***Travels in India Nov 19 2022 Jean-Baptiste Tavernier (1605-89) was one of the most renowned travelers of 17th century Europe. The son of a French Protestant who had fled Antwerp to escape religious persecution, Tavernier was a jewel merchant who between 1632 and 1668 made six voyages to the East. The countries he visited (most more than once) included present-day Cyprus, Malta, Turkey, Syria, Iraq, Iran, Afghanistan, Pakistan, India, Sri Lanka, and Indonesia. In 1676 he published his two-volume Les six voyages de Jean Baptiste Tavernier (The six voyages of Jean Baptiste Tavernier). An abridged and very imperfect English translation of the book appeared in 1677. The first***

*modern scholarly edition in English, presented here, was published in 1889, with translation, notes, and a biographical sketch of Tavernier by Dr. Valentine Ball (1843-95), a British civil servant with the Indian Geological Service. Among the most memorable chapters in the book are those that recount Tavernier's visits to the diamond mines of India and his inspection of the jewels of the Great Mogul. Tavernier was not a scholar or an educated linguist, and after his initial popularity in the 17th century his authority waned, as historians and others questioned the accuracy of his observations. In the 20th century, however, Tavernier's reputation rose, as such important historians as Lucien Febvre and Fernand Braudel used the detailed information he recorded about the prices and qualities of goods and about business and commercial practices in their pioneering studies of economic and social history. The book contains several appendices by Ball about famous diamonds (including the historic Koh-i-Noor Diamond now belonging to the British royal family), diamond mines in India and Borneo, ruby mines in Burma, and sapphire washings in Ceylon (Sri Lanka). A fold-out map shows Tavernier's voyages in India and the mines he visited.*

*Hollow-State Design 2nd Edition Nov 26 2020 Discover (or rediscover) the fun and magic of building electronic circuits with thermatrons (vacuum tubes). This book has everything you need to know about the art and science of thermatron design and construction. It pulls together, in one easy to read book, thermatron types and characteristics, thermatron homebrew techniques, and how to design audio and RF triode and pentode circuits. The book is written primarily for radio amateurs (or audio equipment builders) that already understands basic electronics but have forgotten or never had the pleasure of working with hollow-state devices. The Second Edition includes over 50+ pages of new and revised material including a new chapter on thermatron oscillator design.*

*Surveying for Construction Jun 21 2020 Surveying for Construction 5e is an essential textbook for students of engineering new to surveying,*

*and will also appeal to students of building and environmental studies and archaeology. Offering a strong grounding in land and construction surveying, the authors clearly and comprehensively guide the reader through the principles, methods and equipment used in modern-day surveying. Taking into account recent advances in the field, the material has been fully updated and revised throughout including new and up-to-date coverage of levelling, total stations, detail surveys, and EDM. A new chapter on GPS technology has been added. In keeping with the practical nature of the book, there are chapters on setting out construction works and surveying existing buildings, which guide the reader step-by-step through the fundamental procedures. The clear and methodical nature of the explanations, supported by a wide range of exercises and examples, make Surveying for Construction 5e an invaluable and modern introduction to surveying. Key features include:*

- Fully updated coverage and new material throughout, including a new chapter on GPS*
- New Learning Objectives and Chapter Summaries which guide the student through the learning process and highlight the key principles and methods for each chapter*
- Numerous diagrams and figures which give students a clear and detailed understanding of equipment and procedures*
- Extensive boxed examples and exercises that guide students through real-world surveying methods and calculations*
- Website material: online material for creating your own surveying project allows students to practice the methods and techniques they have learnt*

*Community Rehabilitation in Neurology May 01 2021 Rehabilitation should not stop when the disabled person is discharged from hospital, and many neurological patients require ongoing rehabilitation in order to maximize their functional abilities, minimize complications and promote full participation at home and in the community. This book analyses community rehabilitation needs from many different perspectives, including the views of disabled people, rehabilitation clinicians and service providers. Many examples of community rehabilitation schemes are presented, with evidence for their effectiveness, and case studies are used to highlight the main issues. The authors take an international view, and there are chapters dealing with the disabled child in the community and with neuropsychological rehabilitation. This important book examines the growing trend towards community rehabilitation in neurology and is directed towards all clinicians involved with neurorehabilitation.*

*Remembering Abraham Dec 28 2020 According to an old tradition preserved in the Palestinian Targums, the Hebrew Bible is "the Book of Memories." The sacred past recalled in the Bible serves as a model and wellspring for the present. The remembered past, says Ronald Hendel, is the material with which biblical Israel constructed its identity as a people, a religion, and a culture. It is a mixture of history, collective memory, folklore, and literary brilliance, and is often colored by political and religious interests. In Israel's formative years, these memories circulated orally in the context of family and tribe. Over time they came to be crystallized in various written texts. The Hebrew Bible is a vast compendium of writings, spanning a thousand-year period from roughly the twelfth to the second century BCE, and representing perhaps a small slice of the writings of that period. The texts are often overwritten by later texts, creating a complex pastiche of text, reinterpretation, and commentary. The religion and culture of ancient Israel are expressed by these texts, and in no small part also created by them, as they formulate new or altered conceptions of the sacred past. Remembering Abraham explores the interplay of culture, history, and memory in the Hebrew Bible. Hendel examines the Hebrew Bible's portrayal of Israel and its history, and correlates the biblical past with our own sense of the past. He addresses the ways that culture, memory,*

*and history interweave in the self-fashioning of Israel's identity, and in the biblical portrayals of the patriarchs, the Exodus, and King Solomon. A concluding chapter explores the broad horizons of the biblical sense of the past. This accessibly written book represents the mature thought of one of our leading scholars of the Hebrew Bible.*

*The Electronics of Radio Jan 29 2021 This fascinating book provides a stimulating introduction to analog electronics by analysing the design and construction of a radio transceiver. Essential theoretical background is given along with carefully designed laboratory and homework exercises. The author begins with a thorough description of basic electronic components and simple circuits and goes on to describe the key elements of radio electronics, including filters, amplifiers, oscillators, mixers, and antennas. Laboratory exercises lead the reader through the design, construction, and testing of a popular radio transceiver (the NorCal 40A). A diskette containing the widely known circuit simulation software, Puff, is included in the book. This was the first book to deal with elementary electronics in the context of radio. It can be used as a textbook for introductory analog electronics courses, for more advanced undergraduate classes on radio-frequency electronics, and will also be of great interest to electronics hobbyists and radio enthusiasts.*

*Manual of Psychosocial Rehabilitation Mar 31 2021 Psychosocial Rehabilitation is a comprehensive ready-reference for mental health practitioners and students, providing practical advice on the full range of interventions for psychosocial rehabilitation. It contextualises the interventions described and provides pointers to enable the reader to explore the theory and research. This manual recognises the wide-ranging impact of mental illness and its ramifications on daily life, and promotes a recovery model of psychosocial rehabilitation and aims to empower clinicians to engage their clients in tailored rehabilitation plans. The book is divided into five key sections. Section 1 looks at assessment covering tools available in the public domain, instruments, scoring systems, norms and applications for diagnosis and measurement of symptoms, cognitive functioning, impairment and recovery. Section 2 covers the full range of therapeutic interventions and offers advice on training and supervision requirements and evaluation of process, impact*

*and outcome. Section 3 provides manuals and programs for interventionseffectively provided as group activities. Section 4 explains how to design a full programme thatintegrates therapeutic interventions with group programmes as wellas services provided by other agencies. The final section looks at peer support and self help, providingmanuals and resources that support programmes and interventions notrequiring professional or practitioner direction.*

*The Consolidation of Democracy in East-Central Europe Feb 27 2021 Edited by two of the world's leading analysts of post-communist politics, this book brings together distinguished specialists on the Baltic states (Estonia, Latvia and Lithuania), Poland, the Czech Republic, Slovakia and Hungary. The authors analyse the patterns of post-communist democratization in these countries, paying particular attention to the process of party formation, electoral politics, the growth of civil society, and the impact of economic reform on the emergence of interest groups. Karen Dawisha and Bruce Parrott provide theoretical and comparative chapters on post-communist political development across the region. This book will provide students and scholars with detailed analysis by leading authorities, plus the latest research data on recent political and economic developments in each country.*

*Yard Sale Mar 11 2022 This riveting story carries the reader through three generations and three sales. You can sell off your possessions, but the Franklin and Holloway families come to realize that it is the people you love and who love you that are important. Meet Henry Franklin, a deceitful, self-centered man, who will stop at nothing to get what he wants. It is his greed that almost destroys his family and ultimately leads to the first yard sale. As the story unfolds, you will come to love the wit and humor of LouJean, and the caring nature of Anna, whose dedication to her husband and family create a need for a yard sale. Colleen is the third generation forced to make the ultimate decision to sell off all of her possessions. Along the way, you will encounter an*

*array of interesting characters that help to enrich the story. Each chapter will bring you closer into their lives and you will remember them long after you read the last page.*

*Democratic Consolidation in Eastern Europe: Volume 1: Institutional Engineering Oct 26 2020 This is the first volume in a series of books on democratic consolidation in Eastern Europe. The series focuses on three major aspects of democratic consolidation in Eastern Europe: institutional engineering, transnational pressures and civil society. This first volume analyses constraints on and opportunities of institutional engineering in Eastern Europe: to what extent and how elites in Eastern Europe have been able to shape, if not manipulate, the politics of democratic consolidation through institutional means. The aim is to contrast a set of democracy theories with empirical evidence accumulated in Eastern Europe over the last ten years. The volume tries to avoid complex debates about definitions, methods and the uses and misuses of comparative research. Instead it tries to establish what has really happened in the region, and which of the existing theories have proved helpful in explaining these developments. The volume starts with a presentation of conceptual and comparative frameworks, followed by in-depth empirical analyses of the thirteen individual countries undergoing democratic consolidation. The first conceptual and comparative part contains three chapters. The first chapter explains what institutional engineering is about and describes our experiences with institutional engineering in former transitions to democracy. It also focuses on the import and export of institutional designs. The second chapter analyses the utility of constitutions in the process of democratic consolidation. The third chapter compares constitutional designs and problems of implementation in Southern and Eastern Europe. The empirical case studies deal with the following countries: Estonia, Latvia, Lithuania, Bulgaria, Romania, Ukraine, Russia, Belarus, the Czech Republic, Slovakia, Slovenia, Hungary and Poland. And the conclusions evaluate the enormous impact of institutions on politics in Eastern*

*Europe and show how central constitutional designs are to the institutional engineering in the societies undergoing transitions to democracy.*

*Clinical Medicine and Surgery Aug 16 2022*

*Becoming Native in a Foreign Land Aug 24 2020 How did British colonists in Victorian Montreal come to think of themselves as “native Canadian”? This richly illustrated work reveals that colonists adopted, then appropriated, Aboriginal and French Canadian activities such as hunting, lacrosse, snowshoeing, and tobogganing. In the process, they constructed visual icons that were recognized at home and abroad as distinctly “Canadian.” This new Canadian nationality mimicked indigenous characteristics but ultimately rejected indigenous players, and championed the interests of white, middle-class, Protestant males who used their newly acquired identity to dominate the political realm. English Canadian identity was not formed solely by emulating what was British; this book shows that it gained ground by usurping what was indigenous in a foreign land.*

*Fuzzy Logic and Intelligent Systems Jun 02 2021 One of the attractions of fuzzy logic is its utility in solving many real engineering problems. As many have realised, the major obstacles in building a real intelligent machine involve dealing with random disturbances, processing large amounts of imprecise data, interacting with a dynamically changing environment, and coping with uncertainty. Neural-fuzzy techniques help one to solve many of these problems. Fuzzy Logic and Intelligent Systems reflects the most recent developments in neural networks and fuzzy logic, and their application in intelligent systems. In addition, the balance between theoretical work and applications makes the book suitable for both researchers and engineers, as well as for graduate students.*

*Bcps Bullets Sep 05 2021 Updates for 2019! We've updated and added some content in the following disease states: Acid/Base Disorders, Bipolar Disorder, Breast Cancer, CHF, Chronic Kidney Disease,*

*Clostridium Difficile, Crohn's, DVT/PE, Depression, Diabetes, Gout, Migraines, Hyperlipidemia, Hypertension, PUD, Meningitis, Osteoporosis, Parkinson's, PAD, Rheumatoid Arthritis, Sepsis, Sexual Dysfunction, Shingles, STD's, Vaccines. If you talk to anyone who's taken the BCPS exam, you'll quickly understand that the BCPS exam will likely be the most challenging exam you'll ever take. You need all the resources you can get to make sure you are prepared! In addition to the exam being very difficult, you are likely a busy professional with very minimal free time. I've always had a hard time staying focused while studying from large review article type study guides and have squandered hours reading while retaining very little. This book is intended to be a crash course/cheat sheet overview of the most highly testable material. I wanted to remember the really important stuff, because I know it is impossible to know every minute detail. BCPS Bullets, the Condensed BCPS Study Guide will help prepare you for the exam as well as help you maximize your study time. We covered over 100+ disease states straight from the BCPS content outline provided by BPS, and included important pearls for each condition including assessments, risk factors, most commonly used drugs of choice, must know adverse effects, miscellaneous clinical pearls, notorious drug interactions, warnings and precautions, and of course, relevant labs. I wanted to cover each disease state in 1-2 pages to try to ensure you are reviewing the most relevant content. We did go over 2 pages on some disease states, but we did our best to keep the information concise and critical for you to know in your preparation to becoming a Board Certified Pharmacotherapy Specialist. The book is over 300+ pages, but it is in bullet point format and very easy to digest multiple disease states at a sitting. There is also some white around the margins to take additional notes or highlight essential information to remember. As many of you are aware from the content outline, the BCPS exam is not all clinical. In addition to the disease states on the BCPS content outline, we've also included sections on biostatistics as well as important*

*regulatory issues. I can assure you that there is no doubt this book will help in your preparation to becoming a BCPS pharmacist! The Board Certified Pharmacotherapy Specialist (BCPS) is a designation from the Board of Pharmacy Specialties. The contents within this study guide are not affiliated or endorsed by the Board of Pharmacy Specialties.*
