Human Computer Interaction (HCI) is concerned with every aspect of the relationship between computers and people (individuals, groups and societies). The annual meeting of the British Computer Society's HCI group is recognized as one of the main venues for discussing recent trends and issues. This volume contains refereed papers and reports from the 1995 meeting. The materials cover a range of HCI related topics, including visualization, computer supported communication, task analysis, formal methods, user support and cyberspace. The documents consider both research and commercial perspectives, making the book essential for researchers, designers and manufacturers who need to keep abreast of developments in HCI.
