Modifying the Aerodynamics of Your Road Car Dec 14 2019 This unique handbook assumes no starting knowledge of vehicle aerodynamics. It begins with simple ideas and finishes with sophisticated and effective aerodynamic modifications that work. Three major chapters cover on-road testing techniques that give you all the information you need to decide what modifications you should make – and, after you've made them, how well they work. Low-cost techniques allow you to visualise the patterns of airflow over your car so that you can actually see the problem areas that need improvement. Uniquely, you're also shown how to measure aerodynamic pressures, so you can determine which body surfaces are creating lift, drag and downforce. Want to work out where a wing should be placed? On-road testing to find that out is covered as well. The book also shows you how to measure downforce to see if that wing is actually working! If you wish to reduce drag, more than ten different areas are covered. Reducing frontal area, lowering cooling system drag, optimising vehicle ride height and rake, reducing the strength of the wake, achieving clean airflow separation and optimising wheel designs – they're all covered using the latest research findings. And if you're a performance driver, there's a major chapter devoted to reducing lift and improving stability. This chapter includes the design and development of undertrays and diffusers, wings and spoilers. The example car developed measurable downforce when fitted with an undertray and rear diffuser, something that transformed its on-road handling. The author has been writing about the aerodynamics of road cars for more than 25 years. He is also an experienced and proficient car modifier who has performed numerous aerodynamic modifications and upgrades to his own cars. The book's technical consultant, RH Barnard, is an acknowledged world leading automotive aerodynamicist. If you want a practical, hands-on guide that demystifies and explains car aerodynamics, and shows you how to make effective aerodynamic modifications to your car, this book is for you.

Daily Fresh Jun 19 2020 In the summer of 2020, the final summer of his life, Jory Post gave himself an assignment: He would write one essay a day, inspired by whatever caught his eye and imagination. The seventy essays that emerged — personal and idiosyncratic, contemplative and fierce — range in subject from the writing life, extinct birds, and the origins of words to the "three 'C's" (cancer, chemo, and Covid) and his love for his wife and friends. As he faced his last days, Jory Post measured the world around him and threw the full reach of his emotions and literary skills into these pages.

Heart versus Head Feb 14 2020 Challenging traditional accounts of the development of American private law, Peter Karsten offers an important new perspective on the making of the rules of common law and equity in nineteenth-century courts. The central story of that era, he finds, was a struggle between a jurisprudence of the head, which adhered strongly to English precedent, and a jurisprudence of the heart, a humane concern for the rights of parties rendered weak by inequitable rules and a willingness to create exceptions or altogether new rules on their behalf. Karsten first documents the tendency of jurists, particularly those in the Northeast, to resist arguments to alter rules of property, contract, and tort law. He then contrasts this tendency with a number of judicial innovations--among them the sanctioning of 'deep pocket' jury awards and the creation of the attractive-nuisance rule--designed to protect society's weaker members. In tracing the emergence of a pro-plaintiff, humanitarian jurisprudence of the heart, Karsten necessarily addresses the shortcomings of the reigning, economic-oriented paradigm regarding judicial rulemaking in nineteenth-century America. Lemon-Aid New Cars and Trucks 2013 Aug 02 2021 Canada's automotive "Dr. Phil" says there's never been a better time to buy a new car or truck. For deals on wheels, 2013 will be a "perfect storm." There's never been a better time to buy a new car or truck, thanks to a stronger Canadian dollar, a worldwide recession driving prices downward, and a more competitive Japanese auto industry that's still reeling from a series of natural disasters. In addition to lower prices and more choices, 2013 car buyers will see more generous cash rebates, low financing rates, bargain leases, and free auto maintenance programs. Buy, sell, or hold? Which cars and trucks are "wallet-friendly" and can easily last 15 years? Which vehicles offer the most features to best accommodate senior drivers? Do ethanol and hybrid fuel-saving claims have more in common with Harry Potter than the Society of Automotive Engineers? Is GM's 2013 Volt electric car destined to become an electric Edsel?
