The Praetorian STARShip : the untold story of the Combat Talon Aug 04 2021 Jerry Thigpen's study on the history of the Combat Talon is the first effort to tell the story of this wonderfully capable machine. This weapons system has performed virtually every imaginable tactical event in the spectrum of conflict and by any measure is the most versatile C-130 derivative ever produced. First modified and sent to Southeast Asia (SEA) in 1966 to replace theater unconventional warfare (UW) assets that were limited in both lift capability and speed the Talon I quickly adapted to theater UW tasking including infiltration and resupply and psychological warfare operations into North Vietnam. After spending four years in SEA and maturing into a highly respected UW weapons system the Joint Chief of Staff (JCS) chose the Combat Talon to lead the night low-level raid on the North Vietnamese prison camp at Son Tay. Despite the outcome of the operation the Talon I cemented its reputation as the weapons system of choice for long-range clandestine operations. In the period following the Vietnam War United States Air Force (USAF) special operations gradually lost its political and financial support which was graphically demonstrated in the failed Desert One mission into Iran. Thanks to congressional supporters like Earl Hutto of Florida and Dan Daniel of Virginia funds for aircraft upgrades and military construction projects materialized to meet the ever-increasing threat to our nation. Under the leadership of such committed hard-driven officers as Brenci Uttaro Ferkes Meller

and Thigpen the crew force became the most disciplined in our Air Force. It was capable of penetrating hostile airspace at night in a low-level mountainous environment covertly to execute any number of unconventional warfare missions.

Nine Lives in the Air Dec 16 2019 My inspiration for the name of this memoir is derived from the superstitious wives tale about cats having nine lives. The notion of that myth, while the origin is unknown to me, seemed to be a fitting title line. In the course of a 26 year career as an Air Force Pilot, there were the usual sorts of in-flight emergencies and associated difficulties. Yet there were still other life or death situations wherein it seemed things were entirely out of my control; it was if I was merely along for the ride as a spectator. Those events constitute the eight very distinct occasions wherein, but for the Grace of God and Divine Intervention, I believe it is most doubtful that I would still be around to author the memoirs embodied in this autobiography.

Buying the Big Jets Mar 19 2020 Selecting the right aircraft for an airline operation is a vastly complex process, involving a multitude of skills and considerable knowledge of the business. *Buying The Big Jets* was first published in 2001 to provide guidance to those involved in aircraft selection strategies. This Second Edition brings the picture fully up to date, incorporating new discussion on the

strategies of low-cost carriers, and the significance of the aircraft cabin for long-haul operations. Latest developments in aircraft products are covered and there are fresh examples of best practice in airline fleet planning techniques. The book is essential reading for airline planners with fleet planning responsibility, consultancy groups, analysts studying aircraft performance and economics, airline operational personnel, students of air transport, leasing companies, aircraft value appraisers, and all who manage commercial aircraft acquisition programmes and provide strategic advice to decision-makers. This book is also a valuable tool for the banking community where insights into aircraft acquisition decisions are vital. *Buying The Big Jets* is an industry-specific example of strategic planning and is therefore a vital text for students engaged in graduate or post-graduate studies either in aeronautics or business administration.

Sand and Fire May 01 2021 From Tom Young, author of *The Warriors* and *The Renegades*, comes an explosive new novel of the war on terror. North Africa. A jihadist leader has seized a supply of sarin gas left over from the Gaddafi regime and is wreaking havoc on an escalating scale. Gunnery Sergeant

A. E. Blount—a Marine and the grandson of one of the first black Marines—sets out with his strike team to kill or capture the terrorist leader. Instead, they flew into a trap. Many of the team are killed, the rest captured, and the leader threatens that he will execute one prisoner a day until U.S forces withdraw. Sophia Gold and Lieutenant Colonel Michael Parson, Blount’s friends and colleagues, rush to Libya to help coordinate rescue efforts. But the ordeal has only just begun. Soon, they will all be fighting for their lives in the sand and fire of the desert.

The Speed of Heat Jul 23 2020 With its fleet of large transport aircraft, the United States military can put personnel and equipment anywhere on the globe within hours. In the Iraq and Afghanistan wars in particular, virtually every soldier, every bullet, every pint of blood, and every bite of food have arrived in the war zone by airlift. This book tells the story of one Air National Guard airlift wing as related by its members. The 167th Airlift Wing of the West Virginia Air National Guard consisted of a squadron of 12 C-130 cargo planes, their crews, and all the supporting sections—in all, more than 1,200 people. The author, a former Associated Press reporter turned aviator, flew as an active member of that unit and interviewed nearly 70 servicemen and women for this book. They include aircrews who dodged heat-seeking missiles, mechanics who made combat repairs, flight nurses who treated and transported the wounded, even two motor pool truck drivers struck by a roadside bomb.

C-130BL Category I Performance Test and Qualitative Stability and Control Evaluation Jun 14 2022 The C-1430BL ski-wheel aircraft is a medium range cargo, troop, or air evacuation transport

manufactured by the Georgia Division of the Lockheed Aircraft Corporation for the U.S. Navy. The aircraft is designed to operate on skis from snow and ice surfaces as well as from concrete runways. The ski-wheel combination consists of two main skis and one nose ski attached to the normal landing gear. The performance of the ski-equipped C-130BL is lower than that of the C-130B. Take-off and landing distances (on concrete runways) have been increased 100 to 200 feet and 450 to 750 feet, respectively. The climb performance of the C-130Bl is less than that of the C-130B and is closed to that estimated by the contractor in the C-130BL Substantiating Data Report. The stability and control characteristics in general appear identical to those of the C-130B. There are no noticeable destabilizing effects resulting ffrom the ski installation.

Aeromedical Evacuation Sep 05 2021 The definitive treatment on the medical evacuation and management of injured patients in both peace- and wartime. Edited by eminent experts in the field, this text brings together medical specialists from all four branches of the armed services. It discusses the history of aeromedical evacuation, triage and staging of the injured patient, evacuation from site of injury to medical facility, air-frame capabilities, medical capabilities in-flight, response to in-flight emergencies, and mass emergency evacuation. Specific medical conditions are addressed in detail, including such general surgical casualties as abdominal wounds and soft tissue, vascular, maxillofacial, head and spinal cord injuries, ophthalmologic, orthopaedic, pediatric, obstetric-gynecologic casualties, burns, and more. Over 80 illustrations provide a review of transport equipment

and both medical and surgical treatment. A must-have reference for all armed forces physicians and flight surgeons, for general and trauma surgeons, internists, intensive care specialists, orthopaedic surgeons, and public health service physicians.

Take Charge and Move Out: The Founding Fathers of TACAMO Nov 19 2022 The birth of the US Navy's "Take Charge and Move Out" (TACAMO) mission which provides essential airborne communications to the US nuclear deterrence forces. The US Navy's "Take Charge and Move Out" (TACAMO) mission provides essential airborne communications to the US nuclear deterrence forces. Today it is a thriving community, respected by the Navy and the US strategic defense forces. But it wasn't always so. Despite the enormous importance of the mission, for the first decade of their existence, the TACAMO squadrons did not provide a viable career path for officers, instead being a "one and done" tour for the junior officers who found themselves unluckily so assigned. A second tour in the squadrons was considered to be professional suicide. But in 1975, inspired by a significant commanding officer, a handful of lieutenants put their faith in a community that did not yet exist, betting their careers on that second tour. From their faith and courage was born the TACAMO community. This is the story of the birth of TACAMO, in the words of those who built the community from scratch.
