contemporary media such as television's *The Office* and the comic strips *Life Is Hell* and *Dilbert*. Paying particular attention to the rise of neoliberalism, the emergence of biopolitics, and the legal status of "corporate bodies," *Fiction: Inc.* shows that representations of corporations have come to serve, whether directly or indirectly, as symbols for larger economic concerns often too vast or complex to comprehend. Whether demonized or lionized, the corporation embodies American anxieties about these current conditions and ongoing fears about the viability of a capitalist system. Follow the leader. *Mat Meds* has helped nearly one million nurses and other health care professionals become safe practitioners of dosage calculations. This classic resource continues to blaze the trail into a new edition, with its ratio and proportion method and building-block organization. Hundreds of full-color images of drug labels, syringes, and equipment complement the range of calculation competencies - from reading medication labels to calculating flow rates for heparin infusion. The straightforward language has also been retained, as the ninth edition preserves the tradition of making the complex understandable. *Teaching with Tension* is a collection of seventeen original essays that address the extent to which attitudes about race, impacted by the current political moment in the United States, have produced pedagogical challenges for professors in the humanities. As a flashpoint, this current political moment is defined by the visibility of the country's first black president, the election of his successor, whose presidency has been associated with an increased visibility of the alt-right, and the emergence of the neoliberal university. Together these social currents shape the tensions with which we teach. Drawing together personal reflection, pedagogical strategies, and critical theory, *Teaching with Tension* offers concrete examinations that will foster student learning. The essays are organized into three thematic sections: "Teaching in Times and Places of Struggle" examines the dynamics of teaching race during the current moment, marked by neoconservative politics and twenty-first century free-market struggles. "Teaching in the Neoliberal University" focuses on how pressures and exigencies of neoliberalism (such as individualism, customer-service models of education, and online courses) impact the way in which race is taught and conceptualized in college classes. The final section, "Teaching How to Read Race and (Counter)Narratives," homes in on direct strategies used to historicize race in classrooms comprised of millennials who grapple with race neutral ideologies. Taken together, these sections and their constitutive essays offer rich and fruitful insight into the complex dynamics of contemporary race and ethnic studies education. Over the last four decades, the fashion modeling industry has become a lightning rod for debates about Western beauty ideals, the sexual objectification of women, and consumer desire. Yet, fashion models still captivate, embodying all that is cool, glam, hip, and desirable. They are a fixture in tabloids, magazines, fashion blogs, and television. Why exactly are models so appealing? And how do they succeed in so soundly holding our attention? In *This Year's Model*, Elizabeth Wissinger weaves together in-depth interviews and research at model castings, photo shoots, and runway shows to offer a glimpse into the life of the model throughout the 20th and 21st centuries. In an ad hoc occupation, the "model life" now involves a great deal of physical and virtual management of the body, or what Wissinger terms "glamour labor." Wissinger argues that glamour labor—the specialized modeling work of self-styling, crafting a 'look,' and building an image—has been amplified by the rise of digital media, as new technologies make tinkering with the body's form and image easy. Models can now present self-fashioning, self-surveillance, and self-branding as essential behaviors for anyone who is truly in the know and 'in fashion.' Countless regular people

make it their mission to achieve this ideal, not realizing that technology is key to creating the unattainable standard of beauty the model upholds—and as Wissinger argues, this has been the case for decades, before Photoshop even existed. Both a vividly illustrated historical survey and incisive critique of fashion media, *This Year's Model* demonstrates the lasting cultural influence of this unique form of embodied labor. Winner of the Labriola Center American Indian National Book Award Despite what major media sources say, violence against Native women is not an epidemic. An epidemic is biological and blameless. Violence against Native women is historical, political, bounded by oppression and colonial violence. This book, like all of Sarah Deer's work, aimed at engaging the problem head-on—and ending it. *The Beginning and End of Rape* collects and expands the powerful writings in which Deer, who played a crucial role in the reauthorization of the Violence Against Women Act in 2013, has advocated for cultural and legal reforms to protect Native women from endemic sexual violence and abuse. Deer provides a clear historical overview of rape and sex trafficking in North America, paying particular attention to the gendered legacy of colonialism in tribal nations—a truth largely overlooked or minimized by Native and non-Native observers. She faces this legacy directly, articulating strategies for Native communities and tribal nations seeking redress. In a damning critique of federal law that has accommodated rape by destroying tribal legal systems, she describes how tribal self-determination efforts of the twenty-first century can be leveraged to eradicate violence against women. He bridges the gap between Indian law and feminist thinking by explaining how intersectional approaches are vital to addressing the rape of Native women. Grounded in historical, cultural, legal realities, both Native and non-Native, these essays point to the possibility of actual and positive change in a world where Native women are systematically undervalued, left unprotected and hurt. Deer draws on her extensive experiences in advocacy and activism to present specific practical recommendations and plans of action for making the world safer for all. The concepts are presented in a streamlined manner, and cover the key concepts necessary to establish a strong foundation in the subject. The textbook follows a traditional approach to the study of business law. Each chapter contains learning objectives, explanatory narrative and concepts, references for further reading, and end-of-chapter questions. *Business Law I Essentials* may need to be supplemented with additional content, cases, or related materials, and is offered as a foundational resource that focuses on the baseline concepts, issues, and approaches. A quirky collection of short sci-fi stories for fans of Kij Johnson and Kelly Link *Assimilation* is founded on surrender and being broken; this collection of short stories features people who have assimilated, but are actively trying to reclaim their lives. There is a concert pianist who defies death by uploading his soul into his piano. There is the person who draws his mother's ghost out of the bullet hole in the wall near where she was executed. Another character has a horn growing out of the center of his forehead—punishment for an affair. But he is too weak to end it, too much in love to be moral. Another story recounts a panda breeder looking for tips. And then there's a border patrol agent trying to figure out how to process undocumented visitors from another galaxy. Poignant by way of funny, and philosophical by way of grotesque, Hernandez's stories are prayers for self-sovereignty. *Math in Society* is a survey of contemporary mathematical topics, appropriate for a college-level topics course for liberal arts major, or as a general quantitative reasoning course. This book is an open textbook and can be read free online at <http://www.opentextbookstore.com/mathinsociety/>. Editable versions of the chapters are available as well. This book provides an overview of the criminal justice system of the United States. It is intended to provide the introductory student a concise yet balanced introduction to the workings of the legal system as well as policing, courts, corrections, and juvenile justice. Six chapters, each divided into five sections, provide the reader a consistent, comfortable format as well as providing the instructor with a consistent framework for ease of instructional design. The progress of man from the Stone Age to the computer age is astonishing. At times one may be misled and consider this as man's victory over nature. But it is not true. Our forefathers modestly believed that, 'Life is a glorious gift from God. Human beings are the epitome of the infinite prowess of the divine creator. Nature plays a dominant role in the lives of all creations. Natural objects like rivers, mountains, forests etc. enjoyed a high position in the life of all societies. Rivers were considered as goddesses having not only purifying capacity but also self-purifying ability. Pollution of the water of a river was considered as sin and it attracted severe punishments of different kinds'.^[1] Today these ancient scripts appear to be far more relevant than ever. This thoroughly updated Nutshell follows the structure and format of the authors' popular casebook--Children and the Law: Doctrine, Policy, and Practice. The authors have devoted entire chapters to the meaning of "parent," civil and criminal abuse and neglect, the foster care system

adoption, medical decision-making, support and other financial responsibilities, protective legislation, and delinquency. Representation of children is covered throughout the book. Also treated for comparative purposes are several relevant international law issues, including the UN Convention on the Rights of the Child, international child labor, and U.S. tobacco exports. Hailed as the most engaging and accessible introductory text available, *Exploring Criminal Justice* provides a clear, complete, and credible introduction to the U.S. criminal justice system. Using an easy-to-follow, attention-grabbing writing style, this text explains the overarching processes and purposes of the criminal justice system. The functions of each component—police, courts, corrections—and the relationships between them are described in detail while rich and captivating pedagogy encourages students to think about how each component affects their daily lives. This thoroughly up-to-date text provides contemporary data, case studies, and references for all topics. *Exploring Criminal Justice* devotes an entire chapter to the emerging crimes of terrorism and cybercrime and the role these controversial topics play in the modern criminal justice system. Special attention is also given to juvenile offenders and issues relating to women and minorities. In addition, this text provides thorough integration of criminological theory and policy as it presents both historical context and current features of the U.S. criminal justice system. The 1990s witnessed a flurry of legislative initiatives—most notably, “Megan’s Law”—designed to control the population of sex offenders (child abusers) widely reviled as sick, evil, and incurable. In *Sex Offenders, Stigma, and Social Control*, Diana Rickard provides the reader with an in-depth view of six such men, exploring how they manage to cope with their highly stigmatized role as social outcasts. The six men discussed in the book are typical convicted sex offenders—neither serial pedophiles nor individuals convicted of the type of brutal act that looms large in public perceptions about sex crimes. *Sex Offenders, Stigma, and Social Control* explores how these individuals, who have been cast as social pariahs, construct their sense of self. How does being labeled in this way and controlled by measures such as Megan’s Law affect one’s identity and sense of social being? Unlike traditional criminological and psychological studies of this population, this book frames their experiences in concepts of both deviance and identity, asking how men so highly stigmatized cope with the most extreme form of social marginality. Placing their stories within the context of the current culture of mass incarceration and zero-tolerance, Rickard provides a deeper understanding of the complex relationship between public policy and lived experience, as well as an understanding of the social challenges faced by this population whose re-integration into society is far from simple or assured. *Sex Offenders, Stigma, and Social Control* makes a significant contribution to our understanding of sex offenders, offering a unique window into how individuals make meaning out of their experiences and present a viable—not monstrous—social self to themselves and others. “M. Lindsay Kaplan expands the study of the history of racism through an analysis of the medieval Christian concept of Jewish servitude. Developed through exegetical readings of Biblical figures in canon law, this discourse produces a racial status of hereditary inferiority that justifies the subordination not only of Jews, but of Muslims and Africans as well”— Each and every organization needs to develop a good strategy for public affairs. Public affairs have received such kind of importance in today's world because no organization can survive in isolation. Every institution requires other institutions as well as the public that act as the customer, the decision-maker as well as the employees that can make or break the image of an organization. With the advent of technology, this task has become easier for managers. The information could be disseminated at a very low cost with the use of mass media and socializing websites. Creating a good image for an institution has become relatively much easier, but this comes with the negative fact that the dissolution of the image has also become

easy task. Public affairs have been increasingly given importance in the corporate world as increased competition has resulted in excess marketing and advertising campaigns that are used to create a Goodwill for the company. There are various tools under public affairs that are used by various organizations in order to fulfill their objectives and goals in the long run. This book is not just about thinking or acting in transdisciplinary ways, but about being transdisciplinary. To achieve this requires a deconstruction of our current way of acting within the definition of boundaries that others impose upon us. Transdisciplinarity is a phenomenological perspective of reality and its manifestation in the world in which we exist. The volume develops a widely based transdisciplinary understanding of the issues faced by higher education institutions and those who work within and with these institutions to educate professionals. It incorporates international contributions from organisational theory, anthropologists, historians, psychologists, social scientists, philosophers and practitioners to create a volume that makes an important and distinctive contribution to the literature on higher education and professional practice. "Transdisciplinarity provides one of our greatest challenges in higher education, both to the way it is organized and to the nature of the curriculum. This book is an important contribution to the debate about its implications." "Higher education is being challenged by the nature of knowledge and how it is organized—the world is transdisciplinary but our institutions are constrained by the discipline." This book contributes to the important debates about the challenges transdisciplinarity provides to our institutions." Professor David Boud Emeritus Professor, Faculty of Arts and Social Sciences, University of Technology, Sydney Essays cover nineteenth-century urban crime, police organization, crime control, relations between federal and local police, information technology and community policing Srebnick uses the famous, unsolved murder of a Manhattan woman in 1841 as a window into urban culture in the mid-nineteenth-century. How American colonists reinterpreted their British and colonial histories to help establish political and cultural independence from Britain In Past and Prologue, Michael Hattem shows how colonists' changing understandings of their British and colonial histories shaped the politics of the American Revolution and the origins of American national identity. Between the 1760s and 1800s, Americans stopped thinking of the British past as their own history and created a new historical tradition that would form the foundation for what subsequent generations would think of as "American history." This change was a crucial part of the cultural transformation at the heart of the Revolution by which colonists went from thinking of themselves as British subjects to thinking of themselves as American citizens. Rather than liberating Americans from the past--as many historians have argued--the Revolution actually made the past matter more than ever. Past and Prologue shows how the process of reinterpreting the past played a critical role in the founding of the nation. How did the land of the free become the home of the world's largest prison system? Elizabeth Hinton traces the rise of mass incarceration to an ironic source: not the War on Drugs of the Reagan administration but the War on Crime that began during Johnson's Great Society at the height of the civil rights era. An indispensable resource for all levels, this handbook provides up-to-date, in-depth summaries of the most important theories in criminology. Provides original, cutting-edge, and in-depth summaries of the most important theories in criminology Covers the origins and assumptions behind each theory, explores current debates and research, points out knowledge gaps, and offers directions for future research Encompasses theory, research, policy and practice, with recommendations for further reading at the end of each essay Features discussions of broad issues and topics related to the field, such as the correlates of crime, theory, policy, and prediction Clearly and accessibly written by leading scholars in the field as well as up-and-coming scholars A lush, modern vegetarian cookbook celebrating the bold flavors and

unique ingredients of the Caribbean In Provisions, Michelle and Suzanne Rousseau share 150 recipes that pay homage to the meals and market produce that have been farmed, sold, and prepared by Caribbean people -- particularly the women -- for centuries. Caribbean food is often thought of as rustic and unrefined, but these vibrant vegetarian dishes will change the way you think about this diverse, exciting, and nourishing cuisine. The pages are spiced with the sisters' fond food memories and fascinating glimpses of the islands' histories, bringing the region's culinary past together with creative recipes that represent the best of Caribbean food today. With a modern twist on traditional island ingredients and flavors, Provisions reinvents classic dishes and presents innovative new favorites, like Ripe Plantain Gratin, Ackee Tacos with Island Guacamole, Haitian Riz Djon Djon Risotto, Oven-Roasted Pumpkin Flatbread, and Caramelized Fennel and Grilled Green Guava with Mint. Stunning full-color photographs showcase the variety of these dishes: hearty stews, easy one-pot meals, crunchy salads, flavorful pickles, preserves, hot sauces, sumptuous desserts, cocktails, and more. At once elegant, authoritative, and accessible, Suzanne and Michelle's recipes and stories invite you to bring fresh Caribbean flavors to your table.

Report covers news and events in and actions affecting the Indian community. The second edition of The Urban Design Reader draws together the very best of classic and contemporary writings to illuminate and expand the theory and practice of urban design. Nearly 50 generous selections include seminal contributions from Howard, Le Corbusier, Lynch, and Jacobs to more recent writings by Waldheim, Koolhaas, and Sorkin. Following the widespread success of the first edition of The Urban Design Reader, this updated edition continues to provide the most important historical material of the urban design field, but also introduces new topics and selections that address the myriad challenges facing designers today. The six part structure of the second edition guides the reader through the history, theory and practice of urban design. The reader is initially introduced to those classic writings that provide the historical precedents for city-making in the twentieth century. Part Two introduces the voices and ideas that were instrumental in establishing the foundations of the urban design field from the late 1950s up to the mid-1990s. These authors present a critical reading of the design professions and offer an alternative urban design agenda focused on vital and lively places. The authors in Part Three provide a range of urban design rationales and strategies for reinforcing local physical identity and the creation of memorable places. These selections are largely describing the outcomes of mid-century urban design and voicing concerns over the placeless quality of contemporary urbanism. The fourth part of the Reader explores key issues in urban design and development. Ideas about sprawl, density, community health, public space and everyday life are the primary focus here. Several new selections in this part of the book also highlight important international development trends in the Middle East and China. Part Five presents environmental challenges faced by the built environment professions today, including recent material on landscape urbanism, sustainability, and urban resiliency. The final part examines professional practice and current debates in the field: where urban designers work, what they do, their roles, their fields of knowledge and their educational development. The section concludes with several position pieces and debates on the future of urban design practice. This book provides an essential resource for students and practitioners of urban design, drawing together important but widely dispersed writings. Part One section introductions are provided to assist readers in understanding the context of the material, summary messages, impacts of the writing, and how they fit into the larger picture of the urban design field. As the world has been reshaped since the 1970s by economic globalization, neoliberalism, and financialization, writers and artists have addressed the problem of representing the economy with a new sense of political urgency. Anxieties over who controls capitalism have

thus been translated into demands upon literature, art, and mass media to develop strategies of representation that can account for capitalism's power. Reading Capitalist Realism presents some of the latest and most sophisticated approaches to the question of the relation between capitalism and narrative form, partly by questioning how the "realism" of austerity, privatization, and wealth protection relate to the realism of narrative and cultural production. Even as critics have sought to locate a new aesthetic mode that might consider and move beyond theorizations of the postmodern, this volume contends that narrative realism demands renewed scrutiny for its ability to represent capitalism's latest scenes of enclosure and indebtedness. Ranging across fiction, nonfiction, television, and film, the essays collected here explore to what extent realism is equal to comprehend and historicize our contemporary economic moment and what might be the influence or complicity of the literary in shaping the global politics of lowered expectations. Including essays on writers such as Mohsin Hamid, Lorrie Moore, Jess Walter, J. M. Coetzee, James Kelman, Ali Smith, Russell Banks, William Vollmann, and William Gibson, as well as examinations of Hollywood film productions and The Wire television series, Reading Capitalist Realism calls attention to a resurgence of realisms across narrative genres and questions realism's ability to interrogate the crisis-driven logic of political and economic "common sense."
