Understanding Israel/Palestine **The Crisis and Renewal of U.S. Capitalism** **Transboundary Water Cooperation** **The Economic and Fiscal Consequences of Immigration** **Politics, Planning and Housing Supply in Australia, England and Hong Kong** Citizen-Centered Cities, Volume I *Case Studies of Clinical Preparation in Teacher Education* **TARGET IIFT 2017 (Past Papers 2005 - 2016) + 5 Mock Tests - 9th Edition** **Destined Statecraft** *Mobile Broadband*

Communications for Public Safety

In 1949, United Nations Constitutional Assistance (UNCA) was conceived to promote the Western liberal constitution. This was colonial trusteeship. However, in 1960, as a step towards decolonization, the United Nations General Assembly rejected internationalized constitution-making, and, by extension, UNCA. All colonies acquired the right to draft their own constitutions without any international assistance. Nonetheless, in the same year, UNCA was revived and since then it has helped over 40 developing sovereign states to adopt the Western liberal constitution, for the aims of building peace, preventing conflict, and promoting good governance in these independent states. This book scrutinizes UNCA and its off-shoot, UN/International Territorial Administration (ITA), including their historical origins and revival from 1960 to 2019. Sripathi argues that although the United Nations (UN) uses UNCA to help developing sovereign states secure debt relief, it undertakes UNCA to 'modernize' them with a view to 'strengthen' their supposedly weakened sovereignty. By doing so, the UN is seeking these states' adoption of a Western liberal-style constitution, thus violating their right to self-determination. The book shows how UNCA sires and guides UN (legislative) assistance in all state-sectors: security, judicial, electoral, commercial, parliamentary, public administration, and criminal. Irrespective of UNCA's benevolent motivations, such intrusive interventions impose the old forms of domination and perpetuate global inequality. Much has been written about the events surrounding the 2003 Anglo-American invasion of Iraq and its aftermath, especially about the intentions, principles, plans and course of action of US policy, but much less attention has been given to the consequences of US policy on Iraqi political and social development. This book provides an in-depth

analysis of the impact of US policy on the social and political development of Iraq in the twenty-first century. It shows how not just the institutions of the state were destroyed in 2003, leaving the way open for sectarianism, but also the country's cultural integrity, political coherence, and national-oriented economy. It outlines how Iraq has been economically impoverished, assessing the appalling situation which ordinary people, including women and children, have endured, not just as a result of the 2003 war, but also as a consequence of the 1991 war and the sanctions imposed in the following years. The book argues that the social, political, and cultural ruin that accompanied the Iraq war was an absolute catastrophe; that the policies which had such adverse effects were the foreseeable consequences of deliberate policy choices; and that those responsible continue to evade being made accountable. The definitive guide to organic coatings, thoroughly revised and updated—now with coverage of a range of topics not covered in previous editions *Organic Coatings: Science and Technology, Fourth Edition* offers unparalleled coverage of organic coatings technology and its many applications. Written by three leading industry experts (including a new, internationally-recognized coatings scientist) it presents a systematic survey of the field, revises and updates the material from the previous edition, and features new or additional treatment of such topics as superhydrophobic, ice-phobic, antimicrobial, and self-healing coatings; sustainability, artist paints, and exterior architectural primers. making it even more relevant and useful for scientists and engineers in the field, as well as for students in coatings courses. The book incorporates up-to-date coverage of recent developments in the field with detailed discussions of the principles underlying the technology and their applications in the development, production, and uses of organic coatings. All chapters in this new edition have been updated to assure consistency and to enable extensive cross-referencing. The material presented is also applicable to the related areas of printing inks and adhesives, as well as areas within the plastics industry. This new edition Completely revises outdated chapters to ensure consistency and to enable extensive cross-referencing Correlates the empirical technology

of coatings with the underlying science throughout Provides expert troubleshooting guidance for coatings scientists and technologists Features hundreds of illustrative figures and extensive references to the literature A new, internationally-recognized coatings scientist brings fresh perspective to the content. Providing a broad overview for beginners in the field of organic coatings and a handy reference for seasoned professionals, *Organic Coatings: Science and Technology, Fourth Edition*, gives you the information and answers you need, when you need them. Web technologies have become a vital element within educational, professional, and social settings as they have the potential to improve performance and productivity across organizations. *Artificial Intelligence Technologies and the Evolution of Web 3.0* brings together emergent research and best practices surrounding the effective usage of Web 3.0 technologies in a variety of environments. Featuring the latest technologies and applications across industries, this publication is a vital reference source for academics, researchers, students, and professionals who are interested in new ways to use intelligent web technologies within various settings. Petroleum engineers search through endless sources to understand oil and gas chemicals, identify root cause of the problems, and discover solutions while operations are becoming more unconventional and driving toward more sustainable practice. *Oil and Gas Chemistry Management Series* brings an all-inclusive suite of tools to cover all the sectors of oil and gas chemistry-related issues and chemical solutions from drilling and completion, to production, surface processing, and storage. The fourth reference in the series, *Surface Process, Transportation, and Storage* delivers the critical basics while also covering latest research developments and practical solutions. Organized by the type of challenges, this volume facilitates engineers to fully understand underlying theories, practical solutions, and keys for successful applications. Basics include produced fluids treating, foam control, pipeline drag reduction, and crude oil and natural gas storage, while more advanced topics cover CO₂ recovery, shipment, storage, and utilization. Supported by a list of contributing experts from both academia and industry, this volume brings a necessary reference to

bridge petroleum chemistry operations from theory into more cost-effective and sustainable practical applications. Offers full range of oil field chemistry issues and more environmentally friendly alternatives, including chapters focused on methods to treat produced water for recycle, reuse, and disposal Gain effective control on problems and mitigation strategies from industry list of experts and contributors Delivers both up to date research developments and practical applications, bridging between theory and practice Enhancing Firm Sustainability Through Governance presents a fresh perspective on corporate governance and how the relationship between governance mechanisms, processes and variables should be understood through a new unifying theory: the relational cor This volume investigates different aspects of monetary policy and prevention of financial crises. It discusses some recently suggested measures for central banks' responses to liquidity shortages and to the liquidity trap, methods for assessing the potential of crisis contagion via the interbank network, and the interaction between micro- and macro-prudential regulation. It compares different approaches for solving the Eurozone sovereign-debt problem and provides a new and intriguing explanation for rising income inequality. The authors are experts on monetary policy, financial crises, and contract theory from different European universities and central banks. With the increased use of technology in modern society, high volumes of multimedia information exists. It is important for businesses, organizations, and individuals to understand how to optimize this data and new methods are emerging for more efficient information management and retrieval. Information Retrieval and Management: Concepts, Methodologies, Tools, and Applications is an innovative reference source for the latest academic material in the field of information and communication technologies and explores how complex information systems interact with and affect one another. Highlighting a range of topics such as knowledge discovery, semantic web, and information resources management, this multi-volume book is ideally designed for researchers, developers, managers, strategic planners, and advanced-level students. Latest Solved Paper with Scheme of

Valuation-2022. Strictly as per the latest syllabus, blueprint & design of the question paper. All Typologies-Objective, VSA, SA & Essay Types Questions Previous Years' Exam(2011-2022) Questions with Scheme of Valuation NCERT Textbook Questions fully solved PUE Question Bank Fully solved Revision notes, Mind Maps & Concept videos for clarity of Concepts This book reveals how school memories offer not only a tool for accessing the school of the past, but also a key to understanding what people today know (or think they know) about the school of the past. It describes, in fact, how historians' work does not purely and simply consist in exploring school as it really was, but also in the complex process of defining the memory of school as one developed and revisited over time at both the individual and collective level. Further, it investigates the extent to which what people "know" reflects the reality or is in fact a product of stereotypes that are deeply rooted in common perceptions and thus exceedingly difficult to do away with. The book includes fifteen peer-reviewed contributions that were presented and discussed during the International Symposium "School Memories. New Trends in Historical Research into Education: Heuristic Perspectives and Methodological Issues" (Seville, 22-23 September, 2015). Welfare-to-work or activation policies refer to programmes aimed at promoting the employability, labour-market and social participation of benefit recipients of working age. Frontline workers delivering these policies are conceived of as policy implementers, as policy makers, and as actors mediating politics in an arena where conflicting interests are at stake. Frontline work plays a crucial role in determining what welfare-to-work practically means and how it affects the lives of the people it targets. Yet few books have deliberately focused on comparing what happens when frontline workers, some of whom are professional social workers, meet clients. Pioneering the provision of scholarly reflections on both theoretical and policy relevance of studying frontline practices of delivering activation, internationally renowned researchers present the first comparative analysis of how activation policies are actually delivered by frontline staff in selected EU countries and in the United States. In trying to understand and interpret frontline practices in activation, each

contribution provides insights into what 'activation in practice' looks like, what services are provided and how they are enacted. This involves examining processes of client selection, monitoring, sanctioning and motivating, as well as the role of external service providers. This book is an important acquisition for scholars and researchers of social policy, public administration, public management, social work and policy implementation. This book traces the development of the political institutions, electoral systems, parties, civil society, economic and social policies and foreign affairs of the three Baltic states of Estonia, Latvia and Lithuania over the last quarter century. The Israeli-Palestinian conflict is the longest, ongoing hot-and-cold war of the 20th and 21st centuries. It has produced more refugees than any current conflict, generating fully one quarter of all refugees worldwide. Everyone knows that the Palestinian-Israeli conflict is important itself, and is also fueling tensions throughout the Middle East. Yet most people shy away from this conflict, claiming it is "just too complicated" to understand. This book is written for people who want a point of entry into the conversation. It offers both a historic and analytic framework. Readers, whether acting as students, parishioners, neighbors, voters, or dinner guests will find in these pages an analysis of the most commonly heard Israeli positions, and a succinct account of the Palestinian voices we seldom hear. I argue that human rights standards have never been used as the basis on which the Israeli-Palestinian conflict should be resolved and that only these standards can produce a just and sustainable resolution. This book will be useful for classes in Middle East studies, peace and conflict studies, Middle East history, sociology of race, and political science. It can be helpful for church groups, labor groups, or other grass roots organizations committed to social justice, and for all readers who wish to be informed about this important topic. "Professor Spangler's ... quest for historical and political understanding takes us on a brave and intimate journey into the consequences of Jewish privilege and Jewish victimhood, the agendas of imperial superpowers, and the Palestinian struggle for self-determination." Alice Rothchild, MD, author of *Broken Promises, Broken Dreams: Stories of Jewish and Palestinian Trauma and*

Resilience, and producer and director of documentary film, *Voices Across the Divide* "[A] sharp, poignant, well-documented dossier [that] provides readers with all the most-needed facts to grasp the conflict and get involved." - Sam Bahour, co-editor of *Homeland: Oral Histories of Palestine and Palestinians* and business development consultant and activist based in Palestine "[T]his one is exceptional! It recounts a historical tale; it provides theoretical underpinnings; it does comparative work; it examines all the details and aspects of ongoing debates; and it brings all to life with real-life stories ... the wonder of this book is its insistence on hope - not a naïve, idealistic hope, but one accompanied by a tool-box for concrete action that might right the wrongs of this tragic tale." Anat Biletzki, Professor of Philosophy, Tel Aviv University and Albert Schweitzer Professor of Philosophy, Quinnipiac University; Chairperson of B'Tselem, 2001-2006 Eve Spangler is a sociologist and a human and civil rights activist. For the last decade, her work has focused on the Israel/Palestine conflict; she argues that human rights are the neglected standards that could lead to a just and sustainable solution. *The Economic and Fiscal Consequences of Immigration* finds that the long-term impact of immigration on the wages and employment of native-born workers overall is very small, and that any negative impacts are most likely to be found for prior immigrants or native-born high school dropouts. First-generation immigrants are more costly to governments than are the native-born, but the second generation are among the strongest fiscal and economic contributors in the U.S. This report concludes that immigration has an overall positive impact on long-run economic growth in the U.S. More than 40 million people living in the United States were born in other countries, and almost an equal number have at least one foreign-born parent. Together, the first generation (foreign-born) and second generation (children of the foreign-born) comprise almost one in four Americans. It comes as little surprise, then, that many U.S. residents view immigration as a major policy issue facing the nation. Not only does immigration affect the environment in which everyone lives, learns, and works, but it also interacts with nearly every policy area of concern, from jobs and the economy, education, and health

care, to federal, state, and local government budgets. The changing patterns of immigration and the evolving consequences for American society, institutions, and the economy continue to fuel public policy debate that plays out at the national, state, and local levels. The Economic and Fiscal Consequences of Immigration assesses the impact of dynamic immigration processes on economic and fiscal outcomes for the United States, a major destination of world population movements. This report will be a fundamental resource for policy makers and law makers at the federal, state, and local levels but extends to the general public, nongovernmental organizations, the business community, educational institutions, and the research community. In recent years many nations have asked why not enough housing is being built or, when it is built, why it isn't of the highest quality or in the best, most sustainable, locations. Politics, Planning and Housing Supply in Australia, England and Hong Kong examines the politics and planning of new homes in three very different settings, but with shared political traditions: in Australia, in England and in Hong Kong. It investigates the power-relationships and politics that underpin the allocation of land for large-scale residential schemes and the processes and politics that lead to particular development outcomes. Using a comparative framework, it asks: how different systems of urban governance and planning mediate the supply of land for housing; whether and how these system differences influence the location, quantity and price of residential land and the implications for housing outcomes; what can be learned from these different systems for allocating land, building consensus between different stakeholders, and delivering a steady supply of high quality and well located homes accessible to, and appropriate for, diverse housing needs. This book frames each case study in a comprehensive examination of national and territorial frameworks before dissecting key local cases. These local cases - urban renewal and greenfield growth centres in Australia, new towns and strategic sites in England, and major development schemes in Hong Kong - explore how broader urban planning and housing policy goals play out at the local level. While the book highlights a number of potential strategies for improving planning

and housing delivery processes, the real challenge is to give voice to a broader array of interests, reconstituting the political process surrounding planning and housing development to prioritise homes in well-planned places for the many, rather than simply facilitating investment opportunities for the few. Despite the reversal of America's fortune from the triumphalism of the Roaring Nineties to the gloom of the lost decade and the Great Depression, theoretical conceptions of US capitalism have remained surprisingly unchanged. In fact, if the crisis questioned the sustainability of the US capitalist paradigm, it did not fundamentally challenge academic theorization of American political economy. This book departs from the American political economy literature to identify three common myths that have shaped our conceptualization of US capitalism: its reduction to a state-market dyad dis-embedded from societal factors; the illusion of a weak state and the synchronic conception of the US variety of capitalism. To remedy these pitfalls, the authors propose a civilizational approach to American political economy at the crossroads between cultural studies, history, sociology and political science. Drawing together contributions from a rich variety of fields (from geography to cultural studies, political science and sociology) this work sheds a new light on America's "cultural political economy" combining theoretical reflection with empirical data and offering innovative perspectives on the crisis and renewal of American capitalism. Discover current uses and future development of stress tests, the most innovative regulatory tool to prevent and fight financial crises. The economic outlook for Latin America and the Caribbean remains very challenging. Regional growth is projected to decline for a fifth consecutive year in 2015, dipping below 1 percent. Weakness is concentrated among South America's commodity exporters, where falling global commodity prices have compounded country-specific challenges. Meanwhile, growth is projected to be steady or stronger for most of the Caribbean, Central America, and Mexico, supported by lower oil bills for importers and robust economic recovery in the United States. The analysis in this report examines core challenges facing the region: the impact of lower commodity prices on fiscal and external positions,

the drivers of the slowdown in investment, and the role of economic diversification for longer-term growth prospects. TARGET IIFT 2018 - Past (2005 - 2017) + 5 Mock Tests contains the detailed solutions of IIFT Question Papers from 2005 to 2017. The book also contains 5 Mock tests designed exactly as per the latest pattern of IIFT. The book also contains a General Awareness Question Bank containing 100+ MCQ's involving current issues similar to the ones asked in the actual exam. This book provides a timely and comprehensive overview of the introduction of LTE technology for PPDR communications. It describes the operational scenarios and emerging multimedia and data-centric applications in demand and discusses the main techno-economic drivers that are believed to be pivotal for an efficient and cost-effective delivery of mobile broadband PPDR communications. The capabilities and features of the LTE standard for improved support of mission-critical communications (e.g., proximity services, group communications) are covered in detail. Also, different network implementation options to deliver mobile broadband PPDR communications services over dedicated or commercial LTE-based networks are discussed, including the applicability of the Mobile Virtual Network Operator (MVNO) model and other hybrid models. Radio spectrum matters are also discussed in depth, outlining spectrum needs and providing an outlook into allocated and candidate spectrum bands for PPDR communications and suitable dynamic spectrum sharing solutions in PPDR communications. Explanations are accompanied by a vast collection of references that allow the more intrigued reader to gain further insight into the addressed topics. This book offers an integrated perspective of materiality from the different angles of accounting, auditing, internal controls, management commentary, financial analysis, management control, forensic analysis, sustainability reporting, corporate responsibility, assurance standards, integrated reporting, and limited legal considerations. unknown The success of counterterrorism finance strategies in reducing terrorist access to official currencies has raised concerns that terrorist organizations might increase their use of such digital cryptocurrencies as Bitcoin to support their activities. RAND researchers thus consider the

needs of terrorist groups and the advantages and disadvantages of the cryptocurrency technologies available to them. TARGET IIFT 2017 - Past (2005 - 2016) + 5 Mock Tests contains the detailed solutions of IIFT Question Papers from 2005 to 2016. The book also contains 5 Mock tests designed exactly as per the latest pattern of IIFT. The book also contains a General Awareness Question Bank containing 100+ MCQ's involving current issues similar to the ones asked in the actual exam. This practical and didactic text/reference discusses the leading edge of secure cloud computing, exploring the essential concepts and principles, tools, techniques and deployment models in this field. Enlightening perspectives are presented by an international collection of pre-eminent authorities in cloud security assurance from both academia and industry. Topics and features: · Describes the important general concepts and principles of security assurance in cloud-based environments · Presents applications and approaches to cloud security that illustrate the current state of the art · Reviews pertinent issues in relation to challenges that prevent organizations moving to cloud architectures · Provides relevant theoretical frameworks and the latest empirical research findings · Discusses real-world vulnerabilities of cloud-based software in order to address the challenges of securing distributed software · Highlights the practicalities of cloud security, and how applications can assure and comply with legislation · Includes review questions at the end of each chapter This Guide to Security Assurance for Cloud Computing will be of great benefit to a broad audience covering enterprise architects, business analysts and leaders, IT infrastructure managers, cloud security engineers and consultants, and application developers involved in system design and implementation. The work is also suitable as a textbook for university instructors, with the outline for a possible course structure suggested in the preface. The editors are all members of the Computing and Mathematics Department at the University of Derby, UK, where Dr. Shao Ying Zhu serves as a Senior Lecturer in Computing, Dr. Richard Hill as a Professor and Head of the Computing and Mathematics Department, and Dr. Marcello Trovati as a Senior Lecturer in Mathematics. The other publications of the editors include the Springer

titles *Big-Data Analytics and Cloud Computing*, *Guide to Cloud Computing* and *Cloud Computing for Enterprise Architectures*. The perseveration of our natural environment has become a critical objective of environmental scientists, business owners, and citizens alike. Because we depend on natural resources to survive, uncovering methods for preserving and maintaining these resources has become a focal point to ensure a high quality of life for future generations. *Natural Resources Management: Concepts, Methodologies, Tools, and Applications* emphasizes the importance of land, soil, water, foliage, and wildlife conservation efforts and management. Focusing on sustainability solutions and methods for preserving the natural environment, this critical multi-volume research work is a comprehensive resource for environmental conservationists, policymakers, researchers, and graduate-level students interested in identifying key research in the field of natural resource preservation and management. 'Destined Statecraft enriches our understanding of global affairs by presenting a perspective where small powers are no longer in the periphery, but take up the main narrative. This standpoint is all the more valuable in an age where the proactive decision-making of small powers often goes unobserved. Professor Wong's *Destined Statecraft* offers a fresh lens for discerning world issues, helping to extend the reader's vision beyond the exterior towards a greater perception of the world we live in.' —Mr Sungnam Lim, Vice-Minister of Ministry of Foreign Affairs, Republic of Korea This book considers the post-2010 strategic shifts in the Anglo-American geopolitical approach to Asia as a pivotal new strategy in the U.S. geo-strategic containment plan, which has been reformed to rebalance the rise of China and the Eurasian heartland in the course of the two decades since the disintegration of the Soviet Union in the early 1990s. At this critical global-historical juncture, the People's Republic of China has also devised a new counter-containment endeavor - the 'One Belt One Road' initiative, which aims to re-connect it with all the countries on the Eurasian landmass, forming a single community. Against this backdrop of the intensifying geopolitical and geo-economic competition between the U.S. and China, this book calls for the revival and reinvigoration of

selected Eurasian small powers' embedded geopolitical, political-economic and strategic-cultural structures. Drawing on Pierre Bourdieu's notion of habitus, the book argues that these self-changing and unceasingly structuring structures do not only constrain and limit, but also enable and galvanize small powers' strategists and policy-makers to proactively generate creative means-and-ends calculations, conduct prudent security assessments, and devise measured and responsive strategic deployments. In this context, the book proposes that the small powers return to their own religious, cultural and intellectual roots. It also argues for the need to rediscover their own strategic cultures as an essential means of re-inventing and implementing their own unique models of national development. As a substantial contribution to the subfields of small power politics and strategic cultures in international relations, the book marks a paradigm shift in both theory and practice. Exploring historical case studies from such diverse African, Asian and European powers as the Philippines, Liberia, Myanmar, India, Nepal, Sri Lanka, Bangladesh, Pakistan, Thailand, Germany, Japan, Indonesia, Russia, the European Union, Ukraine, Poland and the United Kingdom as well as China, the book presents engaging dialogues with a wealth of classical and contemporary Western and non-Western strategic thinkers, including: Thucydides, Sun Tzu, Halford Mackinder, Kautilya, King Solomon, Li Zongwu, King Bhumibol Adulyadej, Karl Haushofer, Carl Schmitt and the Malayo-Polynesian datu, as well as John Mearsheimer. In light of the post-2017 U.S. 'America First' foreign policy agenda, this book represents an essential guide for small powers' strategists, foreign policy-makers, security practitioners and national development planners - introducing them to a broader spectrum of strategic options that will help them not just survive, but thrive in the constantly shifting geopolitical currents of our time. What do cities tell us about power? How does power shape cities? These are the main questions answered by a multidisciplinary set of eminent urban scholar in crisp articles on capital cities from around the world, from Buenos Aires to Tokyo, from Jakarta to Moscow. Focus is on contemporary cities and their manifestations and representations of power, though often with a

historical grounding, and the collection also includes an example of archaeological urban analysis, from northern Mesopotamia. Through its variety of approaches by leading scholars of the field, and its variety of cities with their different histories and their diverse national contexts and political organization the book gives a uniquely insightful and easily accessible world overview of cities of power. This book was published as a special issue of the International Journal of Urban Sciences. From media history to today's rapid-fire changes, *MEDIA/IMPACT: AN INTRODUCTION TO MASS MEDIA*, 12th Edition takes you on a tour of the events, people, money, and technologies that have shaped the mass media industries. Known for its engaging writing style, currency, and visual appeal, the book thoroughly explores how today's mass media are converging as well as provides comprehensive coverage of the legal, ethical, social, and global issues facing the mass media industries every day. The twelfth edition focuses on convergence--how the mass media industries are intersecting to deliver content and how audiences are adapting to the new mass media marketplace. It also gives readers an insider's look at what it's like to work in each industry. In addition, it offers new coverage of digital delivery, net neutrality, media industry consolidation, social media, mobile media, and more. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version. Modern cities are increasingly involving citizens in decisions that affect them. This trend is a part of a movement toward a new standard of city management and planning—falling under the names public involvement, public engagement, collaborative governance, civic renewal, participatory democracy, and citizen-centered change. City administrators have long focused on attaining excellence in their technical domains; they are now expected to achieve an equal standard of excellence in public involvement. Toward this end, *Citizen-Centered Cities* provides a body of experience about public involvement that would take years for municipal administrators to accumulate on the job. The opening chapter summarizes nine challenges for public involvement, together with over sixty aspirational recommendations. Subsequent chapters provide

detailed case studies illustrating these challenges for a range of projects—a new bridge, a light rail line, a highway interchange, neighborhood street modifications, urban streetscaping, bicycle routes, movement of freight, and a transportation master plan. The close government-academic cooperation required to carry out this project builds on an innovative partnership between the City of Edmonton and the University of Alberta called the Center for Public Involvement. This book uses surveys to bridge the gap between studies into European economics and policymaking in Europe. It is also available as open access. Most people in most countries have been steadily better in human development. Advances in technology and incomes hold ever-greater for longer, healthier, more secure lives. This innovative reference examines how consumer health informatics (CHI) can transform healthcare systems stressed by staffing shortages and budget constraints and challenged by patients taking a more active role in their care. It situates CHI as vital to upgrading healthcare service delivery, detailing the relationship between health information technologies and quality healthcare, and outlining what stakeholders need to learn for health IT systems to function effectively. Wide-ranging content identifies critical issues and answers key questions at the consumer, practitioner, administration, and staff levels, using examples from diverse conditions, countries, technologies, and specialties. In this framework, the benefits of CHI are seen across service domains, from individual patients and consumers to healthcare systems and global health entities. Included in the coverage: Use of video technology in an aged care environment A context-aware remote health monitoring service for improved patient care Accessibility issues in interoperable sharing of electronic health records: physician's perspective Managing gestational diabetes with mobile web-based reporting of glucose readings An organizing vision perspective for developing and adopting e-health solutions An ontology of consumer health informatics Contemporary Consumer Health Informatics combines blueprint and idea book for public health and health informatics students, healthcare professionals, physicians, medical administrators, managers, and IT practitioners. China and its

neighbours face a series of water security issues, in which international law plays a vital role. Paramount to both policymakers and researchers in the field of water law, the current status of transboundary water cooperation schemes and how these operate in China is of global significance. Grounded in international experience, this comprehensive volume provides readers with an up-to-date overview of current international transboundary water resource sharing policies and practices, including detailed case studies at both domestic and international levels. The authors discuss existing international laws, treaties, and principles that may stimulate transboundary water cooperation and dialogue, and then analyse a number of international experiences with treaties in North America, Eastern Europe, and Central Asia. They take stock of China's water resource issues, legal practices and options, examine case studies of China's southern shared rivers, and explore some innovative approaches to cooperative management of shared waters within China. The articles in this book were originally published in the journal *Water International*. It is often assumed that shareholders have rights, not duties. In recent years, however, this assumption has come under intense scrutiny in all aspects of company law and capital market law - legislation, the courts, soft law, and scholarship - and, in Europe especially, major changes are under way across a diverse spectrum all the way from revised contractual arrangements to mandatory statutory provisions. Such a shift has important implications for the fundamentals of European company law, and there is a need to examine shareholders' duties and to consider where this trend is taking shareholders and their stance in law. This focused collection of essays by twenty notable scholars addresses this complex subject from a highly informative and useful variety of perspectives. Examining shareholders' duties along three axes - types of investee companies, types of shareholders, and types of business situations - the essays deal with such topics and issues as the following: - shareholders' duties as reflections of the interests they are intended to safeguard; - shareholders' duties to society; - shareholders' disclosure obligations; - duties of parent companies; - institutional investor's

fiduciary duty; - how regulatory duties constrain value-reducing forms of opportunism; - the state's continuing duties in the transformation of state-owned companies; - significant shareholders' duties in transactions with the company; and - powerful shareholders' duty not to abuse right. Examining the implications of this shift in discourse - how shareholders' duties are coming to the fore under the impetus of legislation, legal doctrine, case law, and enforcement strategies - as well as its ideological underpinnings, this book offers a comprehensive and in-depth consideration of this rapidly developing field. It will prove of inestimable value not only to policymakers and academics, but also to investors and practitioners committed to creating conditions favourable to sustainable economic growth and responsible business behaviour. This book constitutes the thoroughly refereed post-conference proceedings of the Third International Symposium on Combinatorial Optimization, ISCO 2014, held in Lisbon, Portugal, in March 2014. The 37 revised full papers presented together with 64 short papers were carefully reviewed and selected from 97 submissions. They present original research on all aspects of combinatorial optimization, such as algorithms and complexity; mathematical programming; operations research; stochastic optimization; graphs and combinatorics. This book responds to calls for change in teacher education. "Black," "African," "African descendant" and "of African heritage," are just some of the ways Africans and Africans in the diaspora (both old and new) describe themselves. This volume examines concepts of race, ethnicity, and identity as they are ascribed to people of colour around the world, examining different case studies of how the process of identity formation occurred and is changing. Contributors to this volume, selected from a wide range of academic and cultural backgrounds, explore issues that encourage a deeper understanding of race, ethnicity and identity. As our notions about what it means to be black or of African heritage change as a result of globalization, it is important to reassess how these issues are currently developing, and the origins from which these issues developed. *Global Africans* is an important and insightful book, useful to a wide range of students and scholars, particularly of African studies, sociology, diaspora

studies, and race and ethnic studies. This monograph explores the historical position of pensions law in the UK and the recent influences which have led to the introduction of Auto-Enrolment and subsequent reforms. Alternative models, such as the US and Australia, are also considered as well as the function of law in bringing about political changes. The question of saving for retirement is of national and international importance and many governments are wrestling with the issue of how to deal with the pension funding crisis. Consequently political policy has, in many cases, combined with behavioural science to inform new laws which have acted to shift the burden from the state into the private sector. Around the world responsibility is being moved onto individuals and employers as the state retreats from provision of state support in retirement; this book offers a sophisticated analysis of the role of legal intervention to facilitate this shift. The book explores the work of behavioural economics, its global influence on understanding financial decision-making and its application to legislation which seeks to influence consumer outcomes. Drawing on qualitative empirical research to explore the experience of implementation of Auto-Enrolment, this timely work considers the interaction with the work of behavioural science to highlight the social costs of the new regulatory regime. Intermediate First Year MATHS I A Test papers Issued by Board of Intermediate Education w.e.f 2013-2014.
