The Treasury of Precious Instructions by Jamgön Kongtrul Lodrö Taye, one of Tibet's greatest Buddhist masters, is a shining jewel of Tibetan literature, presenting essential teachings from the entire spectrum of practice lineages that existed in Tibet. Volumes in this series may be engaged as practice manuals while also preserving ancient teachings significant to the literature and history of world religions. Heruka, and other Indian masters, or mahasiddhas, and passes through Gayadhara and his Tibetan disciple Drokmi Lotsawa Sakya Yeshe (992–1072). The practice tradition centers around the teaching and transmission of the Hevajra Tantra and its subsidiary texts. In three parts, this volume includes, respectively: the root text, commentary, and outlines for the Indian mahasiddha Virupa's core text, the Vajra Verses; the liturgies for empowerment and offering rituals specific to a Hevajra Tantra practice lineage; and instructional manuals for practice.

The Root Canal Biofilm Oct 04 2021 This book presents the current state of research on the basic scientific aspects of root canal biofilm biology within a clinically applicable context. Root canal biofilms are complex polymicrobial structures adhering to the root canal surface that are formed by microorganisms invading the pulpal space of teeth, and are associated with persistent root canal infections. Concerted efforts to study root canal biofilms have been made in the past decade, resulting in the publication of observational and experimental studies that detail the morphology and biology of

these structures in infected root canals. In addition to confirming that bacteria in root canals do not exist in free-floating planktonic states as previously assumed, this new information on root canal biofilm infections has provided an opportunity to re-evaluate conventional clinical protocols and improve endodontic therapeutic measures.
